The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair now lays before the Senate the unfinished business, the question being on adoption of the amendment by the Senator from New Hampshire. The Chair advises that debate on this amendment is limited to 2 hours, the time to be evenly divided.

Mr. JAVITS. Mr. President, I yield 10 minutes to the Senator from Illinois (Mr. PERCY).

Mr. PERCY. Mr. President, I was extremely sorry that physically I was not able to be here last night, but I carefully read the RECORD this morning, and if I heretofore had high regard, as I have had, for the distinguished senior Senator from New York (Mr. JAVITS), it was enhanced even further last night. I could not help but think of the comments I had made before 2,000 members of the National Foreign Trade Convention earlier this month in New York, many of them residents of New York City. In that speech I had described the senior Senator from New York, who is termed a liberal, as one of the great believers in the free enterprise system in America and a man who understood the whole basic principles of capitalism better than almost any man I know in the U.S. Senate.

I do not know what a "conservative" is or what a "liberal" is when a "liberal" is fighting to protect the whole essence of our economy and when "conservatives" are asking for protections against the workings of the free market and to disrupt and wreck the free market, using all the restrictive devices we can think of.

As I read the debate that was carried on last night in this Chamber, I could not help but think of the same arguments that are used to protect and impede the flow of goods coming into this country from abroad. Such import restrictions would impede the flow of goods exported from this country because exports are directly related to imports from any particular country.

I could not help but think that the same arguments could be used when we have a textile industry that has moved from New England to the South. Why not then ask for protection against the disruption of an industry in one part of the country when economic forces are causing it to move to another part of the country? Is not that the same kind of argument that could be used?

Also, if we are going to go to that extent, we could just as well protect one industry in one area from disruption because of technical innovations that have been made. We might as well say that if a man is engaged in the manufacture of ice boxes and someone comes along with a refrigerator, we had better protect the workers making those ice boxes from the unfair competition of the manufacturers of refrigerators. We may as well protect the manufacturers of buggies from the unfair competition of automobiles We may as well protect manufacturers of piston airplanes against the unfair competition of the jet.

It is this kind of logic that I think is causing us to distort our economy.

If the Senate enacts the amendment before us today, I think it would do irretrievable damage. I oppose the amendment for several reasons. I think it is irrelevant, I think it is inconsistent. I think it is unconscionable. I think it is irresponsible. I think it will create unemployment. I think it will lower the standard of living of Americans. I think it will wreck our economic trade policy. I think it shows lack of appreciation and consideration of what the economy of the United States is.

Let me go back over these points briefly. From the standpoint of being irrelevant, this is not an amendment to

increase Federal revenue or bring about any reform in our tax laws. It is a measure purely designed to limit imports and protect and give a subsidy to manufacturers who might otherwise have to adjust because of international competition.

It is not a revenue measure. This country has long since abandoned the thought that taxes or tariffs on imports are for the purpose of raising revenue. So it is irrelevant to the purpose of this particular bill.

It further strengthens the hand of the President when he says he is going to veto this bill if it does not fulfill the function and purpose we set out to accomplish in this particular bill. I for one could not possibly think the President would sign this bill if it had this amendment in it, which is so totally irrelevant to the purpose of the measure being considered by this body.

Mr. GRIFFIN. Mr. President, will the Senator yield for an observation?

Mr. PERCY. I am happy to yield.

Mr. GRIFFIN. I want to associate myself with the remarks just made by the distinguished senior Senator from Illinois and to join him in commending the distinguished senior Senator from New York. Aside from the merits of the particular amendment before us, it seems to me it should be rejected on the same ground that some other amendments have been rejected, and on which some others should have been rejected.

I argued yesterday, for example, that one of the amendments of the Senator from Massachusetts (Mr. KENNEDY) should not be adopted because it was campaign reform, not tax reform, and the bill before us is supposed to be tax reform.

As one who served a number of years in the other body, I must say frankly that there are times when I believe it would be well if the Senate had a rule of germaneness so we could confine our deliberations to the subject addressed in the particular bill reported to the Senate.

There is no doubt that questions involving tariffs, imports, and exports are very important matters, but they are so important that they should be dealt with separately and after very careful committee hearings and consideration. Aside from the merits of the pending amendment—and I am sure that it has great merit in the eyes of many in my own State, I believe the amendment should not be adopted under the existing circumstances.

Mr. PERCY. I thank the distinguished assistant minority leader. The Senator again has demonstrated his clairvoyance in this area and his full understanding of the facts.

I have already mentioned that this amendment is totally irrelevant to the purpose of the bill pending before us. That is the first reason why I would be opposed to the amendment.

The second reason is that I think it is totally inconsistent with what we are trying to do in this body. We are trying to reform taxes, bring about equity, and we are reducing the tax burden on some people, particularly low-income people and middle-income people.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. WILLIAMS of Delaware. As one who agrees with much of what the Senator has said, let me also say that the Senate has not been dealing with tax reform in the last 2 weeks.

Mr. PERCY. I accept the correction. It is why I am coming closer and closer to the conclusion that I simply could not vote for the bill in its present condition. I would like to raise the further point that we would be going against the very thing we have been trying to acomplish—not actually accomplishing, but trying to accomplish in some respects—because what we would be doing by this measure would be raising prices. We would be increasing the cost of living because we would be subsidizing the inefficient industries that cannot compete on the same basis for the consumer dollar. We are going to raise prices by taxing the consumer in order to subsidize the producer.

So it really takes the heat off the fight on inflation. The biggest weapon we can use against inflation today is the threat of imports if our prices so consistently get higher.

The thing that will hold union wage demands down is the facts of life if they see themselves faced with increasing competition from abroad. Otherwise protected and highly cloistered, they can continue to raise wages and companies will simply continue to charge higher prices for every single product. But, threatened with competition from abroad, they are going to have to start thinking in terms of economic sanity and economic balance.

So it is inconsistent with what we are trying to do when, on the one hand, we say, "Let us reduce taxes for lower-income people," and then, at the same time, take another action in the same bill that inevitably will raise prices for those same consumers.

Third, I believe this bill is unconscionable. I simply believe we cannot, as a matter of policy, shift——

Mr. HOLLINGS. Mr. President, will the Senator from Illinois yield?

Mr. PERCY. I shall be happy to yield to the distinguished Senator.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PERCY. I yield myself 10 more minutes.

I point out to the Senator from South Carolina that I must leave the Chamber to sit in the chair of the Small Business Committee hearings at 5 minutes to 10. I have only a few minutes; and because of that, I would very much appreciate being able to finish my argument, and then I shall be happy to yield whatever time may be required.

Mr. HOLLINGS. Just one point. Reference is constantly being made to our amendment as "unconscionable." Is it not within the Senator's knowledge that we do have this provision and authority for the President within the Tariff Act now, in section 1330, and also in the Trade Expansion Act of 1962? What the Senator is objecting to is, for all intents and purposes, written into law today.

Mr. PERCY. Well, if that is true, if we already have it, why should we enact this amendment? I believe the present law is more understandable and clear than this amendment. As the Senator from New York said last night, as an able lawyer he cannot even understand the language in the amendment, and as a law school dropout I cannot understand the language, either. I do not know how the President would apply it. It applies to every country in the world, and to virtually every disruption, whatever the company may be.

Mr. HOLLINGS. Mr. President, if the Senator will permit me, I think the distinguished Senator from New York understands it all too clearly. I do not think there is any lack of understanding on the part of the Senator from New York. He knows, and the Senator from Illinois knows. We have had hearings on this thing. It is not a matter of a lack of understanding, or unconscionable conduct, or discrediting the Senate. What we are trying to do is reaffirm to the Executive our belief that he should handle these foreign trade matters, rather than requesting Congress, and the Senate particularly, to pass these trade measures, with all the different items. We are trying to ask the President to use his authority, and to fix that authority over there, and reiterate it one more time, so there will be no misunderstandings.

Mr. PERCY. I thank the Senator. I wish that on his own time he would explain to us, then, if we already have this power provided in the law, why we need a second measure at this time.

Second, I hope the Senator will explain why it is that Congress, which has always had and cherished this power and authority, should now delegate and shift that responsibility to the President of the United States. It is for that reason I say this measure is unconscionable. We cannot shift to the President, already overburdened as no human being in the world today is overburdened with pressures of all conceivable kinds, the responsibility to determine when there is disruption in a domestic industry, when he should impose quotas, or when he should impose higher tariffs.

I think that responsibility must remain in Congress; and those who think otherwise are motivated, in my judgment, by the feeling that they either want to shift the responsibility and get it away from us so we can always just say it is up to the President, or else they feel that, by exerting pressure in election years on the President of the United States, they can perhaps get a better bargain than by keeping that responsibility where it belongs, in Congress.

Fourth, I consider this measure irresponsible. It is irresponsible because it is irrelevant; it is irresponsible because it is inconsistent; it is irresponsible because it could only invite a veto. If we are trying to kill the tax reform bill, then this would be the way to do it, by adding a measure like this, which is totally inconsistent with the message given by the President of the United States just 2 weeks ago—a brilliant message on our foreign economic trade policy. In that message he reiterated consistently the

policy that he, as President of the United States, felt this country should have, which was consistent with the policy that five other Presidents have enunciated since 1932.

I feel also that we should defeat this amendment because, in essence, I believe it will actually create unemployment. Surely we cannot sit here and be so naive as to think that we could raise tariffs, or we could impose quotas, without having the whole world retaliate against us overnight. In fact, I could name dozens of countries that are just waiting to have the United States of America impose a quota so that they can retaliate. They have been at this business far longer than we have been. They are far more ingenious in devising ways of preventing an American product from coming into their markets. They are the ones that keep saying it is unfair for them to compete with the highly developed industries of the United States, which have a virtual monopoly on certain types of technical knowledge, and which have almost unlimited amounts of capital, resources, skill, and automation. So the producers in those countires are waiting to retaliate against us.

So, Mr. President, because it would actually create unemployment, and because other countries would retaliate by imposing import quotas and it would stop or impede our exports abroad, I further oppose this amendment. I maintain it would actually lower the standard of living in this country. A standard of living is made up of the wages we receive and the prices we must pay for the products we purchase for our standard of living.

I cannot imagine any measure ever imposed and implemented by the President that would do more to increase prices in this country, and thereby lower the standard of living, in addition to sacrificing hundreds of thousands of jobs that depend upon our exports. Three and one-half billion other people across the world want the products of our factories and our farms. The only reason they cannot buy more of them is that they cannot sell us enough of their own products.

I think it would wreck the foreign policy of this country. Other countries would retaliate—countries like Japan, that are now beginning to see the light. I could not be more harsh in my criticism of Japan's foreign economic policy, nor could the Senior Senator from New York. We have both spoken to Japanese officials and indicated we would lead the fight to retaliate against them if they did not open up their country to the importation of products as well as capital.

It is for those reasons, I feel, that we are now making progress, and the Department of Commerce and the President have made considerable progress in recent months. We would simply be reversing that process if we were to start to do the very thing we have been warning Japan and other developed nations of the world against.

Last, I think this amendment misses the whole point of the economy of the United States of America. It is about time we stopped considering that this should be a producer's economy, and recognize that it is not our only job to come on this floor and fight for every single vested economic interest that exists in our States.

I have shoe factories in Illinois, I have steel mills in Illinois, I have many producer friends who come down to me and tell me their tales of woe. But there is not one of them who could ever come down and tell me that they had more trouble than I had, for 25 years in industry, in the highly protected photographic products industry, with imports flowing in from Japan and Germany.

I took the position then—for 25 years—that we should put the interest of the country ahead of those of any single company, that we simply could not ask the country to reverse a foreign economic trade policy because there were adjustments that were required by us because of imports.

This is a consumer economy, it is not a producer economy, and we had better start to have some recognition that we have more consumers in our States than we have producers. It is for that reason that I think the consumers of this country need to be organized better. They had better get a better lobby. They had better get a better understanding as to what is being done to them every time we start to tinker with the whole economic system of this country by trying to gerrymander and rig up the sort of controls that impede the free flow of products.

It is about time we say to the consumer, "You must have a voice." For that reason, I have introduced a strong consumer bill in Congress. For that reason, I feel certain that the consumer interests and the consumers would revolt, when they understand what we would be doing to them with this amendment. If they understood, every single consumer in every single State of every Senator who would vote for this amendment would be calling him to a reckoning.

As I say, I share the Senator from New York's view that the President has ample authority to redress legitimate import complaints. And I also believe that the Congress was too strict in the Trade Expansion Act of 1962 in its prescriptions as to eligibility for "escape clause" relief. However, the President's recommendations in his sound message to the Congress of November 18, 1969, on international trade, would remedy the problem by liberalizing the "escape clause" criteria. Tariff or quota relief would become more readily available to industries seriously injured by imports and direct economic assistance would be easier to obtain by firms and workers under the President's proposals.

Foreign trade is an intricate subject—as are taxation and tax reform. I strongly share the belief the late and great minority leader, Senator Everett M. Dirksen, expressed a year ago—when the Senate was considering Senator HOLLINGS' amendment to tax legislation that would have imposed import quotas on textiles—that trade proposals require careful hearing and deliberation rather than hasty consideration on this floor. If only for this reason alone, I object to Senator COTTON'S proposed amendment to H.R. 13270.

However, I object for a more basic reason than that. As Senator JAVITS has said, this amendment is not germane to the business before us—taxes and tax reform. If this body is concerned with matters of foreign trade, the opportunity for careful consideration of this subject will be afforded in 1970, when hearings undoubtedly will be held on President Nixon's November 18 message and legislative recommendations concerning foreign trade.

As the President stated in that message—

> It is clear that the trade problems of the 1970's will differ significantly from those of the past. New developments in the rapidly evolving world economy will require new responses and new initiatives.

I heartily commend the President for that statement and for ensuing recommendations for new trade legislation that he made to the Congress. It is in that spirit of recognition of change that trade policy for the 1970's must be fashioned.

Policy for the future certainly cannot be advanced by the kind of legislation Senator COTTON has put before this body today. While I commend the Senator for his concern that the President have the necessary authority to defend the domestic economy from injurious imports from abroad, I call his attention to existing legislation providing exactly such authority, as mentioned by the distinguished Senator from New York.

Let us be on with the compelling business before the Senate and leave matters of foreign trade to appropriate hearings in 1970. We then will have the opportunity and the time objectively to review past and present policy and to chart the course for the future.

To describe this amendment in a different manner, what this amendment really calls for is increasing Government interference in the flow of economic forces. Yet the problems of U.S. foreign trade today have been caused by Government actions and policies.

As we meet today, circumstances are far from bright. Some $75 billion in Federal deficits over the past 8 years have helped create rampant inflation in the United States. The deficits have played a major role in wiping out our traditional trade surplus. They have helped produce a $10.7 billion annual balance-of-payments deficit based on seasonally adjusted figures for the first 9 months of 1969.

Meanwhile, we are burdened down by a complex variety of controls on the free flow of capital. In Congress and in the business community, we hear increasing calls to restrict access to the U.S. market for products from other countries. A tragic war continues in Vietnam, draining our resources, contributing to inflation and harming our image in many nations.

The Government is tampering with the basic free flow of economic forces while its proper role should be to improve mechanisms to allow these basic economic forces to operate more freely.

I deplore the role of Congress today. The effect of several hundred import limitation bills threatens to wreck our

foreign economic trade policy. I am pleased to report that my name is not attached to a single one of these bills. Now we have an amendment before us which would affect all commodities.

Domestically, we have rising prices and wages. It is difficult to blame labor for wanting more, just as it is difficult to blame business for passing on their increased costs to customers. Yet, sooner rather than later, we must face up to the fact. Unit labor costs are soaring. In 1968, the increase in hourly compensation outstripped increases in productivity by more than 4 percent. Such inflationary wage increases rob us all of purchasing power, pick the pockets of those who are living on fixed incomes, undermine the job security of American workers and seriously damage our position in competitive world markets. As inflation has accelerated, our manufactured goods have become less and less competitive in world markets. This is why I strongly opposed repeal of the 7-percent investment tax credit. It is vitally needed to help American industry remain competitive.

What, then, is the outlook for U.S. foreign trade?

Looking ahead, I see the prospect of a brighter day for domestic economic stability, which, in time, may ease current pressures for restrictive trade policies. President Nixon is determined to bring the war in Vietnam to an end. He has also demonstrated the kind of needed fiscal responsibility to stem inflation. There has been a budget surplus in the current fiscal year and there should be one next year. I am confident that the administration will bring inflation under control. This would be the largest single factor in improving the competitive position of U.S. goods in world trade. And this is why I fully concur in this anti-inflation program. Domestic economic stability is a prerequisite to export growth and the natural curbing of imports. The President's anti-inflation program is a must and I support extension of the surtax and curbing unnecessary Federal expenditures, including a substantial cut in military spending.

It is true that we must remove barriers many other countries have erected. Clearly, many of the practices engaged in by our trade competitors are unfair to the United States and world trade interests.

The Common Market common agricultural policy, for example, has severely and unjustly hindered our domestic agricultural sector and damaged our trade balances. While U.S. nonagricultural trade rose by approximately 12 percent between 1967 and 1968, agricultural trade declined by close to 3 percent. I believe recent exchange rate changes in France and Germany have begun to awaken our friends in the European Economic Community to the headaches that can arise from such an exclusive policy. As subsidy payments rise to burdensome levels, the Common Market in my opinion, will negotiate a reasonable solution.

Japanese restrictions on the other hand, are more appropriate to a developing country than to one with a highly developed economy. Japan will probably have a $1.5 billion trade surplus with the United States this year. Japanese trade policy has played a major role in arousing the U.S. business community and the Congress to call for protection from foreign imports. Japan must realize that if such actions are taken, they will pay a heavy price. It behooves Japan now to liberalize its trade policies and take steps more suitable for the powerfully developed industrialized country that she now is.

The time is fast approaching then when a new round of negotiations must be scheduled on the issue of nontariff barriers. Preliminary work has commenced in Geneva under GATT's auspices.

Let the administration, then, commence now to lay the foundation for a Nixon round on nontariff barriers and let it move ahead as rapidly as possible in this area.

But let us take positive and constructive steps which will stimulate trade and remove barriers, not create new ones.

We can improve our performance in credit extension, insurance, and guarantee programs. The Export-Import Bank, under the direction of Henry Kearns has begun to guarantee loans of foreign financial institutions to finance purchases of U.S. exports. The Bank has also agreed to extend direct credits to foreign financial institutions on a selective basis for relending to private foreign enterprises to purchase U.S. products.

As good a job as Eximbank is doing, I believe we need to expand its authority to meet the longer credit terms that competitors of U.S. businesses can now offer through Government assistance. The advantage frequently runs to 3 or more years. Terms of interest are also a major cause for loss of foreign trade offers. Under present commercial or Eximbank financed arrangements, American exports must charge 8 to 11 percent interest, as against a subsidized rate of 5 to 6 percent by foreign competitors. If we are serious about expanding our foreign trade, we should more earnestly explore the possibility of conferring authority upon the Eximbank to discount paper under subsidy arrangement or else to authorize the Federal Reserve to provide direct subsidized credit. And, while we are at it, more serious attention should be given to taking the Eximbank out from under budgetary restrictions so that committed loan accounts are not charged against current appropriations.

The tax treatment of U.S. foreign trade operations also must be carefully scrutinized. The Treasury has proposed that American corporations be allowed to establish subsidiaries within the United States for the purpose of selling goods overseas. Payments of U.S. taxes could be postponed so long as the revenue continued to be used in foreign trade and export activity. This provision would enable U.S. exporters to compete more fairly against foreign-owned or foreign-based businesses abroad which benefit from tax preferences and tax shelters. Such corporations could also counter the establishment of subsidiaries overseas and thereby aid our domestic job market and balance-of-payments position.

I believe we should gain the permission of GATT to subsidize U.S. exporters on some percentage basis, for example, 5 or 10 percent, at such times when we are in overall balance-of-payments deficit. Many European members, under the value-added tax arrangement, grant subsidies to exporters even when the economy is in heavy trade and payments surplus. I believe the United States should be able to employ the same authority in cases where we are in payments deficit. Foreign nations would not be so likely to retaliate under such conditions.

But, let me restate my conviction that healthy open economies and vigorous freer trade are an essential foundation for prosperous democratic societies. We are threatened today with trade restrictions and retaliations. Some in this very body are egging us on to engage in similar behavior. We must resist these forces while at the same time taking action to expand freer trade. If we are reasonable and firm, I believe most nations will respond favorably to our leadership.

To show how important exports are to U.S. workers, I ask unanimous consent to have printed in the RECORD a table showing amounts of principal commodities exported in 1968 and the first half of 1969.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. EXPORTS OF SELECTED PRINCIPAL COMMODITIES BY HALF YEARS, 1968-69

[In millions of dollars]

| Commodity | 1968 | | | 1969 |
|---|---|---|---|---|
| | January–June | July–December | Total 1968 | January–June |
| Nonagricultural products, total | 13,658 | 14,314 | 27,972 | 15,148 |
| Engines, turbines, and parts | 536 | 524 | 1,060 | 557 |
| Agricultural machinery; tractors and parts | 438 | 435 | 823 | 473 |
| Computers and parts | 219 | 268 | 487 | 318 |
| Construction and maintenance equipment | 168 | 187 | 355 | 178 |
| Materials handling equipment | 222 | 240 | 462 | 247 |
| Other nonelectrical machinery | 1,702 | 1,628 | 3,330 | 1,834 |
| Electrical power machinery | 259 | 273 | 532 | 282 |
| Telecommunications apparatus | 263 | 272 | 535 | 303 |
| Other electrical machinery | 604 | 615 | 1,219 | 714 |
| New automobiles | 522 | 450 | 972 | 523 |
| Automotive parts | 749 | 781 | 1,530 | 888 |
| Commercial motor vehicles | 303 | 320 | 623 | 380 |
| Civilian aircraft | 725 | 681 | 1,406 | 701 |
| Military aircraft | 115 | 293 | 408 | 332 |
| Other transport equipment | 355 | 315 | 670 | 434 |

U.S. EXPORTS OF SELECTED PRINCIPAL COMMODITIES BY HALF YEARS, 1968-69—Continued

[In millions of dollars]

| Commodity | 1968 | | | 1969 |
|---|---|---|---|---|
| | January–June | July–December | Total 1968 | January–June |
| Chemical elements and compounds | 608 | 633 | 1,241 | 638 |
| Plastic materials and resins | 274 | 316 | 590 | 277 |
| Other chemicals | 690 | 768 | 1,438 | 687 |
| Fuels | 495 | 561 | 1,056 | 524 |
| Iron and steel mill products | 251 | 331 | 582 | 371 |
| Nonferrous metals | 380 | 484 | 864 | 399 |
| Professional and controlling instruments | 236 | 234 | 470 | 274 |
| Pulp; paper and manufactures | 389 | 433 | 822 | 408 |
| Other nonagricultural products | 3,155 | 3,272 | 6,427 | 3,406 |
| Agricultural products, total | 3,119 | 3,108 | 6,227 | 2,632 |
| Wheat | 556 | 437 | 993 | 351 |
| Corn | 361 | 373 | 734 | 259 |
| Soybeans | 354 | 456 | 810 | 328 |
| Unmanufactured tobacco | 209 | 315 | 524 | 192 |
| Cotton | 288 | 171 | 459 | 157 |
| Other agricultural products | 1,351 | 1,356 | 2,707 | 1,345 |

Note: Data are unadjusted for seasonal variation.

Source: Department of Commerce.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. PERCY. I yield.

Mr. JAVITS. Mr. President, I am very grateful to the Senator for the statement he has made.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. JAVITS. Mr. President, I am very grateful to the Senator for the statement he has made.

I will, on my own time, deal with the questions that have been raised by the Senator from South Carolina.

The Senator from Illinois is quite right. The Cotton amendment is not the same as the provisions of the act with respect to escape clause relations, and so forth. And in addition, even if it were, it is a fine argument for not having it, as the Senator has said.

My point in asking the Senator to yield is so that I might recall that last night, when I started to speak, I was inspired by the memory—although he is still very much with us, but no longer in the U.S. Senate—of Paul Douglas, Senator PERCY's predecessor whom the Senator from Illinois cherishes.

I said that my labors do not seem very arduous or even important compared to the struggle waged on the floor for years by former Senator Paul Douglas in respect of an open or a closed U.S. economy.

I say to the Senator that not only in this matter, but also in many other things, the Senator is distinguished himself as a Senator of independence, foresight, and statesmanship. And I think he would feel as I feel, more than anything else, well worthy of the line of succession in which Paul Douglas stood. I thank the Senator.

Mr. PERCY. Mr. President, I thank the Senator for reminding me of that section of his comments. I read them this morning with the same deep feelings that I know he has used in expressing them.

I have differed with Paul Douglas in years past on some matters. I suppose the most prominent matter was the Vietnam war. However, I must say that through the years I have worked side by side with him on this one particular subject area.

We did television and radio programs together when I was in business and he was in the Senate. We consistently saw eye to eye. And he has had the enlightened viewpoint of one of the finest economists of this country. And although Paul Douglas was considered a liberal—and by some an extreme liberal—he has more confidence in the American economy and a free trade economic policy and how the business world must operate to serve the consumers than any other man I know who was an economist as well as a legislator.

I am very proud and honored to be able to carry on his work in this area.

I would never want it to be felt that even though we cannot make up for his lack of presence on the floor, many of his good works would be lost because of the turnout of an election.

I am very grateful for my colleague bringing his name into the debate at this time. He was a champion for the cause of the consumer and a believer in the American free enterprise system, as exemplified by the positions he took year after year in this regard.

Mr. JAVITS. Mr. President, the Senator has made two points which seem to me to be critically important and very deserving of comment.

One point that he has made concerns the liberal and conservative. How is it that in trade, it is the liberals who are for the conservative position of an open, competing world and an open, competing country, whereas it is the conservative who takes the position of wanting to close, regulate, and shut off competition both for the consumer and for the producer.

The second point which I think is critically important—and which I made inadequately compared to the way in which the Senator made it—is the question of looking at our country through the eyes of other producers in other countries and what they fear from us, a great colossus of technology and enterprise.

If we are going to have a protectionist world, they would be a lot more afraid than we would. I think if we give them half an opportunity, we can get along.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. Mr. President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. JAVITS. Mr. President, they have good reason to fear us, because after the war, we dominated the world economically in a way which, had we not been a people of rather sporting and rather warm and broad feelings, could have easily imposed a tyranny on the world, a tyranny with which we were charged in many quarters with having imposed, even though it was economic.

This represents a real fear by foreign businessmen, foreign producers, and foreign manufacturers. That is a very healthy observation to inject into the debate.

The Senator from Illinois has put it extremely well from the international point of view.

Mr. PERCY. Mr. President, if the amendment were proposed in the parliament of India, I might well understand it. After all, developing nations see things differently. And 200 years ago something like this might have been appropriate for our country. However, for us to deal in fear, for us to be dealing as a country that thinks it needs this kind of protection and needs to have Congress give this kind of authority to the President would be inconsistent with the role a developed, rich nation, the most powerful economic nation on earth has today.

We have heard a great deal from our colleagues about supporting the President. I cannot imagine that we can say on the one hand we should support the President and on the other, when he has made it so unmistakably clear on this issue, that we should try to force authority on him and try to force him into a position of taking responsibility when he does not want it and does not feel it should be appropriately taken.

I quote once again one sentence from the letter addressed to the honorable RUSSELL B. LONG, chairman of the Committee on Finance, from the General Counsel of the Department of Commerce, He states:

> On behalf of the administration, the Department of Commerce is opposed to the enactment of the proposed amendment.

If we want to support our President, let us do it. And this is a good chance to do it during the consideration of this legislative matter, in which we have full responsibiilty and authority.

For all of the reasons I have given heretofore, I vigorously oppose the amendment. I feel that it would be wrong for the country to do it. And this is certainly the wrong bill on which to impose such an amendment.

I yield the floor.

Mr. HOLLINGS. Mr. President, will the Senator yield?

Mr. JAVITS. Mr. President, I do not yield now for one reason. I would deeply appreciate it if the Senator from South Carolina would speak on the opposition

time. I would be happy to yield under those conditions.

Mr. HOLLINGS. Mr. President, will the Senator from New Hampshire yield some time to me in which to ask a question of the Senator from New York?

Mr. COTTON. Mr. President, I yield 2 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 2 minutes.

Mr. HOLLINGS. Mr. President, I am delighted to hear a speech made about supporting the President. I went around here trying to get everybody to support the President for the last 3 months. I think we are making real progress now.

The distinguished Senator from Illinois and the distinguished Senator from New York harken to the memory of the former Senator from Illinois, Paul Douglas, whom I never really had the pleasure of knowing intimately. However, since we are talking about liberalism and free trade, I would like to ask the Senator from Illinois if it is not a fact that the Kennedy Trade Expansion Act of 1962 and the Kennedy round itself for expanding trade and removing tariffs and liberalizing free trade was attributed to President John F. Kennedy because of his leadership in this regard.

Mr. PERCY. Mr. President, I think that all Presidents who have had the opportunity to look at the total picture have had this position. Every single President from Franklin Delano Roosevelt has been consistent in national trade policy. By this amendment, we are attemping to junk totally everything that we have learned during the past 35 years.

I had conversations with former President Kennedy on this very subject. He was considerably enlightened. He recognized that world trade could be advanced by the freedom of U.S. trade policies from restrictions and the removal of barriers erected for that purpose. He dedicated himself to that position.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HOLLINGS. The Senator also appreciates the fact that President John F. Kennedy used the same authority as enunciated in the Cotton amendment in order to obtain the long-term arrangement between 34 countries on cotton textiles.

Mr. PERCY. If he used authority which he possessed, and if the President of the United States still possesses such authority, and if that authority is adequate for the distinguished Senator from South Carolina, I cannot see why we should delay passage of this tax reform bill by imposing the very same kind of authority which the distinguished Senator says the President already has. Is this not redundant?

Mr. HOLLINGS. It is redundant in that context, but not according to the Executive; because, while we tell him he has the authority, he keeps running over asking us to put this in, which is substantially what we threatened at his request with the visit of Prime Minister Sato just 2 weeks ago.

Now we put into an amendment what the President, himself, requested by way of a letter to be used in his conferences with Prime Minister Sato, and it is now called unconscionable and redundant.

Of course, we are trying to carry through a policy of consistent free trade, and I will exchange comments with the Senator from New York about the language and the wording and how unconscionable and how un-understandable this thing is.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. I yield.

Mr. PERCY. Does the Senator think that if the late President Kennedy were alive today, he would be asking today, under these circumstances, for this authority, or would he be taking exactly the same position President Nixon has taken?

Mr. HOLLINGS. I believe that President Kennedy would be acting under the present authority, and I have said that time and again when I could not get President Johnson to do it, when I could not get President Nixon to do it. They both talked about it, but they did not act, and I am trying to motivate the President into action. That is the purpose of this.

The PRESIDING OFFICER. Who yields time?

Mr. BYRD of West Virginia. Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. JAVITS. I yield.

## SUBCOMMITTEE MEETINGS DURING SENATE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary be authorized to meet during the session of the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Subcommittee on Patents, Trademarks and Copyrights, of the Committee on the Judiciary, be authorized to meet during the session of the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. JAVITS. I yield myself 1 minute, to learn whether the proponent of the amendment proposes to use any time now. If not, I will proceed.

Mr. AIKEN. Mr. President, will the Senator yield me 30 seconds?

Mr. JAVITS. I yield.

Mr. AIKEN. I want to say, in regard to the statement that President Johnson would not act in time of crisis, that I never found that to be a fact. I found that when there was a real crisis and action was warranted, President Johnson did not hesitate to take action.

Mr. JAVITS. Does the Senator from New Hampshire desire to use any time? If not, I will proceed.

Mr. COTTON. I will say to the distinguished Senator that this matter was well debated last night. It is at his desire that we have 2 hours this morning. The Senator from Illinois has just talked about how sad it is to delay this bill by discussing the benighted amendment offered by the less intelligent Members of the body. I certainly do not want to delay. The only speech I intend to make this morning is: Let us vote.

So the Senator can go ahead and use his time. I hope I will not have to use mine, because I cannot see that it helps anybody.

Mr. JAVITS. That is fine.

I yield myself 10 minutes.

Mr. President, I feel that the Senate and the country were well served last night. I do not know what the result will be today, but I think that what I did last night was essential to our national health and security and future. I hope I have other such times in the Senate. I thoroughly believe that a very important issue is at stake here and that it is my duty and that of every other Senator who is similarly motivated to lay it before the Senate.

The issue, I repeat, is what I tried to put before the Senate last night. It has three elements:

One, this amendment is completely irrelevant to this bill, absolutely so, and should be tested on that ground; and I will propose in due course to do so.

Two, this amendment endeavors to change, in an amendment on the Senate floor which is irrelevant to the pending bill, not only the existing carefully considered and drafted legislation of the United States in the trade field, but also, it aborts—and I say this to my fellow Republicans—the President's own intention. I will demonstrate that completely in a moment, from his message delivered to us on November 18.

Three, it is unworthy of the Senate to adopt an amendment which will signal to all mankind the fact that the Senate of the United States is going protectionist at the very moment when there is the gravest danger of a trade war in the world.

Therefore, the Senate's views are essentially dictated by a very local and sectional interest, which I do not in any way depreciate, and on which I make no findings as to the general interest in the country. If Senators feel that they have a particular sectional interest which should prevail in a given case, it is their duty to fight for it. But it is also the duty of other Senators who see the total of the national interest to fight at least as hard in order to prevent what could be a disaster for the country, and that is the purpose of my undertaking the opposition to this amendment.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from New York has 25 minutes remaining.

Mr. JAVITS. Taking these arguments, in turn, I said that this endeavor to reverse existing law and this question have been challenged.

Mr. PROXMIRE. Mr. President, will the Senator yield to me now, or would he prefer to do so later?

Mr. JAVITS. I yield to the distinguish Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I commend the distinguished Senator from New York on what I think is one of the

most remarkable performances I have seen in the 12 years I have been in the Senate.

I was in the Chamber last night when the Senator from New Hampshire called up his amendment. I have great respect for the Senator from New Hampshire. I think NORRIS COTTON is a man of great ability, and, of course, I respect him as the ranking minority member of the Committee on Commerce and a man who has demonstrated again and again his ability in this area and his great concern and knowledge.

However, what the Senator from New York did last night is unusual, because the Senate was sweeping along with an amendment which has great popular appeal and, on the face of it, great merit.

I should like to ask the distinguished Senator from New York whether, to his knowledge, there were any hearings in the Ways and Means Committee or in the Finance Committee on this very far-reaching amendment which is before the Senate, which I understand the Senator from New York has told the Senate would give up, in his view, control over tariff policy to the President of the United States, would surrender it.

Mr. JAVITS. I know of none whatever.

I am grateful to the Senator from Wisconsin for his gracious statement about me. I should like to point out to him that the President has asked for a new test altogether different from the one that is in the Trade Act now, and different from the one contained in Senator COTTON'S amendment.

The President says in his message:

> I recommend the liberalization of the escape clause to provide, for industries adversely affected by import competition, a test that will be simple and clear: Relief should be available whenever increased imports are the primary cause of actual or potential serious injury.

I shall read that again:

> Relief should be available whenever increased imports of a primary cause of actual or potential serious injury.

Now I should like to read what Senator COTTON'S amendment says:

> (2) the foreign country producing such commodity is imposing restrictions (by means of quotas, import licenses, tariffs, taxes, or otherwise) against the importation into such foreign country of articles produced in the United States,

The key comparison is on page 1 in lines 7 through 10 of the Cotton amendment which states:

> (1) the importation of any commodity from a foreign country is at such levels so as to disrupt the domestic market or is causing injury to industries, firms, or workers in the United States, and

I cannot see the remotest relationship or comparison, except for the use of the one word "injury," between this definition and the President's requested definition, or the definition of the Trade Adjustment Act which reads:

> The President may proclaim such increase in or the imposition of any duty or other import restriction on the article causing or threatening to cause serious injury—

Mr. President, I wish to repeat those words: "causing or threatening to cause serious injury to such industry as he determines to be necessary to prevent or remedy serious injury to such industry."

The courts have a stack of cases and the Tariff Commission has a great many cases interpreting "serious injury." There is always a major argument about whether or not the serious injury is attributable to imports or how the President wants to clarify that.

I challenge anyone to find the word "disrupt" anywhere or to bring in a definition which will be credible to the Senate in passing any such operative statute which is based on an undefinable concept or one so broad a concept that the President could do anything he pleases.

If one uses the word "disrupt" literally, everyone disrupts. A tariff disrupts, any regulation disrupts. The United States, under section 22 of the Agriculture Adjustment Act is disrupting in all commodities in which it imposes quotas. I can read the list.

In addition I do not understand this situation. Our farmers now have $2.6 billion worth of exports a year. We are complaining against the Common Market and say they are messing up the world because they want to turn protectionist. Here we give them an open invitation. I do not understand it. The farm bloc is supposed to understand the farmer. I do not understand anything like this.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. AIKEN. Mr. President, with respect to what I said about President Johnson taking action when there was a crisis and action was needed, we had a case of Common Market countries undertaking to submerge our dairy market in the United States and President Johnson, under existing law, took action and established quotas which really saved the American dairy industry from disaster. That is in the law now.

Mr. JAVITS. I am grateful to the Senator from Vermont.

Mr. AIKEN. I want to give President Johnson all the credit I can because he did not take all my advice.

Mr. JAVITS. I thank the distinguiished Senator from Vermont.

Mr. President, I wish to read this language to the Senate:

> Pursuant to authority important restrictions are presently applied in the United States against imports in certain specified dairy products and also on cotton, wheat, and peanuts.

So right now we are disrupting.

Mr. PROXMIRE. Mr. President, will the Senator yield further?

Mr. JAVITS. I yield.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. Mr. President, I yield myself 5 additional minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 additional minutes.

Mr. PROXMIRE. I wish to ask the Senator from New York if it is not true that if some Senator took the message and extracted from it the legislative proposals and introduced them as amendments on this bill there would be a tremendous protest on the floor of the Senate because we would have short-circuited the hearing process, there would have been no legislative hearings, and no one could have appeared and testified for or against it.

Mr. President, I submit that the Senator from New Hampshire, who is a great man and a man with vast experience, in a sense is doing this.

Let us assume——

Mr. COTTON. Mr. President, will the Senator yield to me on my time?

Mr. JAVITS. I have the floor. I yield to the Senator.

Mr. COTTON. Mr. President, I yield myself one-half minute.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. COTTON. How many hearings did they hold on the social security amendments? How many hearings were held on all of the many amendments that have been tacked on to this bill? It is a little ridiculous to wail and wring one's hands on the floor of the Senate that the committee did not hold hearings. We have in the tax bill so many matters on which the committee had no hearings that one can hardly count them. This is ridiculous.

Mr. PROXMIRE. Mr. President, I wish to say to my good friend from New Hampshire it is true that no hearings were held on some matters involved in the tax bill and that is regrettable. However, extensive hearings were held on most provisions that have been offered and agreed to; although not all of them.

In this case we have a completely different kind of consideration. The Senator from New York has made the point. This amendment is not relevant. This is a trade matter and the amendment goes very far. Here, above all, we should have hearings.

When the Reciprocal Trade Act was passed, and it is not as far reaching as this, there were extensive hearings which took many weeks and months. Under these circumstances, where we have something that is not relevant to a tax bill and something that is very far reaching and something which runs counter to the proposal of the President, we should have a record and we should know what we are doing.

Mr. President, I want to thank the Senator from New York for his outstanding service in calling this matter to the attention of the Senate so ably.

Mr. JAVITS. Mr. President, now to proceed to a few other points with respect to the amendment, I promised yesterday I would call to the attention of the Senate what is being jecpardized here, and what we are dealing with, especially in terms of money and jobs. The foreign trade of the United States, export and import, is estimated to provide jobs for 4.5 million Americans. Mr. President, I repeat that figure: 4.5 million Americans. The trade amounts to in excess of $70 million a year.

While it is easy to fix our attention on shoes and textiles, what about fixing our attention on agriculture, which I referred to before, where our agriculture exports, on the whole, run to something in the neighborhood of $3 billion a year every 6 months, according to the record

of 1968, and $2.632 billion for the period January to June of 1969.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. THURMOND. Mr. President, I would like to inquire if the figure which the Senator referred to includes the Public Law 480 funds we send and do not get cash for but merely a credit.

Mr. JAVITS. I will find out.

Mr. THURMOND. I understand the figures the Senator has referred to do include that amount. If that is the case it would hardly be a fair figure to use because the farmers in our country do not actually see that money.

Mr. JAVITS. I will check to determine that information. But even with it, it is a fair figure because it represents money in the pockets of the American farmer, whether he gets it from other taxpayers of the United States or in foreign dollars.

Mr. THURMOND. But it comes from the Treasury of the United States.

Mr. JAVITS. I know, but he gets it from other taxpayers who are not farmers and I feel that is a legitimate source of income to him.

Mr. THURMOND. Do we not now have millions of dollars known as counterpart funds in other countries that we will probably never use growing out of this?

Mr. JAVITS. All the Senator is making is a foreign aid argument. I say the farmer gets the money out of other taxpayers of the United States, but he gets it. I will check on the figures and the amount of Public Law 480 funds in it, but I do not think it is relevant to the $2.632 billion for 6 months in 1969.

Those Senators who have automobile factories, computer factories, agriculture machinery factories, engines, turbines, parts, electronic power equipment and telecommunications industries had better take a good look at the figures before they decide what is in their interest because it appears that automobiles, automotive parts, and so forth exported by the United States run in the neighborhood of $2.5 billion a year. Senators who have airplane factories in their States had better consider the fact that $1.8 billion in airplanes and airplane parts go out of the United States.

In short, what is completely omitted—and a sudden strange silence pervades the Chamber when this kind of protectionist approach—and that is what it is—is asked from the Senate, when trade is certainly a two-way street—is that other countries, and labor, will be disposed, as we ought to know by now, to be very happy to retaliate against us, once we start the idea that we are ready for a trade war. That is what the Senate would be signaling.

I do not agree that the best way to negotiate with nations which are just as proud as we are is by making threats. I do not agree with that. I do not agree that the best way to get a voluntary agreement on textiles, or anything else, is by threatening another power.

If we had threatened Mr. Sato, it would have made his position untenable, and he would not be running for re-election if he had yielded to the United States.

Yet, thoughtlessly, that is exactly what the Senate, in my judgment, will be lending itself to if it adopts the pending amendment.

Another point is that New England has changed. It has changed because its textile mills did not have to worry about competition from abroad. They all moved into the South, and New England was practically a whole area of deserted villages. Until what happened? Until miscellaneous industries, such as electronic equipment manufacturers, and other industries which needed highly skilled workers, came to New England and took up the slack.

Now New England is flourishing again.

One of the critically important aspects of the economy of New England, the traditional home of protectionism, is its ability now to trade throughout the world in terms of the highest levels of American technology.

It seems to me that that is a very critical and important point in respect to what is happening in this country, even by section.

Mr. President, the interest of the consumer is at stake.

The PRESIDING OFFICER. The time the Senator from New York allotted to himself has now expired.

Mr. JAVITS. Mr. President, I yield myself 5 additional minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. JAVITS. In addition, Mr. President, before we signal to the world that the Senate is lined up on the protectionist side, whatever the President may say, if we are going to run it our way, without giving considered judgment to the recommendations in his presidential message which he sent us only a few weeks ago, we had better think about the interests of the consumer which are involved as well, because producers are also consumers.

The consumers of the United States—and the Senator from Illinois (Mr. PERCY) never said a truer word—had better ask themselves the question: "What is happening to us?" Two things are happening having to do with putting American industry on its toes because of the competitive factor. First is the proposal of the United Kingdom to get into the European Common Market, which is critically important to health as well as to the prosperity and the keenness in change, and so forth, of British business.

One of the really strong reasons why the British want to get into the European Common Market is their sensitivity on that particular point.

So far as our own producers are concerned, they need the competition, especially in soft goods, the very goods being discussed here, such as shoes and textiles, in order to keep American business competitive. After all, if things get too expensive and too high in costs of production, our economy will get completely out of line.

Point 2, which puzzles me about the conservative point of view on this trade quota and trade restriction picture, is the issue of labor. That is a very interesting point.

On the one hand, there are claims that American labor knows no limitations in terms of wages, fringe benefits, and in terms of continually shortening the hours of work; that they are just running roughshod over the American economy without any real understanding of the competitive demands upon the economy. On the other hand, the very same people, almost to a man, when we seek to furnish competition for that in terms of the export-import policy of the United States, try to dam up instead of promote and accelerate that kind of healthy competition.

It seems to me that just as we want to keep American business on its toes in terms of giving it some competitive standards that it must meet and deal with, we should want to keep American labor on its toes for precisely the same reason.

Yet, as I say, we have this very strange dichotomy on the part of the very same people who, on the one hand, want to keep American labor competitive and, on the other, will kill off, or endeavor to kill off, any measure designed toward that end.

Mr. President, I should like to sum up our side of the debate regarding the proposed amendment as follows.

First, it is irrelevant to the bill. That is irrefutable.

Second, it represents a signal to the world that the Senate, without waiting for any deliberate consideration even of the President's message, is committing itself definitely to a protectionist and retaliatory course, the effect of which will do only the United States considerable harm; because, as we all know, they have retaliated and they will retaliate because many of the forces within these other countries will be very glad of the opportunity.

Third, the amendment itself, in its terms, represents the kind of law which is so loose in its application and so indefinite as, in effect, to transfer the authority of Congress to the executive.

The PRESIDING OFFICER. The time which the Senator from New York allotted to himself has now expired.

Mr. JAVITS. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 2 additional minutes.

Mr. JAVITS. Mr. President, as to transferring the whole authority of Congress to the Executive, that is something which I can hardly expect, although it may well be that the Senate should consider the fact that this amendment is being offered to an alleged tax reform bill without the deliberation and consideration which even such a move should require.

Again, I have defined and compared precisely the words of the amendment with the words of the Trade Adjustment Act itself and with the words and the definitions that are recommended by the President. It is my deep conviction that the words used in the amendment are the most indefinite, hardest to define, and broadest in terms of a completely blanket grant of authority that we could possibly use in transferring au-

thority to the President of the United States.

For all these reasons, I very much hope that at the appropriate time the Senate will reject the amendment.

Mr. PROXMIRE. Mr. President, will the Senator from New York yield briefly?

Mr. JAVITS. I yield.

The PRESIDING OFFICER. (Mr. TALMADGE in the chair). The time yielded to himself by the Senator from New York has expired.

Mr. JAVITS. Mr. President, I yield myself 2 additional minutes. I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, the Senator from New York has made a strong and convincing case, but I think he has understated his economic argument so far as jobs are concerned. It is true that our exports and imports are in balance. But over the years, we have had a favorable—I repeat favorable—balance of trade. We have had it until recently. I do not know of any economist who does not think we will have a favorable balance in the future. This means that there have been and will be more jobs in the export industries than in industries adversely affected by exports. And this means that to the extent this amendment restricts trade—and it certainly will—it will abolish jobs, not protect them.

The Senator from New York is fighting restrictive legislation. He is fighting to preserve an opportunity for American workers to produce goods for export throughout the world. He has also made a devastating argument for trade providing effective competition at home, so that our prices can remain reasonably stable. We need all the weapons we can get to combat inflation and world trade is a potent weapon.

The PRESIDING OFFICER. The time yielded to himself by the Senator from New York has expired.

Mr. JAVITS. Mr. President, I yield myself 1 additional minute.

I am grateful to the Senator from Wisconsin for pointing out the export surplus proposition. In 1966 we had an export surplus of $3.786 billion; in 1967, $4.033 billion; in 1968, $1.1 billion; for 1969, the indications are that, notwithstanding the disagreement which we have had, we will have an export surplus of $889 million. As a matter of fact, it is expected that we will again resume the export surplus status which has essentially sustained the economic policy of the United States throughout the years.

To the Senator from South Carolina (Mr. THURMOND), I should like to say that the Department of Commerce statistics which I read—and they have just been checked out—do include Public Law 480 funds in the total of $1.4 billion, and they should be added to the figures.

I point out that the figures which I gave would indicate a rate of export of agricultural products of, roughly, $5.2 billion for 1969, assuming the record of 1968 is sustained. Of that amount, 20 percent, or $1.2 billion, is Public Law 480 funds. From the economic point of view, I think that properly represents income. In other words, if it is never paid for or set off by counterpart funds, it is income to the farmers of the Nation from other taxpayers.

Mr. THURMOND. The figures do include Public Law 480?

Mr. JAVITS. They do; that is exactly right.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator has 4 minutes.

Mr. COTTON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. COTTON. If we have a quorum call at this time, it has to be taken out of some Senator's time. Is that correct?

The PRESIDING OFFICER. That is correct, and under the precedents, the Senator from New York does not have sufficient time to complete a quorum call. He has only 4 minutes remaining.

Mr. JAVITS. I yield myself 1 minute. In view of the fact that the Senator from New Hampshire obviously does not intend to use any time, I do believe that Members of the Senate ought to be advised that this matter is coming to a vote by a quorum call.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield time for it? Under the precedents of the Senate, the 4 minutes remaining of the time of the Senator from New York is insufficient for a quorum call.

Mr. COTTON. Mr. President, I yield myself 1 minute to say to the Chair that the Senator from New Hampshire may have to yield some time, and the Senator from New York demanded this time for debate in the Senate this morning. He has used almost all of his time, and I must object to a quorum call being taken out of my time at this point until I know whether I have to use it.

The PRESIDING OFFICER. The Chair will state to the Senator from New York that he has a constitutional right to suggest the absence of a quorum, but not until all time has been yielded back or has expired.

Mr. JAVITS. Mr. President, a parliamentary inquiry, still on my time.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. May I move to table this amendment when my time has expired? Do I have a right to do that?

The PRESIDING OFFICER. The Senator may move to table when all time has expired or has been yielded back.

Mr. JAVITS. And I will be recognized for that purpose?

The PRESIDING OFFICER. The Senator will be recognized.

Who yields time?

Mr. COTTON. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator is recognized for 1 minute.

Mr. COTTON. I gave my word last night to the distinguished majority leader that if he acceded to the demand of the Senator from New York for 1 hour on each side, I would try my best—in view of the extent of the debate we had last evening to use only a minimum of time. I do not, however, want to gag any of my good friends.

The distinguished Senator from Maine (Mr. MUSKIE) did not have an opportunity last night to engage in debate. Therefore, I yield the Senator from Maine 5 minutes.

The PRESIDING OFFICER. The Senator from Maine is recognized for 5 minutes.

Mr. MUSKIE. I thank the Senator.

Mr. President, I have listened with great interest this morning to the remarks by the Senator from New York. The implication from what he has said is that the question is one of whether we have unlimited free trade or no trade at all with other countries around the globe.

I suggest that the amendment of the distingiushed Senator from New Hampshire is not addressed to either of those very unrealistic objectives.

Every Senator, I think, recognizes the part that international trade plays in the role of the United States around the globe, in the growth of the American economy, and in the interest of our consumers.

The question really is whether, under any conceivable circumstances, the Senate or the Congress of the United States ought to be concerned with the kind of competition which American industry faces in our own markets: whether, under any conceivable circumstances, the American people ought to be concerned as to whether or not unfair competition from imported goods in our own markets threatens the existence and the survival of American interests and American industry.

In my part of the country we have special concern about the imports of textiles and shoes, and, indeed, increasingly about imports of electronic equipment. In all of these three areas competition from abroad in our own markets has grown steadily and at a rate which I think is of concern to all of us.

Using the shoe industry alone as an example, in 1954 imports of shoes from abroad were insignificant, almost at the zero point. Today imports of foreign shoes into our own markets exceed 30 percent of domestic consumption, and in recent years the rate of increase has been steeper than is suggested by those two figures.

The shoe industry, Mr. President, is a very mobile industry. It does not take a great deal of capital to set up a shoe plant and it does not involve much loss to move it, or even to close it, on the part of the entrepreneurs who have invested in it.

There is a disposition in the shoe industry in this country, which can be accelerated very quickly if the present trend in shoe imports continues, to move their operations abroad. This would, in effect, be the movement of American jobs abroad.

What the Senator from New Hampshire is frustrated by is that, in the name of free trade, we are asked to defend the importation of shoes, and other commodities, into this country from countries which themselves impose restrictions on the same commodities.

Consider, for example, Japan. Japan resists, with all the vigor of which she is capable, any import quotas on shoes into the United States; but Japan herself im-

poses quotas upon the importation of shoes from the United States into Japan.

Japan concedes this inconsistency. Japan defends this inconsistency as her right, unilaterally, to protect the Japanese shoe industry.

I agree with the distinguished Senator from New York that trade is a two-way street. But other countries, including Japan—which is possibly the greatest trading nation on the face of the earth—impose restrictions upon the importation of commodities from elsewhere. I think it has been said, and accurately, that Japan at one and the same time may be the world's greatest trading nation and also the world's greatest protectionist trading nation. But Japan recognizes that until the time when we reach the millennium where there can be absolute unrestricted movement of goods and people across international borders, she has a national interest to protect Japanese industry against the disruptive effect of import competition.

Japan promotes that kind of policy. Many of our European trading partners promote similar policies. The European Common Market promotes that kind of policy. All the distinguished Senator from New Hampshire is saying is that until we reach the millennium, there are circumstances——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. COTTON. I yield the Senator from Maine 3 more minutes.

Mr. MUSKIE. Circumstances in which American policy also ought to be concerned with import competition in our own markets, when that competition promotes disruptive conditions which are destructive to the health and survival of American industry.

The vote this morning, Mr. President, is on an amendment which I expect will not be written into law, but the vote this morning gives those of us who are concerned about disruptive import competition in our markets an opportunity to express our concern.

There are negotiations underway in Geneva at the present time, in the field of textiles, involving some of our trading partners. I think it would be in our national interest for them to know, on the basis of this vote in the Senate, that we are concerned. We want to move back the barriers to trade. We want eventually to eliminate the barriers to trade. But when we do so, we must take into consideration the legitimate interests of American industry and American jobs.

I repeat, Mr. President, this is not a question of whether we have no trade abroad. This is not a question, at this point in time, since we have not reached the millennium, of unlimited free trade around the globe. No nation on the face of the earth practices a free trade policy today, and none is likely to next week or next month. We are talking about a policy which will enable American industry to adjust to import competition in our own markets when that competition is disruptive, when that competition takes place under conditions in which foreign imports are given a better break, in our own market, than our own goods.

That is what the Senator's amendment is about. That is the concern it expresses, and because it expresses that concern, I support it.

Mr. PASTORE. Mr. President, will the Senator from New Hampshire yield me 2 or 3 minutes?

Mr. COTTON. Mr. President, first I yield myself one-half minute. I shall be delighted to yield to the distinguished Senator from Rhode Island; I merely wish to repeat what I have said before, that I promised the majority leader that we would hold down the debate.

I yield 5 minutes to the Senator from Rhode Island.

Mr. PASTORE. Mr. President, I shall not require 5 minutes. I have already said on the floor of the Senate dozens of times what I am repeating now. I have worked with the Senator from New Hampshire, the Senator from South Carolina, the Senator from Maine, and the Senator from Georgia in what has been, actually, an operation of frustration from beginning to end.

I shall never forget the years when John F. Kennedy was a Member of the Senate. He would be sending me telegrams, asking, "Will you cooperate with me to do something about saving the textile industry in New England?"

We would send letters and telegrams down to President Eisenhower, and nothing ever happened. Then John Kennedy became the President of the United States, and, as I think the Senator from New Hampshire has brought this out, we all marched down there saying to ourselves, "Now we have a friend in court. Maybe John Kennedy, who used to send all those telegrams, will do something about the situation."

But what his response? The response was, "Oh, now that I am President of the United States, I have to worry about Okinawa; I have to worry about Matsu and Quemoy, I have to worry about Pakistan; I have to worry about India," until I began to wonder, who is going to worry about the American worker?

Nothing ever happened. We started in 1958. The historic resolution on the decline of the textile industry was introduced by the Senator from New Hampshire. We held hearings all along the Atlantic seaboard. We had labor leaders come in, we had businessmen come in, we had everybody come in and all established that the textile industry was deteriorating.

Realize, Mr. President, that today our exports of textiles are absolutely nil. Nil, and here we are, with one country alone in this world exporting to us 50 percent of the American consumption in certain articles of textiles.

True, Mr. President, we have Vietnam on our hands today. We are pumping $30 billion into Vietnam now. That is giving an artificial boost to our economy; and I certainly hope that kind of artificial boost comes to an end tomorrow. But when it does, where are we going to find the mills that we used to have? Where are we going to find the jobs that we used to have?

We are busy now manufacturing bombs and bullets, and maintaining defense bases everywhere while the people whom we are defending are making refrigerators and televisions, and sending them over here to the American market. I say the time has come when America must look at itself in the mirror, to see what is happening to us.

Here we have this distressing problem of Appalachia, the poor section of the country. That is where our textile mills could do us much good. Yet here we are, pumping more money, seeking to train and retrain people whose jobs have deserted them.

It is a generous act to take a poor fellow who has worked in a textile mill from the age of 20 to the age of 50 and try to retrain him, after his textile job has disappeared. But when he gets to be 50 years old, what are you going to train him for? To run an elevator? Where is he going to get that job running an elevator, if there is no elevator to run? That is our problem.

All we are saying is this: We do not want to be unfair. All of us have voted to extend the Trade Expansion Act. We voted for it time and time again. We were told that this matter would be adjusted. Not too long ago, I had some distinguished parliamentarians from Japan come into my office. I was told, in a very subtle way, that maybe they could reduce textile exports if we gave back Okinawa. That is how ridiculous this is getting to be. What is the connection? What is the connection between Okinawa and the plight of the textile industry in the United States of America?

Here we are. A tremendously prospering Japan today is relying, for its security, on the umbrella of American protection. Europe is doing the same thing; and I am being told here that the Common Market is exporting more than we are. Why not? We cannot go to them because they have restrictions against us, and they can unload on us because we have no restrictions against them.

That is all we are trying to correct here. We are just saying, here today, "Tit for tat." That is all we are asking: reciprocity.

All we are asking here is that, in the case of any nation that has restrictions against us, the President ought to have the right to impose restrictions against them, until and unless they remove theirs. Then we will have a 2-way street. We do not have it today, and that is our problem and our peril.

I do not want to take any more time. I have made this speech a dozen times on the floor of the Senate. I hope that today, Mr. President, our voices will be heard, and that the pending amendment will be agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. COTTON. Mr. President, I yield myself one-half minute. I thank the distinguished Senator from Rhode Island and the distinguished Senator from Maine.

The distinguished Senator from South Carolina (Mr. THURMOND) has been kind enough to say that he would use 1 minute, and then put his statement in the RECORD to enable the Senate to get to a vote. I yield 1 minute to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 1 minute.

Mr. THURMOND. Mr. President, there are a number of industries in this Nation whose continued existence is being threatened by the imports of goods produced in other nations by virtual slave labor. I am concerned with the economic health and well-being of American industries in general and the textile industry in particular.

The need for a solution to the textile import problem rests on the overriding importance of the textile and apparel complex to our country. No other industry is as widely dispersed over the length and breadth of our land. No other industry can count some 35,000 separate establishments, has as many employees—2.4 million workers—one-eighth of total manufacturing employment, offers as many increasing opportunities for the minority groups in our country or for others who are disadvantaged in our society, contributes so uniquely to the economic health and growth of so many small communities, and no other major industry is as heavily labor intensive.

The uniqueness of the textile and apparel complex would not in itself cause us to be concerned about its future. But when this industry is confronted by import competition which cannot be offset by any volume of investment, technology, or mechanization—where labor costs abroad are but a fraction of these costs at home—$2.31 per hour for an apparel worker, on the average, at home, and 10 cents an hour for an apparel worker in Korea, for example—and the volume of imports is growing substantially and threatening to grow even further—we have a special problem which cries out for solution.

Imports of cotton textiles and apparel are reasonably restrained through the mechanism of the long-term cotton textile arrangement. Many in the industry, I know, are not pleased that during the 8 years since this arrangement and its 1-year predecessor arrangement have been in effect, imports of cotton products have more than doubled. In the case of several categories of cotton products, the growth of imports has been even more spectacular. But the existence of this arrangement provides a brake on disruptive imports which permits the textile and apparel industry to view its future, in the cotton area, with a considerable degree of certainty. However, this device is not entirely satisfactory.

But we cannot say the same for textiles and apparel made from wool and manmade fibers which are not now subject to import restraints as in the case of cotton. Wool product imports have also more than doubled in this 8-year period. Imports of manmade fiber products have increased 14-fold in the same period.

In 1969, our imports of manmades have been running higher than our imports of cotton products, the first year that this has occurred. At the rate these imports are growing, our imports of manmade fiber textiles and apparel will reach 1.8 billion yards this year—about double what they were just 2 years ago. In fact, over the last 8 years our imports of manmade fiber textiles and apparel have doubled roughly every 2 years.

Imports of apparel made from manmade fibers and blends have experienced the most dramatic growth. They have increased 70 percent in 1968 over the preceding year. In the first 6 months of this year they were up 83 percent over the same period of 1968.

Increases from some countries have been notably spectacular. In the first 6 months of 1969, manmade fiber textile imports from Japan increased 51 percent; from Hong Kong, 43 percent; Taiwan, 132 percent; Korea, 71 percent; Israel, 82 percent—and the list goes on.

The effects on our trade balance are serious. On an overall basis, the United States used to enjoy a trade surplus of as much as $5 billion or more a year. In 1968, that trade surplus showed a substantial reduction to only $835 million. In the first 6 months of 1969 our overall trade surplus was at an annual rate of only $301 million.

The textile trade balance—even if we look only at cotton, wool, and manmades—showed a dramatic change in 1968. Our excess of imports over exports which had been running at about $500 million a year in 1966 and 1967, increased by 60 percent in 1968, to over $800 million. In the first 7 months of this year the annual rate of our textile trade deficit was over $1 billion.

Two recent developments underline so dramatically the need for restraint on imports of wool and manmade fiber textiles and apparel.

In August 1969, textile mill employment was the lowest since December 1967. Total textile and apparel employment fell below 2.4 million workers for the first time since May 1968.

During fiscal year 1969, the ratio of imports to consumption of cotton, wool, and manmades reached an alltime high. During the last 8 years, the share which imports had of our domestic market, doubled for wool products, more than doubled for cotton producers, and more than quadrupled for manmade fiber products.

Mr. President, I have no objection to fostering foreign trade but not at the expense of American jobs or at the expense of American industry. I recognize that it is considered good to be charitable to our neighbors throughout the world but let me remind you, Mr. President, that charity begins at home and my neighbors are Americans and I certainly intend to look out for their interest as wage-earning, job-holding, responsible citizens, first.

An article that appeared in the Journal of Commerce last week has just come to my attention. This article is a report of testimony by witnesses before Congressman Boggs' Joint Economics Subcommittee which is trying to chart U.S. foreign economic policies for the 1970's.

A Mr. Arthur K. Watson, chairman of the board of the IBM World Trade Corp. testified and he endorsed what might be called the "one world" theory of trade and he suggested in effect the eradication of over 2.4 million jobs in this country and the willful destruction of an industry that operates in every State of the Union.

This is the almost unbelievable statement this man made which concerns me so much:

> It would be absurd . . . to predicate future policy on the idea that we are raising another generation of mill hands in America. I'd personally rather have my son in the automotive than in the footwear or textile industries.

Mr. President, this statement is ridiculous.

I resent this smug and ludicrous statement for it is insulting to millions of Americans and it reveals a shortsightedness on the part of one of our so-called industrial "leaders" which amounts to blindness.

I demand an apology by Mr. Watson to every man and woman engaged in the textile and apparel industry in the United States.

Let Mr. Watson make no mistake about it that it is no disgrace to be a millhand and that it never has been. Great generations of America have worked hard and long in the textile industry of this country at all levels and through their efforts the people of this Nation have been clothed. This Nation and Mr. Watson, whose company sells many machines to the textile industry, should be thanking our textile workers for their great contribution not only to America's material wealth, but to the basic bedrock of our way of life.

Mr. President, you can say what you will about the millworkers of this country but they have never sold out American jobs in favor of those in foreign nations. Say what you will, no one can ever accuse the American textile worker of being more interested in his pocketbook and his narrow-sighted selfish goals than in his fellow Americans and their economic well-being. The people who work in textile mills are among the finest in this land. Some of the best people in my State work in textile mills.

Here is a basic industry that is giving thousands of people who are unskilled and untrained an opportunity to earn an honest day's wage in a business that will teach them and educate them to a trade that will stay with them the rest of their lives, provided we do not allow this country to heed the bad advice of Mr. Watson.

Mr. President, there are those who have talked about helping the poor, the underprivileged, and the Negroes in this country, and no industry has done more than the textile industry. The textile industry has made great strides in hiring people who are otherwise unskilled and untrained. They have hired the poor, they have hired the black, they have hired everybody they could, and they are paying them excellent wages.

Mr. Watson probably does not know it but the American apparel industry is paying $2.31 on the average per hour to its workers and yet we would allow the barriers to be dropped so that the country would be flooded by foreign made goods created by individuals who earn 50¢ or less per hour, thereby destroying almost 2½ million jobs.

If Mr. Watson's advice is heeded and we destroy the millhand in this country the economic consequences would shake

the very foundation of the economic structure of America.

Mr. President, Mr. Watson has slandered an entire group of people who are good, solid, strong, God-fearing Americans that constitute part of the great "silent majority" of this Nation, and I will not silently allow any man to glibly cast irresponsible dispersions upon them, or to encourage the genicidal philosophy that he espouses.

Mr. President, I ask unanimous consent that this entire article which appeared in the Journal of Commerce on December 3, 1969, entitled "Congress Gets Foreign Economic Initiative" be inserted in the RECORD at the conclusion of my remarks.

Mr. President, I strongly support this legislation and urge its passage.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Journal of Commerce, Dec. 3, 1969]

CONGRESS GETS FOREIGN ECONOMIC INITIATIVES

(By Richard Lawrence)

WASHINGTON, December 2—A host of foreign economic initiatives was suggested for the United States today, ranging from a major new trade negotiation and codes to guide international investment policy to a bigger food aid program to stamp out malnutrition around the world by 1980.

The recommendations came from a diverse panel of Congressional witnesses, but each interested in promoting a better international economic climate.

FIRST PRIORITY

Arthur K. Watson, board chairman of IBM World Trade Corp., told a joint Congressional subcommittee that a more flexible exchange rate system should be the "first priority" of U.S. foreign economic policy in the 1970s.

A Japanese businessman—Akio Morita, Sony Corp. executive vice-president—called on the United States to boldly take the lead for an international negotiation to reduce or end worldwide non-tariff trade barriers.

Former Agriculture Secretary Orville Freeman urged a larger American effort to wipe out world hunger. He also championed a series of international commodity agreements to bring supply into better balance with demand.

One other subcommittee witness—Prof. E. B. Neufeld of Toronto University—echoed Mr. Watson's thoughts about more flexible exchange rates, but also recommended U.S. action in the field of international investment.

INTERNATIONAL RULES

International rules, he said, ought to be devised for such problems as extraterritoriality, including antitrust regulations, export controls and balance of payments restrictions. Governments also should lay down common rules for operations of multinational corporations, he said.

While conceding political problems, Prof. Neufeld tried to encourage the United States to move toward complete free trade with Canada. On "strictly economic grounds," he said, a U.S.-Canadian free trade pact "may well have substantial appeal."

The opinions were delivered at the start of a long set of hearings to try to chart U.S. foreign economic policies for the 1970s. Rep. Hale Boggs (D-La.), chairman of the Joint Economic subcommittee seeking the policy options, promised today that "no significant viewpoint" will be overlooked.

The hearings, he said, will delve into trade, foreign investment and aid, with businessmen, academicians and former government officials slated to testify. Late next year, the Congressional unit will publish its findings, as a guide for both Congress and the administration.

"I am convinced," said Mr. Watson today, "that a degree of flexibility must be returned to monetary arrangements and I believe that world business can live with more frequent and therefore smaller exchange rate adjustments. We much prefer them to the trauma and uncertainty of today's arrangement."

Mr. Watson's testimony indicated that after years of resistance business leaders are coming around to accepting as desirable something other than rigid exchange rates. A lot of today's problems, he said, stem from somewhat outdated international trade and monetary rules. "There is a built-in tendency," he said, "for (economic) imbalances to continue too long."

Mr. Watson lauded U.S. trade policy over the past 30 years as contributing to an unprecedented world growth. The "second priority" for the '70's, he said, ought to be prompt passage of the administration's new trade bill.

By making government help for the import-stricken easier to get, some of the protectionist pressures in this country may be diluted, he suggested. The bill also would help pave the way for nontariff trade negotiations, the IBM executive said. He refuted charges that American business, by investing abroad, is "exporting" jobs. Rather, he said, jobs are being "traded", to U.S. advantage. He cited a 3.6 million increase in U.S. manufacturing employment during the last 10 years.

JOBS CREATED

American jobs, he said, are being created in high profit, high wage industries like computers, while the import surge has been largely in "the older, lower wage and lower technology," industries.

"It would be absurd . . . to predicate future policy on the idea that we are raising another generation of mill hands in America." He added, "I'd personally rather have my son in the automotive than in the footwear or textile industries."

Mr. Watson endorsed President Nixon's recent decision to work for general tariff preferences for the developing nations. And, if a generalized system cannot be developed, "I see nothing wrong with recognizing Latin America and perhaps some Asian nations, certainly including The Philippines, as objects of special concern."

Mr. Morita recommended that in nontariff trade negotiations, the United States first tackle the easier problems, such as formulating international rules in health, sanitary and technical standards and harmonizing patent laws.

TARIFF IS ONLY ONE NEEDED MEASURE

Mr. FANNIN. Mr. President, our problem in this international trade area is the fact that we have allowed ourselves to be priced out of the international markets largely because of labor leaders' demands for wage increases that outstrip productivity. Thus we are faced with a situation where not only are we unable to compete in world markets, but right here at home the U.S. market is flooded with merchandise that threatens the jobs of millions of American workers.

There can be no doubt that we are confronted with some serious trade difficulties today. One of the most alarming facts is that the surplus in our balance of trade—that is, of exports over imports—has virtually disappeared. In the early 1960's this country had a trade balance in its favor of $5 to $6 billion a year. This went a long way to offsetting other elements in the balance of payments, such as foreign aid and foreign investments which have shown a greater outflow of dollars than inflow to this country. By 1968 our trade balance fell to less than $1 billion, and there seems to be no immediate prospect for an improvement this year or even in 1970. And it is not because our exports have shrunk. On the contrary they have been growing at about 8 or 9 percent a year, and by 10 percent last year although much of this increase results from inflation. At the same time, imports rose even faster, by a full 24 percent last year. And here we come to the crux of our difficulty, or at least one of them. We have been losing jobs to our overseas competitors at a rate that cannot be anything but disturbing to us. As the Secretary of Commerce, Maurice Stans, pointed out in September:

If imports of textiles and apparel continue to grow at the present rate there could be a loss of 100,000 jobs a year in this country. (U.S. News & World Report, Sept. 8, 1969, p. 56.)

It is this relationship between inflation and our foreign trade that is far too often lost sight of in the course of labor-management contract negotiations, by labor representatives who push for wage gains that are higher than productivity increases warrant, and by management spokesmen who give in to excessive wage demands in the belief that the consumers will be willing to pay the additional tab.

There is no question that many foreign producers are becoming more advanced in their technology, in their management, in their marketing skills and are consequently becoming increasingly competitive. Their modernization has in many cases followed the American model.

Part of this increased efficiency of production abroad is due to the rapid rise in American owned plants and facilities abroad. Instances are easy to note. The Singer Co., for example, sells its American customers two machines produced in its overseas plants for every one made in the United States. A direct consequence is that its Elizabethport, N.J., plant which once employed 10,000 workers, now employs only 2,000. The Weyenberg Shoe Manufacturing Co. of Milwaukee is currently building a shoe plant in Ireland and plans to ship its annual output of 750,000 pairs to the United States.

There is a growing trend in many parts of the world to put into effect a host of trade barriers against American goods that are a serious handicap to domestic producers. These include quotas, subsidies to their own exporters, border taxes, restrictions on purchases by government agencies and nationalized industries, and a variety of excessive technical restrictions.

How much more critical will the job situation be once we are able to pull out completely from Southeast Asia? Surely we must prepare now to see that we have jobs available for returning servicemen and for those now engaged in production for the war effort in Asia. This makes even more urgent the need to see that our domestic producers are free from unfair and indiscriminate imports from abroad.

While, as I have suggested, there are not a few cases in which we need to pro-

vide specific protection against excessive imports, it is obvious that our primary thrust must be in achieving a higher level of exports.

The responsibility of labor and management in this effort is clear as I indicated in pointing to the need for restraint in the collective bargaining process.

Others have spoken extensively on textiles and I do not wish to dwell on this long, but it is an area in which we must find agreement with Japan or face the destruction of this domestic industry. The President himself recognized the problem when, in his trade message to Congress, he said:

> The textile import problem is a special circumstance that requires special measures We are trying to persuade other countries to limit their textile shipments to the United States in return for provisions which would let foreign producers share equitably in the American market.

For far too long, American producers have been shut out of other nation's domestic markets by various trade barriers, some quite subtle. Now in this and possibly several other areas, we are simply going to have to insist on equal treatment.

American industry, and as a result our domestic economy, is caught between labor demands for wages which exceed productivity, and management's willingness to grant such unwarranted increases if they feel they can get away with it. One basic American industry played that game for too long and is now having a whale of a fight to catch up.

For years major steel producers went along with wage demands which they knew were excessive because they also knew that other domestic producers would have to go along, too. But no one said that Japanese steel producers had to abide by those agreements. As a result, for several years it has been possible to buy certain kinds of steel products—even after adding on overseas shipping costs—from Japanese producers cheaper than these same products can be bought at home. That is bringing competition right to the doorstep.

Television Digest, which is a trade bulletin for consumer-oriented electronics manufacturers, says that TV imports in the first 9 months of 1969 were up 65.1 percent over 1968. Specifically, total imports for this 9-month period were a massive 2.8 million TV sets. At the same time, our country exported for the first 6 months of 1969 a total of only 65,000 TV sets—a negligible quantity.

Of the 2.8 million imported TV sets mentioned above, you will be interested to know that some 653,000 of these sets imported to this country were manufactured by American corporations operating in foreign lands who have felt it necessary to build their plants abroad in order to be able to compete in the face of high wage rates in this country brought about by the imbalance in the laws in our country affecting labor-management relations.

Bear in mind, while total sales are apparently increasing, this same industry source says that major domestic manufacturers such as RCA and Zenith have scheduled production cutbacks with resultant layoffs. Meanwhile, one of the major Japanese labels reports its sales have increased 50 percent in every one of the last 5 years in the export market and it has continuing plans to keep up that kind of marketing.

This year will possibly be the first that domestic brands of color TV will show no increase at all in sales. What is the solution? A friend of mine who is in the electronic distribution business wrote to me·

> It is interesting to note that domestic manufacturers, almost 100%, are importing from their own foreign plants or purchasing from other Asian companies, as well as West Germany and Mexico. The Japanese are finding this competition most difficult to meet, all of which points up how decisively we must move if we are not only to keep up with Japan but all the other countries that are eager to get their products into the United States, thus displacing U.S. citizens from employment.

Later, I intend to offer legislation to further help correct the problem. My proposed assistance is this. You will note that domestic manufacturers have set up plants overseas from which they buy parts of their products. There are three reasons for this: Lower labor costs; fewer redtape problems with the Government; and they are allowed to defer the income tax on the profits of that operation.

I will propose that we allow the same kind of tax treatment to a domestic manufacturer who sets up a plant or a corporation in the United States for the purpose of building products primarily for export.

My proposal would allow a new category of domestic corporation just set up for export manufacturing. The U.S. tax on export income derived through such a corporation would be deferred as long as it is used in the corporation's business or invested in export related assets and not distributed to shareholders. Similarly, the income from such export related investments would be deferred. This would allow the income from financing the acquisition of domestic capital equipment, allocated to export production, to be deferred.

The resulting higher level of U.S. output will mean better job opportunities and will allow more tax revenues thus reducing the current cost to the Government of the deferred tax on export income.

But perhaps the most important thing this proposal would do is to help stop the job drain. This is only a small step compared to the need for action in this field.

We presently have increased demand upon our domestic industry because of the level of Vietnam spending, but when this pressure is eased, as I expect it shall be in a relatively short time, we will really be faced with much more urgent problems.

I want to make it clear that I support the action proposed by the Senator from New Hampshire this morning. He is an able and distinguished Senator and has the welfare of not only his people in his State in mind, but also the general welfare of the Nation. I applaud his efforts and support his amendment. He is taking a much needed step. The long-range solution must, however, be economic and I trust we shall be able in the future to shape legislation together that will help accomplish that objective.

Mr. COTTON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from New Hampshire has 41 minutes remaining.

Mr. COTTON. Mr. President, how much time does the the distinguished Senator from New York have remaining?

The PRESIDING OFFICER. The Senator from New York has 3 minutes remaining.

Mr. COTTON. I yield myself 1 minute. Mr. President, it is my understanding that the Senator from New York quite properly desires a quorum call in order that Senators may be appraised of the fact that we are going to have a vote.

The PRESIDING OFFICER. The 1 minute of the Senator has expired.

Mr. COTTON. Mr. President, the only speech that I want to make this morning, having listened again to all the charges about this alleged devastating measure, which is not devastating at all, is a two-word speech, "Let's vote."

If the Senator from New York will permit his 3 minutes to be used toward the quorum call, so that we will not have a rehash afterwards, I am willing to have the remainder of the time for the quorum call taken from my time.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. PASTORE. I think we ought to hear the other 3 minutes.

Mr. COTTON. That is agreeable with me.

Mr. JAVITS. Mr. President, I yield myself one-half minute.

I comment that I know of the good old New England practice of horse trading. However, I must yield 1 minute at this time to the distinguished Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 1 minute.

Mr. HART. Mr. President, I wish to join in opposing this proposed amendment to the tax reform bill. The amendment is not germane to the legislation before the Senate. Clearly, the subject matter with which it deals should be fully considered by the Congress after deliberation by the appropriate committees and a full opportunity for debate and public comment.

The President, on November 18 of this year, sent to the Congress a comprehensive message on trade and submitted his bill to the Congress. This measure, at the request of the administration, has been introduced by Chairman MILLS of the Ways and Means Committee for himself and for Mr. BYRNES of Wisconsin, the ranking Republican on the Ways and Means Committee. I understand that hearings will commence early next year, and in due course the Senate Finance Committee and the Senate will consider this measure. President Nixon, in submitting this bill to the Congress, has continued a bipartisan tradition of support

of liberal trade policies endorsed by six successive administrations.

Certainly, Mr. President, it is within the context of trade legislation, rather than the tax measure which is now before the Senate, that the amendment of the Senator from New Hampshire should be examined.

This amendment appears to be dealing with two serious problems in international trade policy. In my view, however, the amendment does little to contribute to a solution of these problems and is unnecessary. One part of this amendment ostensibly deals with the problem of disruption or injury to U.S. industries, firms, or workers, due to imports. Mr. President, there is extensive law on this subject and President Nixon's proposed bill proposes important changes in the procedures by which such determinations shall be made. The other part of this bill—discrimination against American exports—also is dealt with in the President's bill and also will receive careful consideration.

It would not be wise to attempt to perfect the language of this amendment by drafting on the floor of the Senate. Rather, it would appear to be the better part of wisdom to consider trade legislation in an orderly fashion. Therefore, Mr. President, I will vote against this proposed measure and urge my colleagues to do likewise.

Mr. BYRD of West Virginia. Mr. President, will the Senator yield?

Mr. COTTON. Mr. President, I yield 3 minutes to the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized for 3 minutes.

Mr. BYRD of West Virginia. Mr. President, the free trade amendment that has been introduced by the distinguished Senator from New Hampshire (Mr. COTTON) should go a long way toward protecting our perishing industries and the jobs of millions of Americans.

The amendment authorizes the President to impose, by proclamation, restrictions against imports when foreign countries export products to the United States at will, but establish restrictive tariffs on the importation of American products into their own countries. It directs the President to remove such tariffs, imposed by proclamation under this amendment, once the foreign country in question does away with its restrictions on products manufactured in the United States.

Mr. President, I am proud to join in supporting this amendment, which serves notice to all the world that free trade is indeed a two-way street; and that the time is past when the United States will offer the jobs of its citizens as sacrificial lambs at foreign policy bargaining tables.

I recently introduced, along with my distinguished colleague (Mr. RANDOLPH), S3022, a measure to regulate the rate of foreign imports in selected industries—glassware products, flat glass, electronic products, footwear, steel, and man-made fibers. These industries provide nearly 25 percent of all the manufacturing jobs in West Virginia—jobs that West Virginia, like every other State in the Nation, cannot afford to lose.

The unchecked flow of cheap products from practically every country into the United States poses a serious threat to our working men and women. Both S. 3022 and the amendment offered by the distinguished Senator from New Hampshire are designed to alleviate that threat and rescue America from the role of being a dumping ground for cheap goods produced by cheap labor from abroad. Neither is designed as a restrictive measure, but rather as a measure that will enable America to compete more equitably in the world marketplace—with a work force employed to its fullest potential.

Mr. President, I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from New York is recognized for 1 minute.

Mr. JAVITS. Mr. President, I think the arguments have been very well marshaled on both sides.

I wish to address an inquiry to the Chair concerning the amendment of the Senator from New Hampshire. I have the greatest respect and regard for him. It is my purpose when the time has expired or has been yielded back to seek a quorum.

Mr. President, it is my intention to suggest the absence of a quorum after the time has expired. Am I correct that I need no time remaining to call for a quorum?

The PRESIDING OFFICER. The Senator has a right to call such a quorum after all time has been used or yielded back.

Mr. JAVITS. Mr. President, also, I have a right to move to table the pending amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. JAVITS. Mr. President, I would not do that as a tactic, because I have the deepest regard for the Senator from New Hampshire. I think I could say safely that I would never move to table an amendment of his as a tactic. However, I submit to him for his really sympathetic consideration the fact that one of the most important arguments against his amendment is the fact that it does not belong in the pending bill. It does not belong in this bill especially in view of the fact that we have a Presidential message concerning which I think the Senator from Rhode Island (Mr. PASTORE) in a most interesting way made the best argument against the amendment.

The Senator from Rhode Island pointed out that when he went to the White House, then President John F. Kennedy said:

> I am sorry, my old friend, John, but I have a much bigger panorama now that I must deal with. It is much different from that of the United States Senate as a whole. I appreciate and value the views of my friends and former colleagues. I appreciate the fact that they fight for what they believe is in the best interest of their country.

The economy of New England has changed rapidly. Our economy has changed rapidly. We cannot continue to have a wagon wheel industry forever. However, be that as it may, I feel that the issue should be tested as whether we should try to put this issue in this bill and in this compass or not. And the only way in which I can test that is by a motion to table.

I apologize to the Senator from New Hampshire, who is a most distinguished Senator, but I feel that it is my duty to test the question by a motion to lay on the table.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COTTON. Mr. President, I yield 1 minute to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 1 minute.

Mr. JAVITS. Mr. President, that is the only way I can test out the question without testing what will be done on another vote, if that loses, on the substantive matter involved.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. COTTON. I yield 3 minutes to the Senator from Rhode Island.

Mr. PASTORE. Mr. President, inasmuch as a question was raised about my arguing on the side of the amendment, the business of these restrictions has been a new gimmick invented since the days of John Fitzgerald Kennedy.

They meet with us in GATT and on the Reciprocal Trade Agreements. They then undermine us with these unilateral prohibitions and limitations. That is not what we are trying to get at.

No one is trying to disturb free trade or the trade expansion agreement. No one is trying to do that at all.

What we are saying is that we want to be treated the way we treat them. We are the only Nation in the free world that does not have a limitation. Every nation has limitations against American exports.

We are saying that where a nation has imposed restrictions against us, we ought to insist upon the removal of those restrictions or we should impose restrictions against them.

All of this came about in recent years. That is the reason why we are in this trouble today.

I know the point of the Senator from New York. And I have been just as much a free trader as he has been. And I still am. But I am saying to Japan, Italy, France, and the other nations, "You take the restrictions off that are imposed against American goods, if you expect us not to impose restrictions against your goods."

What is wrong with that?

Mr. COTTON. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 3 minutes.

Mr. COTTON. Mr. President, I wish to point out to the distinguished Senator from New York that I appreciate his kindly feelings toward me. I reciprocate.

His speech last night was hardly a tribute to the supposed intellect of the Senator from New Hampshire. It was rather patronizing, but that is fair in this debate. As far as the Senator from New York exercising his right to move to lay the amendment on the table, he

does not need to apologize to me for exercising any right he has. I do not consider it in any way to be an action taken against me. If the Senator wants to deal with the question in that manner, he may do so.

I would like to say that this is not a protectionist approach. It simply says to the President, "If you need and feel you ought to do some of these things to make trade truly free trade on a two-way street, we want you to know that the Senate will authorize you to do so." But it goes on to say, "If you do, and the country involved removes its restrictions then you shall immediately remove ours."

If that is a threat, if that is an affront, if that is going to disrupt our foreign relations, I just cannot understand it.

Mr. President, in closing this debate, I ask unanimous consent to have printed at this point in the RECORD excerpts from one letter that I selected from many, many letters I have received in the past few weeks. It is a rather pathetic letter from Mrs. Evelyn Erickson, 44 Lone Star Avenue, Farmington, N.H., dated October 21, 1969.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

FARMINGTON, N.H.,
*October 21, 1969.*

DEAR MR. COTTON: I have done as much as I can to obtain help in our problem. I have even written letters to the local shopping centers where these shoes are sold and told them that my buying power is gone because by selling these shoes that I have very little work and that my factory is in financial difficulty and I know it too could close at any time. I said multiply me by all the shoe workers and you have to eventually feel it too. I asked them to place my letter in the right hands of the owners of these J. M. Fields, etc. to put my case before them to plead for *voluntary restrictions* on *buying* these *foreign made shoes*. For five winters at least we have seen this coming to our factory, but this is the worst year I have ever seen. We are usually busy by this time of the year. We usually have 25 or 30 racks in our line to do a day. When I left Thursday night there were 3 racks and a couple with nearly no work on them at all. A case or two. Some girls have no work at all. Out for a week at a time, some get a day's work in a week. The steward told me not to quit as they have some 800 cases of women's shoes but to us this is not much. We get $1.50 to $4.50 roughly a rack of 10 cases, so 800 cases won't hold us workers long. But these same cases bring the stitchers $2.00 and more or less pr. case. We get pennies per case.

Someone should be watching things like these foreign imports. I believe we should help people but charity begins at home.

* * * * *

We need help so badly. Some of the men are leaving and trying to get into other jobs. One started at age 16 to be a cutter and is 49 years old now and is leaving. That's a long time to spend in one shop and at 49 to have to leave it.

* * * * *

I want to have that same measure of faith that God is able to help us in our times of need but this really isn't an easy one but He is able to move things for us and I pray He will and soon.

MRS. EVELYN ERICKSON.

Mr. PROXMIRE. Mr. President, I rise to oppose the Cotton amendment. I do so for many reasons.

First of all, it is hastily and generally drawn. Its meaning is unclear. Its implications for the export trade of this country are ominous. It takes an end run around the laws and proceedures and protections which have been hammered out by statute and by negotiation ever since Cordell Hull first nursed the Reciprocal Trade Act through Congress.

It means higher prices for the consumer. Tariffs and restrictions raise the price of goods. They are a subsidy paid for by the ordinary people of this country through higher prices.

This amendment would avoid the antidumping laws and substitute for them, and their requirement that proof and evidence be submitted, strong political and regional pressure on the President of the United States to do by proclamation that which could not be proven under the law.

This amendment would be an end run around the escape clause provisions of the tariff acts.

This amendment could spell disaster to the billions of dollars of American goods which the United States sells abroad. It could mean a great reduction in farm prices, since any action under this amendment would, in my judgment, bring quick retaliation from every importing country in the world. And farm products are among our biggest exports.

This amendment violates the whole idea of freer trade, competitive industry, and international markets. No country can be self-sufficient. It is silly to grow bananas on Pike's Peak or to grow jute in New Hampshire. These products should be imported from those countries which produce them more cheaply, more efficiently, and who have a natural climate in which they grow.

But under this amendment the President could act against banana imports if they tended to hurt some inefficient American producer.

This country has a great genius in industrial production. We are more efficient than most countries in this endeavor. We should concentrate on those things in which we have a natural advantage. But we should properly buy from abroad those things where they are more efficient.

To give the President the authority, and then to press him for action, to place barriers against imports which in some way may harm an inefficient American producer, goes against every principle of freer trade, capitalism, competitive industry, and a market economy.

What we should be doing is pressing every country to remove restrictions on trade. Instead, this amendment is based on the premise that one restriction should lead to another—that two wrongs make a right. That is not true. That will stifle trade and industry and our economy. That is the road to ruin and restriction and recession.

This amendment should be rejected. It fails to meet the real problems of freer trade and the real problems of restrictions, wherever they may lie. It substitutes a meat ax for a scalpel.

It would harm the farmers. It would harm our efficient industries. It would hurt shipping. It would protect the inefficient.

It has little merit. It should be rejected.

Mr. COTTON. Mr. President, I understand that the time of the Senator from New York has expired. I yield back the remainder of my time. Let us vote.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ALLEN in the chair). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I move to table the pending amendment.

Mr. BYRD of West Virginia. Mr. President, I ask for the yeas and nays on the motion to table the pending amendment.

The yeas and nays were ordered.

Mr. COTTON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. COTTON. It is my understanding that under this vote, a vote "nay" would be a vote for the amendment.

The PRESIDING OFFICER. The Senator's understanding is correct.

Mr. PASTORE. It would be a vote not to table the amendment.

The PRESIDING OFFICER. A vote "nay" would be a vote not to table the amendment. The vote would then come on the amendment.

The question is on agreeing to the motion of the Senator from New York. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 22, nays 73, as follows:

[No. 199 Leg.]

YEAS—22

| | | |
|---|---|---|
| Case | Harris | Mondale |
| Cranston | Hart | Nelson |
| Eagleton | Hatfield | Percy |
| Ellender | Jackson | Proxmire |
| Fong | Javits | Tydings |
| Goodell | Kennedy | Williams, N.J. |
| Gravel | Mathias | |
| Griffin | Metcalf | |

NAYS—73

| | | |
|---|---|---|
| Aiken | Bible | Church |
| Allen | Boggs | Cook |
| Allott | Brooke | Cooper |
| Baker | Burdick | Cotton |
| Bayh | Byrd, Va. | Curtis |
| Bellmon | Byrd, W. Va. | Dodd |
| Bennett | Cannon | Dole |

| | | |
|---|---|---|
| Dominick | McCarthy | Saxbe |
| Eastland | McClellan | Schweiker |
| Ervin | McGee | Scott |
| Fannin | McGovern | Smith, Maine |
| Gore | McIntyre | Smith, Ill. |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Fulbright | Mundt | |

So Mr. JAVITS' motion to lay Mr. COTTON's amendment (No. 342) on the table was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment of the Senator from New Hampshire (Mr. COTTON).

All time on the amendment has now expired.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from New York will state it.

Mr. JAVITS. Do I correctly understand that we vote now on the substance of the amendment, and that a vote of "yea" will be to approve the amendment, and a vote of "nay" will be to reject it?

The PRESIDING OFFICER. The Senator is correct.

Mr. YOUNG of Ohio. Mr. President, I ask that the Chair direct that throughout the remainder of today all attachés will either be seated beside their Senators or, in any event, will be seated in the rear of the Chamber, and that the Sergeant at Arms be directed to keep the Chamber clear.

Mr. ALLOTT. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. YOUNG of Ohio. Mr. President, I ask that the Presiding Officer make that order to clear the aisles of everyone not a Senator, and that all attachés must be seated in the rear of the Chamber, or leave the Chamber, unless their Senators specifically request that they remain in the Chamber. That would, of course, not include members of the staff of the chairman of the Finance Committee.

The PRESIDING OFFICER. All attachés will take their seats.

Mr. RANDOLPH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from West Virginia will state it.

Mr. RANDOLPH. Is the Senate in order when the well of the Chamber is filled with those persons who are walking around? [Laughter.]

The PRESIDING OFFICER. All Senators will please return to their seats.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 65, nays 30, as follows:

[No. 200 Leg.]

YEAS—65

| | | |
|---|---|---|
| Allen | Fannin | Pastore |
| Allott | Gurney | Pearson |
| Baker | Hansen | Pell |
| Bayh | Hartke | Prouty |
| Bellmon | Holland | Randolph |
| Bennett | Hollings | Ribicoff |
| Bible | Hruska | Russell |
| Boggs | Inouye | Saxbe |
| Brooke | Jordan, N.C. | Schweiker |
| Byrd, Va. | Jordan, Idaho | Scott |
| Byrd, W. Va. | Long | Smith, Maine |

| Ervin | Muskie | |

NAYS—30

| | | |
|---|---|---|
| Aiken | Griffin | Mondale |
| Burdick | Harris | Moss |
| Case | Hart | Nelson |
| Cooper | Hatfield | Packwood |
| Cranston | Hughes | Percy |
| Eagleton | Jackson | Proxmire |
| Fong | Javits | Tydings |
| Goodell | Kennedy | Williams, N.J. |
| Gore | Mathias | Williams, Del. |
| Gravel | Metcalf | Yarborough |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Fulbright | Mundt | |

So Mr. COTTON's amendment was agreed to.

Mr. COTTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE, Mr. RANDOLPH, and Mr. THURMOND moved to lay the motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. SCOTT. Mr. President, the amendment just acted on does not diminish the revenue to the Treasury.

I supported the Cotton amendment to authorize import quotas not because I believe it to be a proper concern of the tax reform bill, but because I wish to register again my deep concern for those hard-working individuals employed by the shoe industry, the textile industry, the steel industry, and others. The very livelihoods of these people are at stake here, and I cannot stand idly by while Pennsylvania continues to be hurt by the present level of import quotas.

The Cotton proposal has been challenged because no hearings have been held on the President's recent trade bill, from which this amendment was excised. This criticism has some validity. The proposal has also been challenged because it may not work. This may be a valid point. But I cast my vote for this amendment in the hope that the administration will recognize the very critical problem encountered by some of our domestic industries.

## OIL SHALE DEFINED

Mr. PROXMIRE. Mr. President, I would like to ask the distinguished chairman of the Finance Committee whether the sentence on page 181 of the Finance Committee's report on H.R. 13270 defining oil shale was intended to change the detailed definition on page 104 of part 2 of the Ways and Means Committee Report.

Mr. LONG. No, that sentence was just intended to be a very general introduction to section 504 of the bill. It was not intended to provide a technical definition of oil shale.

## ARTICLE I STATUS FOR THE U.S. TAX COURT

Mr. TYDINGS. Mr. President, sections 951 to 962 of the pending tax reform bill work a substantial change in the present status and procedures of the U.S. Tax Court. These sections create, by statute, a long-needed small claims procedure and confer article I status on the court.

The need for a small claims procedure has long been advocated by my colleague, the senior Senator from Washington (Senator MAGNUSON), and he has been joined in his efforts by many of us. I am gratified to see that this tax bill recognizes the need for better treatment for those having small tax disputes with the Government.

By granting article I status to the Tax Court, the bill works a substantial change and elevates the court from its current status as little more than an administrative section of the Treasury Department. Giving the Tax Court article I status is a major improvement; but it does not confer true judicial status upon the court nor does it alleviate the myriad of problems plagueing our tax litigation system.

The Federal tax litigation machinery desperately needs a complete overhaul.

The Subcommittee on Improvements in Judicial Machinery, of which I am chairman, has been engaged in a continuing study of our Federal tax litigation procedures. Our inquiry had its genesis in the hearings held during the 90th Congress on a proposal to grant article III status to the Tax Court. Those hearings revealed that there are serious defects and deficiencies in the structure of the litigation system, which often give rise to gross inequities in treatment among different taxpayers.

As a result of the further studies which came as a result of these revelations, I introduced last year and again in the present session a series of measures calculated to reform the tax litigation system. Hearings of these measures were held by my subcommittee in May of this year, at which time many of the most knowledgeable people in the field addressed themselves to the problems in the structure of the system and suggested possible remedies.

Conferring article I status makes the

Tax Court more like a court. That is salutary but it does not supply the complete answer and that answer must await another day.

I cannot conclude my remarks on the pending legislation without commenting on one further feature of the bill. Under section 954 a judge of the Tax Court will be forced to retire at age 70. That is a salutary provision. I have proposed similar legislation, S. 1507, for all Federal judges, and I note that such a retirement system, in my mind, is not a conflict with article III of the Constitution.

This mandatory retirement age will assure that the benches are manned by men who are physically and mentally able to do the work.

I would also like to point out for the record that the judges of the Tax Court, although now not truly judges, are learned in the law and are dedicated to their "judicial" task. They have worked without the shelter and gift of true independence which other Federal jurists have. This legislation will bring them much closer to that day when they will be joined with the rest of the Federal judiciary.

## MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Geisler, one of his secretaries, and he announced that the President has approved and signed the following acts:

On December 5, 1969:

S. 2056. An act to amend title 11 of the District of Columbia Code to permit unmarried judges of the courts of the District of Columbia who have no dependent children to terminate their payments for survivors annuity and to receive a refund of amounts paid for such annuity; and

S. 2276. An act to extend for 1 year the authorization for research relating to fuels and vehicles under the provisions of the Clean Air Act.

On December 9, 1969:

S. 2185. An act to authorize a Federal contribution for the effectuation of a transit development program for the National Capital region, and to further the objectives of the National Capital Transportation Act of 1965 (79 Stat. 663) and Public Law 89-774 (80 Stat. 1324).

## EXTENSION OF LEGISLATION CREATING THE NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 91-202)

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was referred to the Committee on Labor and Public Welfare:

*To the Congress of the United States:*

Americans have long given their first concerns to the protection and enhancement of Life and Liberty; we have reached the point in our history when we should give equal concern to "the Pursuit of Happiness."

This phrase of Jefferson's, enshrined in our Declaration of Independence, is defined today as "the quality of life." It encompasses a fresh dedication to protect and improve our environment, to give added meaning to our leisure and to make it possible for each individual to express himself freely and fully.

The attention and support we give the arts and the humanities—especially as they affect our young people—represent a vital part of our commitment to enhancing the quality of life for all Americans. The full richness of this nation's cultural life need not be the province of relatively few citizens centered in a few cities; on the contrary, the trend toward a wider appreciation of the arts and a greater interest in the humanities should be strongly encouraged, and the diverse culture of every region and community should be explored.

America's cultural life has been developed by private persons of genius and talent and supported by private funds from audiences, generous individuals, corporations and foundations. The Federal government cannot and should not seek to substitute public money for these essential sources of continuing support.

However, there is a growing need for Federal stimulus and assistance—growing because of the acute financial crisis in which many of our privately-supported cultural institutions now find themselves, and growing also because of the expanding opportunity that derives from higher educational levels, increased leisure and greater awareness of the cultural life. We are able now to use the nation's cultural resources in new ways—ways that can enrich the lives of more people in more communities than has ever before been possible.

Need and opportunity combine, therefore, to present the Federal government with an obligation to help broaden the base of our cultural legacy—not to make it fit some common denominator of official sanction, but rather to make its diversity and insight more readily accessible to millions of people everywhere.

Therefore, *I ask the Congress to extend the legislation creating the National Foundation on the Arts and Humanities beyond its termination date of June 30, 1970, for an additional three years.*

Further, *I propose that the Congress approve $40,000,000 in new funds for the National Foundation in fiscal 1971 to be available from public and private sources. This will virtually double the current year's level.*

Through the National Foundation's two agencies—the National Endowment for the Arts and the National Endowment for the Humanities—the increased appropriation would make possible a variety of activities:

—We would be able to bring more productions in music, theatre, literature readings and dance to millions of citizens eager to have the opportunity for such experiences.

—We would be able to bring many more young writers and poets into our school system, to help teachers motivate youngsters to master the mechanics of self-expression.

—We would be able to provide some measure of support to hard-pressed cultural institutions, such as museums and symphony orchestras, to meet the demands of new and expanding audiences.

—We would begin to redress the imbalance between the sciences and the humanities in colleges and universities, to provide more opportunity for students to become discerning as well as knowledgeable.

—We would be able to broaden and deepen humanistic research into the basic causes of the divisions between races and generations, learning ways to improve communication within American society and bringing the lessons of our history to bear on the problems of our future.

In the past five years, as museums increasingly have transformed themselves from warehouses of objects into exciting centers of educational experience, attendance has almost doubled; in these five years, the investment in professional performing arts has risen from 60 million dollars to 207 million dollars and attendance has tripled. State Arts agencies are now active in 55 States and territories; the total of State appropriations made to these agencies has grown from $3.6 million in 1967 to $7.6 million this year. These State agencies, which share in Federal-State partnership grants, represent one of the best means for the National Endowment to protect our cultural diversity and to encourage local participation in the arts.

In this way, Federal funds are used properly to generate other funds from State, local and private sources. In the past history of the Arts Endowment, every dollar of Federal money has generated three dollars from other sources.

THE FEDERAL ROLE

At a time of severe budget stringency, a doubling of the appropriation for the arts and humanities might seem extravagant. However, I believe that the need for a new impetus to the understanding and expression of the American idea has a compelling claim on our resources. The dollar amounts involved are comparatively small. The Federal role would remain supportive, rather than primary. And two considerations mark this as a time for such action:

—Studies in the humanities will expand the range of our current knowledge about the social conditions underlying the most difficult and far-reaching of the nation's domestic problems. We need these tools of insight and understanding to target our larger resources more effectively on the solution of the larger problems.

—The arts have attained a prominence in our life as a nation and in our consciousness as individuals, that renders their health and growth vital to our national well-being. America has moved to the forefront as a place of creative expression. The excellence of the American product in the arts has won worldwide recognition. The arts have the rare capacity to help heal divisions among our own people and to vault some of the barriers that divide the world.

Our scholars in the humanities help us explore our society, revealing insights in our history and in other disciplines that will be of positive long-range benefit.

Our creative and performing artists give free and full expression to the

American spirit as they illuminate, criticize and celebrate our civilization. Like our teachers, they are an invaluable national resource.

Too many Americans have been too long denied the inspiration and the uplift of our cultural heritage. Now is the time to enrich the life of the mind and to evoke the splendid qualities of the American spirit.

Therefore, I urge the Congress to extend the authorization and increase substantially the funds available to the National Foundation for the Arts and Humanities. Few investments we could make would give us so great a return in terms of human understanding, human satisfaction and the intangible but essential qualities of grace, beauty and spiritual fulfillment.

RICHARD NIXON.

THE WHITE HOUSE, *December 10, 1969.*

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed a bill (H.R. 15149) making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, in which it requested the concurrence of the Senate.

## ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

H.R. 2238. An act to provide for the relief of certain civilian employees paid by the Air Force at Tachikawa Air Base, Japan;

H.R. 4744. An act for the relief of Mrs. Ezra L. Cross; and

H.R. 12785. An act to declare that the United States holds in trust for the Southern Ute Tribe approximately 214.37 acres of land.

## HOUSE BILL REFERRED

The bill (H.R. 15149) making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

## ORDER OF BUSINESS

Mr. TOWER. Mr. President, I intend to call up my amendment No. 407. Prior to calling it up, I ask unanimous consent that I may yield to the distinguished Senator from Michigan (Mr. GRIFFIN) to proceed on a nongermane matter for 12 minutes, without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. SCOTT. Mr. President, prior to that request, will the Senator yield so that I may pose a suggestion as to a limitation of time?

Mr. TOWER. I thought we would get a time limitation after the Senator from Michigan had spoken.

Mr. SCOTT. I withhold that request at this time.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? Without objection, it is so ordered, and the Senator from Michigan is recognized for not to exceed 12 minutes, on a nongermane matter.

## PROJECT XUAN THUY

Mr. GRIFFIN. Mr. President, we are in the midst of another holiday season. Christians are looking forward to Christmas, birthday of the Prince of Peace; and people of the Jewish faith are celebrating Chanukah.

This is a time that brings forth evidence of the goodness in people and genuine expressions of love for their fellow man. For most, this is a time of family reunion.

As Americans celebrate this year, many will need no reminder of the grim fact that we are a nation at war. For thousands of families, with sons, brothers, and husbands in the service, there will be no reunion this year—except in spirit and prayer.

For many families, the anguish of separation will be all the more poignant because they do not know whether their loved ones in service are even alive.

I speak of the families of 1,359 Americans who are either missing in action or held captive in Communist prison camps.

These men are in the hands of a ruthless enemy which flagrantly disregards accepted standards of humane treatment of war prisoners.

Both the United States and North Vietnam are bound by the Geneva Convention on Protection of Prisoners of War. So are 123 other countries, including more than 100 members of the United Nations.

The convention covers both declared and undeclared wars. In the language of the document, it applies to "all cases of declared war or of any other armed conflict which may arise between two or more of the high contracting parties, even if the state of war is not recognized by one of them." Accordingly, it binds the United States, which ratified it in 1955; the Republic of Vietnam, which agreed to it in 1953; and North Vietnam, which acceded in 1957.

But North Vietnam has not abided by the Geneva Convention.

North Vietnam has refused to provide a list of Americans it holds captive.

It has tortured prisoners—tortured them physically, and mentally.

It has refused to release the seriously sick or injured.

It has refused to allow inspection of its prison camps by a neutral third party, such as the United Nations or the International Red Cross.

And, with few exceptions, it has denied prisoners the right to correspond with their families.

There is evidence that prisoners receive both an inadequate diet and inadequate medical care. Enemy-released films and those taken by foreign news services bear witness to this. Two recently released prisoners had lost more than 50 pounds in Communist prison camps.

As of December 1, the Department of Defense was able to confirm, through various sources, that North Vietnam is holding at least 421 American prisoners. But we are certain that the Communists are holding many more prisoners than that.

We know that one U.S. serviceman has been in enemy hands for nearly five and a half years. Four others have been missing or held captive for 5 years. More than 200 Americans have been missing or captured for nearly 4 years. That is longer than any American was held prisoner in World War II.

The Geneva Convention specifically provides that the detaining power—in this case—North Vietnam—shall accept a neutral party, such as the International Committee of the Red Cross, to act as a protecting power for the prisoners. The detaining power must provide the names of prisoners to their families, as well as to the protecting power—such as the Red Cross—to be passed on to the prisoners' country of origin.

North Vietnam has consistently refused to comply with these provisions of the Geneva Convention.

Unlike the Government of North Vietnam, the United States has carefully observed the Geneva Convention.

At present, there are approximately 30,000 North Vietnamese and Vietcong prisoners of war being held in South Vietnam. All have been accorded the status and rights of prisoners of war as spelled out in the convention.

With the cooperation of the United States, the South Vietnamese Government has opened all its detention facilities to inspection by the International Red Cross. The names of prisoners have been made available to the Red Cross, and prisoners have the right to send and receive mail and packages.

Regular and impartial third party inspections have established that the six prisoner camps under control of the South Vietnamese Government conform to requirements of the Geneva Convention.

As Ambassador Rita Hauser, U.S. representative to the United Nations, said in an address on this topic last month:

> We are not claiming a perfect record on this subject. War is ugly and brutal by nature, and violations by individuals have occurred. The point is, however, that the allied command has made every effort to ensure that the Convention is applied. This includes the issuance of clear and explicit orders, and, even more important, thorough investigations and puishment of those found guilty. This policy is confirmed and supported by the continuous review, both official and unofficial, which results from free access to POW's by delegates and doctors of the International Red Cross.

The uncivilized attitude of North Vietnam toward prisoners of war has not gone unnoticed in international circles.

Secretary General U Thant of the United Nations said on October 30:

It is the view of the Secretary-General that the Government of North Vietnam ought to give an international humanitarian organization such as the League of Red Cross Societies access to the Americans detained in North Vietnam.

Only recently, the 21st International Conference of the Red Cross adopted a resolution that appeared to be aimed at Hanoi's callous disregard of its responsibilities toward prisoners of war. On September 13 at Istanbul, the Red Cross Conference approved, 114 to 0, a resolution calling upon all parties—in the words of the document—"to abide by the obligation set forth in the convention and upon all authorities involved in an armed conflict, to ensure that all uniformed members of the regular armed forces of another party to the conflict and all other persons entitled to prisoner of war status are treated humanely and given the fullest measure of protection prescribed by the Convention."

The conference took pains to note that, apart from the convention:

The international community has consistently demanded humane treatment for prisoners of war, including identification and accounting for all prisoners, provision of an adequate diet and medical care, that prisoners be permitted to communicate with each other and with the exterior, that seriously sick or wounded prisoners be promptly repatriated, and that at all times prisoners be protected from physical or mental torture, abuse and reprisal.

Mr. President, if anyone, anywhere, thinks or assumes that North Vietnam is abiding by accepted humanitarian standards, he should listen to the words of Navy Lt. Robert Frishman, who was freed a few months ago after almost 2 years in a North Vietnamese prison camp. Frishman, 45 pounds lighter as a result of his ordeal, made this public statement after his release:

My intentions are not to scare wives and families, but Hanoi has given false impressions that all is wine and roses—and it isn't so.

All I'm interested in is for Hanoi to live up to their claims of humane and lenient treatment of prisoners of war. I don't think solitary confinement, forced statements, living in a cage for three years, being put in straps, not being allowed to sleep or eat, removal of finger nails, being hung from a ceiling, having an infected arm which was almost lost, not receiving medical care, being dragged along the ground with a broken leg, or not allowing an exchange of mail to prisoners of war are humane.

Why don't they send out a list of their prisoners of war? Why do they try to keep us from even seeing each other? Certain prisoners of war have received publicity. Others are kept silent. Why aren't their names officially released? If they don't have any secondary alternatives or motives in mind, then release the names of the prisoners of war so their families will know their loved ones' status. I feel as if I am speaking not only for myself but for my buddies back in camp to whom I promised I would tell the truth. I feel it is time people are aware of the facts.

Those are the words of Navy Lt. Robert Frishman who was released with two others in August of this year.

Mr. President, perhaps it would surprise no one if I were to observe that the Vietcong, as well as the Hanoi Government, has ignored international standards of decency.

The Vietcong contends that it is not bound by the Geneva Convention. But the International Red Cross says that the Vietcong is bound since both North and South Vietnam are parties to the Geneva Convention.

But even if the Vietcong were not legally bound by treaty, there could be no excuse or justification for the savage treatment which it accords prisoners of war. The Vietcong should stand condemned in the eyes of the world for its flagrant violation of general principles of international law, apart from the Geneva Convention.

Close to 400 Americans are missing or held captive by the Vietcong in South Vietnam.

It is believed that Communist forces in Laos are holding a number of American prisoners.

I use the word "believed" because this is the crux of the problem. We simply do not know how many Americans are held prisoner by the enemy and we do not know how many are seriously wounded.

Faced with this situation, the U.S. Government is doing everything possible to ease the burden of American families who wait anxiously for word about their loved ones.

Joint teams from the Pentagon and the State Department have been holding meetings across the country briefing families and reporting candidly on the situation.

Through television news film, we have witnessed the painful and heart-rending sight of servicemen's wives traveling to Paris and other world capitals to seek information about their husbands. As one of them said to a North Vietnamese official:

"Please tell me if I am a wife or a widow."

Instead of providing answers to such questions, the North Vietnamese sought cruelly to exploit the anxiety of these brave women by "lecturing" them on the war and by trying to recruit them into the antiwar movement.

Such odysseys of agony have helped to focus attention upon a situation that the world should no longer tolerate.

What can the American people do about this shocking state of affairs?

During this season of good will I have a suggestion to advance—a suggestion which just might make a difference.

I urge all Americans, young and old, to join in a kind of "demonstration" that will register our deep concern about this appalling situation.

I call upon all Americans, regardless of their feeling about the war, to join in putting as much moral pressure as possible on those responsible.

As I noted earlier, this is the holiday season. During these busy days, Americans are addressing cards in the traditional exchange of greetings.

In the spirit of the season, my family has sent a greeting card to Minister Xuan Thuy, chief of the North Vietnamese delegation to the Paris talks.

I urge other families to send cards too; and in each case to include a message calling upon Communist authorities to release the names of American prisoners, to treat them humanely in accordance with directives of the Geneva Convention—and to free them soon.

They could be freed quickly, for example, if Hanoi would agree to negotiate a release of prisoners on both sides.

Perhaps one card will make no difference, but who can say what a million will do.

In this season of good will—in this time of yearning for peace on earth—certainly nothing can be lost by approaching Hanoi in the spirit of the season.

I am pleased to announce that the U.S. Jaycees, a nonpartisan organization of public-spirited young men, is enthusiastic about this idea; that one chapter in Virginia Beach has been working along similar lines, and that the national Jaycee organization has decided to promote the idea as a national project.

In consultation with the U.S. Jaycees, their national president, Andre C. Le Tendre, their national chairman, Wendell Smith, and other officials of the organization, arrangements have been made for a single mailing address.

Cards should be addressed to:

Project Xuan Thuy,
Box 2600,
Washington, D.C. 20013.

After the mail has been collected here in Washington, the Jaycees will arrange for delivery to the North Vietnamese leaders.

It is my fervent hope that civic, religious, veterans, and other organizations, large and small, will lend their support to this expression of national concern.

In particular, I hope college and high school students will join in this demonstration of human compassion.

It might be said that this effort will be only an exercise in futility. However, let me make this point. The men who run North Vietnam have demonstrated that they can be heartless. But they are not fools. As we have seen, they are interested in American public opinion. And they are not oblivious to world opinion.

Mr. President, I have addressed myself only to one aspect of the Vietnam war, but an extremely important one.

It is my earnest desire that some good will come from this undertaking.

If there is a favorable response, it could well hasten the time when a just and honorable peace will reign over South Vietnam.

Mr. TOWER. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from Virginia (Mr. SPONG) for 4 minutes on a nongermane matter, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPONG. Mr. President, I thank the Senator from Texas. First, I commend the Senator from Michigan (Mr. GRIFFIN) for his remarks on Project Xuan Thuy, the project of the Jaycees which has just been announced.

Mr. President, the position which the North Vietnamese have taken with regard to American servicemen held as prisoners of war is indefensible. This must be obvious to all our citizens and

to citizens of other nations of the world.

The policy followed by the North Vietnamese represents a callous disregard for these men and their families and a total failure to adhere to international agreements.

During the past few months, there have been numerous expressions of concern for the prisoners of war, the treatment of these men has been discussed by Ambassador Lodge at the Paris negotiations, and officials of international organizations have felt it necessary to call upon Hanoi for a change in policy.

Thus far, all these actions have been to no avail.

Project Xuan Thuy offers a new hope. It can provide the means for an outpouring of United States and even worldwide sentiment against the North Vietnamese position. It may provide a public pressure which will help evoke a beneficial change in the policies of Hanoi.

I am pleased to note that this project originated with the Jaycees in Virginia Beach, Va. This group of young men has worked long and hard for many months to have the project adopted on a wider basis. It is to their credit that this has happened.

The people of Virginia Beach, and of the Tidewater area of Virginia in general, are particularly close to the prisoner of war matter. There are many service-connected families in the area.

There are families with members who are suspected of being prisoners of war. There are wives living in this area who have made unsuccessful trips to Paris in attempts to gain information about their husbands.

For these reasons, I believe the Virginia Beach Jaycees are in a special position to know the anguish caused by Hanoi's action and the importance of making new efforts to assist our servicemen who are being held.

I am pleased to endorse Project Xuan Thuy, and I shall participate in it.

Mr. TOWER. Mr. President, before returning to the consideration of the pending business, I associate myself with the remarks made by the Senator from Michigan and the Senator from Virginia, and add my word of support for this project. I believe that I have probably spent more time in Southeast Asia with our combat troops than almost anyone else in Congress.

Mr. President, I have visited every one of our major combat units in Vietnam several times.

I can say without any reservation or qualification that this is the finest class of American fighting men this country has ever seen. They are not chips off the old block. They are an improvement. I include in that my own buddies from World War II.

I commend the Senator from Michigan for his endorsement of a very human project.

I think all of us have done everything we conceivably could do as Members of the Senate to try to get the release of the list of the prisoners of war from North Vietnam.

I think that now some citizen action is indicated. I hope that it will be successful.

I add my word of endorsement to that of the Senator from Michigan.

Mr. President, I ask unanimous consent that I might yield 2 minutes to the Senator from Oregon (Mr. HATFIELD) without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon is recognized for 2 minutes.

Mr. HATFIELD. Mr. President, I commend the Senator from Michigan for his presentation this morning. I associate myself with his project.

I believe that all of us should consider the fact that we are engaged today in international conferences on many subjects—arms limitations, health, food, labor, and many other important issues.

I would like to see grow out of this kind of project a greater concern on the part of our Government to engage in international talks on the handling of prisoners of war, not only in reference to Vietnam and our prisoners there today, but also with respect to prisoners of war in general.

Second, I reemphasize the point that not only do we have servicemen who are captives or held as prisoners of war, but also we have missionaries who have been captured by the North Vietnamese and are being held as prisoners.

Mr. President, I hold world opinion to be of the utmost importance in today's times. That is one reason why I avidly support the United Nations. It creates a forum for the expression of opinions.

I think that as members of great countries, the United Nations recognizes the right of free speech. We should all engage in that effort and express our personal views on these matters.

I am proud to associate myself with the Senator from Michigan in his suggestion.

Mr. TOWER. Mr. President, I ask unanimous consent that I might yield 2 minutes to the distinguished Senator from Virginia without losing my right to the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Virginia is recognized.

Mr. BYRD of Virginia. Mr. President, I concur in the views expressed by the distinguished Senator from Michigan. I am delighted that he brought the project to the attention of the Senate. I am proud that the idea was conceived and the program first initiated by the Jaycees of the city of Virginia Beach, Va.

I do not know of anything more inhumane than the way the North Vietnamese have treated the American prisoners of war.

I think it is important that the American people rally behind those Americans who have been captured and are prisoners of the North Vietnamese.

We see a lot of demonstrations these days throughout our Nation. I think one of the finest demonstrations would be a demonstration against the inhumane treatment being accorded Americans by Hanoi.

I again commend the Senator from Michigan for inviting the attention of the Senate to this program.

I believe, as does he, that it is a worthwhile project and is one which should be supported by the American people.

---

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. TOWER. Mr. President, on behalf of the distinguished Senator from Alabama (Mr. SPARKMAN) and myself, I call up our amendment No. 407 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk proceeded to state the amendment.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, reads as follows:

Page 387, strike out lines 17 through 25 and lines 1 through 7 on page 388 and insert in lieu thereof the following:

"(4) USED SECTION 1250 PROPERTY.—In the case of section 1250 property acquired after July 24, 1969, the original use of which does not commence with the taxpayer, the allowance for depreciation shall be determined in the following manner:

"(A) in the case of such section 1250 property which is residential rental housing (as defined in paragraph (2)(B)) having a remaining useful life on the date of acquisition of 30 years or more, the allowance for depreciation under this section shall be limited to an amount computed under any of the methods provided for in paragraph (1);

"(B) in the case of such section 1250 property which is residential rental housing (as defined in paragraph (2)(B)) having a remaining useful life on the date of acquisition of between 20 and 30 years, the allowance for depreciation under this section shall be limited to an amount computed under—

"(i) the straight line method,

"(ii) the declining balance method, using a rate not exceeding 125 percent of the rate which would have been used had the annual allowance been computed under the method described in clause (i), or

"(iii) any other method determined by the Secretary or his delegate to result in a reasonable allowance under subsection (a) not including—

"(1) the sum-of-the-years digits methods, or

"(2) any other method allowable solely by reason of the application of subsection (b)(4) or paragraph (1)(C) of this subsection; and

"(C) in the case of such section 1250 property which is either residential rental housing (as defined in paragraph (2)(B)) having a remaining useful life on the date of acquisition of less than 20 years, or which does not qualify as residential rental housing, the allowance for depreciation under this section shall be limited to an amount computed under—

"(i) the straight line method, or

"(ii) any other method determined by the Secretary or his delegate to result in a reasonable allowance under subsection (a), not including—

"(1) any declining balance method,

"(2) the sum-of-the-years digits method, or

"(3) any other method allowable solely by reason of the application of subsection (b)(4) or paragraph (1)(C) of this subsection."

Page 393, strike lines 1 through 7 and insert the following:

"(iii) in the case of residential rental housing (as defined in section 167 (j) (2) (B)) other than that covered by clauses (i) and (ii), or in the case of rehabilitation expenditures (as defined in section 167 (k) (3)) allowed with respect to section 1250 property, 100 percent minus 1 percentage point for each full month the property was held after the date the property was held 60 full months; and

"(iv) in the case of all other section 1250 property, 100 percent minus 1 percentage point for each full month the property was held after the date the property was held for 120 full months."

Page 393, line 8, strike out "Clauses (i), (ii), and (iii)" and insert in lieu thereof: "Clauses (i) and (ii)."

UNANIMOUS-CONSENT AGREEMENT

Mr. TOWER. Mr. President, I ask unanimous consent that the time on the pending amendment be limited to 1 hour and 30 minutes, 45 minutes to a side, the time for the proponents to be controlled by either the Senator from Alabama or me, and the time for the opponents to be controlled by the distinguished Senator from Louisiana (Mr. LONG).

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Does the Senator wish that the amendments be considered en bloc?

Mr. TOWER. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Texas is recognized for 10 minutes.

Mr. TOWER. Mr. President, the amendment which the senior Senator from Alabama and I are jointly offering will lessen to some extent the serious impact the bill before you would have on real estate, without at the same time seriously affecting the projected overall revenue gain estimated by the Finance Committee. The amendment is directed at assuring that we are able to continue to build the housing which the Nation so desperately needs and that there is a reasonable incentive to continue the nonresidential building that our urban communities need to assure their continued vitality.

Our proposed amendment will carry one step further the action of the Finance Committee when it modified the provisions of the House-passed bill to restore to residential buildings the possibility of full capital gains treatment upon sale, if the property is held long enough. Under the House bill, any depreciation taken in excess of straight line would have been recaptured and taxed as ordinary income at the time of sale. This in effect negated the House decision to retain for newly constructed residential housing the availability of 200 percent accelerated deprication.

The Finance Committee recognized this inconsistency and provided that after a 10-year holding period, the owner of residential property could start reducing the amount of this excess which would be treated as ordinary income by 1 percent a month. This, Mr. President, I commend the committee, but I am concerned that its change is still not enough to encourage the construction of sorely needed rental housing. Our amendments would reduce this required 10-year holding period to 5 years. This is still substantially longer than the required 20-month holding period under present law.

For all other newly constructed real property, both the House bill and the Finance Committee version provide for full recapture of excess depreciation, no matter when the property is sold. Although there is an undoubtedly greater need to provide incentives for the construction of housing than there is for commercial and industrial property, there is also a significant need in our cities for the removal of old, rundown, and deteriorating structures and the construction of new office buildings, shopping areas, and other needed nonresidential facilities. In order to encourage the construction of these buildings, this amendment would permit the owner of a newly constructed nonresidential building to obtain full capital gains treatment if he held the building for 18 years and 4 months. This is the same holding period that the Finance Committee's bill would have permitted for residential property—now to be reduced under this amendment to 13 years, 4 months.

This, Mr. President, would restore some semblance of balance between the treatment of new residential buildings and the treatment of new nonresidential buildings. A new residential building would be entitled to up to 200 percent depreciation and there would be required a 5-year holding period before any capital gains treatment could be achieved. The owner of a nonresidential building would be entitled to up to 150 percent depreciation and would be required to hold that property for at least 10 years before any capital gains treatment would be available.

Following through on this concept of balance between residential and nonresidential property, and to provide for a greater incentive with respect to residential property, our amendment would also modify the Finance Committee's treatment of used residential property. Under the committee's bill, all used property would be relegated to straight line depreciation. This we do not believe is adequate to attract investment into used residential property, nor to assure the first owner of a new rental project that, when it comes time for him to sell his project, there will be an adequate market for that property. To accomplish these goals, these amendments will enable the second or later purchaser of residential property, which has a useful life of 30 years or more, to utilize 150 percent depreciation as is permitted under present law.

For residential property which has a useful life of 20–30 years, the owner would be entitled to up to 125-percent depreciation. For those older properties having a useful life of less than 20 years, many of which are kept standing only because of the availability of 150-percent depreciation under present law, the owner would be entitled only to straight-line depreciation.

This, Mr. President, assures that we will continue to give a reasonable incentive to residential housing by maintaining a significant difference in the incentive available to the investor in such housing as opposed to what is available to the investor in nonresidential property. This amendment, since it restores accelerated depreciation for residential property, also provides for the application of the same recapture rules as would be available for new residential property. Thus, after a 5-year holding period, any depreciation taken in excess of straight line would gradually shift from ordinary income treatment to capital gains treatment.

One further change would be made by this amendment. Both the House and the Finance Committee bills provide for a 5-year writeoff of rehabilitation expenditures on low-rent residential properties. However, to the extent that this accelerated writeoff exceeds what it could have been under the straight-line method, the excess would be fully recaptured and taxed as ordinary income at the time of sale. To be consistent with our other changes providing for a gradual decline of full recapture after a 5-year holding period, this proposal would make the same provisions applicable to these special rehabilitation expenditures.

Mr. President, what the senior Senator from Alabama and I are attempting to do is to avoid further crippling of the production of housing. Today, when we are faced with a severe shortage of long-term mortgage money available to finance housing, and the highest interest rates in over 100 years for the limited amount of money that is available, it would be catastrophic to hamper further the incentives that now exist to produce rental housing. Last year, Congress, in the Housing and Urban Development Act of 1968, set a 10-year national goal for the production of 26 million housing units. That is 2.6 million housing units per year. Yet, in this the first year, we will be lucky if we produce 1.4 million units, about 600,000 less than the 2 million units that we should be producing this year. Prospects for next year, when we should be producing over 2.2 million units, are for a level about the same as this year; this falls short of our goal by some 800,000 units.

Congress cannot in 1 year establish a housing goal and then turn around and thoroughly decimate the prospects of achieving that goal by removing one of the principal incentives to the production of housing. Since 1954, when the existing incentives for the producton of rental housing were added to our tax laws, rental housing has played an increasingly large role in total annual housing production. In 1954, only 8.7 percent of the starts were rental units. For the first 10 months of this year, they represent 44.5 percent. It is absolutely essential that this percentage not be severely cut back by our actions on this tax bill.

This amendment will assure that this will not occur, by retaining an appropriate degree of incentive for the production of housing, while at the same time removing present provisions which might be construed as encouraging the

speculator and the quick-turnover investor. These figures which I have alluded to are set out in detail in the excellent statement of the senior Senator from Alabama on December 4, at pages 37070–37074 of the RECORD. I commend this statement to every Member of this body.

Many Senators might be wondering what the reaction of the Treasury is to this amendment. I am extremely pleased to report that the Treasury Department has today informed me that they endorse these modifications to the Finance Committee's bill. I am also pleased to report that the Department of Housing and Urban Development fully endorses the pending amendment.

I congratulate the administration for its recognition of the need to avoid too severely cutting back on the present incentives for the provision of housing and new nonresidential properties. The moderate incentives provided for by this amendment will enable us to go forward in achieving the national housing goals while not negating the tax reform goals of this important bill. I urge all Senators to join us in this effort.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. SPARKMAN. I am very glad the Senator has referred to some remarks I made on December 4 and also to the tables that were printed in the RECORD. I just refreshed my recollection by looking at those tables. I invite attention to the remarks and the tables, which are to be found on pages 37070 through 37074. I hope that Senators will look at those figures.

There never was a time when housing was more badly needed than at present, and there never was a time when housing was treated so roughly, so far as being able to build is concerned, as at present. I am sure the Senator will agree with me on that.

Mr. TOWER. I certainly do agree.

Of course, with mortgage rates at a century-high level, and having other investments which are more attractive than mortgage investments, makes it very difficult. We are really in a state of crisis insofar as home construction is concerned.

Mr. SPARKMAN. The funds are not available and, even if they were, at these rates many people would be deprived of the privilege of buying or building a home.

Mr. TOWER. The Senator is correct.

Mr. SPARKMAN. The Senator knows that I had two amendments relating to housing, and the remarks I made and the tables that both he and I cited relate to housing. Am I not correct in saying that the revised amendment Senator TOWER and I are now offering is primarily limited to residential housing.

Mr. TOWER. It is, indeed.

Mr. SPARKMAN. And that the amendment that is now being offered is a revision of the original amendment that was offered?

Mr. TOWER. It is a revision of amendments that were introduced by both the Senator from Alabama and the Senator from Texas.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. TOWER. I yield myself as much time as is necessary.

Mr. SPARKMAN. I should like to ask one more question. I hope the chairman of the committee, the Senator from Louisiana (Mr. LONG), will listen to this question. Is it not true that the revised amendment was worked out with the collaboration of the Treasury Department and the Department of Housing and Urban Development?

Mr. TOWER. The Senator is absolutely correct. As a matter of fact, we might call this the "everybody-is-happy" amendment, because the homebuilders are happy, the real estate people are happy, the Treasury Department is happy, HUD is happy, the Senator from Alabama is happy, and the Senator from Texas is happy.

Mr. SPARKMAN. How about the Senator from Louisiana?

Mr. TOWER. I hope the Senator from Louisiana is ecstatic.

Mr. LONG. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. LONG. The Treasury Department agreed to this for fear they would get something worse if they did not. That is what it amounts to, as I see it.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. CURTIS. I hold in my hand what appears to be a copy of a letter dated December 8, 1969, addressed to the distinguished Senator from Texas, signed by John S. Nolan, Deputy Assistant Secretary of the Treasury.

My question is this: Is the Senator's new, revised amendment in accord with this letter? Does it meet the conditions set forth therein?

Mr. TOWER. Yes. I should like to read the letter into the RECORD. This letter is addressed to the amendment now before the Senate, and this is the amendment that was worked out in collaboration with the Treasury Department.

Mr. CURTIS. Does the Senator's revised amendment, No. 407, from the standpoint of revenue, go beyond what Mr. Nolan has agreed to in this letter?

Mr. TOWER. It does not. As a matter of fact, the revenue impact is really relatively light.

I think we must consider that it is a very small price to pay in light of the fact that we are so far behind on our national housing goals, and we must preserve incentives for the construction of residential units in this country.

I shall read the letter from the Treasury Department into the RECORD:

DEAR SENATOR TOWER: You have requested a statement of the position of the Treasury Department on Amendments 297 and 298 to H.R. 13270, the Tax Reform Act of 1969, which you have proposed. In general, these amendments would change the provisions of the bill which allow only straight-line depreciation in the hands of a second owner (so-called "used" property) and which eliminate the phase-out of recapture of the excess of accelerated over straight-line depreciation for buildings and other real estate improvements. They would allow 150 percent declining balance depreciation if the life of the property exceeds 30 years, 125 percent if the life is between 20 and 30 years, and straight-line depreciation if the life is less than 20 years. The phase-out of recapture would be reinstituted to begin after the fifth year of ownership.

The Treasury Department will support these amendments if they are limited to housing, rather than being applicable to all real estate construction as they are in their present form. Treasury would also support a reinstatement of the phase-out of recapture beginning after the tenth year for real estate improvements other than housing if it were coupled with a limitation of Amendments 297 and 298 to housing.

It is my understanding from recent discussions with officials of the Department of Housing and Urban Development that HUD will also support the amendments in this revised form.

Sincerely yours,

JOHN S. NOLAN,
*Deputy Assistant Secretary.*

Mr. President, amendment No. 407, which is cosponsored by the distinguished Senator from Alabama and me, is precisely that which is referred to in this letter. This letter is an endorsement of amendment 407 on which the Treasury Department collaborated with us. The Treasury Department said the revenue measures, as presented, were not primarily to raise revenue but to give housing additional incentives. That is what we are seeking to do, and I think it is a most constructive amendment.

Mr. President, I ask unanimous consent at this time that the Senator from New Jersey (Mr. WILLIAMS), the Senator from New York (Mr. JAVITS), the Senator from Illinois (Mr. PERCY), and the Senator from New York (Mr. GOODELL) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 10 minutes.

Mr. LONG. Mr. President, the Sparkman-Tower amendment is a major step backwards in the area of tax reform in the case of depreciation. On an overall basis, this amendment loses $90 million in the case of two provisions dealing with depreciation. The total revenue which would have been picked up from these two provisions in the absence of the Sparkman-Tower amendment would be $350 million. In other words, the Sparkman-Tower amendment in these two areas is knocking out over one-quarter of the tax reforms, a reduction of $90 million.

The first area in which the Sparkman-Tower amendment opens up a loophole is in the case of depreciation on used property. The House and the Senate Finance Committee required that straight line depreciation was to be required in the case of used property. The Sparkman-Tower amendment restores existing law in the case of used property with a remaining useful life of 30 years or more. It provides 125 percent depreciation for used property with a useful life of 20 to 30 years remaining.

This greatly complicates existing law by substituting three different categories of depreciation rates for used property, according to estimated remaining useful life. It is very difficult to determine estimated remaining useful life in the case of used property and, as a result, the

Sparkman-Tower amendment represents an administrative nightmare.

In addition, this amendment is a bonanza for real estate speculators in used property. Increasing depreciation helps the market for new housing only very indirectly, if at all. Actually, the only part of the market for new housing it helps is the person who is a quick in-and-outer, someone who wants to dispose of new property quickly. There is $50 million loss in this provision, and it does nothing but set back the cause of tax reform. It does not really help new housing at all.

The second feature of the Sparkman-Tower amendment deals with the recapture rules. Here the Sparkman-Tower amendment sets back the cause of reform very substantially. The total revenue pickup under the recapture provisions in the House and Senate bills is estimated at $100 million. The Sparkman-Tower amendment would junk $50 million of this or, in other words, would throw out nearly one-half of the reform. It does this by easing off the recapture rules both for housing and nonhousing. The amendment loses $30 million out of the $45 million which would be picked up under the recapture rules in the case of housing and $20 million of the $55 million which would be picked up in the case of nonhousing. There really is no excuse for these changes at all. The real estate tax shelter is one of the major loopholes in existing law. The House and the Senate Finance Committee dealt with this problem only very lightly. Now the real estate industry would destroy most of that little amount in the area of recapture which the bills do accomplish.

I am well aware of the fact that the sponsors of this amendment have a letter from the Treasury Department indicating that the Treasury goes along with this amendment. We all know how these things happen. The amendment which the Senators have introduced now destroys less of the House and Senate Finance Committee bills than did an earlier amendment which they introduced. It seems obvious to me that the Treasury Department has merely endorsed this amendment to keep the sponsors from pushing an amendment which would go still further and lose still more of the reform in the committee bill.

I call special attention to the fact that this amendment eases off the recapture rules for other than housing. In fact it loses $20 million out of the total of $55 million picked up in this area. I can see no way in which this would help the housing market. The only thing it could possibly do is to draw construction workers from housing projects to nonhousing projects and in this way slow down the development of new housing.

I urge the rejection of this amendment.

Mr. TOWER. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I think that we sometimes get the idea we have to institute tax reform just for the sake of reform. Certainly, there is an incentive inherent in this proposal which will result in some people making money; but since when is it evil for people to make money? I assume this is still a capitalist country.

I think we must recognize the fact that the Government alone has not the resources to cure all the social and economic ills which exist.

One of those ills is the fact that many of our citizens—millions of them—are inadequately housed in substandard housing. Only the private sector of the economy can remedy this situation and for this sector of the economy to do so, we must give them an incentive. People are not going to invest money that does not produce a return.

I think that if people, properly motivated, make a little money off the fact that they have resolved a social or economic ill, so much the better; that is the only way problems are going to be solved.

I cannot see that just for the sake of reform, just for the sake of punishing people who are in the real estate or construction business we are going to destroy the incentive necessary to try to achieve our national housing goal; this goal will average, over the next 10 years, 2.6 million units per year. We are falling short in our first 2 years. We are falling far short. We are not going to achieve much more than half our goal over the next 2 years.

As was pointed out by the distinguished Senator from Alabama, mortgage money is tight; interest rates are high; and it is difficult to get capital into homebuilding.

I do not think that for the sake of perhaps $80 million we ought to destroy the incentive for more construction of residential units. Already the real estate people and the construction people will pay more than $1 billion in additional taxes as a result of this bill. We are just relieving them of about $80 million of it. They are still paying the big bite in this tax bill, more than any other industry, more than any other business, and more than any other trade or profession. Real estate is carrying the load. This, to me, is not a very good time for them to have to carry the load.

Mr. President, this proposal calls for $80 million to $100 million, but think how much more in the way of Government resources it is going to cost us if we cannot stimulate the private segment of the economy to build the residential units we need in this country.

Some allusion has been made to the fact that commercial property would get a little relief. Mr. President, you cannot rehabilitate the poor cities in this country unless you provide both adequate residential and commercial construction. Where people live they need certain commercial facilities. They need retail outlets, and they need goods and services. So we have to have commercial building.

The big relief in the amendment proposed by the Senator from Alabama and me is that there will be a stimulus for the construction of residential units of all types, single-family and multifamily units of all types.

That is what is so desperately needed in this land today. I certainly hope that the Senate will, in its wisdom, adopt this highly constructive amendment, designed to try to help us achieve the goal of 26 million residential units in 10 years. We will never resolve the problem of the core cities until people are adequately housed.

We have passed housing bill after housing bill aimed at promoting construction of low-income housing and in promoting home ownership for low-income families.

Think what a great stabilizing influence that would be on our society, if most of the low income families in this country could own their own homes.

That is what we are aiming for.

I know that sometimes I am regarded as some kind of mossback reactionary, but this is one area in which I am a liberal since I believe that the key to a stable society and to a prosperous society, the key to self-respect and pride in people, is the ability to own our own homes.

That is the thrust of the amendment being offered by the Senator from Alabama and me.

Mr. President, I ask unanimous consent that I may suggest the absence of a quorum with the time consumed by the call not to be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCARTHY. Mr. President, will the Senator from Texas yield?

Mr. TOWER. Mr. President, I yield such time to the Senator from Minnesota (Mr. McCARTHY) as he may deem necessary.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. McCARTHY. Mr. President, on January 18, 1962, before the Joint Committee on Internal Revenue, former Secretary of the Treasury Douglas Dillon, in connection with legislation recommended by the Treasury at that time, stated:

> The existing depreciation guidelines are outmoded and in need of revision.

It is my understanding that in order to give more realistic recognition of obsolescence and technological trends, the Internal Revenue Service adopted Rev. Proc. 62–21 on July 17, 1962, to provide a comprehensive and basic reform in guideline lives for depreciation of a great variety of categories of personal property; however, the section relating to depreciation of buildings provided no basic reform and the revision at that time was limited to a listing of composite lives only of limited types of buildings somewhat less advantageous than those contained in bulletin "F."

Mr. President, in view of the material restrictions contained in this bill on the methods of depreciation and the provision relating to recapture of depreciation, the Treasury Department should reduce the guideline lives of buildings and their components in keeping with the statutory requirement that a "rea-

sonable allowance" for depreciation be allowed including technical and economic obsolescence of the various types of buildings and their components.

Mr. President, despite the Nation's requirement for a drastic increase in housing for low- and middle-income Americans in the decade ahead, the Senate Commitee on Finance has reported a bill which runs counter to this goal. Under proposed legislation, all purchasers of section 1250 used property, are limited to the straight line method of depreciation. Current depreciation schedules are retained for certain low- and moderate-income housing projects, while all other types of residential housing are taxed with full recapture of accelerated depreciation over the straight line method for the first 10 years, with capital gains treatment after 18 years, 4 months. Nonresidential, commercial sales are to be taxed on all depreciation taken over the straight line method.

While recognizing that abuse of the depreciation schedules has occurred, I feel that the proposed legislation will seriously impair our national responsibility to provide decent housing, a decent environment, and decent neighborhoods for America's expanding urban and rural population. At least one-sixth of our population now lives under less than adequate conditions. We must move quickly to provide them with housing and supportive industries so that they may improve their lives and that of the community. The social cost of delay in the related areas of industrialization and unemployment, is an exorbitant and unwarranted expense. The time has come to provide decent housing for all Americans.

The main argument advanced in favor of the provisions affecting depreciation deductions for sellers and owners of revenue producing properties is the purported increase of Federal revenues by $1 billion. The Treasury estimate of the billion dollar per year recoupment by 1979 assumes that the current rate of investment activity in housing and related commercial construction will remain about the same. In light of rising interest rates and higher labor and construction costs, the optimism of the Treasury Department is suspect. It is quite possible that the purported increase in revenues will be offset by additional Federal expenditures in housing. By removing features attractive to investment, the Federal Government will, in the long run, have to assume many of the burdens of construction and investment now borne by the private sector of the economy.

Leon Keyserling, former Chairman, Council of Economic Advisers, in his testimony on September 26 before the Finance Committee, correctly identified the problem sought to be corrected by the tax bill when he stated:

> Equity in a narrow sense depends upon having allowable depreciation deductions equal the actual decline in the economic value of a property, and determining the actual decline is a very difficult question of fact.

Determinative data on this question is difficult to obtain. It is possible that the decline in economic value actually does occur at the rate of accelerated depreciation. The tax treatment of new housing investment, is, as Mr. Keyserling notes:

> Double barrelled because in two ways it makes the tax treatment of investment in new housing much less favorable than the tax treatment of other investments. First, any time this investor wants to sell his building, the price will be depressed because the buyer cannot take advantage of even 150 percent declining balance depreciation. Second, if the original investor does sell anyway, the Bill requires that any capital gains, up to the excess of accelerated over straight line depreciation, be taxed as ordinary income. This means that only the postponement of ordinary taxable income, but never its conversion to capital gains, will be possible under the new law. This change might be conceivably desirable if it could be shown conclusively that accelerated depreciation as to housing and other real estate investment is always excessive, and that true economic income was being converted into capital gains . . . Further, it is probable in many cases that the gain being "recaptured" was never ordinary income in the first place, but rather a wise speculation on the value of a particular capital asset. Some tightening of the tax treatment of capital gains is desirable, and this conclusion might seem to contradict what I am saying here about recapture. However, it is important to note that the recapture provisions of the current Bill apply only to investments in housing and other real estate, not to capital gains generally.
>
> I find it difficult to justify these provisions, at a time when housing and other real estate investment should be stimulated in relation to other kinds of investment.

I ask unanimous consent that extracts from Mr. Keyserling's testimony be printed in the RECORD at the conclusion of my remarks.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

> The tax effect of accelerated depreciation is to postpone ordinary taxable income from the early years of a project's life, when depreciation deductions are higher than they would be otherwise, to the later years, when these deductions are lower. (Immediate deduction of interest and other expenses, in years when reported income from the investment project is not large enough to cover them, has a similar effect of postponing taxable income.) Postponing taxable income of course postpones taxes, so the effect of accelerated depreciation is an interest-free loan as against straight-line depreciation. Accelerated depreciation is thus more favorable than straight-line depreciation.
>
> But this does not mean that accelerated depreciation is an inequitable tax concession, even in the narrow sense where equity depends solely upon having taxable income equal currently realized economic income. Equity in this narrow sense depends upon having allowable depreciation deductions equal the actual decline in the economic value of a property, and determining the actual decline is a very difficult question of fact.
>
> Assuming for the moment (although I seriously challenge) that some of those who have studied the problem are right in their finding that the actual economic or value depreciation of office buildings, and even of some other real property, is less rapid than straight-line, the primary consequence of allowing accelerated depreciation (under this assumption or finding) is that the postponed ordinary taxable income can be taken at a later date as a capital gain, taxed to favorable rates, instead of as taxable future ordinary income. This is done by selling the property, at some later date, at a price which capitalizes the ordinary income expected to accrue after that date. The current Bill is apparently designed to correct this alleged inequity (in the narrow sense of equity) of the present tax laws. But if the finding is incorrect (which I think to be the case), if the decline in economic value actually does occur at the rate of accelerated depreciation, then the capitalized value of postponed ordinary income only offsets what would otherwise appear on an investor's tax return as a capital loss.
>
> In any event, the assumptions and findings which I deem to be so highly questionable (and certainly not supported by adequate empirical testing), have no direct bearing upon the various provisions of the current Bill which effect housing. The most important of the provisions affecting housing are the elimination of accelerated depreciation for purchasers of used buildings, and the recapture provision (sec. 521). These provisions deny the housing investor most of the advantages of the double declining balance method for depreciating new buildings, even though those who have made the findings with which I disagree do not purport to show that accelerated depreciation is inequitably rapid for housing.
>
> The effect of these two provisions on an investor in *new* housing is double-barrelled, because in two ways it makes the tax treatment of investment in new housing much less favorable than the tax treatment of other investments. First, any time this investor wants to sell his building, the price will be depressed because the buyer cannot take advantage of even 150 percent declining balance depreciation. Second, if the original investor does sell anyway, the Bill requires that any capital gains, up to the excess of accelerated over straight-line depreciation, be taxed as ordinary income. This means that only the postponement of ordinary taxable income, but never its conversion to capital gains, will be possible under the new law. This change might conceivably be desirable if it could be shown conclusively that accelerated depreciation as to housing and other real estate investment is always excessive, and that true economic income were being converted into capital gains. But to my knowledge there has been no such showing as to housing, nor do I believe that such showing can be made. Further, it is probable in many cases that the gain being "recaptured" was never ordinary income in the first place, but rather a wise speculation on the value of a particular capital asset.
>
> I have stated earlier in my testimony that some tightening of the tax treatment of capital gains is desirable, and this conclusion might seem to contradict what I am saying here about recapture. However, it is important to note that the recapture provisions of the current Bill apply only to investments in housing and other real estate, not to capital gains generally. This is why I find these recapture provisions so unwarranted, at a time when housing and other real estate investment should be stimulated relative to other kinds of investment, not depressed.
>
> The combined effect of recapture and of straight-line depreciation for all acquisitions of used buildings is to make investment in residential construction much less liquid than it is presently. Since housing generally has such a long life, any decrease in liquidity is apt to depress severely investment in housing, and this is patently undesirable. It is recognized that rapid turnover is a problem, and that present phasing out of recapture may be viewed by some as inadequate to prevent unduly rapid turnover. In that case, full recapture of excess depreciation could be extended to five years, with the recaptured percentage of the excess depreciation declining by one percent per month for 100 months thereafter.
>
> Recapture and straight-line depreciation for used buildings are not the only provisions adverse to housing. The limitation on tax preferences (sec. 301), the allocation of de-

duction (sec. 302), and the limitation on interest deductions (sec. 221) also affect housing (and other real estate investment) adversely. LTP prevents investors in housing from taking the full benefit of accelerated depreciation, where the amounts involved (when combined with any other tax preferences the taxpayer may have) exceed 50 percent of economic income. ADR requires that investors in housing (and other real estate) allocate some of their deductions to the excess of accelerated depreciation over straight-line depreciation, leaving lesser amounts to be deducted from income subject to taxation, and this too reduces the benefits that can be obtained from accelerated depreciation. Although these provisions would make investment in housing less attractive to most investors, I believe, as I have explained, that they are the proper way to prevent gross abuse of the tax stimuli favoring investment in housing. However, I do not agree with the Treasury that interest and taxes paid during construction of real property improvements should be included at this time as a tax preference. My reason is that the use of this practice has received much less scrutiny than the use of accelerated depreciation, and it is not clear at this time that treatment of these interest and tax costs as a preference item is justified. It should also be noted that the Treasury proposal discriminates against housing and other real property, in that other kinds of property are not subject to similar tax treatment.

Although I do favor LTP and ADR, as I have explained, I want to emphasize that their application to housing (and other real estate investment) will have an adverse effect. For this reason it is even more important that the other provisions of the Bill damaging to housing not be adopted.

RETROACTIVE FEATURES OF THE BILL, AND SOME OTHER TECHNICAL PROBLEMS

Before leaving the subject of housing, I should like to point out some retroactive features of the Bill in its current form, and also comment on one other technical problem.

(1) The following sections of the Bill apply retroactively, in that they deny certain tax concessions on commitments made before the Bill was reported. This occurs because the income or deduction accrues after the Bill is effective, and thus is covered by its terms.

(a) Sec. 221, limitation on interest deduction: The problem here is long-term net leases entered into before the Bill was reported. Interest deductions by the lessor may be limited, even though the investor has a long-term commitment. Also, the lessor is not making unreasonably high after-tax returns over the life of the project—the effect of tax concessions, at least in significant part, is passed on to the lessee in the form of lower rental prices than would otherwise obtain:

(b) Sec. 301 and 302, LTP and allocation of deductions: Accelerated depreciation of real property is a tax preference for purposes of LTP and allocation of deductions. Even where a transaction has been committed before the Bill was reported, the transactor loses some benefit from accelerated depreciation. The allocation of deductions is most serious, because it hurts all amounts of accelerated depreciation. The LTP only hurts if the taxpayer has excess depreciation amounts greater than his other income;

(c) Sec. 521, recapture of accelerated depreciation: Persons who invested in real estate before the Bill was reported may have done so only in expectation of converting some income to future capital gains, and they have offered lower rentals in anticipation of this tax advantage. The rental commitments continue, but the tax advantage is gone.

(2) The allocation of deductions to untaxed excess depreciation would not operate fairly: A taxpayer taking accelerated depreciation only postpones taxable income (and perhaps converts later to capital gains, but not as sec. 521 is now written). However, deductions disallowed are lost forever. Therefore, deductions disallowed on account of excess real estate depreciation should be added back to basis cost for purposes of later determining capital gain. (This treatment would correspond to the treatment of that part of excess depreciation which is itself disallowed under LTP).

PROVISIONS OF THE BILL DIRECTLY AFFECTING NONRESIDENTIAL CONSTRUCTION, AND THEIR EFFECTS

In addition to all the provisions adversely affecting both housing and other real estate investment, there is one very important provision in the current Bill which applies only to nonresidential construction. This provision, in sec. 521, would limit the use of accelerated depreciation by the original owner of new non-residential structures to the 150 percent declining balance method, instead of the presently allowed double declining balance method. The 150 percent method is substantially slower than the 200 percent (double declining balance) method, and it therefore reduces very substantially the incentives for investment in non-residential construction.

The reason given for treating housing and nonresidential construction differently is that "Congress [has] expressed its desire to stimulate construction in low- and middle-income housing to eliminate the shortage in this area" (Ways and Means Report No. 91-413, Part 1, p. 166). However, as I have developed in detail earlier in my testimony, it is entirely unrealistic to posit that better housing in a better environment can be achieved by stimulating residential construction alone. Proper community development requires the blending and integration of housing, appurtenant community facilities, and commercial structures. Without the latter, developers may be unable to open up new areas for housing, because no one wants to live where there are no stores, amusements, or other attractions. This is especially true of low-income persons, because they are known to be much less mobile than persons with higher incomes (the two-car family can live where it pleases; the one-car or no-car family cannot).

Within the cities, it is especially desirable to encourage the development of commercial structures, because such buildings increase the tax base and provide the cities with sorely needed revenues. These revenues are obtained without placing additional tax burdens on urban residents, and they may thus help to stem or reverse the flow of middle-income families away from the cities, allowing a better mixture of income groups in all residential loci.

It should be clear, therefore, that there is no sound basis for limiting the tax advantages of the double declining balance method only to new housing, because proper and full development of the nation's housing requires a correlative stimulus for nonresidential construction.

The need for favorable tax treatment of new nonresidential construction can also be developed from a more general approach, comparing commercial construction with other sectors of the economy (commercial construction is the largest component of nonresidential, nonfarm buildings, and it is the one on which the Bill in its current form concentrates). As my earlier discussion indicates (see again Charts 22 and 23), investment in both housing and commercial structures has been growing much less rapidly than other forms of investment, although sound national economic and social policy requires that both of these sectors grow much more rapidly than they have been growing, and also more rapidly than GNP and other major components thereof.

The deficiency in the pace of housing investment is clearly much greater than in the pace of investment in commercial structures, but that is no reason for removing tax advantages from the latter. The present tax advantages for commercial construction are inadequate in terms of our national needs, and they should be strengthened rather than weakened. In this connection, it should be observed that the current Bill places as great an additional burden on investment in nonresidential real estate as it does on investment in producers' durables. The repeal of the investment tax credit, the only provision directly affecting investment in producer durables, is expected to yield 3.3 billion dollars in 1979, when fully effective (projections based on current volume of activity—see H.R. Report 91-413, Pt. 1, p. 16). This is only 5.6 percent of the 1968 investment in this category. In contrast the reduction in accelerated depreciation on new nonresidential buildings alone is expected to yield 960 million dollars, or 5.1 percent of the 1968 investment in such buildings, and the other tax provisions affecting real estate will certainly increase substantially the tax effect on new construction in this field, although the Committee Report does not give revenue estimates in sufficient detail to determine these effects exactly.

The immediately preceding discourse implicity assumes that there is merit in the proposition that commercial buildings (if not housing) depreciate (in an economic or value sense) less rapidly that straight line. For reasons already stated, this proposition has nowhere to my knowledge been vindicated, nor do I agree with it. A recent study by Taubman and Rasche,[1] made available to the U.S. Treasury may well have attained some influence in directions contrary to those I recommend. My analysis of this study, showing its shortcomings, is attached as Appendix Two.

The foregoing indicates that the current tax treatment of all real estate investment, both housing and nonresidential, is desirable on the general grounds of public economic policy. However, the current Bill is directed more narrowly to the question of tax equity, and it is important that the tax equity arguments be faced on their own grounds, even though I feel that these grounds are not the best grounds for resolving the basic issues of our national needs for accelerated investment in these sectors.

EQUITABLE CONSIDERATIONS

It must be emphasized that tax concessions to the real estate industry do not "enrich" real estate investors generally, as shown on my earlier Chart 27. Thus, the current tax concessions available to real estate enable lower rents than would otherwise obtain, and stimulate construction, but they do not provide real estate investors generally with inordinate gains. This indicates that the equity issue may be somewhat specious: investors in real estate generally are no better off after paying their (allegedly) reduced taxes than other investors paying (allegedly) higher taxes.

The question of equity is thus transformed into a question of resource allocation—is it proper that real estate continue to receive the economic stimulus they now receive from current tax provisions? I feel that the materials I have incorporated in this testimony provide an affirmative answer to this question.

ADDITIONAL CONSIDERATIONS

The increasing burden of State and local property taxes weighs most heavily upon resi-

[1] P. Taubman and R. H. Rasche, "Economic and Tax Depreciation of Office Buildings" (University of Pennsylvania, Wharton School of Finance and Commerce, Department of Economics, Discussion Paper No. 111, January 1969).

dential and commercial construction, and indeed upon the owners and renters of such properties, including average business people and, most importantly, families of low and lower-middle income. Federal tax concessions for real estate thus serve in part to redress the balance, not disturb it (and they are also a way for the Federal Government to ease the plight of the States and localities).

Second, as already discussed, high interest rates are more burdensome to housing and other aspects of real estate investment than to other industries, because these endeavors are much more dependent upon external financing (rather than retained earnings) and upon debt financing (see again Chart 27). These high interest rates, however, are not necessarily a true measure of either the scarcity or the value of capital for investment, but rather they are contrived by Government policy. It is therefore extremely appropriate that tax concessions to real estate be used to offset some of the distortions caused by artificially high interest rates.

Third, most other forms of investment will retain the advantages of shortened guideline lives and accelerated depreciation, and similar treatment of real estate is again a balancing force rather than a disturbing one.

Consideration of these three factors is an application of what is called the theory of second-best. As a general principle, subsidy for one industry leads to inefficient allocation of resources; but this principle applies only when there are no taxes or subsidies for any other industries. Viewed against the background of an established tax structure, containing many different types of taxes imposed by many different jurisdictions, the simple rule that subsidies cause inefficiency can no longer be applied (if it has any large validity in principle). Given the present tax structure, it seems clear that continued Federal income tax concessions for real estate are appropriate. Of course, major changes in other parts of the structure might be desirable, and it might then become desirable also to modify the tax treatment of housing and other aspects of real estate investment, but that is not a controlling factor at this time.

Another broad class of reasons for applying only with caution the general rule that subsidies, including those in the form of tax concessions, are inefficient is the incidence of external economies and diseconomies. External factors exist which cause the private signals of market prices to register only partially and inaccurately the values of everyone in the economy. Where this happens, collective action to redirect market incentives is appropriate, and special concessions become necessary. The whole field of housing, urban development, and land use is a classic example of external effects, and there are many economists who argue that such concessions for real estate development are in fact necessary for economic efficiency, not inimical to it.

Finally, in a period of inflation, the Federal tax structure (and income taxes generally) imposes an especially heavy burden on investors holding assets with relatively long lives. The problem is the tax treatment of depreciation allowances, which supposedly enable a taxpayer, in determining his income, to deduct from his revenues the amounts that are only a recovery of his initial capital costs. Taxation is based upon the principle that a dollar is a dollar, whenever it is received or paid, and the owner of property can only obtain depreciation allowances equal to his original dollar cost, even though some of the depreciation is taken many years after the cost was incurred. This means that, in a period of general inflation, the depreciation dollars deducted from revenue, which are supposed to constitute recovery of cost, are worth less (in purchasing power) than those used to construct or acquire the property. The result is that the taxpayer must pay income taxes on funds whose receipt is necessary just to maintain the value (in goods) of his investment (see Table 1).

The first column of the table shows what would happen in some arbitrary future year *t*, on the assumption that there is no change in the general price level. Revenues, costs and taxes are listed, and in this hypothetical example there is a cash flow (depreciation plus income after tax) equal to 15 percent of the assumed value of the property in that year. This cash flow represents both the recovery of the investor's cost and his income from the investment.

The second column of the table shows what would happen on the assumption that the price level in year *t* were double that in year zero, owing to inflation during the intervening period. Revenues, current costs, and the current value of the property are double what they would be with the price index at 100. Allowable depreciation, however, is not doubled, so that taxable income and thus income taxes are more than doubled (in this example, income tax is tripled). The result is that cash flow is less than doubled, and cash flow is therefore a smaller percentage of the property's value than it would be in the absence of inflation.

The third column shows how a doubling of the deprecation allowance (in proportion to the amount of inflation) would exactly compensate for the effect of inflation, reducing income taxes to twice the amount that would be collected in the absence of inflation, and thus restoring cash flow to the same percentage of current value as would be obtained if no inflation had occurred.

I do not contend that depreciation, for tax purposes, be calculated on a basis other than recovery in current dollars of initial cost—any change would make administration of the tax laws very much more difficult. However, it should be observed that office buildings have longer lives than most other assets, so the effects described here have a greater impact on them than on, say, investment in producer durables. For this reason one should perhaps make other adjustments in the handling of depreciation for long-lived assets, and shorter guideline lives plus accelerated depreciation seem appropriate.

TABLE 1.—EFFECT OF INFLATION ON INCOME AND TAXATION OF OWNERS OF DEPRECIABLE PROPERTY

| | | | |
|---|---|---|---|
| Year zero: | | | |
| Price index | 100 | | |
| Initial cost of property | $500,000 | | |
| Year t: | | | |
| Assumed price level | 100 | 200 | 300 |
| Revenues | $180,000 | $360,000 | |
| Operating and maintenance cost | 120,000 | 240,000 | |
| Gross return to capital | 60,000 | 120,000 | $120,000 |
| Depreciation allowed | 30,000 | 30,000 | 60,000 |
| Taxable income | 30,000 | 90,000 | 60,000 |
| Income tax | 15,000 | 45,000 | 30,000 |
| Income after tax | 15,000 | 45,000 | 30,000 |
| Cash flow after tax | 45,000 | 75,000 | 90,000 |
| Current value of property | 300,000 | 600,000 | 600,000 |
| Cash flow as percentage of current value | 15.0 | 12.5 | 15.0 |

Note: All data are artificially constructed for this example.

Mr. TOWER. Mr. President, I ask unanimous consent that I may suggest the absence of a quorum without the time consumed being charged to either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. LONG. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. LONG. Mr. President, I yield such time as he requires to the Senator from Delaware (Mr. WILLIAMS).

Mr. WILLIAMS of Delaware. Mr. President, I hope the pending amendment will not be agreed to. The bill, as it came from the House, would have provided $375 million in additional revenue by plugging various real estate loopholes. The Senate Finance Committee action reduced that amount somewhat, and, the bill as reported by the committee, would provide $350 million in additional revenues.

This amendment loses $90 million of that revenue—over one-fourth of it—in a further erosion of the efforts to close what has been recognized by many as one of the most glaring loopholes. We still do not have a number of them closed.

I should like to cite an example of just how this real estate gimmick could work, and to show that we not only have not done too much, but in fact have failed to do enough. This was a specific case where an individual borrowed the money from a Government agency—it was of these 100 percent financed, so-called nonprofit operations—and built an apartment project down in Florida. The total cost was around $10.5 million. He had less than $25,000 of his own money involved, because it was almost 100 per cent financed. The project ultimately went broke, and so there was never anything paid as far as the Government was concerned. But during the year or two while the project was going broke, or being taken over by the Government, he took depreciation on this property, and in addition to that, being under the accrual accounting method, he accrued the interest which he should have paid, but did in fact pay, to the Government on the borrowed money. These deductions gave him a sizable tax loss each year.

Then this operator consolidated the corporation results with his other corporation for tax purposes. This meant that by filing consolidated returns he brought the losses over to his major company, where he did have a big income, and was able to write off a substantial part of those losses against this income. So he was actually writing off depreciation on buildings built not with any of his money but with the U.S. Government's money, and writing off an allowance for interest on money borrowed from the U.S. Government, where neither the interest nor any part of the principal was paid, and he got a tax benefit—a tax reduction—from all that.

This is just one example of how a person can work this real estate gimmick and make a tax profit out of a deal where he does not put up one dime of his own money.

We have not closed that loophole in this bill. A person can still go into these Government financed projects without

putting up his own money. I failed in my effort to close this loophole.

In fact, there is a provision of the bill which allows special treatment for low-cost housing projects. Under this provision, the investor can sell the property, and he does not have to pay capital gains on the profit; he then can take all of the proceeds, reinvest it in similar property, and keep pyramiding it over and over, not only not paying capital gains, but paying no taxes whatever.

I wonder how much more we want to do for this industry. I think the least we can do is stand by what little corrections the committee has made, which is a very small part of what is needed to really close this loophole. If the Senate, wants to correct some of the inequities and loopholes, I hope the committee bill will be supported and this amendment will be rejected. I personally would prefer going in the opposite direction. I tried to do that in the committee, but lost. Certainly the very least we can do now is to hold the very small attempt we have succeeded in making to close what we have recognized as one of the glaring loopholes in our tax law.

The approval of this amendment will lose $90 million in revenue.

Mr. TOWER. Mr. President, I do not think passing this amendment would give rise to speculation. You have to hold residential property for over 13 years and commercial property for over 18 years to get full capital gains treatment.

The goal of 2.6 million units a year will require about $52 billion in annual investment. What is a tax loss of $80 to $100 million a year when compared with the importance of investment in new housing? We need to attract private investors into rental housing; otherwise, the Federal Government becomes more and more involved. This will cost us more over the long pull. The Federal commitment now for rental housing is nearly $1.5 billion. That amount will drastically increase unless more private investment is made in rental housing.

Mr. PERCY. Mr. President, I am pleased to cosponsor the Tower-Sparkman amendment providing for accelerated depreciation on residential construction.

In 1934, Congress called for the construction of a "safe, decent, sanitary home for every American family." We have failed them ever since. In 1937, it enacted legislation to do away with slums and blight. These conditions still exist. In 1949, Congress prescribed for the construction of 810,000 public housing units. Thirty-five years later, only 700,000 units have beeen built.

In 1968, Congress rededicated itself to meeting our peoples' need for adequate housing by prescribing a national housing goal calling for a "decent home and a suitable living environment for every American family." Pursuant to this, Congress resolved that 26 million housing units had to be built or rehabilitated within the next 10 years, 6 million of which are intended for low- and moderate-income families.

Mr. President, our society can no longer permit the record of broken promises to continue. We cannot hope to promote sound health among our citizens if they are ill-housed. We cannot expect to instill a desire to obtain a sound education if one knows only the hardknocks of a slum environment. We cannot contemplate reductions in crime, delinquency, and drug abuse if people are forced to live under ghetto conditions where substandard housing is the rule. The time has come for us to recognize that housing must be considered as a basic need and requirement of life in the same manner as health, food, education, and a livable income.

There are those who argue that we are not going to be able to meet our housing promises of 1968; that we must face the facts of economic life. I disagree, the facts of life are that the lives of people are being seriously adversely affected as a result of inadequate housing.

We cannot fail our citizens again. They no longer will tolerate failure.

More than 6 million homes and apartments in the United States are delapidated or deteriorating today. One quarter of all U.S. housing is now classed as substandard. The depressed condition of the housing construction market these past 4 or 5 years has meant that we have been unable to contain this rate of deterioration. Whereas, we should be building or rehabilitating 2 to 2½ million homes each year, we have been limping along at a 1.3 to 1.5 million rate. Instead of advancing toward our goal, we are falling farther behind each year.

Generally, it is the old, the ill, the minorities, the large families, and the poor who have been unable to locate decent housing. Today, however, as supply falls even farther behind demand, citizens in all walks of life are being harmed. In one sense this is bad. Realistically, however, a universal unrest over housing conditions may now enable us to commit housing to the priority status it deserves. Up to now, housing has been sacrificed as a leading scapegoat to eccnomic pressures or other claimed needs. We must resolve to no longer permit this.

Under the present law, owners of residential property are entitled to accelerated depreciation against the early years of the property's life. This not only encourages a greater incentive for construction, but provides the release of cash flows which may be directed to new construction. Owners of used buildings also are entitled to reasonable depreciation rates which, if properly administered, can have the effect of encouraging new construction.

The proposed legislation reported out of the Senate Finance Committee would have reduced this accelerated depreciation incentive on existing structures. In addition, the committee proposal would have altered the recapture provisions in all structures, except moderate-income housing projects, so as to impose higher tax burdens on those investing in real estate.

These provisions could seriously impede residential construction. While preferences must be denied those who take unfair advantage of the tax laws on real estate and while our laws must not encourage slum development, we must not at the same time discourage construction—especially residential structures.

Investment is based upon yield and risk. Depreciation cushions these conditions. If we jeopardize a fair recovery through an adequate depreciation and the market for real estate thereby begins to dry up, this not only adversely affects the used housing market, but depresses new construction as well. In addition, lower yields and higher risks due to inadequate depreciation will force housing owners to raise rents or other costs and may also cause the deterioration of buildings. Both cases are harmful to the construction of adequate supplies of new housing or the rehabilitation of existing housing.

Existing changes in the tax laws relating to real estate will provide increased revenue exceeding $700 million in taxes over the next 10 years. There are estimates that the present committee provision may produce additional millions of dollars in revenue. The figures upon which this is based are questionable. Even if accurate, however, the gain cannot equal the potential loss to new or rehabilitated housing so vitally needed to meet our housing goals.

The Treasury Department and the Department of Housing and Urban Development both support this amendment. Its adoption should help assist us as one step—at least we can take today—to overcome the serious housing crisis now facing us.

Mr. TOWER. I am prepared to yield back my time.

Mr. LONG. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. CANNON in the chair). All time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas (Mr. TOWER). On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Georgia (Mr. RUSSELL), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT) and the Senator from Missouri (Mr. SYMINGTON) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is detained on official business.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) and the Senator from Vermont (Mr. PROUTY) would each vote "yea."

The result was announced—yeas 69, nays 24, as follows:

[No. 201 Leg.]

YEAS—69

| | | |
|---|---|---|
| Allen | Bible | Byrd, W. Va. |
| Allott | Boggs | Cannon |
| Baker | Brooke | Church |

NOT VOTING—7

| | | |
|---|---|---|
| Anderson | Mundt | Symington |
| Fulbright | Prouty | |
| Goldwater | Russell | |

So the Tower-Sparkman amendment (No. 407) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CURTIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DIVESTITURE OF CERTAIN STOCK

Mr. ERVIN. Mr. President, I call up my amendment, which I have just sent to the desk, and ask that it be stated.

The PRESIDING OFFICER (Mr. HUGHES in the chair). The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. ERVIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 13 after line 14, insert the following:

"(D) Section 4943 shall not apply to require the divestiture of the stock of an incorporated business enterprise acquired by a private foundation where: the private foundation is a testamentary trust; at least 95 percent of the stock of such enterprise was acquired by bequest from the creator of the trust; the creator of the trust died more than ten years before the date of enactment of this Act; all of the net income of the foundation is required to be distributed annually in specified percentages to specified churches, educational institutions, and orphanages and historical societies; no member of the family (within the meaning of section 4946(d)) of the creator of the foundation is a manager of the foundation (as defined in section 4946(b)) on or after December 31, 1959; such enterprise on October 9, 1969, is of substantially the same character as the enterprise which was conducted by such incorporated business enterprise on the date of the creation of such foundation; and such enterprise, in 3 of the last 5 taxable years ending on or before December 31, 1969, and in each taxable year ending after such date, distributes to its shareholders more than 40 percent of the amount by which its taxable income exceeds the tax imposed by section 11 for the taxable year. This subparagraph shall continue to apply only so long as such enterprise continues to be of substantially the same character as the enterprise which was conducted by such incorporated business enterprise on the date of the creation of such foundation."

On page 112, line 19, strike out "Subparagraph (A)" and insert in lieu thereof "Subparagraphs (A) and (D)".

Mr. LONG. Mr. President, will the Senator yield?

Mr. ERVIN. I yield

Mr. LONG. Mr. President, the Senator's amendment has to do with a foundation that owns a newspaper in Morganton, N.C. The committee did agree to a couple of exemptions to the divestiture rule with regard to foundations, where certain members of the committee found that a severe problem was created. The Senator's amendment has the same merit as the other two exceptions we made.

Would the Senator mind telling me the name of the foundation?

Mr. ERVIN. The organization is a testamentary trust created by the will of Miss Beatrice Cobb, who died in September 1959.

Mr. LONG. Mr. President, I have discussed this matter with the Senator. If this amendment were offered as a private relief bill, I would have no objection to it. In view of the fact that the committee made two exceptions to the divestiture rule when it considered the matter, on the urging of Senators who had a particular problem with regard to some foundation created by a former citizen of their State, I feel that it would be fair to make an exception with regard to this situation, which the Senator finds would create a hardship for the people involved by requiring them to divest under the general language of the bill.

I am informed that the Senator from Delaware (Mr. WILLIAMS), who voted against making any exception at all, will vote against the amendment, as a matter of consistency. I believe he is willing to let this matter be decided on a voice vote.

Mr. WILLIAMS of Delaware. The Senator is correct. I think a mistake was made when an exception was made for the other foundation, but I must admit that there is some similarity between this one and the other. I objected to the other amendment, and I hope this amendment will not be accepted.

Mr. ERVIN. This would be within the provision of section 4943(A)(i) as set forth on page 111 of the bill, except for the death of the testator, which occurred about 2 years and 9 months later. My proposed amendment is stricter because it provides that the testamentary trust must disburse all net income each year. I do not know any other foundation that would come under this amendment.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. CURTIS. I ask this question of the distinguished Senator: Is this the case we discussed in which the trust owns 100 percent of the stock of a going business?

Mr. ERVIN. It owns virtually 100 percent of the stock. It has just enough shares outstanding to have one share held by the members of the board of directors. It owns approximately 99 percent of the stock.

Mr. CURTIS. I wholeheartedly support the Senator's amendment, and this is why: There is absolutely no revenue involved.

I disagree with the idea of divestiture, but I can understand the argument made for it where a foundation owns part of a business and private individuals own part of the business; because there is always the fear that perhaps the foundation would be maneuvered in voting as shareholders, to the advantage of private parties. When the foundation is the owner of substantially all of a business, there can be no conflict of interest, and for that reason it should be exempted from the divestiture. It is right and it is fair. To do otherwise would violate the will of the testator. It would bring no revenue. It would be an attack upon some very fine activities of a foundation.

Mr. LONG. Mr. President, Miss Beatrice Cobb, who published and edited the Morganton, N.C., News Herald for approximately 50 years, died September 11, 1959. Under her last will and testament, she left all of her property to a trust whose trustees are directed to pay out all of the net income of the trust each year by specified percentages to various churches, educational institutions, and orphanages named by her in her will. This trust owns virtually 100 percent of the entire stock of the Morganton News Herald which, as a corporation, pays taxes upon its income. Any dividends paid to the trustees upon the stock held by them in the News Herald is paid out each year along with the other income of the trust for the charitable purposes stated above. The will requests the trustees to continue the publication of the Morganton News Herald in accordance with the policies which Miss Cobb herself followed in operating such newspaper.

Miss Cobb requested in her will that this trust continue to operate the Morganton News Herald and any money made by the newspaper should be donated to charity. I am sure that the testator would not have created this foundation if she had known that it would be required to divest itself of the stock. She probably would have left it to an individual, a public-spirited person upon whom she could rely to continue to operate the newspaper.

This is the kind of situation people cannot forsee, and I think there is much merit to permitting this newspaper to be operated as the testator intended, with the money donated to charity. That being the case, I think it is a meritorious amendment. I would be willing to vote for it as a private relief bill. We already have some exceptions in the bill that have similar merit.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. CURTIS. Is it not also true that if a forced sale of a business takes place by reason of the operation of this law, there is a great risk that, because it is

a forced sale, it will be sold at a very low price or that it will be sold to a national chain or other large group, and thus contribute to the problem of merger and monopoly?

Mr. ERVIN. That is true. That is one of the reasons why this testamentary trust was established by this lady, who had published the paper for more than a half century, and she requested that the trustees continue the publication according to her policies and as a local paper.

Mr. CURTIS. And I dare say that the newspaper itself is paying every tax that any other corporation pays.

Mr. ERVIN. Yes.

Mr. BYRD of Virginia. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. BYRD of Virginia. Is it a good newspaper?

Mr. ERVIN. Yes, very good.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Carolina. [Putting the question.]

Mr. WILLIAMS of Delaware. I vote "No."

The amendment was agreed to.

AMENDMENT NO. 370

Mr. SPARKMAN. Mr. President, I call up my amendment No. 370 and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

Amend H.R. 13270 by adding as subsection (5) to section 509(a) of the Internal Revenue Code of 1954 as added by section 101(a) of H.R. 13270, Tax Reform Act of 1969, the following:

"(5) Nor shall the term 'private foundation' include an organization or trust created or established under the terms of a will or a codicil to a will executed on or before March 30, 1924, by which the testator bequeathed all of the outstanding common stock of a corporation in trust, the income of which trust is to be used principally for the benefit of those from time to time employed by the corporation and their families, the trustees of which trust are elected or selected from among the employees of such corporation, and which trust does not own directly any stock in any other corporation."

Mr. SPARKMAN. Mr. President, this amendment is sponsored by the distinguished Senator from Alabama (Mr. ALLEN), who is presently occupying the Presiding Officer's chair, and by me.

This amendment is almost on all fours with the amendment offered by the Senator from North Carolina. I hope the Senator from North Carolina will remain in the Chamber and hear my case because it is almost on all fours with his case.

What happened in this matter is that back in 1924 Mr. John J. Egan, a citizen of Atlanta, Ga., who owned the American Cast Iron Pipe Co. in Birmingham, died and left a will.

He had set up a profit-sharing plan for the employees of that company whereby they received all profits over and above 6 percent. He had provided for 6-percent earnings on his investment, and that was all. In his will he transferred complete ownership, every part of that company, to the employees. He did it in the form of a trust, a foundation set up to handle the matter. The employees today own 100 percent of that plant and its operation.

The number of employees back in those days was much smaller than it is now. I do not know how many employees they had but, I daresay, they did not have over 1,000 employees, and perhaps 750. Today they have 3,000 employees.

Back at the time he made his will, the company was worth approximately $1 million. Today the company is worth $43 million, every part of which is owned by the employees, and no member of the Egan family has anything to do with it. They are not connected with it or with the foundation. The foundation uses the proceeds in accordance with the will Mr. Egan made about 45 years ago for the purpose of taking care of employees and their families in case of sickness, in case of unemployment—or where because of an accident or something of that nature they could not carry on the work—medical treatment when they needed it, and things of that kind.

Mr. President, the business is operated by a corporation, and the foundation is to get all the benefits. Last year the company had gross revenues of approximately $5 million. They had taxes of more than $2 million. Every part of the earnings of the corporation, as such, is taxable. Every part of the earnings of the employees is taxable, and all those taxes have been paid. That left profits of approximately $2.7 million.

Now, they do what any prudent business management would do. They put aside funds to take care of expansion. They are now engaged in an expansion program involving $12 million. This one plant they are now in the process of constructing will cost $9 million. They put aside something for that each year.

Last year the need for services that I mentioned to take care of employees required only $42,000. The remainder of the money they used in paying their taxes, in construction and expansions, and setting up reserves to take care of those things.

They have borrowed $12 million and they need to build up a reserve. Not one part of this money has gone to profit any individual. Mr. Egan was one of the great public spirited men of all time. I had the pleasure to know him and to know something of the good work he did before he died. He left something here that has been handled in accordance with the directions in his will. I venture the assertion that nobody can find anything irregular in the administration of this affair. I believe it is unique and I believe it is deserving of special treatment, just as others have received special treatment.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. WILLIAMS of Delaware. Mr. President, I did not support the amendment of the Senator from North Carolina but I did recognize there was some similarity between that measure and the previous amendment which the committee had agreed to. However, there is little similarity between the Ervin amendment and the pending amendment.

Under the amendment of the Senator from North Carolina (Mr. ERVIN) at least 40 percent of the corporation's income was being distributed to the foundation and was being redistributed to charity. Under the preceding amendment there was an easing only of the divestiture rules as far as that foundation was concerned. I think even that was a mistake.

However, in this case, we would be carving this foundation out from any of the rules of the bill as it is before us. For example, we would be exempting this foundation from the self-dealing rules, we would be exempting it from the divestiture and payout rules and from the audit tax.

The company is now distributing about 1.5 percent of its earnings after taxes to the foundation. This means that on a $43 million investment, the foundation is receiving only about $42,000. The rest of the corporation's earnings are being plowed back in new investment in the business and are providing no benefit to charity.

There is a vast difference between this amendment and the other amendment. I would certainly want a rollcall vote.

Mr. President, if the Senate is going to completely exempt this foundation, the Senate might just as well eliminate from the committee bill all provisions dealing with foundations.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. ALLEN in the chair). Is there a sufficient second? There is not a sufficient second.

Mr. WILLIAMS of Delaware. Mr. President, I will suggest the absence of a quorum in just a moment and renew the request.

Mr. MILLER. Mr. President, I share the concern of the Senator from Delaware in that the amendment does go very far in eliminating the application of any of these rules that the committee adopted. It seems to me that there is a laudable purpose for a trust that has been established for the use and benefit of the employees of the trust. If that is the purpose, I cannot understand why the application of self-dealing rules of the committee bill would be objectionable to such a trust. I cannot understand why the payout rule would be objectionable to such a trust.

I am wondering if the Senator from Alabama might not see fit to redraw his amendment so that it would be, let us say, excepted from the divestiture rule. If he were to do that, it might get away from some of the objections of the Senator from Delaware and some of the concern that I have.

Mr. LONG. Mr. President, it seems to me if we agree to the amendment, we will be looking at this problem in conference. I should think that in view of the fact that the self-dealing rules and the dives-

titure rules are House provisions, we could look into this problem in conference and agree to such part as the House and Senate conferees would be willing to accept and eliminate the rest of the amendment.

In view of the fact there are other exceptions in the measure that we will be considering at the same time, we could take a look at this foundation and see to what extent we could go along with the relief it seeks.

I hope we do not spend days on end here trying to pick apart amendments and taking some parts and rejecting other parts when the entire thing will be in conference anyway.

Mr. MILLER. Let me say in response to the able chairman of the committee that I am sure all of us are acutely aware of the fact that there has been criticism in the press for some special interest legislation which has been adopted on the floor.

Mr. CURTIS. Mr. President, will the Senator from Iowa yield right there?

Mr. MILLER. I should like to complete my thought first. The amendment could be modified so that any criticism that this is special interest legislation would be poorly taken, so long as it would not impinge upon the objective that the proponent of the amendment is trying to achieve.

It seems to me that in a matter of moments the amendment could be modified, especially if I am correct in my thinking that the main concern is the divestiture provisions which are quite harsh, I might say, in the case of a trust set up for employees of a corporation and could work a hardship. To that extent, I would think progress could be made. It would still be in conference and I think that some of us would feel more comfortable about it if it did not go quite so far as the amendment, now drawn, would go.

Mr. WILLIAMS of Delaware. Mr. President, striking out the divestiture rule would not eliminate the objection. The amendment was drafted to keep the foundation from the need to comply with any of the rules so far as the tax bill is concerned.

Mr. President, I suggest the absence of a quorum and I will ask for the yeas and nays.

Mr. SPARKMAN. Mr. President, will the Senator from Delaware withhold his request for a moment?

Mr. WILLIAMS of Delaware. I withhold my request.

Mr. SPARKMAN. The Senator knows that I have stated to him and to the chairman that if there is objection to the form of the amendment, we can still take it to conference and it will be wide open. If the conferees agree with the suggestion made by the Senator from Iowa, I would have no objection. That is the thing I have been primarily concerned with. The workers there own every bit of the company, but the provisions in the bill, if I understand them correctly, state that each year they will have to pay out, or will have to distribute, 6 percent of their assets. The assets are now about $42 million.

One way they can do that is to divest themselves of their stock. In other words, in 16 years they will put themselves out of business. They will be taxed out of business.

Mr. CURTIS. Mr. President, the distinguished Senator from Iowa (Mr. MILLER) made reference to what certain of the press might say about some of the provisions of the bill. I have a high regard for the press. I think they realize when a Senator is demagoging or when he knows what he is talking about. I do not think it comes as a surprise to them.

We, too, can realize when someone writes well. We know when they do not know anything about what they are writing, or when they are demagoging.

Mr. President, a certain newspaper in Washington—I shall not mention its name, but it is published in the morning—[laughter]—carried a statement by a distinguished Senator with a list of loopholes in the bill.

Now, two of those items did not have one bit of reference to revenue. That newspaper deceived the public. It either did not know what it was talking about, or it deliberately deceived the public. This newspaper can take any position it wants to, of course, but it enumerated a group and said, "These are loopholes in the tax program."

As a matter of fact, the business owned by that foundation pays every tax that any other corporation pays.

I am not concerned about having the press write the tax bill. They can criticize me. I can take it. That is why we have a free press. I am glad when they do. It shows that our country still breathes.

But they should realize, just as they can recognize when someone here does not know what he is talking about, that this is a two-way street. I, for one, feel that the tax bill should be written by the elected representatives of the people and not anyone's propaganda organ.

I do not know the details about the foundation to which the distinguished Senator from Alabama is referring. I suppose it will do no great harm to take the amendment to conference and look into it.

The other day, when we voted on the 6-percent compulsory payout, the information was presented here to the effect that the major foundations had no objection to it. But, of course, the small ones have terrible objection to it.

As a matter of fact, I found out that the major foundations have no objection. I hold in my hand a letter from one of them which repudiates what was said about them. I was called on the telephone by another one. That was not an amendment that was lacking in opposition. It is over now. Fortunately, it is not in the House bill. I hope that adequate information can be laid before the conferees.

Mr. President, I did not want this moment to pass without raising my voice against a deliberate deception, or else it was gross ignorance, on the part of a publication that held up as tax evasion an amendment placed in the tax bill by the Finance Committee that did not affect revenue one bit. As a matter of fact, when the Treasury Department testified before the committee, I asked the question, "Is there any revenue involved in the issue of divestiture?" and the answer was "No."

Mr. President, I yield the floor.

Mr. WILLIAMS of Delaware. Mr. President, in this particular case, I think it should be said that no one could have presented his amendment more fairly or more openly than the Senator from Alabama. We were given a copy of the amendment a couple of days ago so that we could study it. It was outlined to the chairman of the committee, not only as to the amendment but also as to the name of the foundation involved, and when the Senator from Alabama made his opening remarks he also outlined all the details. So there is no question that there is anything personal about this.

The point I make is—and it is true—that we could take the amendment to conference but why approve it at all? There is no question that it does exempt this particular foundation from all provisions of the tax bill.

The Senator from Alabama admitted that was his objective, and I respect him for his frankness. We can achieve the objective of the amendment, conceivably, by eliminating from the bill all provisions dealing with foundations and then all foundations would be in conference, including this one. But the reason I have to object to this one is that I have been contacted by any number of foundations, including some from my own State—and worthy foundations—who likewise would like to be exempted from some of the provisions in the bill.

I have said that I would not go along with any exceptions. They should all be treated alike. I know that the Senator from Alabama understands my position.

That is the point I am making. That is the reason I would ask for a rollcall vote and abide by the decision of the Senate.

Mr. LONG. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. ALLEN. Mr. President, all of the issued and outstanding common stock, 1,085 shares, of American Cast Iron Pipe Co.—Acipco—is owned by the trustees of the trust created by the codicil to the will of John J. Eagan, who died on March 30, 1924. The trustees, as provided in the codicil to the will, are the members of Acipco's board of management and board of operatives, all of whom are officers or employees of Acipco, and none of whom are members of the Eagan family. The trust, which is commonly referred to as the Eagan trust, is for the benefit of employees of Acipco and their families. The will provides, in essence, that income from the trust shall be used by the trustees to insure to the employees an income equivalent to a living wage, to pay an income to any employee, or to the wife and minor children of any employee, at such times as the plant of Acipco may be shut down, or at such times as an employee through accident, sickness, or other unavoidable cause shall be unable to work, and to provide other benefits for employees and their families. The Eagan trust has been held to be a charitable trust by both Federal and State courts in the cases of *Eagan*

v. *Commissioner of Internal Revenue* (5th Cir., 1930), 43 F. 2d 881, and *Mrs. Susan Young Eagan and Marion M. Jackson, as Executors of the Last Will and Testament of John J. Eagan, Deceased,* v. *W. D. Moore, et al.* (No. 61106, Superior Ct. of Fulton County, Georgia, 1924). The trust is presently exempt from Federal income tax under section 501(c)(3), having received a ruling from the Commissioner of Internal Revenue by letter dated February 15, 1946, that it was exempt from Federal income tax under the provisions of section 101(6) of the Internal Revenue Code, the predecessor section of 501(c)(3).

The trust also bought from Acipco at par, and now holds $1,400,000 par value of 5 percent noncumulative preferred stock of Acipco. The common stock has a book value of approximately $40 million. The Eagan Trust has no assets other than the Acipco common and preferred stock and there have been no donations to the trust by anyone since Mr. Eagan died.

Acipco employs approximately 3,000 people directly at its plant and offices in Birmingham, Ala. Acipco's payroll in Birmingham will amount to over $25 million this year. The company spends approximately $30 million annually in the Birmingham area for raw materials, goods and services. In addition to wages and salaries Acipco provides very substantial fringe benefits for its employees and members of their families in the form of bonuses based on profits, medical services, pensions and retirement benefits and group insurance. The effect of providing such benefits is to further the purposes of the trust. Each year Acipco retains a portion of its earnings—in 1968, $2,754,398—for general corporate purposes, principally to protect, preserve and maintain its facilities. Of course, Acipco pays income taxes on its net earnings on exactly the same basis as any other business corporation—in 1968, approximately $2,883,000 to the Federal and State governments—and all amounts paid by Acipco to its employees as wages or other compensation are fully taxable to the employees.

The definition of a "private foundation" contained in H.R. 13270, the Tax Reform Act of 1969, could be held to include the Eagan trust. Other provisions of the act would, in effect, require "private foundations" to divest themselves of stock constituting in excess of 50 percent—20 percent in the House bill—of the stock of any corporation. In addition, under the act "private foundations" would be required to distribute all of their income currently and, in determining income, the act would impute income to the foundation of 5 percent of the fair market value of its assets.

As indicated above, the Eagan trust owns all of the outstanding common stock of Acipco and $1,400,000 of preferred stock. Furthermore, the income of the Eagan trust does not even approach 5 percent of the value of its assets; that is, the value of the Acipco common and preferred stock or approximately $41,400,000. In view of the substantial fringe benefits provided by Acipco to its employees and their families as indicated above, the trustees, as owners of the Acipco stock, have requested the company from time to time to distribute to the trust as dividends only such amounts as have been reasonably required to carry out fully the purposes of the trust. In 1968 the trust received $42,000 in dividends which it used exclusively for purposes of the trust. The requirement for distribution of income not less than 5 percent of the value of assets of the trust would substantially eliminate the benefits that Acipco furnishes and seeks to furnish to its employees. If 5 percent of $41,400,000, which is $2,070,000, has to be distributed each year there would be no way to furnish substantial fringe benefits and to maintain the plant and operate the company. Any sales of stock to create funds for distribution would be impossible because of the provisions and purposes of the trust.

The effect of the provisions of the proposed act referred to above, if applied to the Eagan trust, would be to require the trustees in some fashion and probably only after litigation, to divest themselves of 50 percent—80 percent under the House bill—of the stock of Acipco, contrary to the terms of the will and probably ultimately to destroy the trust estate entirely by forcing the trust to distribute principal as imputed income. As to any amounts required to be so distributed beyond what is required for the charitable purposes of the trust, it is, of course, impossible to say to whom, for what purposes and with what effect amounts in excess of those required for the purposes of the trust would be distributed. There is certainly no reason to limit to 40 years the tax-free status of such a trust.

Application of the provisions of the proposed act to the Eagan trust would not only result in little or no additional revenue to the Government, but would completely defeat the testator's benevolent, praiseworthy and legitimate intent. It could well be disastrous to Acipco by forcing it to pay out as income greater amounts than would be prudent. It would without question materially adversely affect the employees of Acipco and members of their families by depriving them of the benefits of the trust.

Since tax avoidance is not in any manner involved in this trust, the bill should be amended to remove it from the definition of private foundations subject to new rules and taxes aimed at preventing abuses. Indeed, the Eagan trust is probably unique in this country and is entitled on its merits to continue because of the social and charitable advantages that it affords to its beneficiaries and to the public.

Mr. WILLIAMS of Delaware. Mr. President, I am ready to vote.

Mr. LONG. Vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Missouri (Mr. SYMINGTON), are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 49, nays 45, as follows:

[No. 202 Leg.]

YEAS—49

So Mr. SPARKMAN's amendment was agreed to.

Mr. SPARKMAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. (Mr. HUGHES in the chair). The Senator from Kansas is recognized.

AMENDMENT NO. 413

Mr. DOLE. Mr. President, I call up my amendment No. 413, with certain modifications.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT LEGISLATIVE CLERK. The Senator from Kansas (Mr. DOLE) proposes an amendment as follows:

On page 216, strike out lines 9 through 25, and insert in lieu thereof the following:

"(8) PERCENTAGE DEPLETION.—

"(A) MINERAL PROPERTIES OTHER THAN OIL AND GAS.—In the case of a mineral property (other than an oil or gas well located in the United States) the excess of the deduction for depletion allowable under section 611 for the taxable year with respect to each property (as defined in section 614) over the adjusted

basis of the property at the end of the taxable year (determined without regard to the depletion deduction for the taxable year).

"(B) OIL AND GAS WELLS.—In the case of oil and gas wells located in the United States the excess of the deduction for depletion allowance under section 611 for the taxable year from all oil and gas wells in which the taxpayer has an interest (including nonoperating mineral interests, as defined in section 614(d)) over the amount which the aggregate adjusted basis of all such interests in the hands of the taxpayer would have been at the end of the taxable year (determined without regard to the depletion deduction for the taxable year) had the aggregate basis of such interests been increased by intangible drilling and development costs incurred by him with respect to such interests (other than those incurred in drilling nonproductive wells) and deducted under section 263(c). For purposes of this paragraph the term 'oil and gas wells' includes undeveloped oil and gas properties."

Mr. LONG. Mr. President, I ask for the yeas and nays. The yeas and nays were ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, is the Senator from Kansas willing to agree to a time limitation?

Mr. DOLE. Yes.

Mr. LONG. How much time does the Senator need?

Mr. DOLE. 20 minutes for each side.

Mr. LONG. Mr. President, I ask unanimous consent that debate on the pending amendment to be limited to 40 minutes, the time to be equally divided between the sponsor of the amendment and the manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, the purpose of amendment No. 413 to H.R. 13270 is twofold:

First, it would remove from the bill before us an inequity; namely, the taxation of an ordinary business expense. This inequity is created by the tax on preference items provided for in subparagraph (A) of paragraph (8) of section 57 on page 216 which would subject ordinary business expenses of any taxpayer engaged in the exploration and development of oil and natural gas reserves to a special 5-percent tax on preference items as defined in that section. Under the bill, intangible drilling and development costs are defined as a preference item and would be subject to the 5-percent tax. Intangible drilling and development costs are the oil man's ordinary business expenses. They include expenses for nonsalvageable items and, therefore, constitute nonrecoverable business expenses. It is not logical or reasonable to tax ordinary business expenses.

Second, a basic purpose of this amendment is to provide an incentive to the taxpayer to reinvest or plow back into his business funds derived from the depletion provision of the tax law. The amendment provides that the taxpayer would be subject to a 5-percent tax on allowable depletion. But the amendment further provides that to the extent that the taxpayer reinvests funds on intangible drilling and development costs, the amount of depletion subject to the tax is reduced accordingly. In other words, a person who receives a depletion deduction but who does not engage in exploration and development activity will be subject to the full 5-percent tax. On the other hand, if the taxpayer engages in exploration and development activity then the amount of depletion subject to the tax is reduced by the amount of intangible drilling and development expenses that have been reinvested.

Mr. President, this incentive to reinvest funds derived through the depletion provision is in accord with the recognized need on the part of officials in Government and industry that, if we are to meet the rapidly growing demand for both oil and natural gas, very substantially increased funds must be invested in the exploration and development of these resources. The amendment will serve the best interest of our Nation by encouraging expansion of our domestic economy. More important, it will serve our military security by encouraging the development of reserves of a vital commodity.

Mr. President, without attempting to discuss the merits of the entire provision of the pending bill pertaining to the proposed tax on preference items, I wish to point out that this provision was designed to insure that all citizens should pay a minimum tax on income which under present law is sheltered. The error of the bill is that under subparagraph (A) it would tax an expense—money paid out by the taxpayer—not income. I urge my colleagues in the Senate to consider the adverse impact that this provision could have on oil and gas consumers, on the economy of the oil and gas producing States, and on our national security posture.

The most important question for the Senate to consider in reaching a decision on my amendment is—what will be the effect on the ability of the petroleum industry to meet the future requirements of this Nation?

In this regard I wish to point out that according to a study by the Department of the Interior we have not been carrying on an adequate exploration and development program for more than 10 years because of excessive imports and other economic reasons. If we are to meet the needs for the next 10 years these exploration and development efforts must be increased by at least 50 percent. Under these circumstances we in the Congress would be acting irresponsibly if we should take action that would discourage exploration and development activity. Rather, we should be encouraging this effort and that is the purpose of my amendment.

Mr. President, historically most of the exploratory or wildcat drilling that is done in the search for new reserves of oil and natural gas is conducted by independent producers rather than the large integrated companies. The independents are relatively small. They have limited capital. They also have limited means of raising capital. The independent must look to sources outside the industry to supplement his own funds in order to accumulate sufficient capital to drill wildcat wells or development wells in his search for new petroleum reserves. His ability to do this would be very greatly impaired if the proposal to tax ordinary business expenses, as set forth in subparagraph (A), is permitted to stand. Intangible drilling and development expenses, which this proposal would subject to a 5-percent tax, comprise some 60 percent of the cost of the drilling of a well and, therefore, are a large factor in the total drilling and development costs. It is obvious that a tax on an expenditure would be a very telling impediment to the outside investor and to the flow of capital into the petroleum industry.

At a time when our Government recognizes the need to substantially increase the search for new oil and gas supplies, this is not the time to adopt a tax provision which would drive capital away from oil and gas drilling.

No tax provision should make it impossible for taxpayers to deduct their ordinary and necessary business expenses. Yet that would be the result if there is a penalty tax placed on such expenditures as would be the case under this proposal.

Mr. President, I cannot overemphasize the importance of not further discouraging investment in oil and gas exploration. This industry has not been attracting sufficient capital for the past 10 years and we are seeing the results of this situation.

Last year, for the first time in our history, U.S. oil producing capacity declined. We know from the 1967 Middle East war that our oil producing capacity at that time was at a bare minimum to meet a very short emergency. Since then our requirements and that of our allies have grown. We need more capacity, not less.

Furthermore, the Department of the Interior and the Federal Power Commission have warned that the Nation faces a critical situation with respect to natural gas supplies and many in Government and the industry feel immediate corrective actions are urgently needed. Last year for the first time in this Nation's history we consumed more natural gas than we found.

This serious situation will be further aggravated if essential funds needed for drilling are driven away from this industry by the unwise policy of taxing ordinary business expenses.

Mr. President, let me point out how this would work. For example, if an oil producer had gross income from his business, of say $100,000 for a year, he would be entitled to the depletion allowance. Independent producers, receive on the average a depletion allowance of between 15 to 20 percent.

In this regard I emphasize that although the present law provides for 27.5 percent, it will be reduced to some smaller figure because of the action of Congress this year.

The producer very often receives much less than the full percentage depletion allowance, because the law provides that the depletion exemption cannot exceed 50 percent of the net income.

As a result, producers in my State generally receive an actual depletion allowance about 18 to 20 percent. This means in my example that if the producer's gross income is $100,000, the depletion allowed would be $18,000.

Mr. President, under my amendment a producer would be subject to a 5-per-

cent tax, or $900 on the $18,000 depletion if he did no drilling for additional reserves of oil or gas and thus incurred no intangible drilling costs.

However, if he did drill for additional reserves of oil or gas and incurred costs of, say $10,000, the amount of depletion subject to the 5-percent tax would be reduced by $10,000. That is, the 5-percent rate would be levied on the $8,000 balance and he would pay a tax of $400.

Mr. President, I think it is important to note that the House of Representatives in its bill dealing with so-called tax preferences did not include "intangibles" as a preference item. Further, the comprehensive recommendations dealing with the minimum tax provision as sent to the Congress earlier this year by the outgoing Johnson administration did not include "intangibles" as a tax preference item. And most importantly, the Treasury Department in its testimony submitted to the Senate Finance Committee declared:

> First, in view of the substantial reduction in percentage depletion contained in the bill, the inclusion of the intangible drilling cost deduction as a tax preference item could work an unintended hardship in the case of an individual whose principal business is exploration for oil and gas.

Accordingly, the administration proposed that intangible drilling and development costs be excluded from the proposal pertaining to "tax preferences."

Mr. President, let me say as simply as I can that all the amendment would do would be to permit a man in the business of exploring for oil and gas to deduct his intangible expenses for drilling from the allowed depletion and pay a tax of 5 percent, a supertax, on the excess of depletion over intangible costs.

He would not be required to pay an additional 5-percent tax on the expenditures. I believe that the theory of income tax law is to tax income, not expenditures.

Mr. PEARSON. Mr. President, this is a somewhat complicated matter, as are all the tax matters in dealing with specific industries.

I ask my distinguished colleague if he will once again go over the example he set forth so that those who are present in the Senate Chamber will have a very clear understanding of what the amendment would do.

Mr. DOLE. Mr. President, let me restate that a firm or an individual in the business of gas or oil exploration with a gross income of $100,000 is entitled under the present law to a depletion allowance of 27.5 percent.

Because of the limitation on the depletion deduction, most producers get an effective rate of around 18 or 20 percent.

Let us say that a man's depletion does work out to 18 percent, because of the 50 percent net income limitation already in the law. Under my amendment the producer would be subject to the 5 percent tax or a tax of $900 on the $18,000 of depletion he would be entitled to take if he had not drilled further for oil or gas. He would pay 5 percent on the full amount of $18,000. However, if he does what the amendment will encourage him to do and goes out to drill and explore for oil and gas, he is entitled to deduct the intangible drilling costs from the sum allowed for depletion. And he would be entitled to deduct $10,000 from the $18,000 depletion figure. That would mean he would pay at a 5-percent rate on the remaining $8,000, or a tax of $400.

Let me stress again that during the committee hearings the Senator from Iowa stressed the need to provide some incentive for independent oil and gas producers.

The pending amendment would permit a man to plow the money back into the industry to find more oil and gas.

That is purely and simply the thrust of our amendment.

Mr. President, I respectfully urge the Senators to support amendment No. 413 as modified.

Mr. PEARSON. Mr. President, I thank my colleague. The Senator is precisely correct. This is a tax on a business expense. It is a great burden to the independent oil producers, particularly in the State of Kansas.

The oil industry is made up of two parts—the great majors and the independents.

I had thought and wondered about the rationale of the 5 percent. Why should we not make it 10 percent, or 2.5 percent? It seems to me that the raticnale of those for this particular proposal reaches the point where they say, "There ought to be some tax here. We do not know what it ought to be, but we will just put 5 percent on."

This, I might say, is a middleground, a reasonably moderate course, and a just one, it seems to me. It is still more than that recommended by the House or that recommended by the administration. I think it will provide the incentive to reinvest and discover and meet the growing demand of the national security interests involved here.

I congratulate my colleague for leading the effort in this modification, which would be of great benefit to the producers in the State of Kansas.

Mr. DOLE. I thank my colleague from Kansas, who has been most helpful and has worked diligently with me on this amendment.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HANSEN. I thank the distinguished Senator from Kansas, and I compliment him for the leadership he has demonstrated in trying to bring about justice and equity to a very much beleaguered industry.

Certainly, everyone agrees with the concept that tax reform is indicated; but, unfortunately, in the minds of too many people the word "oil" is synonymous with tax reform. Unfortunately, many people think that all that is required today to bring about tax reform is to sock it to the oil industry.

Let us take a look at what we are doing here. In the first place, let us remember that 80 percent of all the new discoveries in the continental United States, excluding those on the outer continental shelf, in the last several years have been made by independents. These are not big oil companies. These are hard-working, small outfits that require the additional financing that has been available to them in order to continue their expensive exploration activities. These activities have been good for the United States. They have added significantly to the security that we have by virtue of controlling our own sources of supply for energy which are so important to us, and we should remember that 75 percent of all the energy that is produced in the United States today comes from oil and natural gas.

So what this amendment will do is to help those independents to continue their search for this elusive natural energy resource that is so important to the security of the United States and is equally important to the economy of America.

Let me underscore the significance of that statement by inviting attention to the fact that in my State of Wyoming the oil and gas industry pays one-third of all the county taxes levied in that State. It pays almost 26.5 percent of the ad valorem tax that is levied by the State of Wyoming. It represents 29.6 percent of the total assessed valuation of Wyoming.

This sort of tax—the sort of tax that my colleague the Senator from Kansas hopes to eliminate through the adoption of his amendment—would put us back on a course that this country has followed for a long time. Never before in the history of the United States, insofar as I know, has there been a tax levy on an expense item. But, as the distinguished Senator from Kansas has pointed out, this tax reform bill, as it is written, does not levy a tax on assets. It does not levy a tax on income. It levies a tax on expenditures. If a man has to take money out of his pocket, as all oil people do, to drill oil wells, this puts a tax on that expenditure.

Is that not what my colleague has been saying?

Mr. DOLE. That is my understanding. I think this proposal to tax expenditures is probably unprecedented.

I know that the purpose of the tax preference amendment is to make certain that everybody pays some tax. We are not objecting to the theory. In fact, I believe the oil industry has made a substantial contribution to tax reform. They have accepted the depletion reduction in good grace. They do not like it, but they have accepted it. We have told them to accept it. But it seems to me unconscionable to ask these independent oil and gas producers and developers to dig into their own pockets and spend their money and pay a 5 percent tax on the money they invest. I believe it is wrong in principle, and I believe the small producers should receive fair treatment.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. LONG. Mr. President, I ask unanimous consent that the time in opposition to the amendment be controlled by the Senator from Delaware (Mr. WILLIAMS), inasmuch as I favor the adoption of the amendment.

The PRESIDING OFFICER (Mr. GURNEY in the chair). Is there objection? The Chair hears none, and it is so ordered.

Mr. LONG. Mr. President, most people think of this bill, as it affects the oil companies, as accomplishing tax reform, because it reduces the depletion allowance from 27½ percent to 23 percent, which is approximately a 20 percent reduction. But it is not generally known that, in addition, we have in this bill approximately $650 million of additional taxes on the oil industry.

This particular item, if I do say it, is one that just happened by accident, in my judgment. We should not have done it. Before we received an estimate, based on a computer run, of the full effect of the provision on the oil and gas industry, the committee moved to report the bill. If there had been more time available, I would have suggested a revision along the line the Senator from Kansas has suggested, and I am confident that the committee would have agreed to it. Under the circumstances, I have no alternative but to support the Dole amendment on the floor.

What is not realized is that, in addition to reducing depletion allowances in this bill by 20 percent, we have raised $200 million by additional taxes on production payments. This so-called supertax of 5 percent raises another $200 million by taxing an expense, as the Senator has mentioned—the intangible drilling cost. It also puts an additional tax of 5 percent on depletion allowances. In addition, it taxes accelerated depreciation, and the industry loses the benefits of accelerated depreciation, which is an especially big item at the corporate level. In addition, the industry loses much of its benefits under capital gains, which also are big items in the minimum tax. Those two items go unmentioned so far as the tax burden on the oil and gas industry is concerned. They constitute another $250 million tax on the industry.

Mr. DOLE. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. DOLE. I yield 1 minute to the Senator from Iowa.

Mr. MILLER. Mr. President, how much time remains on the other side?

The PRESIDING OFFICER. Twenty minutes.

Mr. MILLER. Mr. President, I am not sure whether I am going to vote for or against the amendment.

Will the Senator from Delaware yield me 2 or 3 minutes?

Mr. WILLIAMS of Delaware. I yield 2 minutes to the Senator.

Mr. MILLER. Mr. President, I am in sympathy with what the Senator from Kansas is trying to do. But I am not quite sure how the amendment would work out.

I understand from his illustration that in the case of, let us say, an independent oil company with $100,000 of gross income and $20,000 percentage depletion and $10,000 intangible drilling and development costs, under the amendment the $20,000 percentage depletion would exceed the $10,000 intangible drilling and development costs by $10,000, and the bill would then, as modified, apply a 5-percent tax on the $10,000. Is that correct?

Mr. DOLE. That is correct.

Mr. MILLER. However, what troubles me is a case in which there would be $100,000 of gross income and $20,000 percentage depletion and $80,000 intangible drilling and development costs, so that there would be no tax under the present law. Here is a situation in which intangible drilling and development costs exceed the percentage depletion, rather than the percentage depletion exceeding the intangible drilling and development costs, which is what the amendment seems to be limited to.

What would happen in the case I have put, in which there is an excess of intangibles over percentage depletion?

Mr. DOLE. First of all, it is not a preference; second, I doubt that it would happen.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MILLER. Will the Senator yield me 2 minutes?

Mr. WILLIAMS of Delaware. I yield 2 additional minutes to the Senator.

Mr. MILLER. It seems to me that under the Senator's amendment, the situation in which there is an excess of intangible drilling and development costs over depletion is not covered. If the bill were so amended there would be a gap.

Mr. DOLE. I believe it is covered. It would, as I understand, be added to the base, in view of the fact depletion runs ahead of costs by a 3-to-1 ratio.

Mr. MILLER. Mr. President, one can find every kind of example under the sun in the case of the oil industry. When these matters are clarified, percentage depletion is exceeded by intangibles in a given year. That is what concerns me where they have percentage depletion which is exceeded by intangibles in the given year.

Mr. DOLE. I understand you pick up the depletion only after you have written off all the cost, or this would never occur.

Mr. MILLER. I do not read the amendment in that way.

Mr. DOLE. Mr. President, the Senator has a great understanding of the general problem but I am speaking of a particular problem. I have discussed this matter at great length with the staff and understand it is not likely to happen because, first, you write off your costs.

Mr. MILLER. I am in sympathy with the objection, and as far as the example the Senator gave is concerned, his approach is proper, but during the time remaining I shall discuss it further with the staff.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. DOLE. I yield if I have any time remaining.

Mr. ALLOTT. Mr. President, I applaud the Senator for bringing forth this matter because he knows that many of us worked for some time in the middle of the summer with respect to it. I think the Senator's conclusions and examples are entirely correct. We studied the matter at great length and I know they are true.

What we are doing, in effect, is setting up an expense as a capital item and taxing it. To me this does not make good sense and it is going to destroy exploration.

Mr. DOLE. Mr. President, I thank the Senator. I reserve the remainder of my time.

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Delaware is recognized for 5 minutes.

Mr. WILLIAMS of Delaware. Mr. President, first, let me clarify what we are talking about. These intangible costs have been called expenses—in fact, they are capital expenditures which in any other industry would have to be capitalized. In the oil industry, however, we let them write these costs off currently, which means they are treated differently than in all other industries. However, in the bill we say these costs must be brought back into the minimum tax base—a 5-percent minimum tax must be paid on these items. Therefore, it is just the other way around from what my friends are saying.

Mr. President, I recognize the futility of opposing this matter, but I am opposing it. There are just 11 shopping days until Christmas and considering the fact that the Senate is in the process of erecting a $12 billion Christmas tree. I suppose this bulb will be attached.

This amendment would make two changes in the 5-percent minimum tax provision. First, it would exclude as a preference item the deduction allowed for intangible drilling and development costs incurred in drilling successful oil and gas wells. Second, it would substantially reduce the amount of the preference attributable to percentage depletion taken with respect to oil and gas wells—while not similarly reducing the amount of the preference with respect to percentage depletion taken on other minerals.

The Treasury opposes this amendment. The deduction allowed for the expenses of drilling successful oil and gas wells is utilized by some investors to substantially reduce their income subject to tax.

These expenses are deducted and then, in addition, percentage depletion is claimed when the oil is produced.

The second aspect of the amendment—allowing recovery of all intangible drilling expenses before percentage depletion is treated as a preference—would mean that depletion on oil and gas would be treated as a preference only to the extent the amount of the depletion deduction for the taxable year exceeded the taxpayer's expenses in drilling successful wells during the year—notwithstanding the fact that these expenses are also allowed as a deduction against taxable income and are not themselves treated as a preference. Unless these expenses are treated as a preference item, there is no justification for allowing recovery of the expenses in computing the percentage depletion preference.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. Mr. President, I would like to say to the Senator from Delaware that up to now I had not realized what a good old tax bill we already have on the books. I think I will stick with it.

Mr. WILLIAMS of Delaware. At the rate this is going, instead of tax reform, this is turning into a tax relief bill. We have already in this bill increased the net income limitation on the percentage depletion deduction from 50 percent to 65 percent for persons with under $3 million of gross income from oil and gas and for some minerals we raised the limitation to 70 percent. In many categories, this bill is more generous than the existing law.

Mr. AIKEN. Why do we not add another amendment saying that anybody engaged in the extracting industries shall not be subject to any tax of any kind and then we will probably make better progress.

Mr. WILLIAMS of Delaware. It probably would save a lot of time.

Mr. McINTYRE. Mr. President, will the Senator yield to me for 3 minutes?

Mr. WILLIAMS of Delaware. I yield to the Senator from New Hampshire.

Mr. McINTYRE. Mr. President, I wish to join the distinguished Senator from Delaware in voicing my opposition to this amendment. There is no industry in this entire country that has as many tax advantages as the oil industry. I think the distinguished Senator from Kansas, in bringing up this amendment, may be trying to backtrack on some of the small ways in which we were trying to bring this industry into line as far as paying its fair share of the taxes. Perhaps he is taking advantage of the reported Christmas tree attitude.

In my study of the oil industry and its tax loopholes and advantages, I am convinced they have a real bonanza. I refer to the ability, through treatment and development costs, to write off as a deductible expense what in my mind is an investment and what most other individuals have to treat as an investment.

It seems to me the committee is saying that this is an area that gets away from taxes almost scotfree. This is a loophole. Here they are at this late hour trying to get more advantages beyond what the committee gave them.

It is too bad that every time I get involved with the oil industry and listen to their hardships and difficulties, I feel that I want to pass the hat for them. I think we should pass the hat for them today. Here is an opportunity to bear down and to make this industry pay its share of the taxes. At this late hour they are trying to take the opportunity to ride the gravy train once again. I urge every Senator to oppose the amendment.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. McINTYRE. I yield if I have any time remaining.

Mr. DOLE. Mr. President, I was very impressed with the Senator's argument on the previous amendment of the senior Senator from New Hampshire about industry in New Hampshire. I supported the amendment because I believe there is a problem. I only ask the same consideration for the oil industry, particularly the small independent producer. We see in Kansas and in the Midwest small oil operators and are only asking they be able to stay in business and not be taxed out of business.

Mr. McINTYRE. Mr. President, I informed myself before I spoke. This amendment was not directed at only small operators. The "biggies" would enjoy this, too.

As far as my position on the amendment of the Senator from New Hampshire, my distinguished senior colleague, and my position on this oil question, I do not find them inconsistent one bit.

I thank the Senator from Delaware for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I yield 2 minutes to the Senator from Texas.

Mr. TOWER. I thank the Senator from Kansas for yielding and I would like to thank him for offering the amendment. I do support the amendment. If this measure is not agreed to, it will mean an awfully cold winter in New Hampshire because they will not have natural gas from domestic sources. Watch the Arab sheiks when they fix the price of oil.

Sometimes somebody is going to say, "You can have Israel and no oil or you can have oil and no Israel." I want those people to remember when the Arab sheiks fix the price that they are the ones who did it.

I have always been a strong supporter of maintaining a vigorous and healthy domestic oil and gas industry. I would like to join my colleague (Mr. DOLE) in supporting the amendment to delete intangible drilling costs, and allowable depletion from the list of tax preference items.

I fear the oil and gas industry is being made a scapegoat as the result of efforts to take vengeance on a few wealthly individuals, some of whom have nothing to do with the oil business. Mr. President, in a time when we are facing a serious shortage of natural gas, may I remind you that a large percentage of new gas is discovered during the exploratory drilling of oil prospects. And it has been further determined in the recent natural gas hearings before the Interior and Insular Affairs Committee that it takes 6.4 years from the time of acquisition of prospective acreage until the time of the first pay check for gas. This means that the oil and gas operator has made a substantial capital investment that is frozen for 6.4 years with no return on his investment.

We are already experiencing a time of shortage of investment capital for this high risk business. We can not further dissipate the oil industry's working capital and this is exactly what the 5-percent minimum tax does when piled on top of regular taxes.

To permit this discouraging condition to exist for this vitally important industry will undoubtedly reduce the number of exploratory wells to be drilled and will retard the full development of new oil and gas fields as they are discovered.

We cannot permit this punitive action to be taken against the industry that supplies the major portion of the energy upon which the United States depends for its existence, as we know it today. Our wheels of industry would grind to a halt and rust in a short period of time if not powered by, and lubricated by, the products of the oil and gas industry.

And to become dependent upon foreign petroleum would be the greatest mistake we could make in this area. Until the oil producing areas of the Middle East assume some permanent order of political stability we could never depend on this source for our national power requirements.

My experience on the Committee on Armed Services has convinced me that this Nation cannot afford to be dependent upon reliable sources of essential defense needs of any kind. And this is true even if the cost is high. National security, like freedom itself, does not come cheaply. It never has, and it never will.

To complement my remarks on the importance of the continued existence of a viable domestic oil industry to our national defense, I should like to quote briefly from the most recent report of the Department of Defense report on the role of petroleum products in military effectiveness:

> The part that oil plays in the defense posture of the United States is vitally important. It is a strategic material and one of the few items that is *absolutely essential* and foremost in the minds of military commanders. Along with weapons and ammunition, the needs of petroleum get the most attention. Petroleum cannot be stockpiled like hardware—the quantities required are too great, nor can our military forces operate very long without back-up support from refinery and production sources.
>
> In Southeast Asia today, about 50% of the military tonnage consists of petroleum products. While only about 10% of the petroleum required to support the war effort is supplied from the U.S., we must maintain a capability in the U.S. to supply our war needs in case foreign sources are denied. . . .
>
> Information available today indicates that, with few exceptions, military equipment will continue to derive energy from liquid petroleum and its products for some time to come.

In short, gentlemen, the national security of this country depends upon its ability to insure an adequate supply of petroleum products. It will continue to be dependent upon that for years to come. I, for one, do not intend to let this Nation become dependent upon unreliable sources of supply for this essential defense product.

Mr. President, there are numerous economic reasons for hesitancy in any legislative sanctions on the oil and gas industry, but I wholeheartedly support the Dole amendment even if for no other reason than our national security.

Mr. DOLE. Mr. President, let me say that my intent is only to help the independent oil industry. They are the ones who go out and do the exploration all over America and these independents do not have the internal capital to do the work. This puts the independent oil operator under a tight strain. The oil industry will pay $700 million more in revenue under the bill. They accept that. But I do believe in fairness that there should not be a tax on expenditures. It is my understanding tax is on income and not expenditures.

I merely say that for the independent oil operators in Kansas, Oklahoma, Texas, Louisiana, West Virginia, Penn-

sylvania, Illinois, Colorado—wherever they may be, they need our help.

Sixty-six percent of the small wells in this country are discovered by the independent oil operator. So far as I am concerned, this is just as important an amendment as any other we have been considering. It is in no way an attempt to avoid taxes.

Mr. McINTYRE. Why does not the Senator modify his amendment and get it down to what we would call the small oil companies? Why let it go all the way? Why let Standard Oil and the rest of the "biggies" enjoy it?

Mr. DOLE. As a practical matter, this applies to the independent oil operator, because most major companies capitalize their expenditures.

Mr. President, I yield back the remainder of my time.

Mr. WILLIAMS of Delaware. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has now been yielded back on the amendment.

The question is on agreeing to the amendment of the Senator from Kansas (Mr. DOLE).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COOPER (when his name was called). On this vote I have a pair with the Senator from Arizona (Mr. GOLDWATER). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

Mr. ALLEN (after having voted in the negative). On this vote I have a pair with the distinguished Senator from Arkansas (Mr. FULBRIGHT). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from North Carolina (Mr. ERVIN), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Minnesota (Mr. McCARTHY), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The pair of the Senator from Arizona (Mr. GOLDWATER) has been previously announced.

The result was announced—yeas 44, nays 47, as follows:

[No. 203 Leg.]

YEAS—44

PRESENT AND GIVING LIVE PAIRS, AS PREVIOUSLY RECORDED—2

Cooper, against.
Allen, against.

NOT VOTING—7

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Ervin | McCarthy | |
| Fulbright | Mundt | |

So Mr. DOLE's amendment was rejected.

Mr. WILLIAMS of Delaware. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JAVITS. Mr. President, I move to lay that motion on the table.

Mr. TOWER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The yeas and nays are ordered.

Mr. PASTORE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PASTORE. Are the yeas and nays on the motion to reconsider or on the motion to table?

The PRESIDING OFFICER. On the motion to table the motion to reconsider.

Mr. LONG. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. Who made the motion to reconsider?

Mr. WILLIAMS of Delaware. I did.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. YOUNG of Ohio. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. YOUNG of Ohio. There is a man in the well of the Senate. He should be ordered out.

The PRESIDING OFFICER. The clerk will suspend until there is order. Staff personnel and staff assistants of Senators will leave. The Sergeant at Arms is requested to ask staff members if they are needed in the Chamber; and if they are not needed, they are requested to leave immediately.

The clerk will continue with the call of the roll.

The rollcall was resumed and concluded.

Mr. KENNEDY. I announnce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Minnesota (Mr. McCARTHY), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 46, nays 48, as follows:

[No. 204 Leg.]

YEAS—46

| | | |
|---|---|---|
| Aiken | Hartke | Pastore |
| Bayh | Hatfield | Pell |

NOT VOTING—6

| | | |
|---|---|---|
| Anderson | Goldwater | Mundt |
| Fulbright | McCarthy | Symington |

So the motion to lay on the table the motion to reconsider was rejected.

The PRESIDING OFFICER. The question recurs on the motion to reconsider the vote by which the amendment was rejected.

Mr. WILLIAMS of Delaware. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senate will be in order.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PERCY (when his name was called). On this vote, I have a pair with the Senator from Arizona (Mr. GOLDWATER). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Minnesota (Mr. McCARTHY), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is detained on official business.

If present and voting, the Senator from Oregon (Mr. PACKWOOD) would vote "nay."

The pair of the Senator from Illinois (Mr. PERCY) with the Senator from Arizona (Mr. GOLDWATER) has been previously announced.

The result was announced—yeas 47, nays 45, as follows:

[No. 205 Leg.]

YEAS—47

| | | |
|---|---|---|
| Allen | Ervin | Montoya |
| Allott | Fannin | Moss |
| Baker | Gravel | Murphy |
| Bellmon | Griffin | Pearson |
| Bennett | Gurney | Randolph |
| Bible | Hansen | Scott |
| Burdick | Hollings | Smith, Ill. |
| Byrd, W. Va. | Hruska | Sparkman |

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Percy, against.

NOT VOTING—7

| | | |
|---|---|---|
| Anderson | McCarthy | Symington |
| Fulbright | Mundt | |
| Goldwater | Packwood | |

So the motion to reconsider was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment.

Mr. DOLE. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

Mr. MONDALE. Mr. President, I rise to——

The PRESIDING OFFICER. Debate is not in order now. The time on the amendment is under control. No time is left for debate.

Mr. MONDALE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MONDALE. Is it the ruling of the Chair that the merits of the pending amendment cannot be discussed at this point?

Mr. LONG. Regular order, Mr. President.

The PRESIDING OFFICER. All time on the amendment has been consumed. The question now recurs on agreeing to the amendment.

Mr. MONDALE. I ask unanimous consent that I be given an opportunity to discuss the merits of this amendment.

Mr. TOWER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll, and the following Senators answered to their names:

[No. 206 Leg.]

| | | |
|---|---|---|
| Aiken | Gravel | Muskie |
| Allen | Griffin | Nelson |
| Allott | Gurney | Packwood |
| Baker | Hansen | Pastore |
| Bayh | Harris | Pearson |
| Bellmon | Hart | Pell |
| Bennett | Hartke | Percy |
| Bible | Hatfield | Prouty |
| Boggs | Holland | Proxmire |
| Brooke | Hollings | Randolph |
| Burdick | Hruska | Ribicoff |
| Byrd, Va. | Hughes | Russell |
| Byrd, W. Va. | Inouye | Saxbe |
| Cannon | Jackson | Schweiker |
| Case | Javits | Scott |
| Church | Jordan, N.C. | Smith, Maine |
| Cook | Jordan, Idaho | Smith, Ill. |
| Cooper | Kennedy | Sparkman |
| Cotton | Long | Spong |
| Cranston | Magnuson | Stennis |
| Curtis | Mansfield | Stevens |
| Dodd | Mathias | Talmadge |
| Dole | McClellan | Thurmond |
| Dominick | McGee | Tower |
| Eagleton | McGovern | Tydings |
| Eastland | McIntyre | Williams, N.J. |
| Ellender | Metcalf | Williams, Del. |
| Ervin | Miller | Yarborough |
| Fannin | Mondale | Young, N. Dak. |
| Fong | Montoya | Young, Ohio |
| Goodell | Moss | |
| Gore | Murphy | |

The PRESIDING OFFICER. A quorum is present.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Will the Senator suspend until the Senate is in order?

The Senate will be in order, so that we can carry on the business of the Senate.

Senators will take their seats. Staff members also will take their seats.

Mr. KENNEDY. Mr. President, as I understand the parliamentary situation, all time has expired on the amendment that is being debated under a unanimous-consent agreement. Is my understanding correct?

The PRESIDING OFFICER. The Senator's understanding is correct.

Mr. KENNEDY. Does the unanimous-consent agreement that applied to that particular amendment preclude any additional amendment from being offered?

Mr. LONG. A point of order, Mr. President. These are clearly dilatory tactics. The time has expired.

Mr. KENNEDY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. LONG. He cannot have the floor, because time for debate has expired.

The PRESIDING OFFICER. A parliamentary inquiry has been propounded. The Chair will answer the question, and then the Senate will get on with the business.

The Chair is ready to announce its ruling.

Mr. LONG. Mr. President, these are dilatory tactics. I demand——

Mr. KENNEDY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. LONG. Mr. President, he cannot have the floor because the time for debate has expired.

The PRESIDING OFFICER. The Senator has a parliamentary inquiry which the Chair is trying to answer. If the Senator will be patient we will answer the Senator's question and get on with the business.

The Chair is now ready to announce the ruling. An amendment is in order. However, under the previous ruling of a limitation of time, the offering of an amendment would not permit further debate under this circumstance; and the agreement was that there would be no further debate. So in the opinion of the Parliamentarian, although he cannot find a precedent in the volume on Senate Procedure, he is of the opinion that no further amendment could be offered which would permit further debate.

Mr. KENNEDY. Mr. President, do I understand the Chair correctly that when a unanimous-consent agreement on the limitation of time on one amendment is obtained, that that precludes a limitation, within that definition of time, on the opportunity for the offering of any amendment to that amendment in the future?

The PRESIDING OFFICER. It does unless there is additional time given.

Mr. JACKSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JACKSON. Mr. President, is it not a fact that in offering unanimous-consent agreements to limit the vote on an amendment, that the normal language in such agreements, to be all-inclusive, have under the traditions of the Senate read something as follows: That it will apply to the amendment and all amendments thereto?

Mr. KENNEDY. It seems to me that is frequently done also. Was it done in this particular case?

The PRESIDING OFFICER. It was not done in this particular case.

Mr. KENNEDY. Can the Presiding Officer inform us the reasons, therefore, that time would not be available on amendments that could be offered at this time?

The PRESIDING OFFICER. The reason would be if you get a unanimous consent to limit debate on a particular amendment there would be no point in such unanimous consent if you are going to open it up again, without limitation, by offering another amendment thereto.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Mr. President, there was a question raised by the Senator from Massachusetts. I understand the yeas and nays have been ordered and we are now ready for the yeas and nays. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Would ordering of the yeas and nays preclude further amendments after that point?

The PRESIDING OFFICER. No, it would not.

Mr. JACKSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JACKSON. To pursue the inquiry made by the junior Senator from Washington, by inference the Senate has always made it clear in the past that if you are to lock up debate on an amendment it must include amendments thereto because this is the traditional standard language that we have always applied under the precedence of the Senate from many, many years back.

I would suggest if it was the intent, therefore, to include amendments thereto, that the unanimous-consent agreement should have been explicit on this point.

Mr. President, may I have a response? There is a long, long line of unanimous-consent agreements on this very point in which the agreement has been made to include not only the amendment but amendments thereto if it were the intent to stop all debate beyond the amendment itself.

Mr. DOLE. Mr. President, I demand the regular order.

The PRESIDING OFFICER. A parliamentary inquiry has been propounded. The Chair is waiting to reply. The Senator from Washington propounded a parliamentary inquiry.

Mr. METCALF. Mr. President, may I speak on the parliamentary inquiry proposed by the Senator from Washington?

The PRESIDING OFFICER. Yes, the Senator from Montana may be heard for the edification of the Chair.

Mr. DOLE. Mr. President, I demand the regular order.

Mr. METCALF. Mr. President, I concur with the Senator from Washington that in these unanimous-consent requests we close debate, but that does not foreclose the opportunity to offer an amendment on which a rollcall vote could be requested. It would seem to me that if no further debate is allowed, that amendment could be proposed. If a rollcall vote is demanded we could have a rollcall vote on that amendment.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. Do I understand the ruling of the Chair to be that an amendment to the pending amendment can be offered but that there will be no further debate?

The PRESIDING OFFICER. That is the ruling of the Chair.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The question is that on the adoption of the amendment—the yeas and nays have been ordered.

The clerk will call the roll.

Mr. JAVITS. Mr. President, Mr. President——

Mr. McINTYRE. Mr. President, I send to the desk an amendment.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

The PRESIDING OFFICER. The Senate will be in order.

The ASSISTANT LEGISLATIVE CLERK. The Senator from New Hampshire proposes an amendment as follows:

At the end of amendment No. 413 add a new subsection (C) as follows:

"The effect of this amendment shall be limited to persons and corporations where gross annual income does not exceed $3 million."

Mr. WILLIAMS of Delaware. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WILLIAMS of Delaware. Mr. President, yesterday the Senator from Massachusetts had an amendment upon which time was limited.

The PRESIDING OFFICER. May we have order in the Senate. Senators will please take seats. The Presiding Officer cannot hear. Senators will please be seated.

Mr. WILLIAMS of Delaware. Mr. President, yesterday the Senator from Massachusetts had an amendment pending upon which the Senate had a unanimous-consent agreement to limit debate on his amendment. I was going to submit an amendment to the amendment offered by the Senator from Massachusetts. The Chair ruled that would not be in order until after all time had expired. After that time expired I offered my amendment and the Chair ruled we could have debate.

Mr. KENNEDY. The Senator is correct.

Mr. DOLE. Mr. President, I make a point of order against the amendment and ask that I be heard.

The PRESIDING OFFICER. The amendment is in order.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Do I understand that the motion to reconsider was to reconsider the vote on the amendment and amendments thereto?

The PRESIDING OFFICER. The question is on the adoption of the amendment, and now an amendment has been offered thereto.

Mr. MUSKIE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MUSKIE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Hampshire.

Mr. MUSKIE. Mr. President, is that amendment debatable?

The PRESIDING OFFICER. It is not debatable.

Mr. MUSKIE. Is the ruling of the Chair subject to appeal?

The PRESIDING OFFICER. Yes, it is.

Mr. MUSKIE. I appeal the ruling of the Chair.

Mr. LONG. Mr. President, I move to lay that on the table.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll and Mr. AIKEN voted in the negative.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Montana will state it.

Mr. MANSFIELD. Will the Chair please ask all of us Senators to take our seats.

The PRESIDING OFFICER. The point is well made. Senators will please take their seats. The Senate is in the process of voting.

Mr. CRANSTON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from California will state it.

Mr. CRANSTON. I want an explanation as to whether a vote of "yea" is a vote to sustain the ruling of the Chair.

The PRESIDING OFFICER. A "yea" vote is a vote to sustain the ruling of the Chair.

Mr. CRANSTON. I thank the Chair.

Mr. MANSFIELD. Mr. President, will the Chair once again ask us Senators to please take our seats and try to keep reasonably quiet.

The PRESIDING OFFICER. The Senate will be in order. Senators will please take their seats. The clerk cannot be heard. Senators will please take their seats. The Chair requests once more that Senators please take their seats and please limit conversation while the vote is going on.

Mr. CASE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from New Jersey will state it.

Mr. CASE. Do I correctly understand that a "yea" vote will sustain the Chair? Or will it reject the ruling of the Chair?

The PRESIDING OFFICER. A "yea" vote will sustain the Chair.

Mr. CASE. Mr. President, I vote "yea."

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 57, nays 38, as follows:

[No. 207 Leg.]

YEAS—57

| | | |
|---|---|---|
| Allen | Curtis | Holland |
| Allott | Dole | Hruska |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Fulbright | Mundt | |

The PRESIDING OFFICER. By this vote, the appeal has been tabled, and the ruling of the Chair has been sustained.

The question now is agreeing to the McIntyre amendment to the Dole amendment.

Mr. McINTYRE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MONDALE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MONDALE. Would a vote in favor of the McIntyre amendment be a "yea" vote?

The PRESIDING OFFICER. Yes, it certainly would. [Laughter.]

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HOLLAND. Mr. President, I ask that the clerk be requested to read the amendment. Many of us were on other Senate business when it was read previously.

The PRESIDING OFFICER. The clerk will state the McIntyre amendment.

The ASSISTANT LEGISLATIVE CLERK. At the end of the amendment offered by the Senator from Kansas add a new section as follows:

The effect of this amendment shall be limited to persons and corporations where gross annual income does not exceed $3 million.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. DOLE. Is a motion to table the McIntyre amendment in order?

The PRESIDING OFFICER. Yes, it is.

Mr. DOLE. I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the McIntyre amendment. The yeas and nays are requested. Is there a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The Senate will be in order.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, will the Chair once again request Senators to take their seats and lower their voices?

The PRESIDING OFFICER. Will Senators please take their seats and keep conversations to a minimum so that we can complete this rollcall?

The rollcall was resumed and concluded.

Mr. COTTON (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from New Mexico (Mr. ANDERSON). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I withdraw my vote.

Mr. LONG (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I withdraw my vote.

Mr. McCARTHY (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Arkansas (Mr. FULBRIGHT). If he were present and voting, he would vote "yea." If I were free to vote, I would vote "nay." Therefore I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The Senator from New Hampshire (Mr. COTTON) has previously announced his pair.

The result was announced—yeas 39, nays 53, as follows:

[No. 208 Leg.]

YEAS—39

| | | |

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Fulbright | Mundt | |

So the motion to lay Mr. McINTYRE's amendment on the table was rejected.

The PRESIDING OFFICER. The question now recurs on agreeing to the amendment of the Senator from New Hampshire (Mr. McINTYRE) to the amendment of the Senator from Kansas (Mr. DOLE). On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COTTON (when his name was called). On this vote, I have a pair with the Senator from New Mexico (Mr. ANDERSON). If he were present and voting, he would vote "nay"; if I were permitted to vote, I would vote "yea." Therefore, I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The Senator from New Hampshire (Mr. COTTON) has previously announced his pair.

The result was announced—yeas 74, nays 20, as follows:

[No. 209 Leg.]

YEAS—74

| | | |
|---|---|---|
| Aiken | Gore | Mondale |
| Allen | Griffin | Montoya |

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Cotton, for.

NOT VOTING—5

| | | |
|---|---|---|
| Anderson | Goldwater | Symington |
| Fulbright | Mundt | |

So Mr. McINTYRE's amendment to Mr. DOLE's amendment (No. 413) was agreed to.

The PRESIDING OFFICER. The question now occurs on agreeing to the Dole amendment as amended by the McIntyre

amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent to withdraw my request for the yeas and nays.

Mr. PASTORE. Mr. President, I ask for the yeas and nays.

I voted against the last amendment, and I will vote against this one.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LONG (when his name was called). On this vote I have a pair with the Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I withhold my vote.

Mr. McCARTHY (when his name was called). On this vote I have a pair with the Senator from Arkansas (Mr. FULBRIGHT). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Tennessee (Mr. GORE), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. GORE) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 58, nays 34, as follows:

[No. 210 Leg.]

YEAS—58

| | | |
|---|---|---|
| Allen | Ellender | Montoya |
| Allott | Ervin | Moss |
| Baker | Fannin | Murphy |
| Bayh | Fong | Pearson |

PRESENT AND GIVING LIVE PAIRS, AS PREVIOUSLY RECORDED—2

Long, for.
McCarthy, against.

NOT VOTING—6

| | | |
|---|---|---|
| Anderson | Goldwater | Mundt |
| Fulbright | Gore | Symington |

So the Dole amendment, as amended, was agreed to.

Mr. McINTYRE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McINTYRE. Is a motion in order to reconsider the vote by which the amendment was adopted?

The PRESIDING OFFICER. It is.

Mr. McINTYRE. I move to reconsider the vote by which the amendment was adopted.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MANSFIELD. Mr. President, could we have some idea as to how many more Senators will offer amendments tonight?

I count eight.

I think we ought to stay as late as we can tonight, in the hope that we can at least get to third reading. It is not a very happy outlook, but I hope that the usual consideration and accommodation of the Members on both sides of the aisle will prevail throughout the early hours of the evening, and that we will be able to get a time limitation on these amendments as they come along.

## REQUEST FOR AUTHORIZATION FOR THE COMMITTEE ON THE JUDICIARY TO MEET DURING THE SESSION OF THE SENATE TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. SCOTT. Mr. President, by request, I am constrained to object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAYH. Mr. President, I do not want to have it pass unnoticed that for the second time in 2 days the Committee on the Judiciary has been denied the opportunity to sit. The pending order of business is electoral reform. It has been the pending order of business before the committee since the middle of August.

I think it is critical that the Judiciary Committee have an opportunity to sit and to debate this very important matter. I appreciate the fact that the chairman of the Committee on the Judiciary has made these efforts to try to call the committee. While the Senator from Pennsylvania was the one who objected, my remarks are not directed at him. I am certain that he, as an individual Senator, is not opposed to the committee meeting. He is, in fact, a supporter of electoral reform.

Mr. President, I wish to point out that it has been over a year now since our Presidential election machinery came very close to malfunctioning.

I hope the Senate and the Committee on the Judiciary can take action before we are faced with a catastrophe in 1972.

## THE VICE PRESIDENT AND SENATOR GORE

Mr. GORE. Mr. President, at 6 o'clock this morning I was greeted in the morning news by a report of remarks made by the distinguished Vice President of the United States in a speech in Washington last evening in which he referred to me and to my amendment to increase the personal tax exemption.

I consider it a mark of distinction that I am so much in the thoughts of the Vice President these days that he finds occasion to refer to me frequently. I am particularly honored that in his speech last night he said:

> My only thought is that Senator Gore is living up to his name.

The Vice President is too modest; I am practically certain he has had other thoughts. And, to adapt a phrase made famous by another distinguished statesman—if you gave me a week, I might be able to think of one.

In any event, so honored, I hastened to the Capitol for the convening of the Senate. I must confess, Mr. President, that as I strolled across the Capitol grounds beneath the ancient Elms the Vice President was a bit on my mind, too.

The Vice President said, also, that my amendment to increase the personal exemption from $600 to $800 would "pump" $2 billion into the economy. The Vice President is, of course, entitled to his opinion concerning my amendment. So is the President, who has threatened to veto the tax reform bill if my amendment and social security benefit increases approved by the Senate remain in it.

But I think it is important that we keep the record straight.

My amendment would actually cost the Treasury of the United States less money than would the tax relief provisions it replaced, which provisions had the approval of the Nixon-Agnew administration.

Moreover, the Gore amendment proposes to stop the Government from pumping out of people's pockets and pinching taxes out of everybody's paycheck until each taxpayer has a low income allowance of $1,000 plus a personal exemption of $800 for himself and for each of his dependents.

The principle of allowing a taxpayer a fair and reasonable personal exemption before the Government takes part of his paycheck is not new; it is as old as the Federal income tax itself. This is not intended to "pump" money into the economy but, instead, it is permitting a taxpayer to have enough for him and his dependents barely to live on before the Federal Government starts taxing his income.

Now, both the bill as passed by the House of Representatives and the bill approved by the Senate Finance Committee provide tax relief, as does my amendment.

The question at issue is, Who gets it?

The administration proposes to give more relief to those with high income. My amendment is designed to give proportionately more relief to those of low and moderate income—more specifically, to taxpayers with families to raise and support.

On this question I am delighted to join issue. I join, too, on the issue of a 15-percent increase in social security benefits, already approved unanimously by the House Ways and Means Committee and overwhelmingly by the Senate.

Now, Mr. President, the Vice President is denied the opportunity for debate in this forum. This is a privilege with which the people of Tennessee have honored me. But I do not wish to take advantage of our distinguished Vice President.

I respectfully suggest, therefore, that should the Vice President wish to explore these and related questions further and in depth, it might be useful for the distinguished Vice President and the Senator from Tennessee to have a mutual discussion of the issues contained in the Vice President's statement of last evening in another forum. Subjects alluded to by the distinguished Vice President, and which would appear appropriate for public examination, the public interest being acutely involved, would appear to be:

First, the adequacy and fairness of a $600 personal exemption for a taxpayer, for a taxpayer's wife, and for a taxpayer's dependent children;

Second, the relative values and social justices of giving most tax relief to those in the high income brackets or to the mass of our people who are desperately trying to make ends meet; and

Third, interest rates and the cost of living in the Nixon-Agnew administration.

Perhaps we could add the proposed increase in social security benefits in view of the remarks of President Nixon.

Now, if the distinguished Vice President should find a mutual discussion agreeable, then I would respectfully leave entirely to him the choice of place, time, or forum, though I must say I would prefer Tennessee. Should Tennessee be favorably considered, the grass is usually green and the buttercups out about April 15; the foliage golden and beautiful in late October.

Now, the distinguished Vice President, heaping favor upon honor, has made me political target No. 1 for next year, and has promised to come to Tennessee and campaign against me. I am grateful for this promised service. There is nothing the voters of Tennessee appreciate more than having distinguished outsiders come in and instruct them on how to vote.

Since I am sure to be touched by these promised services, neither my gratitude nor my conscience will give me peace of mind if I fail to repay the Vice President in kind. Though it is not normally the function of a member of the opposition party to rise to the defense of a beleaguered public official, in view of all the extenuating circumstances, I do.

He has brought such unique contributions to the high office of Vice President that they deserve recognition.

First of all, the Vice President warrants our gratitude for all that he has done to rejuvenate public usage of the English language.

When in this era of "cool" disdain and sly innuendo have we heard such Churchillian rhetoric as that of the Vice President when he thunders fulminations against "vultures who sit in the trees and watch lions battle," plotting from their treetops to "pervert honest concern into something sick and rancid"? Who can hear such beautiful words without a stirring of the blood, without feeling inspired to sally forth against those "sick and rancid vultures" in our midst. "Their names;" we are moved to cry out.

But poetry is the least of the "Veep's" contributions. Bard though he is, he claims our gratitude even more as a philosopher. He strongly favors, he tells us, "constitutional dissent." But, improving on both Jefferson and Justice Holmes, he is very precise about his limits.

Quite obviously these limits have been exceeded, when elected representatives of the people ask troublesome questions, or when television commentators, who have not even been elected to their jobs, respond to a Presidential speech with critical analysis instead of rhapsodies of praise.

Going on to make one of these "fine distinctions" in which he specializes, the Vice President points out that when the purpose of the dissent is "unsound," or when it is, in his view, "idiotic" as well, the limit of toleration has been reached. Here, Mr. President, a milestone in jurisprudence has surely been reached, the drawing at last of a clear distinction between "constitutional" and "idiotic" dissent.

As a legal and political philosopher, the Vice President has illustrated for each of us—if only we would listen—the kind of "subtlety" and "fine distinctions based on acute reasoning" which we, too, could perhaps make if we would stick to the text of statements, listen respectfully to the teachings of our leaders and stop asking impudent questions about morality, the priority of values and the national interest.

Such things as these, after all, are best left to wiser heads—to such wise and venerable men as the Vice President of the United States and to those who have made such a stunning success of American foreign policy in this decade. Or, better still, as the distinguished Vice President himself has put it:

> Saying that the President should understand the people's view is no solution. It is time for the people to understand the views of the President they elected to lead them.

But elected representatives of the people, in contradistinction to reporters and commentators, are concerned with the drift of things, with seeming misdirection and perhaps a warped sense of values. Some of them, undoubtedly in the mundane process of getting elected, have let their heads get filled with a lot of questions about social justice, about fairness in taxes, about peace and about the sanctity of human life. They are so literal-minded, these impertinent demagogues. In their innocence and naivete, they talk as though that propaganda they picked up from the people, to say nothing of Jefferson and Lincoln and Wilson, were good for something more than inscriptions on stone monuments. Somehow they have got it in their heads that all those fine phrases, even the Bill of Rights in our Constitution, were to be taken seriously, perhaps even put into practice.

And how have our young people become infected with such "idiotic" constitutional radicalism? How have we, their parents and teachers, failed them? The "Veep" has an explanation and it must give us pause. "Parental-type power must be exercised," he points out. "Some parents have forgotten how." As a result of misguided permissiveness our children have fallen under the spell of "political hustlers."

They do not seem to have understood—they do not seem capable of understanding—that one must attain a certain age and eminence before one has earned the right to corrupt one's country's institutions.

Clearly, as the Vice President suggests, "it is time to question the credentials" of these Americans and, perhaps, to "separate them from our society." We separated our Japanese fellow-citizens from our society during World War II, it will be recalled, to our eternal pride and credit.

None of this is meant to suggest that the distinguished Vice President is opposed to dissent as long it is "constitutional," as long as it is not "unsound" or "idiotic" and as long as it does not involve criticism of the President's policies and speeches until the people have time to "digest" them, or does not involve tax policies that are fair to all of our people.

In his short tenure as President of the Senate the Vice President has become a teacher and an example of sorts for his colleagues. He warns us against ideological eunuchry; he urges us to "divide on authentic lines," and he, himself, has made an unparalleled contribution to this end.

---

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

AMENDMENT NO. 353

Mr. McCARTHY. Mr. President, I call up amendment 353 and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. McCARTHY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 508, after line 20, insert the following new section:

"SEC. 805. INCOME SPLITTING FOR UNMARRIED INDIVIDUALS.

"(a) IN GENERAL.—Section 2 (relating to tax in the case of a joint return) is amended to read as follows:

"'SEC. 2. TAX IN CASE OF INDIVIDUALS ENTITLED TO SPLIT-INCOME COMPUTATION.

"'Except in the case of a married individual filing a separate return, a nonresident alien individual, or an estate or trust, the tax imposed by section 1 on the taxable income of any individual shall be twice the tax which would be imposed if the taxable income were cut in half. For purposes of this section, the determination of whether an

individual is married shall be made as of the close of his taxable year, and an individual legally separated from his spouse under a decree of divorce or of separate maintenance shall not be considered as married.'

"(b) CONFORMING AMENDMENTS.—

"(1) Effective with respect to taxable years beginning after December 31, 1969, and before January 1, 1972, section 1 is amended—

"(A) by striking out so much of subsection (a) as precedes the last table therein and inserting in lieu thereof the following:

"'(a) RATES OF TAX ON INDIVIDUALS.—There is hereby imposed on the taxable income of every individual a tax determined in accordance with the following table:'; and

"(B) by striking out subsection (b).

"(2) Effective with respect to taxable years beginning after December 31, 1970, section 1 (as amended by subsections (a) and (b) of section 803 of this Act) is amended—

"(A) by striking out, in the matter preceding the table in subsection (a), '(other than a head of a household to whom subsection (b) applies and an unmarried individual to whom subsection (c) applies)'; and

"(B) by striking out subsections (b) and (c).

"(3) Section 51(a)(2)(B) (relating to the tax surcharge) is amended to read as follows:

"'(B) LIMITATION.—In the case of—

"'(i) an individual whose tax under section 1 is computed as provided in section 2 and whose adjusted tax for the taxable year is less than $580, and

"'(ii) any other individual (other than an estate or trust) whose tax under section 1 is computed without regard to section 2 and whose adjusted tax for the taxable year is less than $290,

the tax imposed by subparagraph (A) shall not be greater than an amount equal to twice the tax which would be imposed by subparagraph (A) if the tax were imposed on the amount by which the adjusted tax exceeds $290 or $145, respectively.'

"(c) EFFECTIVE DATE.—Except as otherwise provided in subsection (b), the amendments made by this section shall apply to taxable years beginning after December 31, 1969."

Mr. LONG. Mr. President, does the Senator desire the yeas and nays on the amendment?

Mr. McCARTHY. I do.

Mr. LONG. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. LONG. Mr. President, is the Senator willing to limit debate?

Mr. McCARTHY. I am.

Mr. LONG. I ask unanimous consent that time on the amendment be limited to 1 hour, half under the control of the Senator from Minnesota (Mr. McCARTHY) and the other half under the control of the manager of the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Minnesota is recognized.

Mr. McCARTHY. Mr. President, my amendment (No. 353) is cosponsored by the Senator from Connecticut (Mr. RIBICOFF) and the Senator from Indiana (Mr. HARTKE). The purpose of the amendment is to make the same rate of taxation applicable to taxpayers having the same level of taxable income.

The PRESIDING OFFICER. The Senate will be in order. The Chair cannot hear what the Senator is saying. The aisles will be cleared, and Senators will be seated. The Senate will be in order.

The Senator from Minnesota may proceed.

Mr. McCARTHY. Mr. President, the amendment is directed toward both justice and equity and it provides that all citizens will be subject to the same rates of taxation on comparable taxable income whether they are single persons, widows, widowers, married persons, or those unmarried persons who are under existing law classified as head of household taxpayers.

It accomplishes this by making the rates of taxation applicable to married persons filing a joint return available to nearly all taxpayers. It does not increase the rate of taxation on married persons who filed joint returns. It simply extends the benefits of their rates to single taxpayers.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. RIBICOFF. Mr. President, I wish to commend the distinguished Senator from Minnesota for having carried on this fight for many, many years. As the Senator knows this matter has been raised for a long time by a constituent of mine, Miss Vivien Kellems of Connecticut.

To make this situation graphic, is it not true that a married couple with a joint income of $20,000 would pay $4,380 in taxes, but the single person who earned $20,000 and who has about the same expenses as the married couple must pay $6,070 or about 40 percent more than the married couple. Therefore, there is a gross inequity for the single person who works and who also has the expenses of maintaining herself.

Mr. McCARTHY. The Senator is correct. It can run to 40 percent, although there is not that much difference in the lowest brackets.

Mr. COOK. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. COOK. Has the Senator determined what this amendment will cost in relation to income?

Mr. McCARTHY. In relation to income?

Mr. COOK. In relation to income to the Government.

Mr. McCARTHY. It would result in an estimated additional reduction in tax liability of $1.45 billion over and above the $445 million reduction provided by the Finance Committee in its treatment of single persons. This is a substantial amendment. It is worthy of the Senator's attention.

Mr. President, the adoption of the amendment would be a significant step in making the income tax liability of all citizens more equitable.

I have grave doubts whether the existing law as it is drafted and has been in effect is, in fact, constitutional.

The basic method of recognizing family obligations is provided for in the Internal Revenue Code by the allowance for various kinds of deductions. The Senate has now adopted the Gore amendment which increases the amount of the deduction for each dependent. Having made this adjustment in the bill, which recognizes the special expense of maintaining dependents, we should move to provide equity for single persons by adopting this amendment. In fact, the Gore amendment has the effect of increasing the inequity against single persons over and above that which is in the existing law.

This discrimination against single persons has not always been in the Internal Revenue Code. It got in the code almost by accident in 1948 when Congress adopted the income-splitting provision. It was not adopted because it was thought the tax liability of married couples was too great compared with single persons. The income-splitting provision was adopted because of the practical problems of married persons in community property States being treated more favorably. One half of the income of a person is attributed to the other, and there was pressure to extend the consequent more favorable rates available to married couples in community property States to married persons in common law States; and so the income-splitting device available to married couples in States with community property laws was authorized for married persons in common law States.

This change in 1948 seemed to solve the problem for married couples in different States, but the method greatly increased the tax burden on single persons compared to that of married couples filing a joint return. I do not think anyone any longer questions the discrimination against single persons which resulted. The language of the report of the Finance Committee concedes the existence of the problem. As the report states: ". . . a single person's tax is as much as 40.9 percent higher than the tax paid on a joint return with the same amount of taxable income."

Several years ago the Congress attempted to reduce the discrimination for some single persons by creating a head of household category with rates about half way between the more favorable rates for married couples filing joint returns and those for single persons. It improved the situation somewhat for a minority of single taxpayers, but did not diminish the discrimination against the majority of single taxpayers.

The House Committee on Ways and Means considered this inequity in drawing up H.R. 13270 and so did the Senate Committee on Finance. Each committee has proposed a different partial solution, but in my judgment the only satisfactory solution is to remove the inequity altogether, and that is the purpose of this amendment.

The partial remedy adopted by the House is to extend the head of household schedule to widows and widowers, regardless of age, and to unmarried individuals age 35 and over. Also the House bill permits a surviving spouse to receive the full benefits of income splitting accorded to married couples filing joint returns as long as she continues to support a dependent child in her household. I ask unanimous consent to have printed at this point the statement from House report dealing with "head of household and surviving spouse tax treatment."

There being no objection, the state-

ment was ordered to be printed in the RECORD, as follows:

*4. Head-of-household and surviving spouse treatment (sec. 803 of the bill and sec. 1 of the code).*

*Present law.*—Since the Revenue Act of 1948, married couples have had the option of being taxed under the split-income provision. This, in effect, taxes a married couple as if it were composed of two single individuals each of whom had one-half the couple's combined income. This 50–50 split of income between the spouses for tax purposes generally produces a lower tax than any other division of income since the application of the graduated tax rates separately to each of the two equal parts comprising the couple's income keeps the total income in lower tax brackets. In effect, the split-income provision achieves this result by allowing married couples who exercise the option of filing joint returns to use a tax-rate schedule with tax brackets twice as wide as those applying to single people and spouses filing separate returns.

As a result of income splitting, married couples pay lower taxes than single people at the same income levels.

In 1951, a head-of-household provision was enacted to grant partial income-splitting to widows, widowers, and certain other single persons with dependents. Individuals who qualify under this provision are allowed approximately one-half of the income-splitting benefits given to married couples. These heads of households use a different tax rate schedule which, at any given level of income, produces a tax liability about halfway between the tax paid by a married couple filing a joint return and a single individual.

*General reasons for change.*—Widows, widowers, and unmarried individuals who do not support dependents in a household cannot qualify for head-of-household treatment under present law. As a result, such individuals are taxed as single individuals and do not receive the income-splitting benefits accorded to heads of households (that is, one-half the income-splitting benefits granted to married couples filing joint returns). This treatment places unduly heavy tax burdens on mature single individuals, widows and widowers. Such individuals more often than not have to incur the expense of maintaining a household; and in any event they should receive some income splitting in order to be treated fairly compared with married couples. Moreover, for widows and widowers present law is harsh in that it withdraws all the benefits of income splitting after their spouse dies despite the fact that they may continue to have relatively heavy living expenses. Furthermore, your committee believes that the discrepancies in rate between single and married persons are too great. Accordingly, your committee believes some measure of relief with regard to income splitting is warranted for widows, widowers, and mature single individuals.

Present law also does not give adequate income splitting to surviving spouses who support dependent children. It provides full income splitting to such spouses only for 2 years. At the expiration of these 2 years, the surviving spouse may qualify as a head of household if she supports a dependent in her home. However, your committee does not believe this is adequate relief. Since such surviving spouses have the full obligations of a married couple toward their children without the help of a marital partner, they should continue to receive full income splitting.

*Explanation of provisions.*—Your committee's bill provides that widows or widowers, regardless of age, and unmarried individuals age 35 and over are to be treated as "intermediate tax rate individuals." As such, they will be entitled to receive one-half the income-splitting privileges received by married couples filing joint returns; and their tax liabilities will be halfway between those of other single people and married couples filing joint returns at the same taxable income levels.

In addition, a surviving spouse who maintains a dependent child in her home is no longer to be subject to the present 2-year limit on the full-income-splitting privilege. As a result, such a surviving spouse will continue to receive the full-income-splitting benefits accorded to married couples filing joint returns so long as she continues to support a dependent child in her household.

*Effective date.*—The amendments made by this provision are to apply to taxable years beginning after December 31, 1969.

*Revenue effect.*—It is estimated that the amendments made by these provisions will reduce revenues by $650 million for 1971 and thereafter.

Mr. McCARTHY. The approach adopted by the Finance Committee is to establish a new schedule of rates applicable to all single persons, regardless of age, under which the tax of single persons will never be more than 20 percent greater than that of married persons filing a joint return and having the same amount of taxable income. The Finance Committee bill also provides for a new schedule of rates for head of household.

I ask unanimous consent that the statement in the report of the Finance Committee, with its appropriate tables, regarding tax treatment of single persons be printed at this point in the RECORD.

There being no objection, the excerpt from the report was ordered to be printed in the RECORD, as follows:

3. Tax Treatment of Single Persons (sec. 802 of the bill and sec. 1 of the code).

*Present law.*—Since the Revenue Act of 1948, married couples have had the option of being taxed under the split-income provision. This, in effect, taxes a married couple as if it were composed of two single individuals each of whom had one-half the couple's combined income. This 50–50 split of income between the spouses for tax purposes generally produces a lower tax than any other division of income since the application of the graduated tax rates separately to each of the two equal parts comprising the couple's income keeps the total income in lower tax brackets. In effect, the split-income provision achieves this result by allowing married couples who exercise the option of filing joint returns to use a tax-rate schedule with tax brackets twice as wide as those applying to single people and spouses filing separate returns.

As a result of income splitting, married couples pay lower taxes than single people at the same income levels.

In 1951, a head-of-household provision was enacted to grant partial income-splitting to widows, widowers, and certain other single persons with dependents in their households. Individuals who qualify under this provision are allowed approximately one-half of the income-splitting benefits given to married couples. These heads of households use a different tax rate schedule which, at any given level of income, produces a tax liability about halfway between the tax paid by a married couple filing a joint return and a single individual.

Beginning in 1954 surviving spouses with dependent children were permitted to use the joint return tax rates with full income-splitting for two taxable years following the death of the husband or wife.

*General reasons for change.*—The committee conclude that the difference in tax liability between single persons and married couples filing joint returns is too large. Under present law, the tax rates imposed on single persons are too heavy relative to those imposed on married couples at the same income level; a single person's tax is as much as 40.9 percent higher than the tax paid on a joint return with the same amount of taxable income. While some difference between the rate of tax paid by single persons and joint returns is appropriate to reflect the additional living expenses of married taxpayers, the existing differential of as much as 41 percent which results from income-splitting cannot be justified on this basis.

The committee concluded that the proper solution to the tax differential between married and single taxpayers is a new single person rate schedule that insures that the tax of single persons will never be more than 120 percent of that of married taxpayers with the same amount of taxable income.

*Explanation of provision.*—The Committee amendments provide a new, lower, rate schedule for single persons (as well as a new regular rate schedule and head-of-household rate schedule) shown in Table 20. This rate schedule is designed to provide tax liability for single persons which is 17 to 20 percent above that of married couples for taxable incomes of between $14,000 and $100,000, with the maximum differential of 20 percent being reached at $20,000. (See col. 7 of Table 21 below.) Below $14,000, where income-splitting is less beneficial, the excess of the single person's rates over those of married couples gradually decreases. This is also true above $100,000, again where the benefits of income-splitting become less significant.

The committee amendments also provide a new rate schedule for heads of households which is halfway between the new rate schedule for single persons and the rate schedule used by married couples (the "regular" rate schedule with brackets twice as wide). The "regular" rate schedule is maintained for married couples filing separate returns and for estates and trusts. The rates in all schedules reflect the general rate reduction provided elsewhere in the bill.

TABLE 20.—SENATE FINANCE COMMITTEE RATE SCHEDULES (TO BE EFFECTIVE IN 1972)

| Taxable income bracket | Regular rate schedule [1] | Head-of-household rate schedule [2] | Single person rate schedule [3] |
|---|---|---|---|
| 0 to $500 | 13 | 13 | 13 |
| $500 to $1,000 | 14 | 13 | 14 |
| $1,000 to $1,500 | 15 | 15 | 15 |
| $1,500 to $2,000 | 16 | 15 | 16 |
| $2,000 to $4,000 | 18 | 17 | 18 |
| $4,000 to $6,000 | 21 | 19 | 20 |
| $6,000 to $8,000 | 23 | 20 | 22 |
| $8,000 to $10,000 | 27 | 22 | 24 |
| $10,000 to $12,000 | 30 | 23 | 26 |
| $12,000 to $14,000 | 34 | 25 | 28 |
| $14,000 to $16,000 | 37 | 27 | 30 |
| $16,000 to $18,000 | 40 | 29 | 32 |
| $18,000 to $20,000 | 42 | 31 | 34 |
| $20,000 to $22,000 | 44 | 32 | 35 |
| $22,000 to $24,000 | 47 | 34 | 37 |
| $24,000 to $26,000 | 47 | 36 | 37 |
| $26,000 to $28,000 | 49 | 38 | 42 |
| $28,000 to $32,000 | 49 | 40 | 42 |
| $32,000 to $36,000 | 50 | 43 | 47 |
| $36,000 to $38,000 | 50 | 45 | 47 |
| $38,000 to $40,000 | 52 | 47 | 52 |
| $40,000 to $44,000 | 52 | 48 | 52 |
| $44,000 to $50,000 | 54 | 50 | 54 |
| $50,000 to $60,000 | 58 | 54 | 58 |
| $60,000 to $80,000 | 60 | 55 | 60 |
| $80,000 to $100,000 | 61 | 57 | 61 |
| $100,000 to $120,000 | 62 | 60 | 62 |
| $120,000 to $150,000 | 63 | 62 | 63 |
| $150,000 to $160,000 | 64 | 62 | 64 |
| $160,000 to $200,000 | 64 | 63 | 64 |
| $200,000 to $300,000 | 65 | 64 | 65 |
| Over $300,000 | 65 | 65 | 65 |

[1] This schedule is in the House bill.
[2] Available to taxpayers who qualify for head-of-household status.
[3] Schedule for all single persons and widows and widowers.

TABLE 21.—TAX LIABILITY FOR JOINT RETURNS AND SINGLE PERSONS AT SELECTED LEVELS OF TAXABLE INCOME, AT RATES PROPOSED TO BE EFFECTIVE IN 1972

| Taxable income | Tax liability under House bill | | | | | Senate Finance Committee, single persons | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | Single, 35 and over | | | | | |
| | Joint returns [1] | Single under 35 | Percent above joint return | Tax | Percent above joint return | Tax | Percent above joint return | Percent different from House for singles over 35 | Percent different from House for singles under 35 |
| $2,000 | $270 | $290 | 7.4 | $280 | 3.7 | $190 | 7.4 | +5.7 | 0 |
| $4,000 | 580 | 650 | 12.1 | 620 | 6.9 | 650 | 12.1 | +4.8 | 0 |
| $6,000 | 940 | 1,070 | 13.8 | 1,000 | 6.4 | 1,050 | 11.7 | +5.0 | −1.9 |
| $8,000 | 1,300 | 1,530 | 17.7 | 1,420 | 9.2 | 1,490 | 14.6 | +4.9 | −2.6 |
| $10,000 | 1,720 | 2,070 | 20.3 | 1,900 | 10.5 | 1,970 | 14.5 | +3.7 | −4.8 |
| $14,000 | 2,600 | 3,350 | 28.8 | 2,980 | 14.6 | 3,050 | 17.3 | +2.3 | −9.0 |
| $18,000 | 3,600 | 4,890 | 35.8 | 4,240 | 17.8 | 4,290 | 19.2 | +1.2 | −12.3 |
| $20,000 | 4,140 | 5,730 | 38.4 | 4,940 | 19.3 | 4,970 | 20.0 | +.6 | −13.3 |
| $26,000 | 6,026 | 8,490 | 41.0 | 7,260 | 20.6 | 7,150 | 18.8 | −1.5 | −15.3 |
| $32,000 | 8,180 | 11,430 | 39.7 | 9,800 | 19.8 | 9,670 | 18.2 | −1.3 | −15.8 |
| $38,000 | 10,620 | 14,430 | 35.9 | 12,520 | 17.9 | 12,490 | 17.6 | −.2 | −13.4 |
| $44,000 | 13,220 | 17,550 | 32.8 | 15,380 | 16.3 | 15,610 | 18.1 | +1.5 | −11.4 |
| $50,000 | 16,040 | 20,790 | 29.6 | 18,440 | 15.0 | 18,850 | 17.5 | +2.2 | −9.0 |
| $100,000 | 41,580 | 50,790 | 22.2 | 46,140 | 11.0 | 48,850 | 17.5 | +5.9 | −3.3 |
| $150,000 | 71,180 | 82,090 | 15.3 | 76,740 | 7.8 | 80,150 | 12.6 | +4.4 | −2.8 |
| $200,000 | 101,580 | 114,090 | 12.3 | 108,140 | 6.5 | 111,650 | 9.9 | +3.2 | −2.4 |
| | | | | | | | | | 1 |

[1] Under Senate Finance Committee bill, as well.

The committee agrees with the House that the tax differential between single and married taxpayers is excessive but does not believe that the differential should be reduced only for single persons age 35 and over (and widows and widowers) as provided in the House bill. This age 35 test seems arbitrary and unrelated to the basic issue of whether there is too great a tax difference between single and married taxpayers resulting from marital status. In additional, there is good reason for maintaining a tax differential between single persons and heads-of-households who in fact maintain a household for a dependent. This distinction would, of course, be eliminated under the House bill. In view of these considerations, the committee substituted for the House provision the rate schedule which limits the tax paid by all single persons regardless of age to no more than 120 percent of the tax paid by married taxpayers at the same taxable income level.

*Revenue effect.*—The revenue loss from this provision is $445 million annually. The revenue cost of the rate schedule for single persons in the House bill would be $650 million.

*Effective date.*—The new rate schedule for single persons is effective in two stages, in 1971 and 1972, with over one-third of the reduction from present rates to take place in 1971 and the remainder in 1972 (as is also the case with the general rate reduction).

Mr. McCARTHY. The joint committee has prepared a table with estimates of the revenue loss under this amendment, compared to revenue losses under the Finance Committee treatment of single persons. They estimate that this amendment would reduce individual income tax liability by $1.45 billion more than the $445 million reduction estimated under the Senate Finance Committee treatment of single persons.

I ask unanimous consent that this table be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL INDIVIDUAL INCOME TAX ESTIMATED ADDITIONAL REDUCTION IN TAX LIABILITY OVER THE $445 MILLION REDUCTION UNDER SENATE FINANCE COMMITTEE TREATMENT OF SINGLE PERSONS FROM APPLICATION OF JOINT RETURN TAX SCHEDULE TO SINGLE PERSON AND HEAD OF HOUSEHOLD RETURNS

| Adjusted gross income class (thousands) | Single persons | | Head of household | | Total | |
|---|---|---|---|---|---|---|
| | Number of returns (thousands) | Reduction in tax liability (millions) | Number of returns (thousands) | Reduction in tax liability (millions) | Number of returns (thousands) | Reduction in tax liability (millions) |
| 0 to $3 | 3,007 | $14 | 100 | (1) | 3,107 | $14 |
| $3 to $5 | 6,080 | 159 | 530 | $7 | 6,610 | 166 |
| $5 to $7 | 2,971 | 188 | 548 | 16 | 3,519 | 204 |
| $7 to $10 | 2,782 | 314 | 145 | 8 | 2,927 | 322 |
| $10 to $15 | 873 | 179 | 211 | 27 | 1,084 | 206 |
| $15 to $20 | 201 | 103 | 51 | 19 | 252 | 122 |
| $20 to $50 | 205 | 231 | 39 | 37 | 244 | 268 |
| $50 to $100 | 20 | 63 | 6 | 14 | 26 | 77 |
| $100 and over | 9 | 66 | 2 | 7 | 11 | 73 |
| Total | 16,148 | 1,317 | 1,632 | 135 | 17,780 | 1,452 |

[1] Less than $500,000.

Mr. LONG. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. LONG. Mr. President, the compelling reason why we should not agree to this amendment is that it would increase the revenue loss under the bill by $1.5 billion. I personally saw the President on television say that he would veto this bill if it lost the Government as much revenue as it does now, referring to the two big items by which the expense of the bill had been increased at that time.

If we were to take the amendment, and the House were to agree to it, it seems to me it would guarantee a veto of the bill.

On the merits of the amendment, it is true that the costs for one person living alone are more than one-half as much as for two people living together. At the same time that logic does not extend to saying it costs twice as much. After having studied the problem, we have undertaken to help the single person by providing that his tax rate would be no more than 20 percent above the rate that applies to a married couple with the same taxable income.

The cost of that provision is $445 million. That is about as far as we think we can go and still act responsibly at this time. It would further seem that we should let this provision that provides some tax relief to single people go into effect. At some future date perhaps we will be able to afford to extend additional tax relief to them.

We cannot afford it now. To add this amendment might result in their not getting the favorable tax treatment already in the bill. It amounts to $445 million. It would be in the best interest of single people to have this amendment put in the bill because it might result in preventing them from getting any relief.

Mr. WILLIAMS of Delaware. I completely agree with the Senator from Louisiana. Single people would get $445 million in tax relief under the bill. There is no question in my mind that if the amendment would be agreed to and placed in the bill that they would get no relief at all. Unless we can trim back the bill as it is now, we will not have any bill to consider at all.

Mr. LONG. It seems to me that should this amendment carry, it would make it even harder to cut back on the amount of tax relief to the amount the committee felt could be afforded in any event.

I hope that the amendment will be rejected.

Mr. McCARTHY. I hope that the distinguished chairman will not be frightened by the threat of a Presidential veto. He has never shown any inclination along that line before on other amendments to the bill. I would suggest that the Senator would not want to make that as a statement or argument in the Senate today because it would undermine his whole record.

I do not think the Senator from Louisiana has ever voted for a tax increase—or when we proposed to cut taxes—that he brought up the question that a veto would be threatened. The Senator from Louisiana has never before been intimidated——

Mr. LONG. Let me say to the Senator from Minnesota that the bill we have now gives a lot more in tax relief than it would take from tax reform. I do not regard it as a tax increase bill in its present status.

But I do not believe that the Senator's amendment should be agreed to on its merits. I applaud his interest in the problems of single people. For years, he has been trying to help them, but it seems to me that we have gone about as far as the Senate should be asked to go at this time. I believe that the amendment should be rejected.

Mr. McCARTHY. I would suggest to the Senate that the point on which the administration seems distressed is the question of revenue. It does not want the Senate to take irresponsible fiscal action.

Requests for military expenditures and military appropriations are fiscal irresponsibility in two ways. First, it involves an increase in the national debt and in Federal expenditures which is inflationary; and, two, it also involves most wasteful expenditures.

Those who have been voting for these appropriations over the past 20 years know that billions of dollars in military expenditures have been spent which have been militarily useless. We know that an increase in Government expenditures for military purposes is in itself wasteful. Perhaps the only way we can bring the Department of Defense and the administration to some sense of reality—we cannot do it with an authorization which we approve and we have not been able to do it by cutting down appropriations—is to follow the practice of British nobility during the Middle Ages, to stop their kings from invading France, or Normandy, or carrying on attacks on Ireland, and that was not to give them any tax money. So that finally they had to either give up the crown or give up military action.

Mr. LONG. I am familiar with the Senator's views, with regard to military expenditures, the war in Vietnam, and so forth, but I believe that the Senate is anxious at this time to vote on the bill. I shall, therefore, just speak to the amendment and perhaps we can debate those other matters at some future time.

Mr. President, I yield back the remainder of my time.

Mr. MCCARTHY. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on this amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Minnesota (Mr. MCCARTHY).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

On this vote, the Senator from Rhode Island (Mr. PASTORE) is paired with the Senator from Missouri (Mr. SYMINGTON). If present and voting, the Senator from Rhode Island would vote "yea" and the Senator from Missouri would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Alaska (Mr. STEVENS) is detained on official business.

On this vote, the Senator from Alaska (Mr. STEVENS) is paired with the Senator from Arizona (Mr. GOLDWATER). If present and voting, the Senator from Alaska would vote "yea" and the Senator from Arizona would vote "nay."

The result was announced—yeas 25, nays 66, as follows:

[No. 211 Leg.]

So Mr. MCCARTHY's amendment was rejected.

CHANGE FROM INSTALLMENT TO ACCRUAL METHOD OF ACCOUNTING

Mr. LONG. Mr. President, I have an amendment at the desk which I call up at this point.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read the amendment, as follows:

At the end of title IX, add the following new section:

"SEC. —. (a) Section 453(c) of the Internal Revenue Code of 1954 (relating to change from accrual to installment basis of reporting) is amended by adding at the end thereof the following new paragraph:

"'(4) REVOCATION OF ELECTION.—An election under paragraph (1) to report taxable income on the installment basis may be revoked by filing a notice of revocation, in such manner and place as may be set forth in regulations or rulings prescribed by the Secretary or his delegate, at any time before the expiration of 3 years following the date of the filing of the tax return for the year of change. If such notice of revocation is timely filed—

"'(A) the provisions of paragraph (1) and subsection (a) shall not be applicable to the year of change or for any subsequent year;

"'(B) the statutory period for the assessment of any deficiency for any taxable year ending before the filing of such notice, which is attributable to the revocation of the election to use the installment basis, shall not expire before the expiration of two years from the date of the filing of such notice, and such deficiency may be assessed before the expiration of such two-year period notwithstanding the provisions of any law or rule of law which would otherwise prevent such assessment; and

"'(C) if refund or credit of any overpayment, resulting from the revocation of the election to use the installment basis, for any taxable year ending before the date of the filing of the notice of revocation is prevented on the date of such filing, or within 1 year from such date, by the operation of any law or rule of law (other than section 7121 or 7122), refund or credit of such overpayment may nevertheless be made or allowed if claim therefor is filed within 1 year from such date. No interest shall be allowed on the refund or credit of such overpayment for any period prior to the date of the filing of the notice of revocation.'

"(b) The amendment made by subsection (a) shall apply to an election made for any year of change (as defined in section 453 (c)(1) of the Internal Revenue Code of 1954) ending on or after the date of the enactment of this Act, and shall also apply to any such year of change which ended before such date if the 3-year statutory period for assessment of any deficiency for such year has not expired on the date of the enactment of this Act."

Mr. LONG. Mr. President, the amendment I have offered is one which I would have offered in committee, except that I was waiting for the Treasury to report on it, though I did not see how the Treasury could possibly report adversely.

This amendment would permit a taxpayer to change from the installment to the accrual method of accounting.

I know of but one taxpayer who would be involved, and by changing from the installment to the accrual method of accounting, that taxpayer would pay $49,972 in additional taxes, but he finds it very inconvenient to do business under the installment method of accounting, and therefore would like to change.

I know of no objection to the amendment. I have discussed it with the senior members of the committee—and, in fact, with almost all the members of the committee—and I believe the amendment would have been unanimously agreed to by the committee if the Treasury had reported to us in time, or if I had been able to state the Treasury's views. Not having had that opportunity, I have to either offer it now or forever hold my peace. I hope the amendment will be agreed to.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. WILLIAMS of Delaware. The Senator is correct; he withheld the amendment from the committee until he had talked with the Treasury. I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

Mr. LONG. Mr. President, the one taxpayer I mentioned who would be effected is Mr. Meyer Barton of New Orleans, La. I ask unanimous consent to have printed in the RECORD a statement explaining the purposes of the amendment.

There being no objection, the explanatory statement was ordered to be printed in the RECORD, as follows:

ELECTION TO CHANGE FROM INSTALLMENT TO ACCRUAL METHOD OF ACCOUNTING

Installment reporting for federal income tax purposes has been recognized as a proper method of tax accounting since the Revenue Act of 1921. In 1925, the Board of Tax Appeals held, however, that installment reporting did not clearly reflect income. The 1926 act authorized and validated installment reporting both for future and past taxable years. The purpose of allowing this method was to more closely match tax liability with cash flow, thus, reducing the

harshness of the immediate tax bit. This action was another step in bringing tax accounting into agreement with generally accepted accounting principles.

The accounting profession continued to recognize installment reporting as proper accounting through December 1966. However, an opinion, dated December 1966, of the Accounting Principles Board stated that the installment method of recognizing revenue is no longer acceptable except in exceptional cases where receivables are collectible over an extended period of time and because of the terms of the transactions or other conditions, there is no reasonable basis for estimating the degree of collectibility. The essence of this opinion is to require accrual reporting for accounting periods beginning after December 31, 1966. Taxpayers who have elected to report on the installment basis for tax purposes are now required to maintain sufficient records to satisfy two methods of reporting. Another recent opinion (dated December 1967) of the Accounting Principles Board requires taxes to be accrued as a deferred liability on revenue which is reported on the financial statements even though a large portion of this revenue is deferred for tax reporting purposes. This requirement can result in a firm showing a large deferred tax liability resulting in a large tax expense being shown on the income statement which will result in a material reduction in the firm's financial net income. This depressed financial picture would well hamper a firm's efforts to secure the necessary working capital needed to continue its present level of operations. In these situations, it would be virtually impossible to obtain working capital which would be needed to expand operations. In several cases, firms can rectify this situation by reverting from installment reporting to accrual reporting for federal income tax accounting.

Section 453 of the Internal Revenue Code of 1954 does not preclude revoking the election to report on the installment basis. However, the Internal Revenue Service has been reluctant to allow revocation of the election since section 453 does not specifically provide for such an election. In one instance, the Internal Revenue Service has refused to grant an election for revocation even though the firm would pay $43,972 in additional taxes in the year of revocation if allowed, and even though there would be increased additional taxes in each year thereafter for as the firm continues to grow. The required changes in acceptable accounting principles coupled with the indecisive position of the Internal Revenue Service necessitates statutory action to remedy a hardship which could be detrimental to several small and medium size merchandising firms which have elected the installment basis of reporting before becoming aware of the effect of the changes made by the Accounting Principles Board.

Let me now deal specifically with the changes which would be made by the bill which I am introducing at this time.

Section 453 of present law allows a taxpayer to elect the installment method of reporting without permission to change accounting methods in the following situations:

(a) upon the sale of personal property on an installment plan by dealers;

(b) upon the sale or other disposition of real property, providing that payments in the year of sale do not exceed 30 percent of the selling price;

(c) in the case of a casual sale or casual disposition of personal property providing the price exceeds $1,000 and the payments in the year of sale do not exceed 30 percent of the selling price.

A taxpayer who changes his accounting method from the accrual to the installment method pays a double tax on certain income. Under the accrual method, the entire profit from a sale is taken into account in the year of sale, regardless of when the collection is made. The installment method requires that the profit from a sale be recognized ratably as the cash is collected. In the early years following a change from the accrual to the installment method, profit recognized under the installment method is taxable despite the fact that this same profit previously had been reported as taxable income under the accrual method. To preclude this profit from being taxed twice, the tax attributable to an amount included in income for the second time is eliminated or at least decreased to the extent of the tax attributable to its inclusion under the earlier method of accounting.

Although the Internal Revenue Code does not preclude change to some other method of accounting from the installment method, Treasury regulations on section 453 state that a dealer may not change from the installment plan to the accrual method or to any other method of accounting without the permission of the Commissioner. However, neither the Internal Revenue Code nor the related regulations allow for, or preclude, retroactive revocation of the election to report on the installment method.

The bill I am today introducing corrects this type of situation. It amends section 453(c) of the Internal Revenue Code by allowing a taxpayer to revoke an election to report on the installment basis by filing a notice of revocation. The Secretary or his delegate shall describe by regulations or rulings the method by which the "revocation of election" is to be made. The election to revoke must be made within three years following the date of the filing of the tax return for the year that the election to file on the installment method was made. A timely filed revocation applies to the year that installment reporting was elected plus all subsequent years. The statutory period for the assessment shall extend for two years following the date of the filing of the notice of revocation. Interest will not be allowed on refunds paid or credits due as a result of filing an election of revocation. The election to revoke shall apply to all open years under the statutory period for assessment.

AMENDMENT NO. 387

Mr. COOPER. Mr. President, for myself and my colleague from Kentucky (Senator COOK) I call up amendment No. 387, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read the amendment, as follows:

On page 198, line 12, strike out the figure "5" and insert in lieu thereof the figure "7".

Mr. COOPER. Mr. President, I ask unanimous consent that a summary and explanation of the amendment No. 387 as introduced be included at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 387

*Summary:* The Committee bill would establish a presumption that an individual is engaged in an activity for profit, and therefore not subject to the "hobby loss" provision prohibiting the deduction of losses resulting from that activity, if the activity shows a profit in 2 out of 5 years. The amendment No. 387 would establish that presumption if the activity shows a profit in 2 out of 7 years. The purpose of the amendment is to allow a reasonable time for activities having a long cycle of investment and a recognized element of risk, such as thoroughbred breeding and training, to meet the test required by the Committee bill.

*Explanation:* Section 213 of the Senate Committee substitute for H.R. 13270 would *disallow* deductions for losses from an activity "not engaged in for profit." This provision is much more stringent than the existing "hobby loss" provision (section 270) which limits to $50,000 per year the losses that can be used to offset other income, but imposes that limitation only when such losses exceed $50,000 for *each* of five consecutive years.

Section 213 also establishes a presumption (paragraph (d) page 198) that the taxpayer is engaged in business for a profit if the gross income from the activity exceeds deductions attributable to the activity in 2 out of 5 consecutive years. If this test is not met (or if the Secretary or his delegate establishes that the activity is not engaged in for profit) losses may *not* be used to offset other income. If the test *is* met, in the case of *farm* losses, section 211 of the bill then applies. Section 211 in general limits to $25,000, plus one-half of the amount over $25,000, the losses which may be used to offset other income. The Senate on Saturday rejected the Metcalf and the Miller-Metcalf amendments which would have further limited farm losses allowable as deductions.

Amendment No. 387 would in no way change the tax liability of individuals engaged in the business of farming and subject to section 211, which imposes limitations on deductible farm losses and which has evidently been settled upon by the Senate. It would make subject to those limitations individuals having a profit from farm operations in 2 out of 7 years, in addition to those having a profit in 2 out of 5 years.

Farm operations which did *not* show a profit in 2 out of 7 years (and in any case those determined by the Secretary as not engaged in for profit) would not meet the presumption, and would be subject to section 213, the stringent new "hobby loss" provision recommended by the Committee which prohibits *any* losses to be used to offset other income.

*Need for the amendment:* The breeding, training, showing and racing of horses is an important business in Kentucky and 26 other States. Testimony before the Committee estimated: Capital investment in horse breeding, equipment and facilities of $543 million; value of commercial horses of $1.1 billion; total capital investment $2.34 billion. Labor for breeding, training and showing commercial horses provides 150,000 full-time jobs, total annual wages $727 million. USDA estimates horse owners spend $5 billion annually for feed and equipment. The number of registered horses (1.2 million) doubled in last 8 years—832,000 recreational and 428,000 commercial registered horses. At the heart of this great industry is the breeder, who is engaged in a long-cycle operation of recognized uncertainty, often requiring investment over several years of funds from other sources.

*Example of cycle in horse business:* A person entering or established in the thoroughbred business may purchase breeding stock in 1969, in the hope of making successful matings and producing a popular line. Bred in the Spring of 1970, the mares would foal beginning in late February and through May of 1971. The foals would become yearlings, according to the horse calendar, on January 1, 1972. They would be trained and may try out as two-year-olds in 1973, but would not seriously race until three-year-olds (as in the Kentucky Derby) in 1974. Only then—in the *sixth* consecutive year counting the year breeding stock was purchased and plans made in 1969—would the result of that breeding begin to be proved. Under the favorable assumption that a new breeder is skillful, and successful in producing winners and desirable stock, that would be his first profitable year in six and it would require seven years, as provided by the amendment, to meet a

presumption that he is in business for a profit.

Even for established breeders, it could easily happen that there would be no profit for four consecutive years—or perhaps a profit only every third year—which would make it impossible for him to meet the presumption required by the Senate bill. A single breeding mistake—selection of a line which does not prove popular, or the wrong judgment in matching studs and mares—will not be known until the offspring begin racing as two or three-year-olds, in the fourth or fifth consecutive year, at which point the breeder must change lines and start over. Reliable thoroughbred breeders have indicated that while the industry may be able to live with the new Committee farm loss restrictions imposed by Section 211, and is willing to accept the "hobby loss" provision prohibition the deduction of losses by those not engaged for a profit, the long cycle of horse breeding and training operations requires that the presumption established by paragraph (d) of Section 213 be extended to seven years.

Mr. COOPER. Mr. President, if I may have the attention of the distinguished chairman of the committee and manager of the bill (Mr. LONG), and also the attention of the Senator from Georgia (Mr. TALMADGE) and the Senator from Delaware (Mr. WILLIAMS), I shall modify my amendment. I expect that my amendment can be disposed of in a reasonable time.

If Senators will follow the bill as printed, my modification, which I offer in lieu of the amendment as printed, is self-explanatory.

I modify my amendment to read as follows:

Page 198, line 18, before the closing quotation marks, insert the following new sentence: "In the case of an activity which consists in major part of the breeding, training, showing, or racing of horses, the preceding sentence shall be applied by substituting the period of 7 consecutive taxable years for the period of 5 consecutive taxable years."

Senators will recall that section 211 of the tax reform bill provides a procedure by which, under certain conditions, farm losses may be offset against nonfarm income. Section 211 was thoroughly debated last Saturday when an amendment was offered by the Senator from Montana (Mr. METCALF), and later another amendment was offered by the Senator from Iowa (Mr. MILLER). In both cases the Finance Committee provision was ably sustained by the Senator from Georgia (Mr. TALMADGE) and the Metcalf-Miller amendments, were rejected.

I wish to make it clear that the amendment I offer today does not disturb section 211 in any way. It is directed to section 213 of the bill. As Senators will remember, the title of section 213 is "Deductions Attributable to Activities Not Engaged in for Profit."

The Committee on Finance, interpreting section 213 in their report said, in effect, that they would consider all businesses to be engaged in for profit—and I think this correct—but unless a profit were made in 2 out of 5 consecutive years, a rebuttable presumption would arise that the business was not engaged in for profit.

The relation of my amendment to section 211 is this: Before a person engaged in a business under section 213 may claim the advantages of section 211, he or she must, in their business, have a profit in 2 out of 5 years.

My amendment applies to horses. Of course it does apply to racing horses, but I point out to Senators that it applies to all horses. It applies to running horses—thoroughbreds which, of course, are bred in Kentucky, as well as in other States. It applies to harness horses, trotters, and pacers; to saddle horses, 3-gaited and 5-gaited riding horses and Tennessee walking horses; to quarter horses; Appaloosas; and to the draft horses which are still bred for show—the Belgian, the Percheron, and the Clydesdale.

So, as far as racing horses are concerned, this amendment is of great importance to Kentucky and 26 other States. But when you consider it in terms of breeding horses for pleasure riding and for show as well as for racing, it probably involves nearly every State in the Union.

Why do I offer the amendment? I do not ask for any special privilege. I think Senators will recognize this when I make the explanation. I do not ask for any privilege for the breeders of racing horses or any other horse. I point out that section 278(e)(4)(A) added by section 211 of the bill provides that "in the case of a taxpayer engaged in the raising of horses, the business of farming includes the racing of horses." By extending the period to 7 years, we simply ask that horse breeders be given a reasonable opportunity to claim the benefit of section 211, as all other farmers may do, and I shall make clear why this period of time is necessary.

Mr. President, section 211 which deals with businesses not engaged in for profit, applies to any kind of activity. People may have art galleries or antique shops. There are all kinds of business activities which are engaged in, and not necessarily for profit but perhaps for their pleasure, perhaps also for a tax offset of losses. The section seems to me properly directed to such activities.

But it is almost impossible for anyone seriously engaged in the horse breeding business to have a profit in 2 years out of 5. I will explain why.

I will give an example of the breeding of a thoroughbred race horse, which would also be applicable to a standard bred harness horse and, I would assume, to a show horse. Suppose a person wants to engage in the breeding of fine horses. He buys stock; he buys a mare, say, in 1969. That is the first of the consecutive years in which he has expenses and perhaps losses.

The mare would be bred in the spring of 1970, in the second tax year. In 11 months a foal is born in March or April of 1971. That is the third year. The colt or filly remains a foal through 1971.

On the first day of January 1972, the foal is designated a yearling. All racing horses have the same birthday—January 1—and as far as this yearling is concerned, 1972 would be the 4th year of expenses.

In 1973, it becomes a 2-year-old, in the 5th tax year. There is some racing of 2-year-olds in this country, but the breeder cannot determine their class, or really their ability until they are 3 years old. That would be in 1974, the sixth year.

So it is only in the sixth consecutive year—after 6 years of work and expense maintaining and training the colt that results are known and, with skill and good fortune, that a profit may be made.

In this business, a single breeding mistake, the selection of a line which is not popular, the crippling of a horse, or any of a number of other risks, could ruin the breeding and training process.

I point out that this long cycle of investment is applicable not only to thoroughbred racing horses, but also to harness horses, and to a degree to show horses and other types of horses such as those bred for riding—"pleasure horses" as we call them—or for profit.

This is an important industry in my State and in other States. The commercial horse industry as a whole has an investment of over $2 billion in the United States. It pays, I think, something like one-half billion dollars in taxes.

I know it brings about $50 million a year to Kentucky. Moreover, in 27 States breeding, training, racing, and showing of horses provides 150,000 full-time jobs. It is a legal business, and recognized throughout the United States and the world.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, would the Senator be willing to limit debate?

Mr. COOPER. I would be agreeable.

Mr. LONG. Mr. President, I ask unanimous consent there be a time limitation of 30 minutes on the remainder of the debate on the pending amendment, the time to be equally divided between the manager of the bill or those in opposition and the Senator from Kentucky.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none, and it is so ordered.

Mr. COOPER. Mr. President, I have almost finished.

I simply want the Senate to be fair and give this farm industry, which is tied down by a 5-year breeding and training cycle, a chance to make a profit. In 2 years out of 5, it is not likely that one can do it. We ask for 2 years out of 7. And I think that is fair.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. CURTIS. Mr. President, I support the amendment of the Senator from Kentucky.

The raising of horses is a business. And they want it to be treated as a business and not as a hobby.

There are other ways in which the Internal Revenue Service can reach the abuses. But these people are in a business for a profit. And they should be treated like all other taxpayers. Under the present law and under the committee bill they are not.

Mr. President, I support the amendment.

Mr. COOPER. Mr. President, I thank the Senator for Nebraska—a ranking member of the Finance Committee.

Mr. President, I yield to the senior Senator from Maryland.

Mr. TYDINGS. Mr. President, I support the amendment of the distinguished Senator from Kentucky. As he pointed out, there are some 30 States which now have parimutuel racing. And racing provides a major source of revenue for many States.

Certainly it is an important source of revenue for my State. I know that it is also an important source of revenue for the State of Kentucky and for other States.

I think that for Congress to take action to deprive the States of tremendous sources of revenue in a period when we are trying to stress federalism and State responsibility and State initiative would be a great mistake.

I am delighted to add my voice along with many of my colleagues in support of the amendment of the Senator from Kentucky.

Mr. COOK. Mr. President, will the Senator yield?

Mr. COOPER. Mr. President, I yield to my colleague.

Mr. COOK. Mr. President, I associate myself with the remarks of my senior colleague from Kentucky.

I would like to add that the racing business also involves a tax procedure to the extent that those who participate in the parimutuel races pay taxes in that they raise for the United States somewhere in the neighborhood of $500 million.

I think the case has been laid out well by my colleague.

I reiterate that I associate myself with his remarks.

Mr. COOPER. Mr. President, I thank my colleague, and especially for his fine sponsorship and support.

I yield to the junior Senator from Maryland.

Mr. MATHIAS. Mr. President, I thank the Senator from Kentucky for yielding. I associate myself with his remarks.

The sportswriters sometimes call horseracing the sport of kings. That may well have been true through years gone by. However, today it is a very important element of income for many of the States.

I think the amendment of the distinguished Senator from Kentucky recognizes the modern fact of life that racing does play an important role which has significance to the smallest taxpayers of the States.

The Senator's amendment, I think, is worthy of support on that basis.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. TOWER. Mr. President, would the Senator's amendment extend to quarter horses also?

Mr. COOPER. The Senator is correct. It would take care of them and the Appaloosas, too.

Mr. TOWER. I thank the Senator.

Mr. WILLIAMS of Delaware. Mr. President, I am in a position of having to object to an amendment offered by my friend, the Senator from Kentucky.

The committee went pretty far into what we thought was the question involved and I cannot support this amendment. However, recognizing that we are dealing with a Christmas-tree measure, perhaps it would be proper to put a hobbyhorse under this Christmas tree.

I hope that the amendment would be defeated and that we could at least hold what little reform we have in the bill.

I do not care to debate it further. I think everyone understands that it involves the liberalization of the provision on hobby farming.

Mr. President, I yield back the remainder of my time.

Mr. COOPER. Mr. President, this is a serious amendment. The horse business is important to the economy of my State and other States, I believe and hope very much that it will be approved. I hope very much that the Senator from Delaware, (Mr. WILLIAMS), and the Senator from Louisiana, (Mr. LONG), and the conferees will support the measure in conference.

One cannot make a profit in 2 years out of 5 when the breeding and raising cycle is 5 years. We ask only that this important business be treated equally with other farming businesses.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

## AUTHORIZATION FOR COMMITTEES TO FILE REPORTS

Mr. MANSFIELD. Mr. President, will the Senator yield me one-half minute?

Mr. COOPER. Mr. President, I yield to the distinguished majority leader.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the chairman of the Foreign Relations Committee be authorized to file reports from his committee and that all other committees be authorized to file their reports following the close of business today until midnight, including any minority, individual, supplemental, or additional views.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

MINIMUM TAX FOR TAX PREFERENCE

Mr. MILLER. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. MILLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 212, commencing with line 15 strike out all through line 2 on page 214 (relating to minimum tax for tax preferences) and insert the following:

"SEC. 56. IMPOSITION OF TAX

"(a) IN GENERAL.—In addition to the other taxes imposed by this chapter, there is hereby imposed for each taxable year, with respect to the income of every person, a tax equal to 10 percent of the amount (if any) by which—

"(1) the sum of the items of tax preference in excess of $30,000, is greater than

"(2) the taxes imposed by this chapter for the taxable year (computed without regard to this part and without regard to the taxes imposed by sections 531 and 541) reduced by the sum of the credits allowable under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 37 (relating to retirement income), and

"(C) section 38 (relating to investment credit)."

For purposes of paragraph (1), the items of tax preference shall be reduced by the amount of deduction allowable under subsection (b) (relating to net operating losses) to the extent the taxpayer chooses to take such deduction.

"(b) Net Operating Losses.—In the case of any taxable year for which the taxpayer has a net operating loss (as defined in section 172(c)) or for which a net operating loss deduction is allowable under section 172 (a), the taxpayer may elect to deduct, for the purposes of subsection (a) (1), from the items of tax preference so much of such net operating loss or of such net operating loss deduction as he chooses. To the extent any loss is deducted under this subsection for purposes of subsection (a) (1), it shall not be allowed as a deduction under section 172. Any deduction under this subsection shall be treated as availed of first from the earliest loss which is carried over to the taxable year under section 172. The election for any taxable year to take a deduction under this subsection may be made or changed at any time before the expiration of the period provided for making a claim for credit or refund of the taxes imposed by this chapter for the taxable year."

Mr. LONG. Mr. President, does the Senator desire the yeas and nays on this amendment?

Mr. MILLER. Yes.

Mr. LONG. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. LONG. Mr. President, will the Senator agree to a limitation of time on the amendment?

Mr. MILLER. Mr. President, I should like to suggest that I be allowed to proceed for 5, 6, or 7 minutes, and we may be able to wind this up in a matter of a few minutes if my colleagues would not mind staying in the Chamber.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. MILLER. Mr. President, on the desk of each Senator is an explanation of the pending amendment, which is designed to cure some inequities that are in the minimum tax part of the pending bill.

During the last few days I have heard many conversations about what is regarded as inequity contained in the minimum tax provisions of the bill. For one thing, it is said that in the case of a taxpayer not paying any tax under present law, to put a tax of only 5 percent on the amount of his tax preference is terribly low. For another thing, it is said that there are many taxpayers who are

paying a substantial amount of tax, but under the bill they would have 5 percent of their tax preferences added on top of their substantial tax bill.

My amendment seeks to get at these two inequities in this way: First, it provides that those people who are paying taxes can subtract from their tax preferences the amount of their tax. That gives those who are paying some tax a break. It gives those who are paying little or no tax very little break or none at all.

Second, my amendment increases the minimum tax rate in the bill, which is now 5 percent, to 10 percent.

As will be found in the example sheet on the desk of each Senator, under the bill, consider a taxpayer whose regular tax is $80,000, with tax preferences—in excess of $30,000—amounting to $100,000. Under the bill, 5 percent of that $100,000 of tax preferences would be a minimum tax to be added to the regular tax of $80,000 for a total tax bill of $85,000, just adding insult to injury. But under my amendment the $80,000 of taxes would be subtracted from the $100,000 of tax preference, and a 10-percent rate would be applied to the difference, which would bring that tax bill to $82,000. So we would not be adding as much insult to injury under my amendment as we would under the pending bill.

But the gross case in which somebody is not paying any tax at all shows in the second example. The tax under the regular tax rates is zero. Tax preferences of $100,000; and under the bill the total tax would be only 5 percent, or $5,000.

This, mind you, while many low-income people in this country have a minimum tax rate of 13 or 14 percent.

Under my amendment, of course, there would be no tax to subtract from the tax preferences, which would leave the entire $100,000 subject to a 10 percent rate, or a $10,000 total tax bill double what it would be under the bill.

I know that many of us are concerned about some of the revenue-losing features of the amendments that have been offered on the floor. I am very pleased to tell the Senators that, whereas, under the pending bill the minimum tax would pick up $700 million additional revenue, my amendment would pick up $740 million.

A few moments ago, we adopted the Dole amendment, as modified by the McIntyre amendment. This is going to cost upwards of $20 to $25 million loss in revenue.

My amendment does equity. It makes sure that those who are not paying any taxes at all will have to pay at least 10 percent of their tax preferences, and it will bring added revenue into the Treasury compared with what the tax bill does—certainly enough to offset the loss under the Dole amendment.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MILLER. I yield.

Mr. LONG. The prime example that we have heard mentioned about the oil companies, over and over again, is the situation that existed with regard to Atlantic Richfield, which made a substantial amount of money and paid no taxes. The Senator's amendment would hit Atlantic Richfield Corp., under the same facts, twice as hard as the minimum tax.

On the other hand, if someone is paying a great deal of taxes he would not be affected by the minimum tax, because the taxes he pays would completely offset his tax preferences. However, with regard to people such as the 154 who were found to be paying no taxes, most of them would pay twice as much under the Senator's proposal as they would pay under the minimum tax in the bill.

Personally, I think the Senator has a good amendment. Frankly, I am aware that some people who suggested to us the minimum tax which appears in the bill have studied the proposal of the Senator. They tell me that if you want to tax foreigners, if you want to tax the people who are paying no tax or who are getting by with paying little, you will tax them twice as much with this amendment as you will with the minimum tax in the bill.

This proposal was not considered in the committee, but I think it has more merit than what we did in the committee.

Mr. MILLER. I appreciate the comments of my colleague.

May I say that everyone knows that the Finance Committee was under terrible pressure and limitation of time when it considered this bill.

What we were distressed about was the so-called limited tax preferences and allocation-of-deductions provisions in the House bill, which were terribly complicated and, in many cases, inequitable.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. MILLER. I will yield in a moment.

In an effort to simplify the House bill's approach to a minimum tax, on very short consideration, we decided on the 5-percent minimum tax. It certainly simplified things; but in working simplicity, I think we worked inequity.

I have spoken with many people who have criticized the pending bill because they said, "Here you were supposed to do something about people who weren't paying any tax. Now the best you have come up with is 5 percent of those tax preferences."

By doubling it to 10 percent, we will do a better job along this line.

There also has been the criticism on the other side, by those who have been paying a substantial amount of taxes, who say, "Now you're going to pile another 5 percent on top of us."

My amendment takes care of both those inequities and, at the same time, does bring in a little more revenue from the minimum tax than does the bill.

I yield to the Senator from Massachusetts.

Mr. KENNEDY. Will the Senator give us some indication of the revenue increase, both for corporations and for individuals, under his amendment?

Mr. MILLER. May I say to the Senator from Massachusetts that I think we can get that information for him. I received this estimate from the staff based upon a computer run on the entire picture—both corporations and individuals.

Mr. KENNEDY. The Senator will correct me if I am wrong, but my understanding of what the Finance Committee has done is that is has identified nine areas which are generally recognized as tax shelters.

There are some taxpayers who will shelter more income than others. The Committee on Finance applied a 5-percent rate on the committee's minimum tax base. Of course, the committee omitted from its minimum tax base the appreciation in value of property donated to charity.

What is suggested by the Senator from Iowa is the following: We are going to provide an opportunity for those in corporations and industries who are now making hundreds of thousands of dollars in salaries to shelter enormous amounts of their income from all Federal taxes.

Mr. MILLER. Mr. President, I am afraid that the Senator from Massachusetts does not quite understand my amendment. Take, for example, a corporation which has $50,000 of tax under the regular computation method.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. MILLER. If I may, I would like to complete my example.

Mr. KENNEDY. Mr. President, I wish the Senator would use the illustration of an individual, because I think that the concept of the minimum tax is more appropriate for individuals than for corporations.

Would the Senator please use as his example an individual with $100,000 of income?

Mr. MILLER. I thought the Senator was talking about corporations. That is why I was going to use an example of a corporation. I can do it either way.

Mr. KENNEDY. I wish the Senator would make his explanation with reference to individuals. Perhaps he would use the example of a corporate executive who receives $100,000 in salary and has $100,000 in tax shelters.

Mr. MILLER. I would guess that on an average, a person with $100,000 of income would pay, let us say, $40,000 in taxes.

Mr. KENNEDY. He would normally have taxes of $70,000 on the $100,000 income, if his total taxable income is such that the $100,000 is taxed at the rate of the highest bracket, 70 percent. Of course, if his total taxable income is only $100,000 altogether, his tax would not be $70,000.

Mr. MILLER. I must say to the distinguished Senator from Massachusetts that I do not believe such a case exists. A married person with an income of $100,000, no children, just a husband and wife, with normal deductions, I would say on an average, would have a tax of $40,000.

Let me use that example to give the illustration the Senator would like to have. Let us say he has a salary of $100,000 and a regular tax of $40,000. In addition to that he has $100,000 of tax preferences. Now, under the bill that is pending before us he would have $5,000, which is 5 percent of that $100,000, to pay on top of the $40,000 he is already paying.

Under my amendment he would subtract the $40,000 tax he is paying from the $100,000 tax preferences, and he would have $60,000 left over. He would

have to pay 10 percent on that, and that would increase his minimum tax by $6,000 over the $5,000 provided by the bill.

Mr. President, I use that example to illustrate how a person with large tax preferences, and not a large tax, will actually have his tax increased under my 10-percent approach. But if he had a larger tax in comparison to his tax preferences, then my tax of 10 percent would not add so greatly to his burden. The equity of the amendment is that a person with low taxes compared to his tax preferences will pay more under my amendment; if he has high taxes compared to his tax preferences, he will pay very little more.

Mr. KENNEDY. I do not dispute that under the Senator's amendment, someone with very high tax preference income in relation to his taxes would pay a larger minimum tax than that he would pay under the committee bill. At the same time, however, the Miller amendment is far weaker than the committee bill for someone who has both high taxes and high preference income. This is the flaw in the Senator's amendment. I prefer the simple committee approach of a flat 5-percent minimum tax for all of the tax-sheltered areas that have been recognized by the committee. This is the essence of the minimum tax. All taxpayers should pay at least some tax on their income from tax loopholes. This is what the taxpayer's revolt is all about.

Although the Miller amendment has the virtue of closing more loopholes for individuals who have considerable income purely from tax-free sources, it opens up new loopholes for individuals whose tax shelters are accompanied by high taxes or their other income. I am just as concerned with an individual who pays $100,000 in taxes and has $100,000 in tax-free income as I am in the individual who has no taxes and $100,000 in tax-free income. Yet, the Miller amendment would not apply at all to the first individual, even though he is enjoying $100,000 in tax-free income. Simply because a tax dodger is paying tax on some of his income is no excuse to allow his preference income to go scot free of taxes.

Ideally, we should try to combine the virtues of the Miller amendment and the virtues of the committee bill. Perhaps the best answer would be to adopt both provisions as alternative versions of the minimum tax. The individual would calculate his minimum tax each way, and he would pay whichever tax was greater. If we have to choose one or the other, however, I prefer the committee flat rate of 5 percent on all preference income. It is simple and easy to understand, and it means that no one gets a free ride for the use of tax shelters.

I recognize that there are taxpayers who use tax preferences to reduce their taxes to zero. That is the case of the 155 nontaxpayers we have heard so much about since last January. I agree that the Miller amendment would attack this problem more effectively than the committee bill, but the difference is not all that great. The committee rate is 5 percent and the Miller rate is 10 percent. Both of these rates are still only slaps on the wrist for anyone with huge tax shelters. So the Miller amendment is not all that much of an improvement even in getting at those 155 nontaxpayers.

At the same time, we must realize that the Miller amendment would open a huge loophole in the minimum tax for anyone who is already paying high taxes. Executives with hundreds of thousands of dollars in taxable salaries, and individuals with hundreds of thousands of dollars in dividends, would be able to avoid any minimum tax whatever until their tax loophole income exceeded their taxes. Worse, even at this level, the Miller tax would not be as effective as the committee tax until an individual's tax preference income exceeded twice his taxes.

In essence, the Miller amendment is similar in principle to the House bill's minimum tax, which was adopted from the Treasury study last December. The House bill was subject to the same basic defect as the Miller amendment, and that is why I, for one, am glad the committee chose the broad-based 5-percent rate approach.

One other issue ought to be raised here. Last Saturday, when we debated the minimum tax, one of the principal objections raised against my amendment to make the rate progressive was it would raise the top tax rate on capital gains to 42½ percent. I believe that the Miller amendment would raise the rate of tax on capital gains for some people to 40 percent.

Mr. MILLER. Mr. President, the Senator does not interpret my amendment accurately.

Mr. KENNEDY. I think I understand the Senator's amendment. It has some merit, but it also has a serious defect, because it gives a big tax break to persons with high taxable income.

Mr. MILLER. The Senator does not accurately interpret the amendment, and I shall try to clear up his problem. Let me give the Senator two examples.

The PRESIDING OFFICER (Mr. SPONG in the chair). The Senate is not in order. The Senate will be in order.

Mr. MILLER. Let us take the example of A and B. Let us say each of them has a salary of $100,000 and each of them has $40,000 in taxes. A has tax preferences of $50,000 and B has tax preferences of $100,000. In relation to tax preferences, A obviously has a much higher tax load and, therefore, he should have a better break, which he receives under my amendment. But as far as B is concerned, he has a much lower tax load in comparison to his tax preferences, and my amendment adds to his burden over what the committee bill would do.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MILLER. I yield.

Mr. LONG. Mr. President, the study made by the Treasury Department indicates that taxpayers making over $100,000 on the average pay about 35 percent of their income in taxes. The Treasury, in moving toward tax equity, sought to bring those people paying nothing up to that 35 percent that the average person in that categeory pays.

The Senator's amendment goes further in that direction than does the bill reported by the committee. In that respect, it is striving toward tax reform.

I am sure we will find plenty of those people if we leave the amendment pending overnight.

Mr. MILLER. I thank the Senator.

Mr. President, another answer to the Senator from Massachusetts is this. Where does the Senator from Massachusetts think we get the extra revenue so that we come out with more money under my amendment than under the tax bill? We get it by taxing those people with low taxes in comparison to preferences more—through a 10-percent tax rate—than does the bill with its 5 percent rate.

I would be amazed if the Senator from Massachusetts would not support my amendment, and I think he will when he understands it.

This, to me, as between two taxpayers, one who pays low taxes in comparison with the tax preferences and the other who pays high taxes in comparison with the tax preferences, seems a fairer approach. One with the low tax in comparison to his tax preferences should have a bigger tax than we give him under the tax bill, and under my amendment this will happen.

Mr. LONG. There are more than just working people who have a right to a taxpayers' revolt. Some fellow who sees 70 percent of his income going in taxes, while his neighbor down the street is paying zero in taxes but making the same income, has a more compelling reason to complain about the present tax system than those who pay very little, if any, tax because they are in a low-income bracket.

Mr. MILLER. May I say this to my colleague, in response to what he has just said, that I have received criticism and have heard criticism about the fact that when Congress comes in under the name of tax reform to put an end to the group of taxpayers who pay no tax but earn large incomes, the answer we propose in the bill is that we will tax them at 5 percent. This is not satisfactory. Ten percent, which doubles it, is certainly better. What I am striving to do in this amendment is to come out with the same revenue as the minimum tax in the bill. It does. In fact, it adds $40 million over the revenue provided by the bill. As time goes on, we may find that we should improve the minimum tax approach, but the one in the bill is inequitable, and my amendment corrects the inequities.

Mr. WILLIAMS of Delaware. Mr. President, the amendment of the Senator from Iowa raises an interesting point. I frankly am not sure that I understand it completely so that I could say whether I like it or not. I have talked with the Treasury Department and they are checking it. They will not be able to have it checked out in time as to how they think it would work under various circumstances for a vote at the immediate time.

Therefore, I am wondering, rather than delay any further, if the Senator would withdraw his amendment without prejudice, with the clear understanding that he can offer it later and not be precluded from that. In the mean-

time, that would give us an opportunity to get the Treasury to check it out and some of us can sit down without delay and find out a little more about the matter.

Mr. MILLER. That is, I think, certainly a fair request. I do not wish to——

Mr. CURTIS. Mr. President, will the Senator from Iowa yield to me?

Mr. MILLER. Mr. President, I ask unanimous consent to yield to the Senator from Nebraska (Mr. CURTIS) without losing my right to the floor.

The PRESIDING OFFICER. Without objection, the Senator from Nebraska is recognized.

Mr. CURTIS. Mr. President, I rise for the purpose of reciting a little legislative history.

The investment credit was repealed. This means that the 7-percent credit is no longer allowed.

The President made a statement to that effect on April 21.

Word had leaked that he might make such a statement and it was alleged that certain taxpayers rushed in and closed deals over that weekend.

Therefore, the Ways and Means Committee drew the curtain down on the investment credit at midnight of April 18, so that transactions on April 19 and thereafter would not get the investment credit.

The question arose, what about the transaction that was in progress, where parties, in good faith, had contracted to buy equipment, or to build something, or to buy something so that the investment credit would be allowed?

The Finance Committee, in dealing with the subject, tried to do the fair thing. It tried to close out the alleged contract that had no previous history, but it tried to take care of that contract which, in truth and in fact, was under way at the time the repeal became effective.

As a matter of fact, as shown by the committee report on page 230, the committee even directed that certain oral contracts be validated.

I read as follows:

> A contract for this purpose may be oral or written. However in the case of an oral contract the taxpayers must establish by appropriate evidence that a contract was, in fact, entered into before the close of April 18, 1969. This may be done by memorandums, the conduct of the party, or other evidence that a contract was, in fact, entered into.

Mr. President, it happened that a certain taxpayer had this experience. I read this information into the record before the executive session of the Finance Committee. The minutes of the board of directors of the purchaser recorded a formal authorization to complete the transaction in February 1969. The executive committee of the selling corporation authorized acceptance of the offer in March 1969. Both corporations proceeded to complete the details of negotiation and they did not get the loose ends wound up prior to midnight of April 18. But it was clear that they had a binding contract. There was the written evidence of the one corporation in February and the other one in March.

Now, Mr. President, I recited the facts I have here before the Finance Committee in executive session. The question was discussed as to whether there should be an amendment to take care of the situation and see that the purchaser obtained the investment credit, because the Finance Committee did adopt amendments in cases where there were borderline cases and as a matter of justice, it should be done.

At that time, the view was expressed by some staff members, in fact, by all staff members who spoke up, conveying the idea that an amendment was not necessary. As a result, an amendment was not offered.

Inasmuch as this took place in executive session, where there is no printed record, I felt impelled to recite it here because I am convinced that this particular transaction falls within the intent of the committee and that the investment credit should be allowed in this case.

Let me add further that a quorum was present of the committee. The Treasury Department was there. We were well advised by staff so that the record was made to show the intent of the committee to allow the investment credit in a case of this kind and to show the intent of the committee that an amendment was not necessary. Therefore, I have chosen to make this statement at this time.

Mr. President, I yield the floor.

Mr. MILLER. Mr. President, I understand we are still waiting for some information for the Senator from Delaware, and since we are, I ask unanimous consent that my amendment be temporarily laid aside so that other amendments can be considered.

The PRESIDING OFFICER. Is there objection?

Without objection, the amendment of the Senator from Iowa is temporarily laid aside.

CERTAIN ITEMS OF TAX PREFERENCES

Mr. HANSEN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment of the Senator from Wyoming will be stated.

The assistant legislative clerk read the amendment, as follows:

> On page 354, strike lines 20 through 24 and insert the following:
> "If, for any taxable year, a taxpayer has items of tax preference specified in section 57(a) (excluding the capital gain preference described in section 57(a)(9)(A)) in excess of $10,000 ($5,000 in the case of a married individual filing a separate return), an amount equal to such excess shall be subtracted from the amount of long-term capital gains specified in paragraph (3)."

Mr. HANSEN. Mr. President, the Finance Committee amendments to H.R. 13270 provided some relief for taxpayers with relatively small amounts of capital gain by permitting the 25-percent alternative rate to remain applicable. Accordingly, single persons and married couples filing joint returns may continue to apply the 25-percent rate in the case of capital gains of up to $140,000—$70,000 in the case of married persons filing separate returns. However, this rate is available only if the taxpayer does not have tax preference income as described in the bill—other than the excluded one-half of capital gains—in excess of $10,000—$5,000 in the case of married persons filing separately.

The complete elimination of the alternative tax, as proposed by H.R. 13270, would impose a heavy burden on capital investment, and it would discourage investment in new ventures. The Treasury Department recommended against the complete elimination.

However, the alternative rate of tax on long-term capital gains has been abused by some wealthy taxpayers who consistently have very large amounts of capital gains and small amounts of ordinary income. The result is that their effective income tax rate is very low.

To insure against this continued abuse, and, at the same time to allow continued capital investment and market transactions by relatively small investors without an increased tax burden, $140,000 of long-term capital gains remains subject to the alternative rate in the Finance Committee version of the bill. However, this provision becomes inapplicable if the taxpayer has tax preference income in excess of $10,000. The effect is to completely deny this relief in many cases where the 25-percent rate should be applicable. For example, a taxpayer who, in addition to other income, has $10,000 of capital gain and $11,000 of accelerated depreciation on real property will be unable to use the 25-percent rate. In order to achieve a more equitable result and eliminate the "notch" of $10,000 of tax preferences as an absolute cutoff, a taxpayer with tax preference income in excess of $10,000 should be permitted to reduce the $140,000 of capital gain, subject to the 25-percent rate, by the amount of such excess. For example, if the tax preference income is $50,000 for any year, the taxpayer would reduce his limit of $140,000 subject to the alternative by $40,000—which would be $50,000 minus $10,000—and, therefore, a maximum of $100,000 of long-term capital gains would be subject to the 25-percent rate.

This amendment would insure that the 25-percent rate remains available to the taxpayer with relatively small amounts of capital gain.

Mr. President, I have asked the Treasury for an opinion on this amendment. I have a letter here from Mr. John Nolan, of the Treasury Department, saying that the Treasury has reviewed the amendment and agrees with it and recommends its adoption.

Mr. TALMADGE. Mr. President, this is a recommendation that the Treasury Department has made. It would relieve to some degree the burden on capital gains.

I have conferred with the distinguished ranking minority member of the committee. He is agreeable to accepting it. Our staff recommends it. I urge the Senate to approve it.

The PRESIDING OFFICER. The question is on agreeing to the amendment by the Senator from Wyoming.

The amendment was agreed to.

AMENDMENT NO. 314

Mr. HART. Mr. President, I call up my amendments (No. 314).

The PRESIDING OFFICER. The clerk will read the amendments.

Mr. HART. I ask unanimous consent that the reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments (No. 314) are as follows:

On page 514, line 18, strike all after TRUST LAWS.—to page 515, line 16 and insert in lieu thereof the following:

"No reduction shall be allowed under subsection (a) for two-thirds of any amount paid or incurred on any judgment entered against the taxpayer or in settlement of any action by reason of anything forbidden in the Sherman Act (Act of July 2, 1890, ch. 647, 26 Stat. 209, as amended) brought against the taxpayer under section 4 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' approved October 15, 1914 (38 Stat. 731; 15 U.S.C. 15), by reason of anything forbidden in the antitrust laws."

On page 517, after line 22, insert the following:

"(d) (1) Part III of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by inserting at the end of part III the following new section:

"'SEC. —. TREBLE DAMAGE PAYMENTS RECEIVED UNDER THE ANTITRUST LAWS.

"'Gross income does not include two-thirds of any amount received during the taxable year on any judgment entered for treble damages or in settlement of any action by reason of anything forbidden in the Sherman Act (Act of July 2, 1890, ch. 647, 26 Stat. 209, as amended) brought by the taxpayer to recover treble damages under section 4 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (38 Stat. 731; 15 U.S.C. 15), by reason of anything forbidden in the antitrust laws.'

"(2) The amendment made by paragraph (1) shall be applicable only with respect to amounts received after the date of the enactment of this Act."

Mr. HART. Mr. President, the effect of the amendment would be to extend the action that the Finance Committee has recommended with respect to the treatment of moneys paid as a result of an antitrust treble damage judgment or settlement.

The bill before us allows the deduction of two-thirds of sums paid to the prevailing party in a Clayton section 4 action for treble damages, provided, however, that the civil action relates to an incident or transaction which has been the subject of a Department of Justice criminal action which has been concluded with a conviction.

This is a desirable advance in the treatment of sums so paid by businesses which have offended the antitrust laws, but the amendment I now offer would not condition the adjustment on a prior Department of Justice action.

Whether or not there had been a successful criminal prosecution, the firm against which the civil judgment had been rendered would not be permitted to deduct two-thirds of that sum.

Earlier in the proceedings, I inserted in the RECORD, under date of November 26, at page 35905, an explanation of the amendment. Printed there is the amendment which is now before us. Additionally, the day before, as I recall, which would be November 25, I sent my colleagues a letter which included an explanation of this amendment.

Further, Mr. President, the amendment would exclude from taxable income two-thirds of the payment to a plaintiff who had succeeded in obtaining a treble damage judgment. This second feature of the amendment, however, becomes effective only after the effective date of the act with respect to amounts received after that date.

It is my feeling that it is not inappropriate to achieve a socially desirable end through the Internal Revenue Code itself. We have on many occasions used the Code for that purpose. This admittedly would seek to make more effective the discipline of antitrust statutes on business practices by way of antitrust treatment.

Mr. President, amendment No. 314 would be a substitute for that part of section 903 of the tax bill which relates to the tax deductibility of treble damage payments by defendants in private suits for antitrust violations. This amendment also would exclude from gross income of plaintiffs the penalty part of the judgment in such cases.

We recall the shocking price-fixing cases against the manufacturers of electrical equipment by the Department of Justice in Philadelphia in 1962 and 1963. Following the indictments some 2000 private damage suits were filed by States, cities, TVA, and private power companies claiming damages from the price fixing by the equipment manufacturers. Section 4 of the Clayton Act requires the court to treble the actual damages in such cases.

The courts have frequently considered this trebling of the actual damages as a penalty for the violation of the antitrust laws. As late as 1955 the Supreme Court in *Commissioner of Internal Revenue* v. *Glenshaw Glass Co.*, 348 U.S. 426 treated the trebled part of the judgment as a penalty.

These court decisions are in line with the purpose of section 4 of the Clayton Act. That purpose was and is to serve as an additional deterrent to antitrust violations. Assessment of a civil penalty in the form of trebled damages is indeed a deterrent.

It is important to note that section 4 assessed the penalty without reference to any civil or criminal prosecution by the Government. It is punishment of the restraint or monopolizing of trade entirely separate and apart from the penalties provided in the Sherman Act. The penalty is the result of private action for damages caused to private parties by the restraints or monopolizing.

This is important to remember because it is the essence of the difference in my amendment and section 903 as now written with respect to taxes to be paid by the defendants in such private cases.

But first let me explain the need for this in the tax bill. In 1964, the Internal Revenue Service issued a formal ruling at the request of some of the defendants in the Philadelphia electrical equipment cases. The ruling 64–224, held that all of the treble damage judgment in a section 4 private suit was deductible as ordinary and necessary expenses of doing business.

This ruling was a reversal of the Service's informal rulings prior to 1964. It seemed to ignore the very nature and purpose of the punishment fixed in section 4. By allowing the penalty to be deductible as ordinary and necessary expense of doing business, thus greatly reducing the statutory punishment for law violation, it runs contrary to general public policy. It further violated our specific national policy against restraints of trade and monopoly by greatly reducing the civil penalty for such violations and removing much of the deterrent effect of section 4.

Since 1964, I have undertaken in each Congress to restore the effectiveness of section 4 by reversing this Internal Revenue ruling. This can be done only by restoring the penalty in section 4 without regard to or being dependent on prosecution by the Department of Justice. That was the effect of section 4 prior to the tax ruling and it cannot be restored to its full and intended effectiveness without reversing in full the tax ruling. In brief, the result of the ruling was to short circuit the policy and law on antitrust enforcement as Congress had written it.

Section 903 as now written would reverse the tax ruling only in those cases of private damage judgments under section 4 which follow criminal judgments obtained by the Department of Justice. Section 903 would have no effect on the tax ruling in cases where the Department had not criminally prosecuted or filed only a civil case or took no action at all.

Section 903 would reverse the tax ruling in only a small number of antitrust violations. It ignores or thwarts the vital purpose of section 4; namely, to create an additional arm of enforcement through private action and a deterrent to violations.

Section 903 would apply only in cases in which the Department has criminally prosecuted and collected criminal penalties which might include a jail term as well as a fine. Those are the cases in which private treble damage cases are least needed. My amendment would reverse the tax ruling in full and restore the effectiveness of section 4 to the degree that Congress intended.

This amendment would make one-third of the treble damage judgment deductible by the defendant for income taxes. This would represent the amount paid by him as actual damages to the plaintiff. The other two-thirds of the judgment representing the penalty assessed by law for the antitrust violation would not be deductible. The penalty of section 4 would not be lessened and the deterrent to violations through private action again would be fully effective.

Amendment No. 314 would also restore the inducement to private suits to enforce the Sherman Act. Section 903 as written does nothing on this.

The amendment would remove from gross income of the plaintiff in antitrust treble damage judgments two-thirds of the judgment. One-third would be included in gross income. The two-thirds

would again be considered as a penalty for a law violation. This was generally believed to be the law until the Glenshaw case by the Supreme Court in 1955. Even at that time the lower court and the Court of Appeals for the Seventh Circuit held the penalty was not income. The Supreme Court held that section 22(a) of the tax law defining gross income as "income from any source whatever" did not exclude "money received as the punitive two-thirds of a treble-damage antitrust recovery."

My amendment would conform the definition of gross income to that generally understood prior to the 1955 decision. It would thereby restore the inducement to private plaintiffs.

I urge that my colleagues support amendment No. 314. It is of national importance. If each of you could have sat with me through the Antitrust Subcommittee's many hearings on the growth of industrial concentration in our economy you would, I believe, agree with me on the need for stronger and more effective antitrust enforcement. This can be greatly aided by private action.

This amendment, just as section 4, does not place any burden on the public. It shifts the tax burden from the public to the law violators where it should be. It gives the Treasury the money the tax ruling took away. It carries out the national policy against restraints and monopolies of trade. And we should keep in mind that every such act in violation of the Sherman Act is a criminal offense, whether or not the Department of Justice prosecutes.

Objection is made that we should not attempt to achieve such goals by use of tax provisions. But Congress has used a tax effect to accomplish a nontax social purpose in many instances—depletion, interest equalization, investment credit—are a few examples. This is not a valid objection to the amendment if it is otherwise meritorious. And I have outlined its merits and value.

I would hope very much that we would extend, by the adoption of this amendment, the constructive action that the committee itself has taken in this area.

Mr. HRUSKA. Mr. President, I rise in opposition to the amendment proposed by the Senator from Michigan.

Mr. HART. Mr. President, will the Senator yield so that I may ask for the yeas and nays?

Mr. HRUSKA. Surely.

Mr. HART. I ask for the yeas and nays.

The PRESIDING OFFICER. There is not a sufficient second.

Mr. HART. Very well.

Mr. HRUSKA. This amendment should be defeated, Mr. President. It seeks to disallow income tax deductions for the amounts paid by a defendant in any action in which a treble damage judgment or settlement is paid.

It also provides that two-thirds of any such payment is not to be included in the gross income of the recipient thereof.

Mr. President, in order to achieve proper perspective, we ought to note that there is a provision in the committee bill providing for nondeductibility of treble damage assessments and payments made thereunder after conviction in criminal prosecutions, and also that conviction must occur after January 1, 1970. So it should be stated at the outset that the question at hand is not whether offenders against antitrust laws should be punished; it is not whether they should be treated leniently or in a more favored way than other law violators.

The antitrust law violator should be punished. It should be by a penalty in keeping with the gravity of the offense. It should be such that it will operate as a deterrent for others as well as the violator as to future or further violations. It should be in keeping with the principles and application of sentencing which have evolved through generations in this field and in the general field of sentencing.

Mr. HART. Mr. President, will the Senator yield briefly, for the purpose of again asking for the yeas and nays?

Mr. HRUSKA. I yield.

Mr. HART. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. HRUSKA. I am happy to yield.

Mr. TALMADGE. Would the Senator from Michigan and the Senator from Nebraska agree to a time limitation on this amendment?

Mr. HRUSKA. The Senator from Nebraska would rather that that request were postponed until after he has made his statement.

The Sherman Antitrust Act from the time of its passage to the present has provided criminal penalties, and properly so. From time to time these sanctions have been reviewed and changed. Pending in the Congress right now is another measure which seeks to substantially increase maximum fines—from $50,000 to $500,000, a tenfold increase.

This Senator introduced that bill. It has the support of the administration.

It is hoped the Congress will approve it soon.

The method of sentencing sought by this amendment does not have any of the provisions of virtually all of our criminal laws—namely, a judge to apply a punishment to fit the crime or offense, with a range of upper and lower limits depending on the seriousness of the crime, the record of the accused in similar situations, and the impact the punishment will have upon him and those about him, and upon the public.

The issue before the Senate now, therefore, is not whether an antitrust offender should be punished but whether the method and degree of punishment provided in the pending amendment is proper, desirable, and fair.

In the Tellier case, decided about 3 years ago, the opinion read in part:

> We start with the proposition that the Federal Income Tax is a tax on net income, not a sanction against wrong-doing. This principle has been firmly imbedded in the tax statute from the very beginning.

The proposed amendment seeks to make of the income tax a method and a course whereby punishment can be inflicted upon the offender—the violator of the antitrust laws—through the income tax statutes, and that is not good legislation.

Second, the proposed amendment would discourage settlement of such treble action suits; thus further clogging court dockets which are already overcrowded. Thus enforcement would be impaired.

Third, the penalty provided is excessive. Considering the corporate tax rate currently applicable, the approval and passage of this amendment would result in a sixfold burden, not a threefold burden.

Fourth, the penalty resulting from nondeductibility is not sufficiently related to the seriousness of the offense committed.

Finally, the penalty would often be unfair and harsh because of difficulty of determining when the antitrust law is applicable and when it is violated.

Mr. President, the subject of deductibility of treble damage payments has a long history.

That history was made chiefly in the Committee on the Judiciary and rightly so because the provision providing treble damages is a part of the antitrust statute.

Any proposal for a change in that law should originate in that committee where due consideration can be given to the entire context and purpose of the statute involved.

That is not the case here. The Senate is asked to consider a feature of antitrust law in the debate and action on a tax measure.

This is most unfortunate and unfair.

The income tax law, I repeat, should not be used—or rather abused—to punish wrongdoing. Criminal laws and penalties should be used for that purpose.

A basic tenet of income tax law is that "ordinary and necessary business expenses" are deductible.

Treble damage payments are ordinary and necessary business expenses. They have been held and treated as such for a long time; and they have been deductible on that basis for a long, long time.

The Supreme Court has described the treble damage provision as a "remedial provision for redress of private injuries in several decisions (*Eastman Co.* case, 273 U.S. 359, 373. Also *U.S. v. Cooper Corp.*, 312 U.S. 600, 608).

The overwhelming weight of judicial authority supports the proposition that treble damages provisions are compensatory in nature, not punitive. Yet, the amendment seeks to put treble damages in the same class as fines imposed upon conviction in a criminal action.

Fines are not tax deductible. The amendment seeks to make damage judgments not deductible, and have them occupy the same relationship in the tax picture as fines.

Therefore this question can well be put, Mr. President: Why discriminate in this field by depriving this type of damage of its deductible classification? There are many decisions in many causes that are in effect similar, if not identical, to treble damage payments, which are deductible and would remain so, notwithstanding the approval of the Hart amendment.

And the basis of their deductibility is that they are held to be ordinary and necessary business expenses. There is no reason to single out treble damages compensatory cases and not treat other situations in like manner.

There are many examples of similar and even identical cases. For example, I cite the payment of treble damages in price ceiling violations under the Price Control Act. That was a circuit court case, second circuit court.

In the instance of multiple damages paid to an employee for violation of the Fair Labor Standards Act, that was held to be deductible by the Internal Revenue Service. The settlement of a judgment against a taxpayer for fraud was deductible as ordinary and necessary business expense. That is a ninth circuit case.

In the Tellier case, decided in 1966 in the Supreme Court of the United States, a taxpayer was convicted of fraud in the sale of securities. That is certainly as venal a crime or offense as the violation of the Antitrust Act. The Supreme Court held that the fine was not deductible, but that $22,000 paid as attorneys' fees were deductible.

And it was in that case that the opinion read in part:

> We start with the proposition that the Federal income tax is a tax on net income, not a sanction against wrong-doing. This principle has been firmly imbedded in the tax statute from the very beginning.

The proposed amendment seeks to violate that principle and, worse yet, to violate it in only one instance and disregard it in numerous similar and even identical situations.

The amendment is unconscionable because in many cases it is difficult to determine when the law is violated. It is difficult to determine in which cases that are prosecuted criminally it would apply. It would apply to all cases in which treble damages are awarded. The unconscionable nature arises from the fact that a business firm may subject itself to treble damage action even though it has made every effort to avoid antitrust violations.

Here is one very spectacular example. Back in 1926 the U.S. Supreme Court approved as valid a consignment arrangement for merchandise. That is the *General Electric Co.* case in 272 United States 476. The use of that contract did not violate the Sherman Act, the Court held. That was in 1926.

Mr. President, in 1966, 40 years later, after the economy and commerce in this Nation had in large measure, and over a tremendously larger sector of transactions of this nature, been based upon and operated upon the validity of that type of consignment arrangement, the Supreme Court changed its mind.

The Supreme Court sustained an action by a service station operator against an oil company for treble damages. And it held that a consignment contract, parallel to the 1926 situation, was in violation of the Sherman Act.

If that situation would be repeated, and it will be because the examples are so numerous, any company or taxpayer basing his operations on what is as good authority as any—the opinion of the Supreme Court—would be caught in the proposition of paying, not treble damages, but damages that would consist of a sixfold increase.

There are other examples. I refer to the White Motor Co. case, and also the Federal Trade Commission ruling on newspaper advertising of retail druggists.

There a bulletin was released by the Federal Trade Commission saying that this type of newspaper advertising is not valid and violates the antitrust law. In reply to that, and in short order, the Antitrust Division of the Department of Justice came out with a ruling saying, "This type of newspaper advertising is valid, and it does not violate the antitrust law."

What is a businessman to do under those circumstances? He has to proceed at his own hazard.

The amendment that is proposed here would say not only that, but would also say that if one has guessed wrong, then he will pay a sixfold burden instead of the treble damages that are now proposed.

Yet, the proposed amendment would impose a mandatory penalty in such an instance, a punitive action making the treble damages equivalent to a fine paid to the Government—that is, they would be nondeductible as ordinary and necessary business.

Situations for punitive damages should be provided in criminal statutes with opportunity for the court to exercise the same kind of judgment as to severity as in other criminal cases.

It should be noted that there is pending in the Senate now a bill calling for an increase in Sherman Act violation fines, raising the maximum from $50,000 to $500,000. That is a tenfold increase over what it is today.

Deterrents in these cases can be adequately exercised and will have a proper deterrent effect upon those who had contemplated conduct that would be criminal in character in this field.

And there, of course, would enter the committee amendment. There would be a criminal trial. And there would have to be a conviction and a sentence before the nondeductibility would attach to the treble damages which are awarded later on in a civil suit.

So we have some sense in that part and some protection against the harshness which otherwise would be visited upon the business of commercial firms of the Nation.

It is clear that the proposed amendment depends on inherently uncertain enforcement factors. Its provisions are not sufficiently related to the seriousness of the related and pertinent offense.

It is intrinsically unfair and should be rejected.

The amendment would militate against another well imbedded principle of antitrust law that has been the case ever since antitrust law was enacted originally, and that is that the settlement of cases should be encouraged.

The imposition of nondeductibility on treble action cases will force defendants in those cases to engage in protracted and extensive and expensive litigation. They would have no other recourse whatsoever.

And because of the nature and the harshness of the penalty that would be imposed upon them, with the protracting of these lawsuits, with their multiplication, and their increase in number, the already overcrowded courts would be clogged even further, not only for the purpose of trying antitrust cases, but also for all other purposes.

This is not the time. This is not the way. This is not the fashion in which we should consider penalties for antitrust violators.

The income tax law ought not to be prostituted with that end and with that goal in mind.

That is exactly the attempt that is being made. The amendment should be rejected.

We ought to consider criminal penalties that are this severe and this harsh in the proper fashion when we could apply the rule that goes with penology, a rule that will have some purpose in getting at the matter of sentencing.

We should not do that in this meat cleaver way.

I hope the amendment will be rejected.

Mr. TALMADGE. Mr. President, I ask if the Senator from Nebraska and the Senator from Michigan are willing to agree to a time limitation of 10 or 15 additional minutes to the side. Would that be agreeable?

Mr. HART. Mr. President, there would be on objection on my part. The Senator from Nebraska has made a full explanation of his position.

Mr. HRUSKA. Is there any desire on the part of any of our colleagues to be heard?

Mr. TALMADGE. Mr. President, I will speak briefly on this amendment.

The House bill did not have any item relating to this particular feature. The Senate bill included a provision which would disallow as deductions fines and penalties paid to the Government for violations of any law and a provision which would disallow deductions for two-thirds of the amounts paid as treble damages for criminal violations of the antitrust laws. In 1965, at the direction of the distinguished chairman of our committee, who was then chairman of the Small Business Committee, our staff did a detailed study of this entire area.

Part of the report reads as follows:

> Under the bill there would have to be a conviction in a criminal prosecution before deductions would be denied for treble damage payments under the antitrust laws and bribes and kickbacks of other than public officials. Except where payments to the public officials are involved, it appears undesirable that a revenue agent be permitted to determine whether a taxpayers' payment to a third party is in violation of a law. If an agent is granted such authority, the deduction of the payment is disallowed unless the taxpayer—carrying the burden of proof—establishes in court that he is innocent of the violation. It is understood that this is the present position of the Internal Revenue Service. On the other hand, if the taxpayer had been convicted in a criminal proceeding, he was protected by the requirement that the prosecutor must prove him guilty beyond a reasonable doubt. In such a case it is clear that the taxpayer's payment was in violation of the public policy involved.

That is a provision of the Finance Committee bill. It appeared to the Finance Committee that it would be dan-

gerous, indeed, to set up a system that would encourage lawsuits. If A sued B and won that lawsuit, B could not deduct his losses, and A would not have to report his gains. In other words, he would win a lawsuit and have tax-free income. I think that is an extremely dangerous policy.

That is what the amendment of the Senator from Michigan provides, and it goes even beyond that. It makes it retroactive to a degree that if a cause of action arose before this bill becomes law and a recovery is made after this bill is signed into law, the same situation would arise. I do not know of anything more dangerous than to say to a taxpayer, "You go out and sue somebody, and if you recover a judgment, you do not have to pay income taxes on what you collect, and the man you recovered from cannot deduct his expenses."

I urge the Senate to reject the amendment.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. HRUSKA. Mr. President, the purpose of the bill is to close loopholes for taxpayers. It seems to me that the creation of this nonreportable income in the case of recipients creates a loophole of gigantic proportions, and it would be available to literally thousands of people engaged in business, even if there were no criminal conviction of the defendant in the original instance, as a hard-core antitrust law violator.

Is that not true?

Mr. TALMADGE. I agree with the Senator. I think it would create a new loophole.

Mr. HART. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield the floor.

If the Senator will conclude his remarks, and if the Senator from Nebraska has concluded, and if the distinguished chairman does not want to make a statement, that concludes our argument.

Mr. President, I ask unanimous consent that we vote on the pending amendment at 6:10 p.m.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HRUSKA. I am ready to vote now.

Mr. HART. Mr. President, I think that perhaps the Senator from Georgia overstates the extent to which the sums paid would be nondeductible. Only two-thirds would be nondeductible, and to the extent that the recipient would be exempt from the payment, that would be true with respect to only two-thirds. But he is correct in saying that the effect of this amendment would be to encourage lawsuits. This, indeed, is a purpose of the amendment.

Given the limitations of personnel of the Department of Justice, a most effective salutary plus in antitrust enforcement would be the self-help road of civil damages. That, in my book, is what section 4 had in mind. I think we will advance antitrust enforcement by the adoption of this amendment and, rather than it being an objection, I think it is an argument for it.

Mr. BAYH. Mr. President, I salute the Senator from Michigan for bringing to the attention of the Senate what is a gross injustice; namely, permitting the treble damages in antitrust actions to be assessed, in reality, on the taxpayers as a whole by having them deducted as a business expense.

While I recognize the injustice of this practice, I feel compelled, nevertheless, to vote against the amendment of the Senator from Michigan. I have discussed this with him earlier.

My concern centers on the fact that in purely civil treble damage cases, the amendment can be applied retroactively. I am not concerned about those cases where civil action follows a criminal prosecution, but the Senator goes one step further and covers treble damages in purely civil cases that originated prior to the date of enactment.

Again, I salute the Senator from Michigan for being a watchdog on this matter.

Mr. TALMADGE. Mr. President, I ask unanimous consent that we vote now on the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Michigan. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) is detained on official business.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 25, nays 66, as follows:

[No. 212 Leg.]

YEAS—25

| | | |
|---|---|---|
| Burdick | Inouye | Mondale |
| Byrd, W. Va. | Jackson | Moss |

NOT VOTING—9

| | | |
|---|---|---|
| Anderson | Goldwater | Pastore |
| Cooper | McCarthy | Symington |
| Fulbright | Mundt | Tydings |

So Mr. HART's amendment was rejected.

Mr. HRUSKA. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. TALMADGE and Mr. LONG moved to lay the motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 351

Mr. YARBOROUGH obtained the floor.

Mr. TALMADGE. Mr. President, will the Senator from Texas yield to me for a unanimous-consent request?

Mr. YARBOROUGH. I yield.

Mr. TALMADGE. Would it be agreeable to the Senator from Texas for a 40-minute limitation on his amendment, when it is called up, with 20 minutes for each side?

The PRESIDING OFFICER. The Chair would inform the Senate that the amendment has not yet been presented to the Senate.

Mr. YARBOROUGH. I should like to have a time limitation of 1 hour, with 30 minutes to a side, if that is agreeable to the Senator from Georgia.

Mr. TALMADGE. Mr. President, I ask unanimous consent that there be a time limitation on amendment No. 351 to be offered by the Senator from Texas, with the time to be equally divided, 30 minutes to a side, to be handled by the distinguished Senator from Texas, and the floor manager of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Georgia? The Chair hears none, and it is so ordered.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the amendment of the Senator from Iowa (Mr. MILLER) be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. YARBOROUGH. Mr. President, I call up my amendment No. 351 and ask that it be stated.

The PRESIDING OFFICER (Mr. GRAVEL in the chair). The amendment will be stated.

The bill clerk read as follows:

On page 420, beginning with line 21, strike out all through line 9 on page 421.

Mr. YARBOROUGH. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. YARBOROUGH. Mr. President, my amendment No. 351, to H.R. 13270 would delete from the tax bill a provision which would exempt certain gas pipeline contracts from the repeal of the 7 percent investment tax credit.

One of the most significant tax reform proposals contained in H.R. 13270 is the repeal of the 7 percent investment tax credit. It is widely recognized that the investment tax credit has long since out-

lived any usefulness that it might have ever had and is now nothing more than a vast loophole through which the Government loses billions of taxable dollars each year.

H.R. 13270 provides for the permanent repeal of the investment tax credit in the case of property acquired or construction which is begun after April 18, 1969. However, to avoid economic injustice to those taxpayers who have commenced construction or acquired property pursuant to a binding contract entered into before April 18, 1969, the bill specifically exempts such taxpayers from the repeal of the investment credit and makes the credit available to them. This is a fair and reasonable exemption since it has never been the policy of this country to penalize those who in good faith have relied on existing laws.

Unfortunately, H.R. 13270 does not stop with this one justified exemption from the general repeal of the investment tax credit. There has also been inserted into H.R. 13270 a special exemption for gas pipeline contracts which cannot be justified on any basis except that its proponents desire additional special treatment for an industry which is already specially protected and specially favored by our laws. The exemption to which I refer may be found on page 420, at line 21 of H.R. 13270 and provides:

(B) Where, in order to perform a binding contract of contracts in effect on April 18, 1969, (i) the taxpayer is required to construct, reconstruct, erect, or acquire property specified in any order of a Federal regulatory agency for which application was filed before April 19, 1969, (ii) the property is to be used to transport one or more products under such contract or contracts, and (iii) one or more parties to the contract or contracts are required to take or to provide more than 50 percent of the products to be transported over a substantial portion of the expected useful life of the property, then such property shall be pre-termination property.

On its face this seemingly innocuous language would not appear to be a vehicle for serving special interest. However, on closer examination it is clear that the only purpose for this provision is to grant to certain gas pipelines a special privilege in dealing with the investment tax credit which no other industry or taxpayer in America has.

The taxpayers in my State and in other States are paying through the nose in income taxes to grant special privileges to 29 companies by granting them a largess of $49 million.

To appreciate the necessity for striking this insidiously clever provision from H.R. 13270, it is important to understand: First, the nature of a gas pipeline contract; second, why there is no reason for a special treatment of these contracts; and, third, the history of the gas pipeline industry and the investment tax credit.

A gas pipeline contract, unlike the other contracts, to which the exemption from the repeal date of the investment tax credit applies, is not a contract for the purchase of capital goods, but is a contract for service or supply. That is, the gas pipeline contract obligates the company to supply its customers with a specified number of units of natural gas. Nowhere in this contract between the company and the customer does the gas pipeline company obligate itself to build or expand its facilities to perform the contract. However, section 7C of the Natural Gas Act of 1938 requires:

No natural-gas company or person which will be a natural-gas company upon completion of any proposed construction or extension shall engage in the transportation or sale of natural gas, subject to the jurisdiction of the Commission, or undertake the construction or extension of any facilities therefor, or acquire or operate any such facilities or extension thereof, unless there is in force with respect to such natural-gas company a certificate of public convenience and necessity issued by the Commission authorizing such acts or operations . . .

Therefore, until the FPC grants the gas pipeline company a certificate of public convenience and necessity, the company cannot lawfully fulfill its contract to the customer. Thus, the certificate is a necessary prerequisite to a valid binding gas pipeline contract.

In determining whether to grant a certificate to a gas pipeline company, the FPC takes into consideration whether the proposed expansion in service is physically and economically feasible. The FPC will, and often does, allow a gas pipeline company to withdraw its application for a certificate upon a showing of just cause. The "just cause" for which an application may be withdrawn might well include a showing by the company of a loss in profits by the repeal of the investment credit.

In other words, if they cannot make a profit on their investment, they can get the order rescinded.

Furthermore, the regulations of the FPC afford a company with a way of having the application dismissed by the FPC. Section 157.12 of the FPC regulations provides that in the absence of a showing of good cause, "failure of an applicant to go forward on the date set for hearings and present its full case in support of its application will constitute grounds for summary dismissal of the application and the termination of the proceedings." Therefore, without showing just cause, an application can be dismissed by inaction on the part of the gas pipeline company.

I point out that there is no binding contract. They have applications pending. They can play them like the keys of a piano. They can let them die or pursue them by the diligence with which they pursue them or by the lack of diligence with which they pursue them. So they do not have binding contracts. Until that certificate is issued by the Federal Power Commission, they are not bound to do it.

What this amounts to is that gas pipeline companies are not subject to the same economic hardships as taxpayers who have bound themselves contractually to construct, reconstruct, or acquire property.

They do not have to acquire or reconstruct the property unless they want to, because, unless they diligently pursue it, they will not have that obligation, and they are not under the same obligation other taxpayers are.

The simple truth is that without the certificate of public necessity the gas pipeline company is not contractually bound to do anything. This gives the gas pipeline company the right to have the benefit of the investment tax credit for contracts that it may void at will.

They have an option to construct or not to construct. It is not like a binding contract.

There is no justification for this type of special advantage.

As I have previously pointed out, these gas pipeline contracts are not binding on the company in the absence of a certificate of public necessity and convenience. Thus, this special exemption is not justified. Are there any economic reasons for this special treatment? A review of the facts clearly reveals that the answer is "No."

The gas pipelines are strong and financially healthy. It is one of the very few operations in America which is guaranteed a profit by the Federal Government.

It is the one utility group whose rates charged for natural gas are regulated by the Federal Power Commission so as to assure them a reasonable profit. So they are going to have their profit without the investment credit. The rates charged for natural gas are regulated by the FPC so as to assure the gas pipelines a reasonable profit each year. Very few other industries in America can be assured that, year in and year out, they will be operating in the black.

Since 1958, the revenues and assets of the gas pipeline companies have doubled. According to a recent industrial survey conducted by Standard & Poor's, the revenues of gas pipeline companies are expected to reach new highs in 1969. The American Gas Association estimates that gas sales in 1969 will reach 152,650 million therms. This is an increase of 5.7 percent from 1968.

The outlook for future growth is also quite encouraging. The American Gas Association estimates an increase in sales of 6 percent for each year from 1967 to 1980. By 1985, gas utilities sales are expected to reach 356 billion therms. This is an increase of 144 percent from the amount of gas sold in 1968.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. GRAVEL in the chair). The Senator will state it.

Mr. YARBOROUGH. How much time do I have left?

The PRESIDING OFFICER. The Senator has used only 10 minutes of his time.

Mr. YARBOROUGH. Mr. President, in addition to the increase in sales, the rate of return to the companies is also increasing. At present, the rate of return on old contracts is between 6½ to 6⅔ percent. However, the FPC recently granted one company an annual rate of return of 7¼ percent. There are numerous other applications pending before the FPC which request returns of 8 to 8½ percent.

The alleged purpose behind the enactment of the investment tax credit in 1962 was that it would encourage business investments in new machinery and equipment. The plain facts reveal that the large gas pipelines companies never needed enactment of the 7 percent investment tax credit; the large gas pipeline companies did not suffer from lack of growth, because they could already raise their rates enough to pay for any

replacement of equipment, and they never suffer from lack of growth.

From 1957 to 1961, the net investment in gas utility plants rose from $6 to $8 billion. After the enactment of the investment tax credit, the net investment in gas utilities plants grew at about the same rate, $8 to $10 billion. It did not need the stimulus of the investment tax credit to get them to grow. This clearly shows that the investment tax credit was not needed to stimulate growth.

The whole history of the investment tax credit and the large gas pipeline companies has been one of special and unjustified favoritism over other companies in our economy.

To begin with, the gas pipeline was allowed the 7-percent credit whereas the other major public utilities were allowed only 3 percent. What was the reason for this? I submit that the only reason for it was the strength of the gas pipeline industry's lobby.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the time taken to get order not be charged out of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

May we have order, please?

Mr. YARBOROUGH. I again ask unanimous consent that the time to restore order not be taken out of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator will continue.

Mr. YARBOROUGH. Furthermore, the FPC is prohibited by a 1964 amendment to the Internal Revenue Act from treating a reduction in income tax, arising from the investment tax credit, as a reduction in the gas pipeline cost for determining rates.

Let me repeat that. Under the Internal Revenue Act there is a provision that they cannot treat a reduction in income tax credit as a reduction in the gas pipeline cost for determining rates.

Thus, a gas pipeline company is free either to retain the tax savings for reinvestment or payments to stockholders, or pass along the tax savings to its customers in the form of volunteer rate reductions. It should come as no surprise that, according to figures compiled by the FPC in 1967 alone, more than 94 percent of the amounts generated and utilized by gas pipeline companies from that investment tax credit was retained by the companies and less than 6 percent passed on to the consumer by rate reductions.

They just took that 7 percent and put it in their pockets.

Mr. LONG. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. LONG. Mr. President, does not the Senator recall that when we passed the investment tax credit law, we expressly provided in that law that it was intended to encourage the construction of new transportation facilities? Not just pipelines, but railroads, airlines, and other transportation facilities got the 7-percent investment tax credit. We specifically said, in section 207—depending on whether you look at the House bill or the Senate bill it was section 207(e)(2) or 202(e)(2)—that it was intended that they be permitted to keep the 7-percent investment tax credit to encourage them to improve the transportation facilities of this country.

Mr. YARBOROUGH. Mr. President, as I just pointed out, gas pipeline companies already have built-in protection in that they are guaranteed a profit by the Federal Power Commission. Those companies were building and expanding rapidly before the investment tax credit was ever instituted.

Mr. LONG. Mr. President, they would have cut the activity down. It would have gone down.

Mr. YARBOROUGH. That conclusion is too speculative. The facts reveal that these companies were experiencing rapid growth when the investment tax credit was first passed.

This provision of H.R. 13270, which my amendment is designed to eliminate, is the sort of special interest legislation which has generated the present demand for tax reform by the majority of the people of the United States. Our people are tired of carrying the greater portion of this Nation's tax burden while their own elected representatives write special exemptions into the tax laws for big business.

The people of the United States have challenged the 91st Congress to reform this Nation's tax laws. They expect their interest to come first for a change. Special exemptions and favortism for these companies that are sound financially is not needed—I have no prejudice against gas pipelines, we need them; they perform a vital service; my State produces a lot of gas, and we need a market for it. I remember when flares burned all over Texas and there was no market for the gas. However, today these companies are doing very well. Therefore, I think the 11 million people of my State are more entitled to tax relief, than the 29 companies who would get the $40 million largesse under this provision.

I submit that it is time for Congress to turn its attention to problems and needs of average Americans. These people cannot afford expensive lobbying efforts to get their point of view across. They must depend on us to represent them. I hope we will show them that we are concerned by closing this loophole.

I urge all of my colleagues to join with me in remedying this inequity. The total estimated cost of the applications for certificates for public convenience and necessity pending before the Federal Power Commission on April 18, 1969, was $611,874,000. As adjusted to reflect the property subject to the investment tax credit, it would be $570 million. This means that approximately $40 million would be available to these 29 companies under the provision in the House and committee bills.

Mr. President, I yield the floor.

Mr. LONG. Mr. President, I yield myself such time as I may require.

In repealing the investment tax credit, the House of Representatives wrote into its bill the provision that the Senator seeks to strike. This is not something the Senate Finance Committee did. The House did it. We thought they were right, and so we did not change it.

Let me explain what we are talking about. Here is a situation where a pipeline signs a contract with its customer to deliver more gas to that customer. The customer can be a city or some other unit of government. This is a binding contract to deliver more gas. Let us say, just for the sake of argument, that they are going to have to deliver twice as much gas as they are delivering now because of industrial expansion and a population increase in the area.

When that contract is signed, it is a binding contract on the pipeline to deliver, and on the customer to take, the additional gas that will be transported. The pipeline company is then bound to apply to the Federal Power Commission for permission to loop its pipeline, to use the term by which that is usually referred to. To loop the pipeline means to lay another pipeline alongside the one already in place. But with that binding contract in effect, subject to the approval of the Federal Power Commission—and the Federal Power Commission looked at the rates to be charged, the desirability of the service, and all the rest of it—the pipeline company cannot back out of that contract, and neither can the city or other governmental unit. They are both bound by their contract. The Federal Power Commission approves the contract, and then the pipeline company must construct the additional pipeline.

In view of the fact that they are committed to build the pipeline, subject only to the approval of the Federal Power Commission, that is a binding contract. The same thing would apply, Mr. President, to other types of contracts. Under an ordinary contract to erect a plant on a plantsite, if a contract was in effect prior to April 18, the company would be eligible to receive its investment tax credit, because the company in making its plans, was relying on the tax law as of the time it signed the contract in determining whether its investment would be profitable or unprofitable.

If you are considering buying a piece of land, and you have an option to buy it, the option will say that the seller must provide good title, and he might even have to go to court to cure his title in order to deliver. It might be subject to that condition, but it is a binding contract which every court recognizes.

There are other parallel situations in this bill, and in every case where this type of adjustment was asked, we gave it to those who asked for it. Let me point out some of the situations we had. Keep in mind, the Senator wants to strike what the House of Representatives did, and what the Senate Finance Committee agrees with in the House bill. We did not even amend this section.

Let us talk about some of the things we did in committee. The committee heard testimony from coal industry representatives which, in effect, said, "I have signed a contract to deliver coal. That means I will have to open this coal mine, and in order to open the coal mine and deliver the coal, I will have to acquire machinery."

The committee considered this situation to involve a binding contract which

makes it necessary to acquire additional machinery in order to meet its obligation. In treating this as a binding contract we acted in the same way that Congress did in 1966 when it suspended the credit.

The aircraft companies appeared before the committee to state that they have binding contracts to deliver a new type of airplane. In order to deliver the airplanes, they must acquire the machinery with which to manufacture the airplanes, otherwise the planes cannot be delivered. The price charged for the planes was dependent on what it would cost to acquire the machinery, assuming availability of the investment credit, to manufacture them. That provision is right here in the bill, and the Senator is not seeking to do a thing about that. The House saw that the problem existed with regard to Lockheed Aviation Corp., and they wisely took care of that problem by providing a carefully phrased transitional amendment.

Mr. President, that was right. The Senate Finance Committee looked at the House proposal, found that McDonnell-Douglas had exactly the same problem—technically different, but exactly the same in justice and equity—and we added an amendment to provide the same transitional adjustment.

An adjustment was made for contracts to build a new type of oceangoing ship, which will carry loaded barges aboard the ship, and the barges are used to deliver the product to the final customer. There was the contract for the ship—no problem there—but the contract had not yet been signed for all of the barges, because they did not require as long a lead-time. But, the ship would be of no use without the special barges to go aboard that type of ship. The House and the Finance Committee decided that this is a transitional situation to which the investment tax credit should apply.

There also was a problem with regard to a contract to build a shopping center. That provision was in the 1966 law to suspend the credit where someone had signed a contract to lease space in a shopping center. The shopping center had to be built in order to provide the space.

The contract is signed to provide space in a shopping center which does not exist, but which is going to be leased. Let us say the lessee is supposed to move into that space on the 1st of next year, or in 6 months. The shopping center owner has not signed a contract with the man who is going to build it, but he has signed a contract to provide the space for the lessee to move into. He has no choice but to build the shopping center.

In this case, a contract was signed which leaves no choice with regard to the second contract.

That principle was followed consistently. We treated them all the same in that respect.

I regret that the Senator from Texas seems to have difficulty with respect to pipeline companies. However, when we passed the investment tax credit, we said that it applied to pipeline companies as well as any other company.

When we voted for the investment credit we were providing this incentive for the railroads, and for the airlines, and for the truckers, and for anybody in any line of transportation or any other industry to make it more profitable for them to modernize their plant and equipment, and to improve their service. We said it was an incentive to all industry, not just pipelines. We said that everybody would get this investment credit as an incentive to make the American economy more productive and American industry more competitive in world markets.

When we considered the repeal of the investment credit we treated them all the same in common justice and common equity. We have not discriminated against anybody. Everybody and every company who is bound and committed as of April 18, 1969, to build a plant or acquire a machine or equipment, if they have a binding commitment that requires them to perform, would not be prevented from receiving the investment tax credit under the Finance Committee bill. The committee applied the same principle to every similar situation.

That is the only way we could be just and fair.

To adopt the Senator's amendment, in my judgment, would be extremely unfair, particularly after we had accepted this principle and extended it to other situations which the Senator would not challenge with his amendment.

Mr. SPARKMAN. Mr. President, do I correctly understand from the Senator's statement that everybody, not just the transportation segments of our economy, but everybody who is obligated in some way prior to April 18, 1969, to do some building or expanding, would still have the investment tax credit pertain to him?

Mr. LONG. Mr. President, let me make it more explicit. Many witnesses who came before the Finance Committee testified that they had a binding contract that require them to acquire some machinery or build something on which they expected to receive an investment tax credit in order to perform the contract. The fact that they had not signed a binding contract for the machinery should not deny them the benefit of the investment credit in this situation.

Mr. SPARKMAN. Mr. President, let me go a little further. I did not use the term contract. I used the word "obligation." In other words, if they are obligated to move forward, do I understand that situation applies whether it is a manufacturing plant or a transportation industry or communication industry or whatever industry it might be?

Mr. LONG. It applies generally to many different situations. However, it is not drafted to apply to everything. It could not be. We drafted it to apply to those situations directed to our attention. I put it this way, if the Senator from Alabama were standing on the floor and offered an amendment and said, "Look. You did not seem to know of this situation. However, in addition to the situations you provide for, we have a situation in Alabama which is slightly different that you have not covered."

We would say, "Well, fine. Offer an amendment because we have done this for others who have a similar problem."

So, we would put a provision in the language of the bill to take care of this situation.

We have been consistent in that we did not draft our language to go beyond the type of problems directed to our attention.

We tried to provide fair and equal treatment. When it was called to our attention that the House had provided for Lockheed but not the McDonnell-Douglas, we said, "Let's apply the provision to McDonnell-Douglas equally as well because the situations are the same." We took different language, but the problem was the same.

Mr. SPARKMAN. Mr. President, I appreciate the explanation. I should like to make this further comment. I believe the first time the recommendation was made to Congress for some kind of investment tax credit, it was made in a report. There was a study by the Small Business Committee. The study was made in 1952, and the Senator was a member of that committee.

I have always believed in the investment tax credit. I believe in it strongly. And I say very frankly that I think the action in repealing the investment tax credit, even with these exceptions, may be necessary on a short-range basis, but on a long-range basis, I think it is bad. I think it is shortsighted. I think we ought to have an investment credit allowance.

I believe that most of the industrial countries in the world do have one and have one much greater than we have had.

I hope the time will come when the economy will be strong enough so that we can reestablish a good investment credit provision.

I would hate very badly to see us repeal it, even though we are not happy with the manner in which we had to handle it a few years ago when we voted to suspend it for a certain period of time and then reinstate it.

If it is necessary for us to do something at this time, I would rather not see it done away with, which would naturally make it more difficult to reinstate.

I believe we ought to have in investment tax credit allowance. We ought to have some regard for what other industrial countries do.

By the way, let me say this: I recently talked with the president of one of the largest chemical manufacturing companies in this country, and he told me that his company was building a big plant in Germany, a tremendous plant. I was impressed by what he said to me. He said, "I hate to do it, but I can't keep from doing it. Over there they give me a 40-percent investment credit. In addition, they lend the money on very liberal terms, and they also have an export subsidy."

That is what we are up against in trying to sell in the world market.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. STEVENS. The Senator from Louisiana is familiar with our situation in Alaska. We have a pipeline that three companies agreed to build. They are not required by any order to build it. They agreed with one another to build it. It is all in the State of Alaska, even though

it is 800 miles long. Therefore, they did not make any application to the FPC.

As I understand the Senator's statement of policy, which I think is very fair, they would have to have had an agreement with a third party to deliver the oil in order to qualify as this gas pipeline qualifies to deliver the gas.

Am I correct that this is the only thing that differentiates our Alaskan pipeline, the reason why our Alaskan pipeline was left out, as compared with the Texas pipeline?

Mr. LONG. There are two differences. One is that you have to have the contract to deliver. Also, this amendment requires that the equipment that is going to be needed must be specified. Neither of those requirements could be met by the Alaskan pipeline, so far as I know.

Mr. STEVENS. I intend to call up an amendment in a little while, depending upon the outcome of this amendment, as the chairman knows. But it is my understanding that invitations to bid were let out in February of this year and that we are actually proceeding on a pipeline, whereas the Texas pipeline may not be built for a couple of years.

Mr. LONG. I was hoping the Senator would not ask me to debate the Alaskan pipeline in comparison with these pipelines. We will face that pipeline when we get to it.

Mr. STEVENS. I wanted to get the facts with regard to this pipeline. Is there any property that has been ordered for this pipeline? Have they ordered the steel?

Mr. LONG. The pipelines to which we are making reference in this provision involve situations where there is a binding contract to deliver the gas, where the equipment that will be needed is specified in an application that is subject to Federal Power Commission approval, and where the contract for constructing the pipeline cannot be signed until the Federal Power Commission approves it. Sometimes the Federal Power Commission is slow in approving these things.

Mr. STEVENS. I thank the chairman.

Mr. YARBOROUGH. Mr. President, I yield myself 4 minutes.

The examples given by the distinguished Senator from Louisiana of coal mines, of manufacturing airplanes, of building a shopping center have no relevancy to the amendment under consideration. They are not cases in point.

On the contrary, we are dealing here with gas pipeline companies that are public utilities and are guaranteed a profit by the Federal law. These rates are fixed so as to assure them a profit. So all the nonutility examples the Senator has mentioned just beg the point. They simply are not relevant.

I say that the law and the facts are against the distinguished Senator from Louisiana.

On page 240 of the report of the committee, in the last paragraph, appears an example:

> An example of the type of case covered by this provision would be a situation where a company has entered into a binding contract to buy or sell fuel and is required to construct a new pipeline or add capacity through an existing pipeline in order to transport such fuel.

Mr. President, that contract is binding only when the Federal Power Commission enters an order granting the company a certificate. My amendment is directed at cases where no certificate has been granted, therefore the company can, at will, withdraw or let lapse its application. Consequently, this gives them the right to determine in the future whether they will create a binding contract. Those contracts to sell fuel are not binding if the company does not obtain permission to build or expand its facilities. It is a matter of general knowledge that often they do not push these applications. In such event it is automatically dismissed.

Consequently it takes a definition of law created by this bill to create the idea that these are binding contracts when in reality they are not. They are not binding, because without this definition in the bill, if the general binding contract provision, would not apply to these contracts. If they had a truly binding contract before April 18 why would they need this provision? I submit that they would not have to write this special provision into the law if these contracts were in fact binding. In truth, they are not binding. Since they are not binding, this provision is necessary if they are to continue to have the benefit of the investment tax credit.

When the investment tax credit was passed, it was hoped that the profits would be passed on to the consumer. However, 94 percent of the amounts generated and utilized by these companies from the investment tax credit are retained by these companies, and less than 6 percent is passed on to the consumers in rate reductions.

I have no prejudice against these pipelines. I recall 30 years ago when the skies of Texas were red at night with gas wasted, and we wanted and needed the pipelines. They give us a market and an opportunity to sell the gas produced in Texas. Much of the byproducts of oil were then burned in the air without the pipelines. But I say, on behalf of the other 11 million people of Texas, it is not right to have 29 companies make contracts after the date of this law and get this $40 million benefit and while other millions of taxpayers in my State reach down into their meager earnings and savings and pay a high price for gas from these companies who obtain this tax break.

The law says that if you have a binding contract on April 18, 1969, you are protected. They do not have binding contracts, and that is why they need a special provision in the law to continue to have the benefit of the investment tax credit.

I yield the floor.

Mr. LONG. Mr. President, how much time do I have left?

The PRESIDING OFFICER (Mr. HARTKE in the chair). Twelve minutes.

Mr. LONG. Mr. President, on page 241 of the report is another example. The same basic principle is applied over and over:

> An example of the type of case covered by this provision would be a situation where a person is obligated under the terms of the contract to build an industrial gas plant—

That is usually a plant, as I understand it, that uses coal to manufacture gas—

> which is specified in the contract for the purpose of supplying the industrial gas to a steel or chemical company. Another example of a type of case covered by this provision would be a situation where a coal company must acquire equipment (including items such as a bulldozer which removes overburden) in order to carry out a binding contract under which the company is obligated to open new coal mines on specified mineral properties.

We proceeded upon the very principle which was applied similarly to a number of other concerns where the same principle was equally applicable. It would be extremely inappropriate to deny the same consideration to pipelines when they are bound to construct the pipelines to deliver more gas. When they negotiated their contract with the city they had in mind the prices they could charge under the assumption that they would receive the investment tax credit.

That is a binding contract subject to Federal Power Commission approval. It would be inappropriate to deny those pipelines that consideration, when the same principle has been extended to everybody else who had a similar problem.

I hope the amendment will be agreed to.

The Senator from Delaware (Mr. WILLIAMS) expressly asked the Treasury when they appeared before the committee, "Do you approve of this particular provision that the House has agreed to with regard to pipelines?"

The Treasury said, "We approve of it."

It is because the principle was approved and agreed to by the Treasury and by a majority of the committee and by the House of Representatives that we extended it to other similar situations.

Those cases are equally justified, and no one has suggested that they be stricken out. I do not think they will, because the principle is correct. It should be extended to anyone who is similarly obligated to construct something under a binding contract, even though there is no construction contract but there is a contract that made the construction contract necessary and from which they could not escape as of April 18.

Mr. YARBOROUGH. Mr. President, I wish to point out to the Senate that if a gas pipeline company has a contract in existence on April 18, 1969, with a gas pipeline contractor to build a pipeline, they are protected under the general provision. This special provision is not to protect a construction contract. On the contrary, this provision protects the contract in which the company must obtain a certificate from the Federal Power Commission, to be binding. There is no obligation on the company to fulfill the contract unless they get the certificate. This does not involve a contract to build a pipeline. It involves contracts to furnish or buy gas which requires an order of the Federal Power Commission to be enforceable. Whether or not they get that order depends on whether or not they ask for it. Many times these applications lie over at the FPC for years without action. I

am familiar with that procedure. They file the application in order to get ahead of some other company and then, if they want to activate it, they present their evidence. There is nothing binding on them at all.

The examples which the distinguished and able Senator from Louisiana read from page 241 of the committee report have no application to my amendment. They apply to construction contracts. That example does not refer to a public utility, guaranteed a profit. Under existing rates they would probably get a 7-percent return.

Mr. MONDALE. Mr. President, does the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. MONDALE. Does the Senator know of any other industry that gets this kind of prospective treatment?

Mr. YARBOROUGH. I am advised that is the only industry in the bill that gets that prospective treatment on something that is not now a binding contract. This is a contract for services and it only becomes binding if they later get a permit from the Federal Power Commission. This does not refer to any existing contract to build a pipeline.

Mr. MONDALE. Mr. President, I would like to join the Senator from Texas in his measure and I ask to be made a cosponsor.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the Senator from Minnesota (Mr. MONDALE) be added as a cosponsor of the amendment.

The PRESIDING OFFICER (Mr. HARTKE in the chair). Without objection, it is so ordered.

Mr. LONG. Mr. President, I wish to make clear again that the contracts to which we are referring are contracts that were entered into by the pipeline company, which will be the seller, and the city, which will be the buyer of gas. An application for permission to construct the pipeline was filed with and must be approved by the Federal Power Commission. That specifies how big the pipeline is to be, the kind of pipe with which it is to be constructed, the size of the pipe, the diameter and the material. It also specifies what kind of pipeline must be built to deliver the gas. The whole transaction is binding on the buyer and the seller, subject to the approval of the Federal Power Commission.

We applied the same provision with regard to every industry that showed a similar problem and where there was a binding contract. We gave them the same consideration that was given to them in the House bill.

Mr. YARBOROUGH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. YARBOROUGH. Mr. President, I wish to point out, as explained in the Tax Reform Act reported by the committee, this would apply to a contract to buy or sell fuel not to a construction contract.

If one made a contract and said, "We will buy so much fuel from you in the future if we get a certificate from the FPC," and then, they let the contract lie there to see if they could get a contract to sell, then all they have is a nonbinding agreement, while they decide if the market is good enough to go through with it. They put their evidence before the Federal Power Commission to get the Federal Power Commission certificate in the future. Then, they make a contract to build the pipeline. This would grant the investment credit where there is no contract to build anything at all. It is not a contract. It is an agreement with a condition precedent and they control whether that condition is fulfilled, depending on the diligence with which they pursue our certificate.

Mr. President, this is a benefit granted to 29 companies. It is a $40 million gift to 29 companies. The record shows they build them when they get the chance because the Federal Power Commission guarantees a profit to them. We submit there is no reason for this type of privilege.

It is true the committee did not include it in here. I do not charge the Committee on Finance with including the provision in the bill. I believe that if the provision had been submitted to the Committee on Finance originally they would have turned it down. This was inserted in the other body over the objection of a Representative from my State. He opposed it on the floor of the House of Representatives.

Mr. LONG. Mr. President, again, let me say that we are talking about firm and binding contracts subject only to the approval of a regulatory commission that under the laws has to approve the contract before it can be carried out.

In view of the fact that they are binding contracts that require delivery of the gas and the equipment was specified the committee felt that the fact that the Federal Power Commission had not yet approved the construction of the pipeline needed to carry out the contract should not foreclose the pipeline companies from getting an investment credit to which they are entitled as a matter of justice and equity.

Again I wish to say that every other company that presented a similar problem was given the same consideration.

Mr. TOWER. Mr. President, I must voice my opposition to the amendment offered by my colleague from Texas. It eliminates a part of the Finance Committee bill which must be retained if we are to treat gas transmission companies fairly.

Simply stated, the committee merely provided a transition period for the application of new, increased taxes which will result from repeal of the investment tax credit. What the Finance Committee has done is to prevent the occurrence of a situation where a business attempting to act in accordance with the Government's understanding of what is in the national interest is penalized by government action.

We will have forced the pipeline companies to wait for FPC approval before expanding operations on the one hand, and then imposed a tax on them while they wait. This does not strike me as fair no matter how you look at it.

This is no loophole, Mr. President. The staff of the Committee on Finance, under the able leadership of the distinguished chairman of that committee, examined the circumstances under which pipelines would be granted the transition and wrote very "tight" provisions into the bill which restrict the use of the credit appropriately.

Now it has been argued that we should oppose the transition rules because the 7 percent investment tax credit never should have been extended to regulated industries in the first place. I do not happen to agree, Mr. President, but even if it were so we should not eliminate the transition rules.

The fact is that the tax credit was extended to regulated industries. They were not wrong or somehow immoral to make use of it. Their justified reliance on the credit, and their allowance for it in calculating expansion plans should not be punished merely because the tax credit was repealed while they were waiting for Government approval.

The committee bill protects a company or individual who had become obligated to purchase or construct equipment in order to perform a binding contract but, because of the necessity of the approval of a Federal regulatory agency, had not entered into a binding contract to purchase or construct the equipment necessary to complete the contract. Such a taxpayer who had bound himself as fully as was within his power and who was forced to await the approval of the Federal regulatory agency before proceeding to purchase or construct the equipment should not be penalized simply because he was subject to such regulation. This is especially true when the Federal approval is determined upon a finding that the contract and the purchase or construction of the equipment necessary for its performance are required by the public convenience and necessity.

Mr. President, the word "equity" has been bandied about quite a bit in this Chamber here lately. I think it is time we applied a little of it and rejected this amendment.

Mr. McINTYRE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. LONG. I yield.

## SUBCOMMITTEE MEETING DURING SENATE SESSION TOMORROW

Mr. McINTYRE. Mr. President, I ask unanimous consent that the Subcommittee on Small Business of the Committee on Banking and Currency be permitted to meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4293) to provide for continuation of authority for regulation of exports; and that the House receded from its disagreement to the amendment of the Sen-

ate to the bill and concurred therein, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7491) to clarify the liability of national banks for certain taxes.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H.R. 9163) to authorize the disposal of certain real property in the Chickamauga and Chattanooga National Military Park, Ga., under the Federal Property and Administrative Services Act of 1949.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13763) making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 1 through 34, and 39 through 41 to the bill, and concurred therein; and that the House receded from its disagreement to the amendment of the Senate numbered 37 to the bill and concurred therein, with an amendment, in which it requested the concurrence of the Senate.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. LONG. Mr. President, if the Senator from Texas is ready to yield back his time, I am ready to yield back the remainder of my time.

Mr. YARBOROUGH. Mr. President, I yield back the remainder of my time.

Mr. LONG. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas. On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPARKMAN (after having voted in the negative). On this vote, I have a pair with the Senator from Oklahoma (Mr. HARRIS). If he were present and voting, he would vote "yea"; if I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. BYRD of West Virginia (after having voted in the affirmative). On this vote I have a pair with the Senator from Georgia (Mr. RUSSELL). If he were present and voting, he would vote "nay"; if I were at liberty to vote, I would vote "yea." I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 36, nays 51, as follows:

So Mr. YARBOROUGH's amendment was rejected.

Mr. BENNETT. Mr. President, I have two amendments which are highly technical. They have been discussed with the chairman of the committee, the ranking minority member of the committee, and the Treasury, they are both acceptable. I would like to send them up to the desk and ask for their immediate consideration, but before I do so, without losing my right to the floor, I ask unanimous consent that I may yield to the Senator from Alaska for 2 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, earlier today, I offered an amendment pertaining to the Alaska pipeline. After examination of the code, section 49(b)(1), the committee report, and discussing the matter with the staff, I would like to withdraw that amendment. I ask unanimous consent that I may withdraw it at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENNETT. Mr. President, I ask unanimous consent that the pending amendment by the Senator from Iowa (Mr. MILLER) may be temporarily laid aside.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The first amendment of the Senator from Utah will be stated.

The assistant legislative clerk proceeded to read the amendment offered by Mr. BENNETT, for himself, and Mr. MURPHY.

Mr. BENNETT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. GORE. Mr. President, I object. I want to hear what it is.

Mr. BENNETT. I will be glad to explain it.

The PRESIDING OFFICER. Does the Senator withdraw his objection?

Mr. GORE. I do.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 303, after line 25, insert the following new paragraph:

"(6) Notwithstanding any other provision in this subsection, the amendments made by subsection (a) shall not apply to a distribution of stock (or rights to acquire stock) made or considered as made before January 1, 1991, with respect to common stock if, except for this paragraph, such distribution would be taxable by reason of the existence of shares of a class of convertible preferred stock outstanding on April 22, 1969, which are issued not later than December 31, 1974, and if the terms of such convertible preferred stock provide that the conversion ratio thereof may be increased or decreased dependent, in whole or in part, upon the market value of the stock into which such preferred stock is convertible. The preceding sentence shall not apply in the case of shares of such convertible preferred stock (even if issued not later than December 31, 1974) if and to the extent that such shares exceed 25 per centum of the number of shares of common stock outstanding on April 22, 1969, but in no event more than 3,000,000 such shares."

Mr. BENNETT. Mr. President, the purpose of the amendment is to permit a company to issue a limited number of shares for a limited period of time in order to bring the total number of preferred shares up to a number where the stock would have some chance of attracting enough interest on the part of institutional investors to enable the stock to sell at its intrinsic worth.

Mr. GORE. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. GORE. I find it all right.

Mr. BENNETT. I thank my friend.

Mr. President, I ask for a vote on my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment was agreed to.

Mr. BENNETT. Mr. President, I send another amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. BENNETT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

That subsection (e)(2) of section 333 of the Internal Revenue Code of 1954 (relating to the election as to recognition of gain in certain liquidations) is amended by adding at the end thereof the following new sentence:

"For purposes of this subparagraph (2), stock or securities acquired by a corporation after December 31, 1953, solely in exchange for stock permitted to be received under section 351 without the recognition of gain or loss, shall be treated as acquired before December 31, 1953 if the period for which the stock or securities is deemed to be held by the corporation, determined by applying section 1223(2), includes any period prior to December 31, 1953."

That subsection (f) of section 333 of the Internal Revenue Code of 1954 (relating to the election as to recognition of gain in certain liquidation) is amended by adding at the end thereof the following new sentence:

"For purposes of subparagraph (1), stock or securities acquired by a corporation after December 31, 1953, solely in exchange for stock permitted to be received under section 351 without the recognition of gain or loss, shall be treated as acquired before December 31, 1953 if the period for which the stock or securities is deemed to be held by the corporation, determined by applying section 1223(2), includes any period prior to December 31, 1953."

The provision of this section shall apply to liquidations occurring prior to January 1, 1971.

Mr. BENNETT. Mr. President, I would like to explain that this is an amendment which I have been asked to present by the Senators from Washington (Mr. MAGNUSON and Mr. JACKSON). It is the policy of Congress to encourage liquidation of personal holding companies. In the State of Washington there is a holding company that cannot qualify technically because after the cutoff date of December 1953 it acquired additional stock. This stock, however, was acquired as a tax-free contribution to its capital from a contributor who acquired that stock prior to December 31, 1953.

Because of that condition, the Treasury has indicated that it feels this minor exception should be made.

Mr. GORE. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. GORE. I would like to take a brief moment to pay tribute to the distinguished Senator. If he will permit a Southern Baptist to so characterize him, I would like to describe him as a Christian gentleman.

Mr. BENNETT. The Senator from Utah greatly appreciates that designation, but it puts a tremendous responsibility on the Senator from Utah to try to live up to it.

Mr. President, I ask that the amendment be accepted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment was agreed to.

Mr. CURTIS. Mr. President, I ask unanimous consent that the amendment of the Senator from Iowa (Mr. MILLER) be temporarily laid aside so that I may offer a conforming amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will read the amendment.

The assistant legislative clerk read the amendment as follows:

On page 115, after line 13, insert the following new subparagraph:

"(7) Section 508(e)—Section 508(e) shall not apply to require inclusion in governing instruments of any provisions inconsistent with paragraph (4) of this subsection.

Mr. CURTIS. Mr. President, this amendment does not change anything in the bill. It is a conforming amendment. It has been submitted to the staff. I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

The amendment was agreed to.

Mr. HRUSKA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator from Nebraska ask unanimous consent to lay aside temporarily the amendment of the Senator from Iowa (Mr. MILLER)?

Mr. HRUSKA. Yes; I ask unanimous consent that the pending amendment be laid aside temporarily for this purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment of the Senator from Nebraska will be stated.

The assistant legislative clerk read the amendment, as follows:

On Page 399, line 3, strike out "1969" and insert "1970".

On Page 401, line 9, strike out "1969" and insert "1970".

On Page 402, line 6, strike out "1969" and insert "1970".

Mr. HRUSKA. Mr. President, by way of explanation, yesterday the Senate deleted from the bill the provisions with reference to professional corporations and a limitation on the deductible contributions that they may make to pension funds.

There is a similar limitation on contributions to pension funds to be found in section 531, pertaining to subchapter S corporations. The purpose of this amendment is to postpone the effectiveness of section 531 until taxable years following December 31, 1970, instead of December 31, 1969. There has been consultation with the manager of the bill and with other members of the Committee on Finance. There appears to be a consensus that the effective date of section 531 should be set back for the same reason that section 901 was deleted; that is, to allow the Treasury Department ample time in which to complete its study, make its recommendations, and have the Finance Committee recommend such legislation as necessary in the entire pension field.

In my statement of yesterday I referred to the effect of section 531 of the bill. This provision would impose a limit of $2,500 or 10 percent of compensation, whichever is the lesser, on contributions to qualified pension and profit-sharing plans on behalf of shareholder-employees of subchapter S corporations. This limit would apply to taxable years beginning after December 31, 1969.

I concur in the belief of the Treasury Department that there are a number of matters in the deferred compensation area which need careful examination and that a comprehensive review of this area is necessary. In order to permit this review to be undertaken in an orderly fashion, the effective date of section 531 should be postponed for 1 year. As I said earlier, piecemeal amendments are a poor way to deal with difficult matters. The postponement that I recommend will afford us the required time to deal properly with this and related problems.

I call for a vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

Mr. LONG. Mr. President, this amendment would postpone for 1 year the retirement provisions under the new rules for subchapter S corporations. In view of the fact that this matter would be in conference in any event, I am willing to take this amendment to conference. It might be desirable to take more time to study the matter before it goes into effect. I personally do not object to the amendment, and I do not believe the other members of the committee do, either.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. GORE. I find serious objection to this proposal. It permits professionals—especially the doctors who have large incomes—to be taxed as a partnership, but still have the benefit of corporate pension and profit-sharing plans.

I do not know why the Senate seems determined to confer such undeserved tax reduction benefits for retirement plans of high-income taxpayers. That is not right.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. GORE. I simply cannot stand here and let this happen unless the Senate is advised. That is all I have to say.

Mr. HRUSKA. Mr. President, we dealt with the section dealing with professional corporations yesterday. The Senate, in its wisdom, deleted that entire section. Whether that was right or wrong is beside the point here. We have a comparable situation in subchapter S corporations, where Congress, as a national policy, has adopted and maintained in force a law giving certain partnership arrangements a corporate quality and cloak for certain purposes.

It seems to me, if the Senate has given the professional corporations total deletion, it would be within the Senate's discretion and would be consistent with its decision yesterday not to delete the subchapter S corporations, but simply to postpone the effectiveness of that section until after December 31 of next year, to give the Finance Committee a chance to receive the report and recommendations of the Treasury Department, and to legislate on the entire subject.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HRUSKA. Surely.

Mr. LONG. This is a compromise previously discussed, and on which I tried to get agreement on yesterday with regard to professional corporations; and I wish we could have agreed to that compromise, because the failure to achieve the compromise caused us to have that provision knocked completely out of the bill.

The effect of the Senator's amendment

would be that with regard to subchapter S corporations, if the House of Representatives agrees to it, 1 year from now the bill would become law anyway, and we could have a look at it, and have the Treasury make recommendations prior to the time it would go into effect.

Mr. GORE. Mr. President, the distinguished Senator from Nebraska advances the unusual logic that because we extended an undeserved benefit yesterday, we should also do so today.

I ask for a rollcall.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from California (Mr. CRANSTON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) and the Senator from Oklahoma (Mr. HARRIS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Colorado (Mr. DOMINICK), the Senator from Maryland (Mr. MATHIAS), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Illinois (Mr. SMITH) would each vote "yea."

The result was announced—yeas 52, nays 32, as follows:

[No. 214 Leg.]

YEAS—52

So Mr. HRUSKA's amendment was agreed to.

Mr. HRUSKA. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. Mr. President, I move to lay that motion on the table.

Mr. CURTIS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Iowa has the floor.

Mr. MILLER. Mr. President, I ask unanimous consent that I may yield to the Senator from New York without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New York is recognized.

Mr. JAVITS. Mr. President, I shall be very brief. I have amendment No. 309 which calls for certain types of information to be included in the Secretary of the Treasury's annual report.

Mr. President, I ask unanimous consent that the text of amendment No. 309 be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

The following new section is to be added at the end of the bill:

"SEC.—. INFORMATION TO BE INCLUDED IN SECRETARY'S ANNUAL REPORT.

"(a) REVENUE LOSSES.—The Secretary of the Treasury shall include in his annual report to the Congress estimates of the losses in revenues for the fiscal year for which such report is submitted which result under the provisions of subtitle A of the Internal Revenue Code of 1954 and other laws of the United States from—

"(1) the exclusion of items of income for purposes of the taxes imposed by such subtitle,

"(2) the deductions allowed under such subtitle.

"(3) the deferral of the imposition of the taxes imposed by such subtitle, and

"(4) such other special tax provisions in such subtitle or in other laws of the United States as the Secretary considers appropriate to carry out the purposes of this subsection."

The Secretary shall include in such report only those revenue losses which in his judgment are significant and can be ascertained with reasonable accuracy.

"(b) TAX EXPENDITURES.—The Secretary of the Treasury shall include in his annual report to the Congress estimates of the indirect expenditures made and to be made by the Government through the application and operation of the Federal income tax laws for the fiscal year for which such report is submitted and for the succeeding two fiscal years. Such indirect expenditures shall be related, insofar as possible, to budget outlays as set forth in the Budget of the United States Government for the same fiscal year for which such report is submitted. Such indirect expenditures shall be based on the revenue losses described in subsection (a), but, for purposes of this subsection, such losses may be qualified in such manner as the Secretary considers appropriate to carry out the purposes of this subsection."

Mr. JAVITS. Mr. President, this very information I asked for was included in the 1968 annual report of the Secretary of the Treasury. What it deals with is the amount which the various tax preferences, and so forth, really cost us.

This is a very important question which has arisen time and time again in the debate.

I would like to ask the manager of the bill a question. It is my understanding that the Secretary is now committed to include the same information in all future reports.

If that is the understanding of the manager of the bill as well, there is no need for pursuing amendment No. 309.

Mr. LONG. Mr. President, I believe that to be the case. And I think it is a good idea.

Mr. JAVITS. Mr. President, I thank the Senator very much.

The PRESIDING OFFICER. The Senator from Iowa has the floor.

Mr. MILLER. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The question now recurs on the amendment of the Senator from Iowa.

UNANIMOUS-CONSENT AGREEMENT

Mr. MILLER. Mr. President, I am perfectly agreeable to entering into a time limitation if the manager of the bill would like to do so.

Mr. LONG. Mr. President, I ask unanimous consent that further debate on the pending amendment be limited to 20 minutes, the time to be equally divided between the Senator from Iowa and a Senator in opposition to be designated.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MILLER. Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 4 minutes.

Mr. MILLER. Mr. President, the reason for laying the amendment temporarily aside was to enable the representatives of the Treasury staff to do some work on analyzing some further implications in the amendment. I am pleased to tell my colleagues that the Treasury representatives believe that my amendment is a better approach than the one in the bill. Additionally, it will bring in $740 million of revenue as against $700 million under the bill.

The Senator from Massachusetts asked for the impact of this amendment on corporations and individuals. I am advised that the estimate is that this amendment would bring in $400 million more revenue from corporations and $340 million more from individuals—in just about the same proportion as the pending bill would affect corporations and individuals.

Mr. President, I think the proposition before the Senate is very simple. Are we going to be satisfied with the application of the pending bill to those taxpayers who are paying no tax, for example, by taxing them only 5 percent on their tax

preferences, or do we want to do a better job, a more equitable job?

My amendment will tax them to the extent of 10 percent.

On the other hand, it seems that it is inequitable to take those taxpayers who are already paying a large amount of tax in relation to their tax preferences and just add another 5 percent on top of it. I propose to allow them to deduct their taxes against their tax preferences and on the balance apply a 10-percent rate.

As I explained earlier, the higher taxes are in relation to tax preferences, the greater the benefits under my amendment. The lower the taxes in relation to the tax preferences, the harsher my amendment is.

I suggest to my colleagues that what we are trying to do is to get at the real abuses. The most glaring example is that of a large corporation that pays no taxes because of its tax preferences. Under my amendment, they would be taxed 10 percent. Under the pending bill, they would be taxed only 5 percent, and I suggest that that is not adequate.

I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. CHURCH in the chair). Who yields time?

Mr. KENNEDY. I yield myself 4 minutes.

Mr. President, the difference between the revenues which would be achieved by the amendment of the Senator from Iowa and the committee amendment are virtually the same.

It has been estimated that the committee's 5-percent minimum tax would raise $700 million and that the amendment of the Senator from Iowa would raise $740 million. The figures are virtually the same, within about 5 percent. The real question is, How are we going to approach the question of tax-free income?

Let us take, for example, an individual with $100,000 in taxes and another $100,000 in tax-free income. Under the Miller amendment, he would subtract his $100,000 in taxes from the $100,000 in tax preference income, and he would have a zero base for the minimum tax.

When we apply the Miller amendment's tax rate of 10 percent to that zero base, we still get zero. So no minimum tax would be paid at all for this individual under the Miller amendment. Under the committee bill, however, he would pay a minimum tax of $5,000. Under the present Finance Committee bill, if he has $100,000 of taxable and has $100,000 in preferences, he will know that he must pay a minimum tax.

In fact, before the Miller amendment becomes more effective than the committee bill in taxing what is now tax-free income, the individual must have twice as much tax preference income as the tax he owes to the Federal Government. Only at this level and above does the Miller amendment place a more effective minimum tax on an individual than the present Finance Committee approach.

In other words, the committee recognizes what I think is a very sound principle, and that is the following: Regardless of a person's taxable income, he will always pay 5 percent on his tax loopholes. Of course, I would have liked to see a progressive rate used in calculating the minimum tax. But that proposal was defeated in the Senate last Saturday afternoon. Given this history, I think it would be better to provide an across-the-board 5-percent rate, as the committee provision does. If we adopt the Miller amendment, we will be granting an open invitation to high-salaried corporate executives to pyramid their tax preferences right up to their high tax level. The committee bill is open to no such abuse.

Mr. President, time and time again we have seen instances in which the Finance Committee or the Senate has calculated a meritorious formula, only to have the formula recalculated by those who are in the higher income brackets, in order to take advantage of tax loopholes.

I believe that the minimum tax devised by the Finance Committee, which provides an across-the-board 5-percent tax, is really a more sound, fair, and equitable way to reach the problem of tax shelters than the amendment of the Senator from Iowa.

Mr. MILLER. Mr. President, in response to the Senator from Massachusetts, I say that I think he has fairly put the case. It is true that, unless the tax preferences are much greater than the taxes, they are not going to be hit with higher taxes under my approach. But when I hit them, I hit them twice as hard as the committee bill does, and I suggest that that is the area we should hit harder.

This is another reason why I think the suggestion of the Senator from Massachusetts may not be as well taken as it sounds. I know it is sincere. The Finance Committee already has attacked frontally some of these preferences. For example, the preference of depletion. We have attacked that frontally. Also, the preference of accelerated depreciation. We have attacked that frontally. We have tightened up on it. We have provided for tighter recapture rules to cut down on the opportunities for capital gains. We have tightened up on capital gains by increasing the rates. We have tightened up on amortization, and I suggest that already we have achieved, by a frontal attack in the main bill, the very objectives that the Senator from Massachusetts is suggesting should be achieved.

So, I think that if we have the blend of what we have already done frontally in the committee bill with respect to tax preferences, and then we add the minimum tax of 10 percent, which I suggest, we will have a reasonably balanced package.

I want to make it clear that I do not claim that this is a perfect amendment, and I do not think anybody claims that the pending bill is perfect as to the minimum tax. What I want to see happen is for this proposal to go to conference, where, if perfections can be made, they will be made.

I have three objectives in mind by this amendment: No. 1, to do more equity; and I suggest that taxing at the rate of 5 percent of their tax preferences people who are paying no tax is not doing equity; 10 percent certainly is better. No. 2, I want to see the revenue protected, and this protects the revenue, indeed it adds $40 million. No. 3, I would like to see an alternative type approach brought to the conference, so that the conferees will have a broader opportunity to do a better job.

Mr. KENNEDY. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 minutes.

Mr. KENNEDY. Mr. President, in order for the Miller amendment to improve on the committee bill, an individual's tax preference income must be double the taxes he would pay. Only after his tax shelters reach twice his taxes would the Miller amendment provide additional resources to the Treasury. Only at this point does the Miller amendment offer any advantage whatever over the committee. Meanwhile, it places no minimum tax at all on those who are high-bracket taxpayers and who are enjoying large amounts of tax-free incomes.

Mr. President, ideally I would prefer to have Senator MILLER accept a modification of his amendment, so that an individual would have to pay whichever minimum tax is higher—the Miller version or the committee version. But the hour is late, and I do not wish to subject the matter to a vote. In the circumstances, if we must choose one or the other, I believe that the committee version of the minimum tax is the best approach, and I hope the Miller amendment is rejected.

Mr. MILLER. Mr. President, what is the remaining time on both sides?

The PRESIDING OFFICER. The Senator from Iowa has 4 minutes remaining.

Mr. MILLER. And how much time is remaining to the other side, Mr. President?

The PRESIDING OFFICER. The other side has 5 minutes remaining.

Mr. MILLER. Mr. President, if the Senator from Massachusetts is ready to yield back his time, I am ready to yield back my time.

Mr. BAYH. Mr. President, will the Senator from Iowa yield for a brief question?

Mr. MILLER. Yes, indeed.

Mr. BAYH. Would it be agreeable to the Senator to have a combination of his amendment and the committee amendment and then to say that the high-income taxpayer would pay whichever is greater. The result of this compromise, as the Senator knows, would be to include in the bill the best of the committee version and the best of the Senator's ingenious formula. The revenue produced would be greater than for either formula individually.

Mr. MILLER. I have discussed this with the Senator from Massachusetts. I want to be perfectly fair about it. There is some merit to the Senator's suggestion. However, what bothers me is that we have already had frontal attacks on these tax preferences and we should have an analysis by the Treasury Department as to what this would do.

I understand from the manager of the bill that this can be considered in conference. It would give them a chance to work it out. I do not know how this would apply in view of the frontal attack we have already made.

Mr. LONG. Mr. President, I do not know of anybody who would be adversely affected by the amendment, but who-

ever is adversely affected should be adversely affected because that person must be making a lot of money and have a lot of tax preferences but must be paying very little in taxes. The Senator's amendment would keep us from further increasing taxes on people who are already paying the lowest amount in taxes; and it would raise more money than we have in the committee bill. In this bill we are hitting capital gains four different ways. The House hit capital gains six different ways. The oil industry is being hit nine different ways. The real estate industry is being hit no telling how many ways. I have lost count. With all the different ways we are hitting those interests, it is enough to hit them one more way rather than two.

The Senator's amendment proceeds on the principle that if one is already paying a lot of taxes, the minimum tax will not be an additional burden, but if he is not paying much in the way of taxes he will pay twice as much minimum tax. I think it is a good amendment and I would be willing to vote for it. However, if it is going to be a proposition of "heads you win and tails I lose," I would vote against it.

Mr. MILLER. Mr. President, I agree with the Senator. We have frontally attacked these preferences. I would like to see this bill do more equity than it is doing now. I do not think anybody in the Senate could be proud of going before the American people and saying, "The best we could do with people not paying taxes is to nip them 5 percent."

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. MILLER. I think we could hold our heads higher if we set it at 10 percent.

Mr. KENNEDY. We had a chance to do that last Saturday, and I wish the Senator had been willing to provide progressive rates up to 15 percent for the minimum tax. I am glad the Senator is so concerned about the 5-percent figure. I wish the Senator had been as forceful in his support of the progressive tax.

Mr. MILLER. The Senator was aware of what was going on. What the Senator from Massachusetts would have done would have been to heap 15 percent on top of the tax being paid by people who were paying a lot of taxes already.

The PRESIDING OFFICER. The time of the Senator from Iowa has expired.

SEVERAL SENATORS. Vote! Vote! Vote!

The PRESIDING OFFICER. Who yields time?

Mr. HARTKE. Mr. President, will the Senator from Massachusetts yield to me for a question?

Mr. KENNEDY. Mr. President, I am prepared to vote.

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. KENNEDY. Mr. President, I yield for a question.

Mr. HARTKE. Mr. President, I wish to ask the distinguished Senator from Massachusetts whether or not he would be willing to accept an amendment of the principle of the Senator from Iowa by reducing the amount of taxes by 50 percent. This would increase the revenue to $990 million. It would provide the same basic principle of a 10-percent tax, but reduce the amount of offset, instead of by the 100 percent suggested by the Senator from Iowa, by 50 percent.

Mr. KENNEDY. That question should be addressed to the Senator from Iowa. That kind of adjustment would make the Senator's amendment a great deal more desirable and more fair. However, once again we are getting into a field where the Treasury Department does not have the figures and it is difficult to predict. I think that the question should be addressed to the Senator from Iowa.

If the Senator from Iowa desires, I would be glad to yield him a minute to respond to the question.

The PRESIDING OFFICER. Does the Senator from Iowa desire to respond in the minute which has been offered to him?

Mr. MILLER. Mr. President, I thank the distinguished Senator from Massachusetts.

With all deference to the suggestion of the distinguished Senator from Indiana, I do think that the idea that the Senator from Massachusetts had of an alternate—either taking the 5 percent or my 10 percent, whichever is higher, has a lot more logic behind it than to just take a fraction of the tax, whether it is one-fourth or one-half. There is merit in the suggestion, but let us go out of here with a measure that can go to conference, something that is open to what the Senator from Indiana has suggested and what the Senator from Massachusetts has suggested; but at least we will have said that anyone who pays no tax is not going to get off the hook for 5 percent; he will have to pay 10 percent at least. With that, I think we will have taken a big step in the right direction.

Mr. KENNEDY. Mr. President, I yield back whatever time I have remaining.

Mr. HARTKE. Mr. President, I send to the desk an amendment and ask that it be stated. I understand the ruling is that no debate is allowed but we can ask for the yeas and nays.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana (Mr. HARTKE) proposes an amendment to the amendment proposed by Mr. MILLER, as follows:

In the proposed subsection (G)(2) strike out "the taxes imposed by this chapter." and insert in lieu thereof "one-half of the amount of the taxes imposed by this chapter."

After the word "reduction" insert "one-half".

Mr. BAYH. Mr. President, a point of order. Perhaps a parliamentary inquiry would be best.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. Mr. President, it seems to me that since we have had two different rulings by the Chair, the present Presiding Officer is in a position to decide if we can accept an amendment to the tax bill without one word of debate.

Is it possible for us to have some debate to find out what is in the amendment? I believe that if we had that opportunity, the Senate would agree to the Hartke amendment.

The PRESIDING OFFICER. First, does the Senator from Indiana offer his amendment as an amendment to the amendment offered by the Senator from Iowa?

Mr. HARTKE. That is correct.

The PRESIDING OFFICER. In accordance with the ruling of the Chair, which was sustained by the Senate this afternoon, the Chair must rule that although an amendment offered by the Senator from Indiana (Mr. HARTKE) is in order, no further debate is in order and the Senate will proceed to vote on the amendment offered by the Senator from Indiana.

Mr. HARTKE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Indiana will state it.

Mr. HARTKE. If unanimous consent is granted then debate could be had, is that correct?

The PRESIDING OFFICER. The Chair would advise the Senator from Indiana that if unanimous consent is granted, almost anything can be done.

Mr. HARTKE. Mr. President, I ask unanimous consent.

Mr. EASTLAND. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HARTKE. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Indiana (Mr. HARTKE).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll and Mr. AIKEN voted in the negative.

Mr. LONG. Mr. President, I move to table the Hartke amendment.

The PRESIDING OFFICER. The Chair would advise the Senator from Louisiana that the vote is now in progress. The Chair announced the beginning of the rollcall and since a rollcall vote is in progress, the request of the Senator from Louisiana is out of order.

The clerk will continue the call of the roll.

The bill clerk resumed and concluded the call of the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from California (Mr. CRANSTON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

On this vote, the Senator from Oklahoma (Mr. HARRIS) is paired with the Senator from Rhode Island (Mr. PASTORE).

If present and voting, the Senator from Oklahoma would vote "yea" and the Senator from Rhode Island would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is necessarily absent.

The Senator from Colorado (Mr. DOMINICK), the Senator from Maryland (Mr. MATHIAS), the Senator from Pennsylvania Mr. SCOTT), and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), the Senator from Vermont (Mr. PROUTY) and the Senator from Illinois (Mr. SMITH) would each vote "nay."

The result was announced—yeas 31, nays 52, as follows:

[No. 215 Leg.]

YEAS—31

| | | |
|---|---|---|
| Bayh | Hollings | Moss |
| Burdick | Hughes | Muskie |
| Cannon | Inouye | Nelson |
| Church | Jackson | Pell |
| Dodd | Kennedy | Proxmire |
| Eagleton | Magnuson | Randolph |
| Goodell | McGee | Spong |
| Gore | McGovern | Williams, N.J. |
| Gravel | McIntyre | Yarborough |
| Hart | Mondale | |
| Hartke | Montoya | |

NAYS—52

| | | |
|---|---|---|
| Aiken | Ellender | Murphy |
| Allen | Ervin | Packwood |
| Allott | Fannin | Pearson |
| Baker | Fong | Percy |
| Bellmon | Griffin | Ribicoff |
| Bennett | Gurney | Saxbe |
| Bible | Hansen | Schweiker |
| Boggs | Hatfield | Smith, Maine |
| Brooke | Holland | Sparkman |
| Byrd, Va. | Hruska | Stennis |
| Byrd, W. Va. | Javits | Stevens |
| Case | Jordan, N.C. | Talmadge |
| Cook | Jordan, Idaho | Thurmond |
| Cooper | Long | Tower |
| Cotton | Mansfield | Williams, Del. |
| Curtis | McClellan | Young, N. Dak. |
| Dole | Metcalf | |
| Eastland | Miller | |

NOT VOTING—17

| | | |
|---|---|---|
| Anderson | Mathias | Scott |
| Cranston | McCarthy | Smith, Ill. |
| Dominick | Mundt | Symington |
| Fulbright | Pastore | Tydings |
| Goldwater | Prouty | Young, Ohio |
| Harris | Russell | |

So Mr. HARTKE's amendment was rejected.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Iowa (Mr. MILLER). All time on the amendment has expired. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), The Senator from Michigan (Mr. HART), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. HARRIS) and the Senator from Rhode Island (Mr. PASTORE) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is necessarily absent.

The Senator from Colorado (Mr. DOMINICK), the Senator from Maryland (Mr. MATHIAS), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), the Senator from Vermont (Mr. PROUTY), and the Senator from Illinois (Mr. SMITH) would each vote "yea."

The result was announced—yeas 72, nays 11, as follows:

[No. 216 Leg.]

YEAS—72

| | | |
|---|---|---|
| Aiken | Ervin | Miller |
| Allen | Fannin | Montoya |
| Allott | Goodell | Murphy |
| Baker | Gravel | Nelson |
| Bayh | Griffin | Packwood |
| Bellmon | Gurney | Pearson |
| Bennett | Hansen | Pell |
| Bible | Hartke | Percy |
| Boggs | Hatfield | Proxmire |
| Brooke | Holland | Randolph |
| Burdick | Hollings | Ribicoff |
| Byrd, Va. | Hruska | Saxbe |
| Byrd, W. Va. | Hughes | Schweiker |
| Cannon | Inouye | Smith, Maine |
| Case | Jackson | Sparkman |
| Church | Javits | Spong |
| Cook | Jordan, N.C. | Stevens |
| Cooper | Jordan, Idaho | Talmadge |
| Cotton | Long | Thurmond |
| Curtis | Magnuson | Tower |

NAYS—11

| | | |
|---|---|---|
| Cranston | Kennedy | Moss |
| Eagleton | McGovern | Muskie |
| Fong | Metcalf | Stennis |
| Gore | Mondale | |

NOT VOTING—17

| | | |
|---|---|---|
| Anderson | Mathias | Scott |
| Dominick | McCarthy | Smith, Ill. |
| Fulbright | Mundt | Symington |
| Goldwater | Pastore | Tydings |
| Harris | Prouty | Young, Ohio |
| Hart | Russell | |

So Mr. MILLER's amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

AMENDMENT NO. 358

Mr. SPARKMAN. Mr. President, I call up my amendment, No. 358, offered in behalf of myself, the Senator from Tennessee (Mr. BAKER) and my colleague from Alabama (Mr. ALLEN), and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk proceeded to read the amendment.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that further reading of the amendment be waived.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senate will be in order.

Mr. SPARKMAN's amendment (No. 358) is as follows:

SEC. —. (a) Section 3(a) of the Securities Act of 1933 (15 U.S.C. 77c) (relating to exempted securities) is amended by adding at the end of paragraph (2) the following: "or any security consisting of an obligation evidenced by any bond, note, debenture, or other evidence of indebtedness issued by the United States or any territory thereof, or by the District of Columbia, or by any State of the United States, or by any political subdivision of a State or territory, or by any public instrumentality of one or more States or territories, which is payable from payments to be made in respect of property or money which is or will be used, under a lease, sale, or loan arrangement, by or for industrial or commercial enterprise, if under section 103(c) of the Internal Revenue Code of 1954 (exclusive of section 103(c)(7) thereof) gross income does not include interest on such bond, note, debenture, or other evidence of indebtedness;".

(b) Section 3(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78c) (relating to exempted securities) is amended by inserting after "any municipal corporate instrumentality of one or more States;" in paragraph (12) the following: "or any security consisting of an obligation evidenced by any bond, note, debenture, or other evidence of indebtedness issued by any one of the foregoing governmental units which is payable from payments to be made in respect of property or money which is or will be used, under a lease, sale, or loan arrangement, by or for industrial or commercial enterprise, if under section 103 of the Internal Revenue Code of 1954 (exclusive of section 103(c)(7) thereof) gross income does not include interest on such bond, note, debenture, or other evidence of indebtedness;".

(c) The amendments made by this section shall apply with respect to securities consisting of obligations evidenced by any bonds, notes, debentures, or other evidences of indebtedness sold after January 31, 1968.

Mr. SPARKMAN. Mr. President, this is a very simple amendment. I have talked with the manager of the bill and with the senior Republican member of the committee, the Senator from Delaware (Mr. WILLIAMS), and I believe they are willing to accept the amendment.

The situation is simply this: A year or so ago, the Congress passed a bill that exempted from taxation industrial development bonds in amounts not to exceed $1 million.

Mr. CURTIS. Was it not $5 million?

Mr. SPARKMAN. It was first proposed to be $5 million, but the amount of $1 million was finally agreed upon.

Later, the Securities and Exchange Commission, by administrative action, instituted a regulation requiring these development corporations to register with the Securities and Exchange Commission. That never was the intent of the legislation at all; and it is a very expensive, long-drawnout operation. It costs, I would estimate, between $50,000 and $75,000.

That means that the little industrial development programs that we intended to help are simply denied the benefit.

Mr. LONG. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. LONG. What the Securities and Exchange Commission has done is to increase by about $75,000 per bond issue the cost of issuing less than $1 million worth of bonds to help finance some local type of industrial development.

As I understand it, the amendment would cost the Federal Government nothing.

Mr. SPARKMAN. Nothing.

Mr. LONG. The amendment just takes a burden off the communities and State governments which need not exist; and, if anything, it would tend to save the Government money, rather than cost the Government anything. It is just an un-

necessary burden on a function of government. There is no revenue loss at all, and, if anything, as I say, it would save money.

Mr. SPARKMAN. The Senator is exactly right, and the provision was not in the law itself.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

Mr. BAKER. I rise to support the amendment of the distinguished Senator from Alabama.

Mr. President, on May 27 of this year I introduced an amendment to the Internal Revenue Code pertaining to the income tax treatment of interest on industrial development bonds. A section of this bill provided for a requirement of registration of State and local securities with the Securities and Exchange Commission only in such instances as the obligations are defined as industrial development bonds and taxable under the Internal Revenue Code. The amendment offered by this distinguished senior Senator from Alabama (Mr. SPARKMAN), which I am cosponsoring, is identical to the language of the section in my earlier bill.

As Senator SPARKMAN points out, the Senate in 1968 curtailed large industrial development bond issues and firmly fixed a tax-exempt ceiling of $1 million or, under special circumstances, $5 million for any one company in any one county. The intent of the Congress was to permit these smaller issues to continue to be considered on the same basis as ordinary municipal bonds. Unfortunately, however, on January 31, 1968, the Securities and Exchange Commission established a registration requirement which effectively emasculated the decision by the Congress on these small issues by requiring that the small issues be registered in accordance with SEC regulations. This emasculation results from the substantial cost involved in complying with SEC regulations which range from a low of $50,000 to a high of $75,000 in legal, auditing, and printing costs and also means a delay of issuance of 4 to 6 months. It is this cost and delay that effectively prohibits the use of small issues.

The Commission took this action even though the Securities Act of 1933 and the Securities Exchange Act of 1934 specify that obligations of State governments and their local entities are exempt from registration and even though the Congress continued the tax exemption for small issues. The amendment offered today provides that those obligations that are taxable under the Internal Revenue Code be registered with the Securities and Exchange Commission while those obligations that the Congress has specified are not taxable under the Code would not have to be registered.

I urge the adoption of the amendment to fulfill the original intent of Congress and to relieve an unwarranted and costly restriction that the Commission has imposed on State and local governments.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama.

The amendment was agreed to.

AMENDMENT NO. 416

Mr. DOLE. Mr. President, I call up my amendment No. 416, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The BILL CLERK. The Senator from Kansas (Mr. DOLE) proposes amendment No. 416, as follows:

At the proper place insert the following new section:

"SEC. —. POLITICAL ACTIVITIES OF LABOR ORGANIZATIONS.

"(a) IN GENERAL.—Section 501(c) (relating to list of exempt organizations) is amended by striking out paragraph (5) and inserting in lieu thereof the following:

"'(5) Labor organizations which do not participate in, or intervene in (including the publishing or distributing of statements), any political campaign on behalf of any candidate for public office, and agricultural or horticultural organizations.'

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after the date of the enactment of this Act."

Mr. LONG. Mr. President, will the Senator from Kansas agree to a time limitation? How much time does the Senator require?

Mr. DOLE. I think 10 minutes on a side.

Mr. JAVITS. Mr. President, will the Senator from Louisiana yield, before he makes his unanimous-consent request?

Mr. LONG. I yield.

Mr. JAVITS. I hope my colleagues understand that in my judgment—I have read the amendment, and have remained here tonight to try to do something about it—it essentially reargues the case which we debated at considerable length respecting alleged union political activities.

I think personally that notwithstanding the lateness of the hour, none of us individually is keeping the Senate in session; it is the majority's decision. That does not mean that these things have to be pushed off as if they were unimportant. They can be very important.

Therefore, I would most respectfully suggest that there be a time limitation of at least a half hour on a side, so that if Senators want to be heard or say something about it, they will not be suddenly snuffed out.

Mr. LONG. Mr. President, I ask unanimous consent that there be a time limitation of one-half hour on each side.

Mr. MANSFIELD. Mr. President, reserving the right to object—and I shall not object—I think the issue is very plain. There has been an amendment somewhat similar to this, and I hope, in the interests of the Senate as a whole, we will not use up all that time.

The PRESIDING OFFICER. Is there objection?

Mr. FANNIN. Mr. President, reserving the right to object, this amendment does not pertain to voter registration. Most of the debate when I offered a similar amendment a few days ago was on voter registration. So this is a different amendment, and I trust that it will be given consideration as such.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none, and it is so ordered.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. LONG. Mr. President, I hope we will not use all the time on this amendment. Although I think the amendment contains merit and will muster a substantial vote, I do not think it will carry, and it is almost the same thing that the Senate spent about 4 hours debating the other day.

In the Committee on Finance, when we considered the Fannin amendment on the same point—it might not have been as well drafted, but it was basically the same amendment—the chairman said to the members of the committee, "I think everybody knows how he wants to vote. We are either in favor of it or against it. All in favor say aye, all opposed say nay." We disposed of it in 60 seconds, although it took 4 hours on the Senate floor yesterday.

So I hope the Senators will keep in mind that yesterday we have had a vote on this type of amendment, to see what the general philosophy of the Senate was. We determined that, and I hope we will not debate this issue further. We will just arrive at the same conclusion on it. I have no doubt the vote will go basically the same way.

The PRESIDING OFFICER. The Senate is now proceeding under a unanimous-consent agreement giving 30 minutes for debate to each side. The Chair recognizes the Senator from Kansas. How much time does he yield himself?

Mr. DOLE. Mr. President, I yield myself 5 minutes.

I certainly concur in the general statement made by the Senator from Louisiana. I think we all recognize the basic thrust of the amendment, but I would point out that when we discussed at some length yesterday the Fannin amendment, there was much discussion about the fact that it contained a provision prohibiting voter registration.

And this amendment does not do that. And this is the basic difference. Let me point out that the Fannin amendment applied to all section 501(c) organizations. The Dole amendment, amendment No. 416, treats unions the same as section 501(c)(3) or organizations, such as the United Givers Fund, Easter Seals, and so forth.

It would place labor organizations in the same position as corporations for profit in that all such activities would be taken out of aftertax dollars. Our amendment would assure that political activities of unions would use aftertax dollars. To recap what happened yesterday in the debate, the Fannin amendment denied the use of tax-exempt money for, first of all, support of candidates and, second, support of parties, and the most controversial section was with reference to voter registration drives.

My amendment uses the same language contained in section 501(c)(3) but only insofar as it would deny tax-exempt status for labor organizations supporting candidates in political campaigns.

My amendment would not prohibit unions from carrying on propaganda. It would not prohibit lobbying or voter registration drives, but it would deny tax-exempt status to unions which partici-

pated in or conducted any political campaign on behalf of any candidate.

Mr. President, I recognize the lateness of the hour. And I certainly recognize that the issue is very simple. It is whether labor unions should be using tax-exempt dollars to engage in political campaigns to influence the election of any candidate for public office.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. TOWER. Mr. President, this would not make it impossible for organizations like the League of Women Voters or the Jaycees, or any of these other organizations to engage in voter registration drives. They would be exempt from the provisions of the amendment?

Mr. DOLE. That is the intent of the amendment, yes. No section 501(c) organization would be prohibited from conducting voter registration drives by my amendment.

Mr. HATFIELD. Mr. President, would the amendment put the labor organizations in the same category as the Grange, the Farmers' Bureau, and the Farmers' Union?

Mr. DOLE. It would not put them in the same position. However, I do not think they engage in political activity. I think they engage in lobbying efforts, but I do not know of any of them that have engaged in political activity.

Mr. HATFIELD. The Senator should come to Oregon.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. GRIFFIN. Mr. President, at first blush I thought the amendment was one that I could support. I supported the Fannin amendment. However, as I read and think about the amendment, I am concerned about a labor organization which uses not dollars—which I would object to for any political purpose—but COPE funds. Let us assume that they are collected voluntarily. What would be the impact or effect of the Senator's amendment?

Mr. DOLE. Mr. President, I do not think it would have any effect at all. We are talking about unions which use tax-exempt dollars.

Mr. GRIFFIN. Mr. President, I appreciate the Senator's answer. I am not quite sure that it is clear that that is the case as I read the amendment.

It seemed to me that a labor organization which under any circumstances intervened in a political campaign would be denied its tax-exempt status, whether it was using union dues or not. If that is what we want to do, I think we ought to be clear on it.

Mr. DOLE. Mr. President, the present section 501(c)(3) deals with corporations, and any community chest, fund, or foundation, organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals.

This says in part that they are tax exempt and the funds are tax exempt unless they "participate in or intervene in (including the publishing or distributing of statements), any political campaign on behalf of any candidate for public office."

In an effort to avoid controversy about voter registration or even about party, I incorporate in my amendment the same language just cited from section 501(c)(3).

It is my purpose to make it very clear that the conducting of voter registration drives does not infringe on the right of the League of Women Voters or the AFL–CIO, or COPE. It is intended to keep labor unions from engaging in any election campaigns for public office with tax-exempt funds.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOLE. Mr. President, I reserve the remainder of my time.

Mr. LONG. Mr. President, I yield 5 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 5 minutes.

Mr. MONDALE. Mr. President, this is the fourth of a series of amendments which have been presented designed to cripple the opportunity of organized labor to present their points of view in an effective way.

In a real sense, this goes further than any of the others, because the past three would not have prohibited the use of voluntarily contributed money, usually known as COPE funds, as well as union treasury funds.

Treasury funds cannot be used anyhow. It is prohibited by Federal law.

This would deny tax exemption to any union which used money that was contributed voluntarily, with the specific consent of an individual union member, for political purposes.

I think this goes further than any other amendment that has been presented to cripple and paralyze labor unions.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. AIKEN. Mr. President, does the Senator think that would include REA cooperatives, as well?

Mr. MONDALE. Mr. President, the amendment is unique in another respect. I would say to the Senator from Vermont that some of the three preceding amendments at least presented the appearance of applying to tax-exempt associations generally. This does not. The facade is dropped, and they apply a belly punch to the labor organization.

It does not apply to the chamber of commerce or to the American Medical Association, or to the National Association of Manufacturers, or to the National Right To Work Committee or to any of the other tax-exempt organizations, but only to organized labor.

It reaches beyond treasury funds of the union to prohibit the use of voluntary funds as well. This goes further than any of the others.

It does not affect corporate officers' giving whatsoever, even though every report shows that more outside funds from that source find their way into campaigns than money from any other source. However, not a word is included in the amendment about that.

These amendments are not offered on behalf of officers who are required to be elected by democratic processes and work in plants of the union.

These amendments are designed to intimidate and to destroy the capacity of an association of people, joining together in a union, to have any influence in the political sector whatever.

It assumes that labor leaders, the stewards at regular annual meeting, and all the rest, in no way accurately reflect the will of the people working in factories in this country.

These amendments come from sources such as the National Right To Work Committee and the chamber of commerce and the antilabor groups which want to shackle the vibrant source of labor strength in this country.

Mr. President, I hope the amendment will be rejected.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. YARBOROUGH. Mr. President, I ask the Senator from Minnesota, looking at lines 6 through 9, where it reads, "Labor organizations which do not participate in, or intervene in—including the publishing or distributing of statements—any political campaign on behalf of any candidate" whether that wording includes the publishing of statements, including the publishing of the organization's own paper that goes to its members?

Mr. MONDALE. I would also take this to mean that if a labor union, in its regular newspaper, wrote an editorial in support of a candidate, it would lose its tax exemption and would have to pay corporate tax rates on all the dues and assets of that organization.

Mr. YARBOROUGH. That is only if they limited this to the newspaper.

Mr. MONDALE. The Senator is correct.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. Mr. President, will the Senator yield me 5 minutes?

Mr. LONG. I yield 5 minutes to the Senator from New York.

Mr. JAVITS. Mr. President, I requested more time than we obviously will need to deal with this amendment. The Senator from Kansas (Mr. DOLE), commendably, has made his statement brief, and so has the Senator from Minnesota (Mr. MONDALE), and I will be brief, also.

The only point that has not been made is that every illegitimate union activity which Senator DOLE says he believes his amendment reaches is dealt with by the Corrupt Practices Act. Beyond that, if he goes beyond that, and I think his amendment does, you are dealing with first amendment rights. Not even the right of a trade union to tell its own members what it thinks about anything or to write an editorial in its newspaper. Whether it is for or against any of us, we should be vigilant to protect those rights. Again, the penalty is much greater than any crime that is likely to be committed, because they lose their whole tax-exempt status. I cannot conceive of that.

In addition, this amendment is very vague, and I think courts would hold it is vague and indefinite. This is a penalty provision, let us remember. What is meant by the words "participate in" or,

what is even worse to my mind, "intervening"?

It seems to me that if you publish an article in which you say this union has or has not endorsed so and so, that is intervening in an election. So I do not think the amendment is saved for the fact that it is confined to candidates. The Corrupt Practices Act is confined to candidates in Federal elections.

What the appendage "an agricultural or horticultural organization" means, I do not know. It is apparently a tail which may be wagging this dog and may be insignificant; but it is there, and we have to take it for what it is, and it leaves us in considerable doubt and will worry any court. What does it mean in terms of "an agricultural or horticultural organization" in respect of participation in or intervening in any political campaign?

On those grounds, and because it seems to me the question was thoroughly debated and decidedly decided by the Senate, I hope very much that the amendment will be rejected.

The PRESIDING OFFICER. Who yields time?

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DOLE. I yield 5 minutes to the Senator from Arizona.

Mr. FANNIN. Mr. President, this matter was debated yesterday, but most of the time was devoted to a discussion of voter registration. It seems peculiar to me that these objections come up now.

One of the principal objectives of these amendments, and the objective in my amendment, are to bring about a better balance between labor and management. A drastic situation is facing this country. We are gradually seeing jobs moved out of our country, exported to other nations. And why? Because we do have this imbalance—the great power that labor unions possess.

We have talked about the Corrupt Practices Act. I covered that thoroughly in my statement earlier, and explained that the Corrupt Practices Act does not cover the abuses mentioned here.

If we look at it from the standpoint of what is best for this country and what will best bring about the conditions we all desire we will try to put both unions and managment on an equal footing. We all must realize that the unions do have special statutory privileges today, and this has been brought out by the distinguished Senator from Kansas. He is just attempting to bring about a correction to this problem.

Let me stress again what is happening. Companies are moving into neighboring countries. We have seen them move across the waters, placing plants in other nations, rather than in this country. Why? Not only because of the wage rates. Surely, that is a very important matter—but also because of the factor of productivity and the ability of the mangement of these companies to work with their employees. This is a most important matter.

I feel that if we correct these imbalances, and eliminate some of the undue power of the union officials and their vast treasury, we will be doing a great benefit to all the people of our Nation. Consider that over a billion dollars in dues is collected each year by unions. Without political activities that could possibly be cut in half.

I know that all that amount is not contributed to political candidates. But, knowing how unions operate, I submit that a vast amount of money is lost to the union worker. In most instances the union member is not voluntarily contributing his money. A union attorney appearing before the Supreme Court gave examples of what happened when he was questioned. He admitted that they could not voluntarily raise the amount of money they needed to carry on their work. Consequently, they did use dues money. That is a matter of record.

I know that the reports have been given to the House of Representatives. These disclosures indicate what has happened. Vast sums of money are utilized that are not given voluntarily.

I feel that by adopting this amendment the Senate will be doing a great service for the future of this Nation.

The PRESIDING OFFICER. Are there further requests for time?

Do Senators yield back their time?

Mr. LONG. I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Kansas. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS (when his name was called). Mr. President, on this vote I have a pair with the Senator from Arizona (Mr. GOLDWATER). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. HOLLAND (after having voted in the affirmative). Mr. President, on this issue I announce a pair with the senior Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "nay." I have already voted "yea." I withdraw my vote.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. HARRIS) and the Senator from Rhode Island (Mr. PASTORE) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is necessarily absent.

The Senator from Colorado (Mr. DOMINICK), the Senator from Maryland (Mr. MATHIAS), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Colorado (Mr. DOMINICK) and the Senator from Vermont (Mr. PROUTY) would each vote "nay."

The Senator from Alaska (Mr. STEVENS) has previously announced his pair with the Senator from Arizona (Mr. GOLDWATER).

The result was announced—yeas 10, nays 71, as follows:

[No. 217 Leg.]

| Goldwater | Pastore | Tydings |
| Harris | Prouty | Young, Ohio |
| Kennedy | Russell | |

So Mr. DOLE's amendment was rejected.

Mr. CURTIS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read the amendment as follows:

At the end of the bill insert the following new section:

"SEC. ——. POSTPONEMENT OF EFFECTIVE DATES OF CERTAIN PROVISIONS.

"Notwithstanding any other provision of this Act, the following amendments made by this Act shall be applicable only to taxable years beginning on and after the first day of January which falls within the first fiscal year following the date of the enactment of this Act for which it is estimated that there will be a surplus in the administrative budget of the United States Government:

"(1) The amendments made to sections 1 and 3 of the Internal Revenue Code of 1954 (relating to tax tables applicable to individuals).

"(2) The amendments raising the deduction for personal exemptions of individuals.

"(3) The amendment granting a credit against tax for certain expenses of higher education.

"(4) The amendment granting an increase in the amount deductible for medical expenses.

"(5) The amendment providing an exception to the repeal of the investments credit in the case of certain depressed areas.

"(6) The amendment granting an annual exception to the repeal of the investment credit for the first $20,000 of investments in section 38 property.

"The determination as to whether there is to be a surplus in the administration budget for a fiscal year ending after the date of the enactment of this Act shall be made by the Secretary of the Treasury and published in the Federal Register."

Mr. GRIFFIN. Mr. President, will the Senator from Nebraska yield to me briefly?

Mr. CURTIS. I yield.

Mr. GRIFFIN. Because a number of Senators have inquired of me, I should like to ask the distinguished majority leader what he thinks the prospects are for finishing the bill.

Mr. MANSFIELD. First, before responding to the question of the distinguished acting Republican leader, the amendment just read seems like a recommital before third reading. However, it is my understanding that this will be the last amendment——

Mr. CURTIS. This will be the last one for me.

Mr. MANSFIELD. Well, the Senator from Nebraska thinks it will not take very long.

Mr. CURTIS. No.

Mr. MANSFIELD. The Senator from Nebraska says he can finish up his amendment in 5 minutes. The Senator from Alabama says he can do better and finish up in less than a minute?

Mr. SPARKMAN. Two or 3 minutes. If I do not receive too much "fire" from other Senators.

Mr. MANSFIELD. Mr. President, barring unforeseen circumstances, it is our hope that we can reach third reading, and that will be the end of business for tonight.

It is my understanding that there may well be a motion to recommit the bill to come at some time on tomorrow, possibly in the late morning or early afternoon.

It is the intention of the joint leadership, if we do get to third reading tonight—and what a relief that will be—that on tomorrow we will take up, at 9 o'clock a.m., the conference reports on the legislative appropriation bill, and following that the District of Columbia appropriation bill; and then, at that time, hopefully, we can return to consideration of the tax bill on a post-third-reading basis.

Following disposition of the tax bill, it is the intention of the joint leadership to consider taking up various other measures, such as the foreign aid authorization bill, maybe the cigarette labeling bill, and other measures which have been enunciated before this time.

Thus, we will have a pretty busy week, but it will be a lot easier if we ever get third reading on this particular measure.

Mr. CURTIS. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. SPARKMAN. Mr. President, will the Senator from Nebraska yield to me briefly?

Mr. CURTIS. For a question, I yield.

Mr. SPARKMAN. I wish to ask a question of the distinguished majority leader. There are two very brief conference reports, one on housing and one on taxation of national banks by the States which were unanimously agreed to, and I think we can dispose of them right off, tomorrow.

Mr. MANSFIELD. Tomorrow morning, or tonight?

Mr. SPARKMAN. No, not tonight. The Senator from Utah (Mr. BENNETT) does not want it tonight.

Mr. TOWER. Mr. President, if the Senator will yield, speaking to the housing conference report, the minority is perfectly willing to take it up tomorrow. I cannot speak for the conference report on taxation.

Mr. SPARKMAN. The Senator from Utah (Mr. BENNETT) wanted that one held for tomorrow.

Mr. MANSFIELD. Very well.

Mr. SPARKMAN. He does not want to take up either one tonight.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska?

Mr. CURTIS. I thank the Chair. I can be very brief. The only argument I have to make is to tell Senators what the amendment contains.

It is my hope that there will not be a motion to table it. I think there is a basic policy involved and we are entitled to have a vote.

Mr. President, the amendment would provide that the major reduction of taxes in the bill shall not take effect until the budget is balanced and there is a surplus in the Treasury.

It calls upon the Secretary of the Treasury, at the first of the year, to estimate whether there will be a surplus at the end of the fiscal year and, if so, the reductions will go into effect.

Now, here are the reductions.

The reductions in rates, I realize, were knocked out by the Gore amendment, but they may be in conference. The Gore amendment raises the exemption, which is a laudable thing, and most of us favor it. But I am opposed to reducing taxes if we have to borrow the money and go into debt to do it.

The next reduction is the amendment granting credit for certain expenses of higher education. I think that is a good thing, but I am opposed to doing it with borrowed money. I am opposed to setting a tax reduction if we have to increase the national debt to do it.

The next one is the amendment granting an increase in deductible medical expenses. That affects only those in the higher income brackets. Eighty percent of people over 65 years of age do not file an income tax.

The next reduction is the amendment providing an exception to the repeal of the investment tax credit in certain depressed areas, a very desirable thing. But, to me, it is not desirable enough to go into debt to do it, to borrow the money to make such a reduction.

The last one is an amendment granting an annual exception to the repeal of the investment credit for the first $20,000 of investment.

Mr. President, this involves $5 billion in tax reductions. I do not strike any of it from the bill. All it does is provide that the effective date of the reductions shall be on January 1, when the Secretary of the Treasury can estimate that the budget will be balanced and there will be a surplus at the end of the fiscal year.

Mr. GORE. Mr. President, will the Senator from Nebraska yield?

Mr. CURTIS. I yield.

Mr. GORE. I hope the Senator will not press his amendment. It is now 9:30 o'clock and I have been to the desk to try to read the Senator's amendment but I cannot even find a copy. It has not been printed. The Senator proposes to open up the whole bill and yet we cannot even find a printed copy. Since it is now 9:30 o'clock in the evening, we should not pass it in just a few moments. I therefore suggest to the able chairman of the committee that if we are going to follow that procedure, let us adjourn until Monday next and start all over again.

Mr. CURTIS. Mr. President, this is not a technical amendment changing the bill. What the distinguished Senator says has no relevance at all.

Mr. GORE. How do I know it does or does not, because I cannot see a copy of the amendment.

Mr. CURTIS. It is merely an issue: Shall we borrow money to reduce taxes? Shall we vote $5 billion in tax reductions when, without it we will have a deficit next July?

Mr. PERCY. Mr. President, will the Senator from Nebraska yield?

Mr. CURTIS. I yield.

Mr. PERCY. Mr. President, I commend the Senator from Nebraska for introducing this amendment which will delay the effects of any amendment adopted by the Senate that causes a loss of revenue to the Federal Treasury until such time as the Federal budget is in surplus. I intend to support this amendment. If it is adopted, it will be the only basis upon which I can vote for this "so-called" tax reform bill.

Mr. President, I intend to vote "no" if the so-called Tax Reform Act of 1969 is presented to the Senate for final passage tomorrow in its present form as amended.

I know of few more urgent domestic needs before us than the reform of our tax code, the necessity to strike from our tax laws the many inequities and loopholes that now exist and to restore tax justice to our society.

In advancing that goal, I have sponsored and supported numerous reform proposals incorporated within the pending tax measure—proposals that would end tax avoidance by the wealthy, that would provide for low-income allowances for the poor and that would curb self-dealing by foundations while helping legitimate charitable institutions to pursue their urgent tasks.

Yet I can no longer regard the measure before us basically as a tax-reform bill. For it has been twisted on the Senate floor into an unwarranted, unjustified, dangerous and ill-timed tax cut that would only play a cruel trick on the very people it is supposed to relieve. For this reason, I cannot and will not vote for this bill.

As passed by the House, the Tax Reform Act of 1969 would lead to a long-term net revenue loss to the Treasury of $3.3 billion a year. The tax bill approved by the Senate Finance Committee, while differing from the House measure in several respects, would have a similar $3.3 billion impact on Treasury revenues.

The bill as altered by the Senate would more than triple this loss. Action on the Senate floor has now resulted in an additional revenue loss of more than $9,000,000,000 for 1970 over the Senate Finance Committee bill and a revenue loss of more than $11,250,000,000 in 1971. The immediate effect of these actions on our economy could surely be to induce an inflationary spiral without precedent in modern times. While all Americans would be injured by such an unchecked inflation, the blow would fall most heavily upon people with low wages, fixed incomes and limited means—the poor, the elderly, the retired pensioner.

In principle, some of the revisions that have been made to the bill—increased social security payments, higher personal exemptions—are legitimate and I would support them within a sound fiscal climate. But as inserted in this bill, the cumulative effect of these and other revenue losses strips the measure of its basic fiscal soundness and, most importantly, imperils its many needed tax reforms.

They would, of course, all go down the drain with a Presidential veto. And the President, having rightly warned of the dangers of such an inflationary approach, has clearly indicated that he cannot sign the Senate tax bill in its present form.

Not the least of my intentions in voting against this bill—should it nevertheless pass—is to add my weight to those who would have the Senate's conferees join those of the House in drafting a more responsible tax measure that would create greater tax justice for our people while preserving the integrity of the economy under which we live.

That is the kind of measure I had hoped the Senate would write.

That is the kind of measure I can support.

Mr. CURTIS. Mr. President, a vote on this amendment will in no sense prejudice the right of any Senator to make a motion to recommit tomorrow. I merely ask a vote on the policy issue: Shall we borrow money to reduce taxes, or shall we postpone the effective date until there is a surplus in the Treasury?

Mr. President, I am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

Mr. LONG. Mr. President, what the Senator has done here is to pick out the expensive items that were added to the bill on the Senate floor. Then he proposes that all those items should be postponed and not take effect until the Director of the Budget, or someone in the administration, the President, estimates that he is going to have a balanced administrative budget. That would not be next year, or anytime soon. Mind you, Mr. President, that is not a balance in the unified budget, which would be easier to achieve. The Senator is talking about a balance in the administrative budget.

The Senator is proposing that no part of the Gore amendment would go into effect next year—no part whatever. That means, having debated that matter for almost a week, he wants to reopen it tonight, at 9:32 p.m., when we are hoping to get to third reading.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. in just a moment. I know what is going to happen if we permit this amendment to go to a vote on its merits. Just for fear that it might carry, the Senator from Tennessee will move to strike the part that affects the Gore amendment. If I were the Senator from Tennessee, that is what I would do.

Then the Senator from Colorado or the Senator from Indiana will get up and move to strike out the part that affects his amendment. Then the Senator from Alaska will offer an amendment to strike out the part that affects the Stevens amendment.

I guess after a while the Senator from Louisiana will get up and move to strike the part that affects the Long amendment, the social security amendment.

We will be here all night long.

As the Senator from Tennessee has suggested, we might as well quit now, go home, get a good rest over the week-end, and then start on the bill all over again Monday—after 3 weeks of work.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. I yield for a question.

Mr. CURTIS. Social security is not involved. This amendment has been drawn with compassion. The low-income taxpayer is not touched at all. It is not complicated at all. It is merely a question of the effective date.

Mr. LONG. The Senator from Nebraska in effect is making a motion to recommit before the appropriate time for it to be made. That should be made after third reading. I reserve the right to vote for a motion to recommit, if a Senator wants to make one, after we have had a chance to look at it and see what the motion is.

Mr. CURTIS. That is not a correct statement. All I am doing is offering an amendment relating to the effective date. It is not a motion to recommit. It does not send the bill to committee. I hope the distinguished Senator——

The PRESIDING OFFICER. The Chair must insist on proceeding in the regular order. The Senator from Louisiana has the floor.

Mr. LONG. Put it any way one wants to, this proposal opens up the major provisions in the bill. Furthermore, this amendment is subject to amendment, so every Senator who is dissatisfied with what happened to some amendment of his is privileged to get up and move to amend this amendment and reopen the issue. So all these major issues that we have been debating for 3 weeks would be opened up to a vote again.

If this amendment is going to be insisted on, I will insist on a division and a vote on the Gore amendment, and then the Ribicoff amendment, and all the other amendments, if we can muster a quorum by that time.

The only thing I am interested in is getting on with our business, reserving to the Senator from Nebraska, or any other Senator, the right to move to recommit the bill with any instructions they suggest, if we ever get to a third reading.

On that basis, Mr. President, because this amendment reopens all of the amendments that are most controversial, except the social security amendment, I move to lay the amendment on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Nebraska.

Mr. CURTIS. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. HARRIS), and the Senator from Rhode Island (Mr. PASTORE) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is necessarily absent.

The Senator from Colorado (Mr. DOMINICK), the Senator from Pennsylvania (Mr. SCOTT), and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Vermont (Mr. PROUTY) would vote "yea."

On this vote, the Senator from Colorado (Mr. DOMINICK) is paired with the Senator from Arizona (Mr. GOLDWATER). If present and voting, the Senator from Colorado would vote "yea" and the Senator from Arizona would vote "nay."

The result was announced—yeas 56, nays 28, as follows:

[No. 218 Leg.]

YEAS—56

So Mr. LONG's motion to lay Mr. CURTIS' amendment on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. The Chair recognizes the Senator from Alabama.

Mr. SPARKMAN. Mr. President, I call up my amendment No. 202, as modified.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT LEGISLATIVE CLERK. The Senator from Alabama (Mr. SPARKMAN) proposes an amendment, identified as No. 202, and modified to read as follows:

At the proper place insert the following new section:

"SEC. —. DISTRIBUTIONS PURSUANT TO SAVINGS AND LOAN HOLDING COMPANY AMENDMENTS OF 1967.

"(a) IN GENERAL.—Subchapter 0 of chapter 1 (relating to gain or loss on disposition of property) is amended by adding at the end thereof the following new part:

"'PART X—DISTRIBUTIONS PURSUANT TO SAVINGS AND LOAN HOLDING COMPANY AMENDMENTS OF 1967

"'Sec. 1121. Distributions pursuant to Savings and Loan Holding Company Amendments of 1967.

"'Sec. 1122. Special rules.

"'Sec. 1123. Definitions.

"'SEC. 1121. DISTRIBUTIONS PURSUANT TO SAVINGS AND LOAN HOLDING COMPANY AMENDMENTS OF 1967.

"'(a) DISTRIBUTIONS OF CERTAIN NON-SAVINGS-AND-LOAN PROPERTY.—

"'(1) DISTRIBUTIONS OF PROHIBITED PROPERTY.—

If—

"'(A) a qualified holding company distributes prohibited property (other than stock received in an exchange to which subsection (c) (2) applies)—

"'(i) to a shareholder (with respect to its stock held by such shareholder, without the surrender by such shareholder of stock in such company; or

"'(ii) to a shareholder, in exchange for its preferred stock; or

"'(iii) to a security holder, in exchange for its securities; and

"'(B) the Corporation has, before the distribution (or January 1, 1971, if later), certified that the distribution of such prohibited property is necessary or appropriate to effectuate section 408 of the National Housing Act,

then no gain to the shareholder or security holder from the receipt of such property shall be recognized.

"'(2) DISTRIBUTIONS OF STOCK AND SECURITIES RECEIVED IN AN EXCHANGE TO WHICH SUBSECTION (C) (2) APPLIES.—If—

"'(A) a qualified holding company distributes—

"'(i) common stock received in an exchange to which subsection (c) (2) applies to a shareholder (with respect to its stock held by such shareholder), without the surrender by such shareholder of stock in such company; or

"'(ii) common stock received in an exchange to which subsection (c) (2) applies to a shareholder, in exchange for its common stock; or

"'(iii) preferred stock or common stock received in an exchange to which subsection (c) (2) applies to a shareholder, in exchange for its preferred stock; or

"'(iv) securities or preferred or common stock received in an exchange to which subsection (c) (2) applies to a security holder in exchange for its securities; and

"'(B) any preferred stock received has substantially the same terms as the preferred stock exchanged, and any securities received have substantially the same terms as the securities exchange,

then, except as provided in subsection (f), no gain to the shareholder or security holder from the receipt of such stock or such securities or such stock and securities shall be recognized.

"'(3) NON PRO RATA DISTRIBUTIONS.—Paragraphs (1) and (2) shall apply to a distribution whether or not the distribution is pro rata with respect to all of the shareholders of the distributing qualified holding company.

"'(4) EXCEPTION.—This subsection shall not apply to any distribution by a company which has made any distribution pursuant to subsection (b).

"'(5) DISTRIBUTIONS INVOLVING GIFT OR COMPENSATION.—In the case of a distribution to which paragraph (1) or (2) applies, but which—

"'(A) results in a gift, see section 2501, and following, or

"'(B) has the effect of the payment of compensation, see section 61(a) (1).

"'(b) COMPANY CEASING TO BE A HOLDING COMPANY OR MULTIPLE HOLDING COMPANY.—

"'(1) DISTRIBUTIONS OF PROPERTY WHICH CAUSE A COMPANY TO BE A HOLDING COMPANY OR MULTIPLE HOLDING COMPANY.—If—

"'(A) a qualified holding company distributes property (other than stock received in an exchange to which subsection (c) (3) applies)—

"'(i) to a shareholder (with respect to its stock held by such shareholder), without the surrender by such shareholder of stock in such company; or

"'(ii) to a shareholder, in exchange for its preferred stock; or

"'(iii) to a security holder, in exchange for its securities; and

"'(B) the Corporation has, before the distribution (or January 1, 1971, if later), certified—

"'(i) in the case of a multiple holding company, that such property is all or part of the property by reason of which such company controls two or more insured institutions (as defined in section 408(a) (1) (A) of the National Housing Act), or such property is part of the property by reason of which such company did control two or more insured institutions before any property of the same kind was distributed under this subsection or exchanged under subsection (c) (3); or

"'(ii) in the case of any other holding company, that such property is all or part of the property by reason of which such company controls an insured institution (as defined in section 408(a) (1) (A) of the National Housing Act) or holding company, or such property is part of the property by reason of which such company did control an insured institution or holding company before any property of the same kind was distributed under this subsection or exchanged under subsection (c) (3); and

"'(iii) that the distribution is necessary or appropriate to effectuate section 408 of such Act,

then no gain to the shareholder or security holder from the receipt of such property shall be recognized.

"'(2) DISTRIBUTIONS OF STOCK AND SECURITIES RECEIVED IN AN EXCHANGE TO WHICH SUBSECTION (C) (3) APPLIES.—If—

"'(A) a qualified holding company distributes—

"'(i) common stock received in an exchange to which subsection (c) (3) applies to a shareholder (with respect to its stock held by such shareholder), without the surrender by such shareholder of stock in such company; or

"'(ii) common stock received in an exchange to which subsection (c) (3) applies to a shareholder, in exchange for its common stock; or

"'(iii) preferred stock or common stock received in an exchange to which subsection (c) (3) applies, to a shareholder in exchange for its preferred stock; or

"'(iv) securities or preferred or common stock received in an exchange to which subsection (c) (3) applies to a security holder, in exchange for its securities; and

"'(B) any preferred stock received has substantially the same terms as the preferred stock exchanged, and any securities received have substantially the same terms as the securities exchanged.

then, except as provided in subsection (f), no gain to the shareholder or security holder from the receipt of such stock or such securities or such stock and securities shall be recognized.

"'(3) NON PRO RATA DISTRIBUTION.—Paragraphs (1) and (2) shall apply to a distribution whether or not the distribution is pro rata with respect to all of the shareholders of the distributing qualified holding company.

"'(4) EXCEPTION.—This subsection shall not apply to any distribution by a company which has made any distribution pursuant to subsection (a).

"'(5) DISTRIBUTIONS INVOLVING GIFT OR COMPENSATION.—In the case of a distribution to which paragraph (1) or (2) applies, but which—

"'(A) results in a gift, see section 2501, and following, or

"'(B) has the effect of the payment of compensation, see section 61(a) (1).

"'(c) PROPERTY ACQUIRED AFTER APRIL 14, 1967.—

"'(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), subsection (a) or (b) shall not apply to—

"'(A) any property acquired by the distributing company after April 14, 1967, unless (i) gain to such company with respect to the receipt of such property was not recognized by reason of subsection (a) or (b), or (ii) such property was acquired by it in exchange for all of its stock in an exchange to which paragraph (2) or (3) applies, or (iii) such property was acquired by the distributing company in a transaction in which gain was not recognized under section 305(a) or section 332, or under section 354 with respect to a reorganization described in section 368 (a) (1) (E) or (F), or

"'(B) any property which was acquired by the distributing company in a distribution with respect to stock acquired by such company after April 14, 1967, unless such stock was acquired by such company (i) in a distribution (with respect to stock held by it on April 14, 1967, or with respect to stock in respect of which all previous applications of this clause are satisfied) with respect to which gain to it was not recognized by reason of subsection (a) or (b), or (ii) in exchange for all of its stock in an exchange to which paragraph (2) or (3) applies, or (iii) in a transaction in which gain was not recognized under section 305(a) or section 332, or under section 354 with respect to a reorganization described in section 368(a) (1) (E) or (F), or

"'(C) any property acquired by the distributing company after April 14, 1967, in a transaction in which gain was not recognized under section 332, unless such property was acquired from a company which, if it had been a holding company or multiple holding

company, could have distributed such property under subsection (a)(1) or (b)(1).

"'(2) EXCHANGES INVOLVING PROHIBITED PROPERTY.—If—

"'(A) any qualified holding company exchanges (i) property, which, under subsection (a)(1), such company could distribute directly to its shareholders or security holders without the recognition of gain to such shareholders or security holders, and other property (except property described in subsection (b)(1)(B) (i) or (ii)), for (ii) all of the stock of a second corporation created and availed of solely for the purpose of receiving such property;

"'(B) immediately after the exchange, the qualified holding company distributes all of such stock in a manner prescribed in subsection (a)(2)(A); and

"'(C) before such exchange (or January 1, 1971, if later), the Corporation has certified (with respect to the property exchanged which consists of property which, under subsection (a)(1), such company could distribute directly to its shareholders or security holders without the recognition of gain to such shareholders or security holders and other property (except prohibited property) for (ii) all of the stock of a second corporation created and availed of solely for the purpose of receiving such property;

"'(B) immediately after the exchange, the qualified holding company distributes all of such stock in a manner prescribed in subsection (b)(2)(A); and

"'(C) before such exchange (or January 1, 1971, if later) the Corporation has certified (with respect to the property exchanged which consists of property which, under subsection (b)(1), such company could distribute directly to its shareholders or security holders without the recognition of gain) that the exchange and distribution are necessary or appropriate to effectuate section 408 of such Act, then paragraph (1) shall not apply with respect to such distribution.

"'(3) EXCHANGES INVOLVING INTERESTS IN SAVINGS AND LOAN PROPERTY.—If—

"'(A) any qualified holding company exchanges (i) property which, under subsection (b)(1), such company could distribute directly to its shareholders or security holders without the recognition of gain to such shareholders or security holders and other property (except prohibited property) for (ii) all of the stock of a second corporation created and availed of solely for the purpose of receiving such property;

"'(B) immediately after the exchange, the qualified holding company distributes all of such stock in a manner prescribed in subsection (b)(2)(A); and

"'(C) before such exchange (or January 1, 1971, if later) the Corporation has certified (with respect to the property exchanged which consists of property which, under subsection (b)(1), such company could distribute directly to its shareholders or security holders without the recognition of gain) that the exchange and distribution are necessary or appropriate to effectuate section 408 of such Act, then paragraph (1) shall not apply with respect to such distribution.

"'(d) DISTRIBUTION TO AVOID FEDERAL INCOME TAX.—

"'(1) PROHIBITED PROPERTY.—Subsection (a) shall not apply to a distribution if, in connection with such distribution, the distributing corporation retains, or transfers after April 14, 1967, to any corporation, property (other than prohibited property) as part of a plan one of the principal purposes of which is the distribution of the earnings and profits of any corporation.

"'(2) SAVINGS AND LOAN PROPERTY.—Subsection (b) shall not apply to a distribution if, in connection with such distribution, the distributing corporation retains, or transfers after April 14, 1967, to any corporation, property (other than property described in subsection (b)(1)(B) (i) and (ii) as part of a plan one of the principal purposes of which is the distribution of the earnings and profits of any corporation.

"'(3) CERTAIN CONTRIBUTIONS TO CAPITAL.—In the case of a distribution a portion of which is attributable to a transfer which is a contribution to the capital of a corporation, made after April 14, 1967, and prior to the date of the enactment of this part, if subsection (a) or (b) would apply to such distribution but for the fact that, under paragraph (1) or (2) (as the case may be) of this subsection, such contribution to capital is part of a plan one of the principal purposes of which is to distribute the earnings and profits of any corporation, then, notwithstanding paragraph (1) or (2), subsection (a) or (b) (as the case may be) shall apply to that portion of such distribution not attributable to such contribution to capital, and shall not apply to that portion of such distribution attributable to such contribution to capital.

"'(e) FINAL CERTIFICATION.—Subsection (a) or (b) shall not apply with respect to any distribution by a company unless the Corporation certifies that, before the expiration of the periods permitted under the relevant provisions of section 408 of the National Housing Act (including any extensions thereof granted to such company under such provisions), the company has (1) disposed of all the property the disposition of which is necessary or appropriate to effectuate such section, or (2) ceased to be a holding company or multiple holding company (as the case may be).

"'(f) CERTAIN EXCHANGES OF SECURITIES.—In the case of an exchange described in subsection (a)(2)(A)(iv) or subsection (b)(2)(A)(iv), subsection (a) or (b) (as the case may be) shall apply only to the extent that the principal amount of the securities received does not exceed the principal amount of the securities exchanged.

"'SEC. 1122. SPECIAL RULES.

"'(a) BASIS OF PROPERTY ACQUIRED IN DISTRIBUTIONS.—If by reason of section 1121 gain is not recognized with respect to the receipt of any property, then, under regulations prescribed by the Secretary or his delegate—

"'(1) if the property is received by a shareholder with respect to stock, without the surrender by such shareholder of stock, the basis of the property received and of the stock with respect to which it is distributed shall, in the distributee's hands, be determined by allocating between such property and such stock the adjusted basis of such stock; or

"'(2) if the property is received by a shareholder in exchange for stock or by a security holder in exchange for securities, the basis of the property received shall, in the distributee's hands, be the same as the adjusted basis of the interest or securities exchanged, increased by—

"'(A) the amount of the property received which was treated as a dividend, and

"'(B) the amount of gain to the taxpayer recognized on the property received (not including any portion of such gain which was treated as a dividend).

"'(b) ALLOCATION OF EARNINGS AND PROFITS.—

"'(1) DISTRIBUTION OF STOCK IN A CONTROLLED CORPORATION.—In the case of a distribution by a qualified holding company under section 1121(a)(1) or (b)(1) of stock in a controlled corporation, proper allocation with respect to the earnings and profits of the distributing corporation and the controlled corporation shall be made under regulations prescribed by the Secretary or his delegate.

"'(2) EXCHANGES DESCRIBED IN SECTION 1121(c) (2) OR (3).—In the case of any exchange described in section 1121(c) (2) or (3), proper allocation with respect to the earnings and profits of the corporation transferring the property and the corporation receiving such property shall be made under regulations prescribed by the Secretary or his delegate.

"'(3) DEFINITION OF CONTROLLED CORPORATION.—For purposes of paragraph (1), the term 'controlled corporation' means a corporation with respect to which at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes is owned by the distributing qualified holding company.

"'(c) PERIODS OF LIMITATION.—The periods of limitation provided in section 6501 (relating to limitations on assessment and collection) shall not expire, with respect to any deficiency (including interest and additions to the tax) resulting solely from the receipt of property by shareholders or security holders in a distribution which is certified by the Corporation under subsection (a), (b), or (c) of section 1121, until 5 years after the distributing company notifies the Secretary or his delegate (in such manner and with such accompanying information as the Secretary or his delegate may by regulations prescribe) that the period (including extensions thereof) prescribed in the relevant provision of section 408 of the National Housing Act, or section 1121 (e), whichever is applicable, has expired; and such assessment may be made notwithstanding any provision of law or rule of law which would otherwise prevent such assessment.

"'(d) ITEMIZATION OF PROPERTY.—In any certification under this part, the Corporation shall make such specification and itemization of property as may be necessary to carry out the provisions of this part.

"'SEC. 1123. DEFINITIONS.

"'(a) HOLDING COMPANY.—For purposes of this part, the term 'holding company' means any corporation which is a savings and loan holding company as defined in section 408(a)(1)(D) of the National Housing Act.

"'(b) MULTIPLE HOLDING COMPANY.—For purposes of this part, the term 'multiple holding company' means any corporation which is a multiple savings and loan holding company as defined in section 408(a)(1)(E) of the National Housing Act.

"'(c) QUALIFIED HOLDING COMPANY.—

"'(1) IN GENERAL.—Except as provided in paragraph (2), for purposes of this part the term 'qualified holding company' means any corporation which is a holding company or multiple holding company (as the case may be) and which holds prohibited property acquired by it—

"'(A) on or before April 14, 1967,

"'(B) in a distribution in which gain to such company with respect to the receipt of such property was not recognized by reason of subsection (a) or (b) of section 1121, or

"'(C) in exchange for all of its stock in an exchange described in section 1121(c)(2) or (c)(3).

"'(2) LIMITATIONS.—

"'(A) A holding company or multiple holding company shall not be a qualified holding company, unless it would have been a holding company or multiple holding company, respectively, on April 14, 1967, if the Savings and Loan Holding Company Amendments of 1967 had been in effect on such date, or unless it is a holding company or multiple holding company, respectively, determined solely by reference to—

"'(i) property acquired by it on or before April 14, 1967,

"'(ii) property acquired by it in a distribution in which gain to such company with respect to the receipt of such property was not recognized by reason of subsection (a) or (b) of section 1121, and

"'(iii) property acquired by it in exchange for all of its stock in an exchange described in section 1121(c)(2) or (3).

"'(B) A holding company or multiple holding company shall not be a qualified holding company by reason of property described in subparagraph (B) of paragraph (1) or clause (ii) of subparagraph (A) of this paragraph, unless such property was acquired in a distribution with respect to stock, which stock was acquired by such holding company or multiple holding company, respectively—

"'(i) on or before April 14, 1967,

"'(ii) in a distribution (with respect to stock held by it on April 14, 1967, or with respect to stock in respect of which all previous applications of this clause are satisfied) with respect to which gain to it was not recognized by reason of subsection (a) or (b) of section 1121, or

"'(iii) in exchange for all of its stock in an exchange described in section 1121(c)(2) or (3).

"'(C) A company shall be treated as a qualified holding company only if the Corporation certifies that it satisfies the foregoing requirements of this subsection.

"'(d) PROHIBITED PROPERTY.—For purposes of this part, the term 'prohibited property' means in the case of any holding company or multiple holding company, property (other than nonexempt property) the disposition of which would be necessary or appropriate to effectuate section 408 of the National Housing Act if such company continued to be a holding company or multiple holding company (as the case may be) beyond the relevant period specified in such Act.

"'(e) NONEXEMPT PROPERTY.—For purposes of this part, the term "nonexempt property" means—

"'(1) obligations (including notes, drafts, bills of exchange, and bankers' acceptances) having a maturity at the time of issuance of not exceeding 24 months, exclusive of days of grace;

"'(2) securities issued by or guaranteed as to principal or interest by a government or subdivision thereof or by any instrumentality of a government or subdivision; or

"'(3) money, and the right to receive money not evidenced by a security or obligation (other than a security or obligation described in paragraph (1) or (2)).

"'(f) CORPORATION.—For purposes of this part, the term "Corporation" means the Federal Savings and Loan Insurance Corporation.'

"(b) CLERICAL AMENDMENT.—The table of parts for subchapter O of chapter 1 is amended by adding at the end thereof the following:

"'Part X—Distributions pursuant to Savings and Loan Holding Company Amendments of 1967'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years ending after the date of the enactment of this Act.

Mr. SPARKMAN. Mr. President, I have modified the amendment as printed by changing the date "1970" to "1971" in the following places:

Page 2, line 20.

Page 5, line 15.

Page 10, line 21.

Page 11, line 21.

Mr. President, I shall be very brief, and I shall not ask for a record vote.

This is an amendment requested by the Home Loan Bank Board. The amendment was prepared by the Treasury Department, and it seeks to do simply this: When we passed the Bank Holding Act, providing a time to divest of certain properties they owned, they were given a particular tax treatment. Last year or 2 years ago, we passed the Savings and Loan Holding Act, and required time to divest. That act was patterned exactly after the Bank Holding Act.

This amendment provides only that the Savings and Loan Associations be given the same tax treatment we gave the banks.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. WILLIAMS of Delaware. I have looked at the Senator's amendment, and I do not know just how much is involved—what treatment is to be provided and what effects it will have. It does embrace a new formula for taxing this particular group. While I realize that the Senator has great interest in it, I have been wondering if he will not withdraw his amendment tonight in order to give our committee a chance to look at it to see just how far-reaching it is and just what treatment it will provide. I will assure him, as one member of the committee, that we will give it our attention, and I think the chairman will concur in that, but I hate to vote on it tonight when we do not know what the effect of the treatment provided is going to be and how far it is going to reach.

As I say, I hope the Senator will withdraw it, with the promise that it will be given consideration by the committee. That is not just a brush-off; it is a promise.

Mr. SPARKMAN. Mr. President, let me say this: I do not agree that it provides a new formula, because this is the first treatment since we passed the Savings and Loan Holding Act, and it applies the same formula that we did apply to the banks under the same pattern of divestiture.

I offered this amendment before the committee, in September, I think it was. But I have talked with the Senator from Delaware and the Senator from Louisiana. The Senator from Delaware has told me that there will be other tax bills during this Congress—though not this session—and that that will give us an opportunity to present it again, and give him and his staff and the committee staff an opportunity to examine it and go into it carefully.

Mr. President, with that assurance from both the chairman of the committee—I think I have his assurance—and the ranking Republican member of the committee, I withdraw the amendment, and will present it at the first opportunity.

The PRESIDING OFFICER. The amendment is withdrawn. The bill is open to further amendment.

Mr. CANNON. Mr. President, I send to the desk an amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. CANNON. Mr. President, I ask unanimous consent that further reading of the amendment be waived, and I shall explain it very briefly.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON's amendment is as follows:

At the proper place insert the following new section:

"SEC. —. INCOME TAX CREDIT FOR POLITICAL CONTRIBUTIONS.

"(a) ALLOWANCE OF CREDIT.—Subpart A of part IV of subchapter A (relating to credits allowable) is amended by renumbering section 41 as 42, and by inserting after section 40 (as added by section — of this Act) the following new section:

"'SEC. 41. POLITICAL CONTRIBUTIONS.

"'(a) GENERAL RULE.—In the case of an individual there shall be allowed, as a credit against the tax imposed by this chapter for the taxable year, an amount equal to one-half of so much of the political contributions as does not exceed $50, payment of which is made by the taxpayer within the taxable year.

"'(b) LIMITATION.—

"'(1) MARRIED INDIVIDUALS.—In the case of a joint return of a husband and wife under section 6013, the credit allowed by subsection (a) shall not exceed $25. In the case of a separate return of a married individual, the credit allowed by subsection (a) shall not exceed $12.50.

"'(2) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under section 33 (relating to foreign tax credit), section 35 (relating to partially tax-exempt interest), section 37 (relating to retirement income), and section 38 (relating to investment in certain depreciable property).

"'(3) VERIFICATION.—The credit allowed by subsection (a) shall be allowed with respect to any political contribution, only if such political contribution is verified in such manner as the Secretary or his delegate shall prescribe by regulations.

"'(c) DEFINITIONS.—For purposes of this section—

"'(1) POLITICAL CONTRIBUTION.—The term "political contribution" means a contribution or gift of money to—

"'(A) an individual whose name is presented for election as President of the United States, Vice President of the United States, an elector for President or Vice President of the United States, a Member of the Senate, or a Member of the House of Representatives in a general or special election, in a primary election, or in a convention of a political party, for use by such individual to further his candidacy for any such office; or

"'(B) a committee acting in behalf of an individual or individuals described in paragraph (A), for use by such committee to further the candidacy of such individual or individuals.

"'(d) CROSS REFERENCES.—

"'for disallowance of credits to estates and trusts, see section 642(a)(3).'

"(b) CLERICAL AND TECHNICAL AMENDMENTS.—

"(1) The table of sections for such subpart A is amended by striking out the last item and inserting in lieu thereof:

"'Sec. 41. Political contributions.

"'Sec. 42. Overpayment of tax.'

"(2) Section 642(a) (relating to credits against tax for estates and trusts) is amended by adding at the end thereof the following new paragraph:

"'(3) POLITICAL CONTRIBUTIONS.—An estate or trust shall not be allowed the credit against tax for political contributions provided by section 41.'

"'(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1969, but only with respect to political contributions payment of which is made after such date.'"

Mr. CANNON. This is the same amendment that the Senator from Massachusetts (Mr. KENNEDY) offered a few days ago, except that his was a broader amendment, providing an across-the-board deduction for political contributions. This amendment relates only to contributions for campaigns for Federal offices—for Congress, for Senator, for Vice President and President of the United States—and contributions to national committees.

Senator KENNEDY's amendment lost by five votes the other day, on the basis—and I voted against it—that it was too broad, because it would have gone down to every local office, including those of dog catcher and assessor. As the distinguished Senator from Kentucky pointed out, it might even have resulted in some parties of some sort being paid for by the Federal Government.

The amount of deduction is exactly the same in this amendment as was proposed in the Kennedy amendment except that it is very clearly limited to candidates for Federal office and for President and Vice President of the United States in national political elections.

Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. PEARSON. Mr. President, would that apply to primaries as well for Federal office?

Mr. CANNON. It would apply also to primaries for Federal office. It would apply to whoever files under State law whether or not he is elected, in a political primary.

Mr. STEVENS. Mr. President, is it a deduction or a credit?

Mr. CANNON. It is a tax credit. It will not exceed $25 per couple if a husband and wife file jointly, or $12.50 for a single individual.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. LONG. Mr. President, the amendment raises once again a problem that I thought we had disposed of. The matter ought to be studied.

We have done a lot of work in this area. We did report a bill out to do what we thought ought to be done about campaign financing. I thought we had voted on the issue. Those who voted against the Dole amendment did so because they did not think that matter ought to be brought up again. It seems to me that at this late hour it is not appropriate to consider this matter—something like this ought to be studied. We could point out a number of things that we think are wrong.

There is no assurance that a candidate would stay in the race at all. We would give the taxpayer a tax credit for contribution to a race for an office, even though the candidate might withdraw.

If we do this, we ought to look into the corrupt practices aspect of the matter.

We should not be putting Federal money into campaign financing effort unless we have tighter regulations as to how it should be spent and unless we tighten up the corrupt practices law.

In view of all the different things we could get involved in through this amendment, I hope that we will not be asked to do this.

I hope that the Senator will be willing to withdraw the matter and give us a chance to study the proposal in the Finance Committee, where we have jurisdiction if it is going to involve a tax credit, rather than insisting here at 6 or 7 minutes to 10 o'clock at night that we consider the matter.

Mr. CANNON. Mr. President, I have no desire to take up the time of the Senate. Forty-five people voted for the proposition straight across the board the other day.

I would have been tempted to go along, but I withheld for consideration by the Finance Committee.

Forty-five Senators the other day said they wanted to give this same exemption all the way across the board for every candidate for office, including dog catcher and justice of the peace. I voted against it. I will vote for this one, and I think we ought to have at least 46 votes tonight.

I am willing to vote at any time.

Mr. WILLIAMS of Delaware. Mr. President, I hope that we do not get into this area tonight. It is almost 10 o'clock. We are trying to reach third reading. We acted upon this measure before and reported a bill from the Finance Committee. We included in that measure a section dealing with election reform. This does not do that. This would just raise the money.

If this amendment is agreed to, I would be compelled to bring up the matter of the campaign reporting system. That has nothing to do with this bill.

I hope that we can lay this aside tonight and proceed to third reading on a bill that we have been working on for 3 months.

Mr. LONG. Mr. President, if we get involved in this extraneous matter, it seems to me that we should consider the suggestion of the Senator from Delaware and also consider amendments in the corrupt practices area of the law, because we insisted on making that part of the campaign financing law when we considered it before. I believe that the votes are there, but I believe we ought to stay out of the campaign financing field at this time. We would have to debate the matter, offer amendments, and consider the various phases of it.

Mr. COOK. Mr. President, how could any Member of the United States Senate vote on this and say that he had voted to provide for the tax credits with respect to contributions for himself to run for the United States Senate but that with respect to a man running for Governor of his State or for the State legislature or for any local office at the State level, the contributor could not get a tax credit for his contribution.

It seems to me that we are somehow or other setting ourselves aside as a different kind of candidate than other people who run for responsible offices at the State level.

We have former State Governors who are Senators. How could they vote for this and say to a candidate in their respective States, "Someone can give me a contribution and get a tax credit for it. However, if you run for a State office, no one can do that in your case."

Mr. LONG. Mr. President, there are many things that are wrong with the proposal. It should be studied so that we might correct some of the shortcomings.

We want to reach third reading tonight. We ought to leave this issue with the committee that has jurisdiction to study it and have it bring in a proposal that would meet the objections that have been raised.

Mr. MANSFIELD. Mr. President, I am more interested in electoral reform than in the tax credit on the basis just proposed by the Senator from Nevada.

Mr. LONG. Mr. President, that being the case, in the hope that we will not have the campaign finance reporting fight all over again and will not get involved in those amendments, I promise the Senator that as far as I am concerned I am willing to study the proposals in the reform area early next year.

Mr. President, so that we can get a third reading and not have to consider the amendments and suggestions and proposals, including one that I have in mind, I move that the amendment of the Senator from Nevada be tabled.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Nevada.

Mr. CANNON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Nevada. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Oklahoma (Mr. HARRIS), the Senator from Indiana (Mr. HARTKE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

On this vote, the Senator from Rhode Island (Mr. PASTORE) is paired with the Senator from Oklahoma (Mr. HARRIS). If present and voting, the Senator from Rhode Island would vote "yea" and the Senator from Oklahoma would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. PROUTY) is necessarily absent.

The Senator from Colorado (Mr. DOMINICK), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Illinois, (Mr. SMITH), and the Senator from Texas (Mr. TOWER), and the Senator from Ohio (Mr. SAXBE), are detained on official business.

If present and voting, the Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), the Senator from Vermont (Mr. PROUTY), and the Senator from Texas (Mr. TOWER), would each vote "yea."

The result was announced—yeas 55, nays 26, as follows:

[No. 219 Leg.]

YEAS—55

| | | |
|---|---|---|
| Aiken | Ervin | McClellan |
| Allen | Fannin | McIntyre |
| Allott | Fong | Miller |

| Dominick | Mundt | Symington |
| Fulbright | Pastore | Tower |
| Goldwater | Prouty | Tydings |
| Harris | Russell | Young, Ohio |
| Hartke | Saxbe | |
| Kennedy | Scott | |

So the motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair wishes to announce for the information of the Senate that the Senate has just completed its 20th rollcall today.

Mr. LONG. Mr. President, I have amendments at the desk. I ask that they be read.

The PRESIDING OFFICER. The amendments will be stated.

The legislative clerk proceeded to read the amendment.

Mr. LONG. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

TECHNICAL AND CLERICAL AMENDMENTS

Page 51, line 4, after "tion" insert a comma.

Page 64, line 22, strike out "a State" and insert "an appropriate State".

Page 72, line 17, strike out "audit" and insert "audit-fee".

Page 72, line 20, strike out "881" and insert "861".

Page 74, lines 17 and 18, strike out "transaction to which paragraph (1) applies" and insert "prohibited transaction".

Page 77, line 25, beginning with ", if", strike out all through "on" in line 5, page 78.

Page 83, line 4, strike out "section" and insert "subsection".

Page 84, line 10, strike out the comma after "(a)".

Page 91, line 18, strike out "title" and insert "heading".

Page 97, line 12, strike out "title" and insert "heading".

Page 97, line 22, strike out "five" and insert "5".

Page 102, line 10, strike out "title" and insert "heading".

Page 120, line 23, strike out "corporation" and insert "organization".

Page 122, line 4, before "property" insert "for purposes of this paragraph as personal property any".

Page 122, line 14, strike out "such personal property" and insert "personal property described in subparagraph (A)(ii)".

Page 126, line 11, strike out "organizations" and insert "persons".

Page 128, line 23, strike out "paragraph" and insert "paragraphs".

Page 131, line 10, after "(j)" insert "(7)".

Page 134, line 11, strike out "subsection" and insert "paragraph".

Page 134, line 15, strike out "carryover or" and insert "carryback or".

Page 141, line 6, after "etc."—insert "For purposes of this subsection—".

Page 142, line 9, strike out "An" and insert "For purposes of this section, an".

Page 142, lines 11 and 12, strike out ", for the purpose of this section.".

Page 142, line 14, after "section" insert a comma.

Page 144, line 1, after "amount" insert a comma.

Page 144, line 13, strike out "If the" and insert "For purposes of this subtitle, if".

Page 144, lines 15 and 16, strike out ", for the purposes of this subtitle,".

Page 164, line 7, strike out "so sold" and insert "sold by the taxpayer at its fair market value (determined at the time of such contribution)"

Page 186, line 20, beginning with "with" strike out all through "in" in line 22, and insert "to".

Page 188, line 16, strike out "(c)" and insert "(C)".

Page 199, line 13, strike out "subchapter 1" and insert "subchapter P of chapter 1".

Page 200, line 2, strike out "nine" and insert "9".

Page 213, line 12, after "liability" insert "not imposed for the taxable year but".

Page 213, line 16, strike out "subparagraph (B)" and insert "paragraph (1)(B)".

Page 221, beginning with "(other than" in line 13, strike out all through line 20, and insert: "shall be treated as items of tax preference of the shareholders of such corporation, and, except as provided in paragraph (2), shall not be treated as items of tax preference of such corporation. The sum of the items so treated shall be apportioned pro rata among such shareholders in a manner consistent with section 1374(c)(1).

"(2) CERTAIN CAPITAL GAINS.—If for a taxable year of an electing small business corporation a tax is imposed on the income of such corporation under section 1378, such corporation shall, notwithstanding the provisions of section 1371(b)(1), be subject to the tax imposed by section 56, but computed only with reference to the item of tax preference set forth in section 57(a)(9)(B)."

Page 221, line 25, after "fund" insert "(and not as items of tax preference of such fund)".

Page 222, line 10, after "is" insert "attributable to amounts".

Page 222, line 20, after "trust," insert "(and not as items of tax preference of such company or such trust)".

Page 224, line 5, strike out "held for more than 6 months".

Page 228, line 20, after "221" insert "(b)".

Page 229, line 22, strike out "individual" and insert "person".

Page 233, line 25, strike out "individual" and insert "person".

Page 234, strike out lines 1, 2, and 3 and insert: "shall be allowed for the taxable year of such person which ends with or within the taxable year in which such amount is included in gross income of the person who performed such services."

Page 240, line 9, strike out "five" and insert "5".

Page 245, line 4, after "allowed" insert "as".

Page 245, line 6, after "distributed" insert "to such beneficiary".

Page 246, line 24, strike out "(i)".

Page 247, line 4, beginning with "less" strike out all through the comma in line 6.

Page 247, line 7, strike out "(i)".

Page 247, line 19, beginning with "less" strike out all through line 21 and insert: "less an amount equal to the amount of taxes deemed distributed to the beneficiary under sections 666(b) and (c)."

Page 248, line 4, strike out "each".

Page 248, strike out lines 5 through 20 and insert:

"(B) The partial tax shall not be computed under the provisions of subparagraph (B) of paragraph (1) if in the same prior taxable year of the beneficiary in which any part of the accumulation distribution is deemed under section 666(a) to have been distributed to such beneficiary some part of prior accumulation distribution by each of two or more other trusts is deemed under section 666(a) to have been distributed to such beneficiary.

Page 248, line 25, strike out "of the average".

Page 249, line 1, strike out "undistributed net income deemed distributed" and insert "accumulated distribution divided by the number of preceding taxable years to which the accumulation distribution is allocated under section 666(a)".

Page 250, line 15, after "income" insert "(other than amounts deemed distributed under section 666 and 669 by the same or other trusts)".

Page 252, line 4, strike out the period and insert a comma.

Page 252, beginning with "The" strike out all through "by" in line 6 and insert "less".

Page 253, line 4, before the period insert "and without regard to any capital gain distribution for any succeeding taxable year".

Page 296, line 14, before "Subchapter" insert "(a) IN GENERAL.—"

Page 297, after line 20, insert:

"(b) CLERICAL AMENDMENT.—The table of parts for suchapter C of chapter 1 is amended by adding at the end thereof the following new item:

"'Part VI. Treatment of certain corporate interests as stock or indebtedness.'"

Page 323, line 6, after "elects" insert "at such time and".

Page 327, line 11, after "services" insert "or other communication services if furnished or sold by the Communication Satellite Corporation for purposes authorized by the Communications Satellite Act of 1962 (47 U.S.C. 701),".

Page 350, line 19, strike out "(e)" and insert "(f)".

Page 409, strike out lines 10 through 14, and insert:

"(b) RECEIPT OF MINIMUM DISTRIBUTIONS.—Section 263(b) (relating to receipt of minimum distributions) is amended—

"(1) by striking out 'surcharge period' in the heading of paragraph (1) and inserting in lieu thereof 'surcharge period ending before January 1, 1970';

"(2) by striking out '1964' in the heading of paragraph (2) and inserting in lieu thereof '1964 and taxable years beginning in 1969 and ending in 1970 to the extent subparagraph (B) applies'; and

"(3) by striking out the last two sentences and inserting in lieu thereof the following:

"'In the case of a taxable year beginning before the surcharge period and ending within the surcharge period, or beginning within the surcharge period and ending after the surcharge period, or beginning before January 1, 1970, and ending after December 31, 1969, the required minimum distribution shall be equal to the sum of—

"'(A) that portion of the minimum distribution which would be required if the provisions of paragraph (1) were applicable to the taxable year, which the number of days in such taxable year which are within the surcharge period and before January 1, 1970, bears to the total number of days in such taxable year,

"'(B) that portion of the minimum distribution which would be required if the provisions of paragraph (2) were applicable to such taxable year, which the number of days in such taxable year which are within the surcharge period and after December 31, 1969, bears to the total number of days in such taxable year, and

"'(C) that portion of the minimum distribution which would be required if the provisions of paragraph (3) were applicable to such taxable year, which the number of days in such taxable year which are not within the surcharge period bears to the total number of days in such taxable year. As used in this subsection, the term "surcharge period" means the period beginning January 1, 1968 and ending June 30, 1970'."

Page 444, line 21, strike out "of the Department".

Page 445, line 24, strike out the comma.

Page 453, in the matter following line 2, strike out the closing quotation marks after "stock.".

Page 453, line 18, strike out "unadjusted".

Page 518, line 8, after "(E)" the second place it appears insert a comma.

Page 523, line 20, after "excess" insert "as if the property distributed had been sold at the time of the distribution".

Page 535, line 4, strike out "of a" and insert "of such".

Page 539, line 13, after "construction" insert ", reconstruction,".

Page 539, line 15, after "struct" insert ", reconstruct,".

Page 550, line 14, strike out "(c).'" and insert "(c);'."

Page 554, strike out lines 17 through 23 and insert:

"(c) LIMITATIONS AND SPECIAL RULE.—

"(1) Additions under more than one paragraph.—

"(A) With respect to any return, the amount of the addition under paragraph (1) of subsection (a) shall be reduced by the amount of the addition under paragraph (2) of subsection (a) for any month to which an addition to tax applies under both paragraphs (1) and (2).

"(B) With respect to any return, the maximum amount of the addition permitted under paragraph (3) of subsection (a) shall be reduced by the amount of the addition under paragraph (1) of subsection (a) which is attributable to the tax for which the notice and demand is made."

Page 554, line 24, strike out "less" and insert "more".

Page 556, line 21, after "prescribed" insert "by law (without regard to any extension of time)".

Page 557, line 8, strike out "(c)" and insert "(e)".

Mr. LONG. Mr. President, these are purely technical amendments that have been prepared by the staff. They are technical and conforming amendments, for clerical purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE MEETING DURING SENATE SESSION TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Interior and Insular Affairs be authorized to meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CHANGE OF VOTE

Mr. BYRD of West Virginia. Mr. President, the Hartke amendment to the Miller amendment was defeated by a vote of 31 to 52 on rollcall 215. I voted in the negative. I ask unanimous consent that my vote be changed to a "yea" vote and that the Journal and permanent RECORD so show.

The PRESIDING OFFICER. Without objection, it is so ordered.

## VETERANS DAY ADDRESS BY BILL ALLEY, FORMER OLYMPIC CHAMPION

Mr. MILLER. Mr. President, one of America's finest athletes is Bill Alley, former Olympic champion in the javelin throw.

Now a resident of Morrisville, Vt., and originally from New Jersey, Bill is a graduate of the University of Kansas. His college days brought him into national prominence, and the people of my State of Iowa were privileged to see him in outstanding performances at the annual Drake Relays in Des Moines.

Bill delivered a magnificent message on the occasion of Veterans Day, November 11, 1969—one which everyone should have an opportunity to read because of its meaningfulness.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

STRUGGLE AND FIND HAPPINESS

I would like to tell you one of the most moving sports stories of all time. It began with a boy named Charlie Paddock, back in 1920, who went to a track coach one day and said: "I want to be an Olympic champion. I want to be the fastest sprinter in the world."

"Well, Charlie," the coach told him, "You can if you think you can, but more than that, you will have to work, discipline yourself, live a clean life, and put your faith in God. The secret of becoming a greater sprinter is to develop your legs until they are like pistons. To get this kind of strength in your legs, you have to have it in your heart and in your mind. And when you get it, then you can pull up your knees to your chest and drive like a locomotive on a railroad."

Charlie Paddock did go on to be an Olympic champion and the world's fastest sprinter. His fame brought him many speaking engagements. Once before a group of young people he spoke about what you can do through struggle and hard work. Then he looked about him and said, "Somewhere in this room maybe there is another Olympic champion, but if not in sports, at least in life. It's more important to be a champ in living."

After the speech, a shy little spindly Negro boy came up and announced, "Mr. Paddock, you've done something to me. I would like to be an Olympic champion."

Paddock put his hand on the lad's shoulder and said to him: "Son, you can, if you think you can. Then to that you must add real hard work. Give it all you've got and discipline yourself, and have a lot of faith in God."

And eventually the time came when that boy, whose name was Jesse Owens, won four Olympic championships. And he was asked to make many speeches. Remembering the inspiration he had received from Charlie Paddock, he told one audience of youngsters: "Somewhere in this room there is, I am sure, another Olympic champion, if not in sports at least in life."

And afterwards, a skinny little Negro boy came up to him, shook hands and told him exactly what he himself had told Charlie Paddock many years before. Owens looked at the boy and thought he had never seen a skinnier youngster in his life; indeed it turned out that the boy's nickname was "Bones". But nevertheless, Owens said, "You can if you think you can, if you are willing to struggle, work and believe. Harrison "Bones" Dillard went on to break Jesse Owens Olympic record.

Each of these great athletes struggled to achieve their successes and the happiness that came to them. And of course, all of us must struggle if we wish to receive real happiness. Struggle isn't destructive, it's constructive, and it makes success and happiness all the sweeter.

Harrison Dillard came to my high school in my sophomore year and showed pictures of the 1952 Olympics, I didn't at all think then that my athletic career would unfold as it did, but I can remember very vividly the great crowds and the feelings that I had inside—I wanted to be a great athlete and wanted to participate in the Olympics. I too, wanted to be an Olympic champion.

During the summer of 1960, I was very fortunate in being chosen to represent the United States in the 17th Olympiad. The opportunity to participate in the Olympic games had been my goal for many years, and I looked forward to my trip with much anxiety and anticipation. The pageantry and excitement of this great event were paramount. People from the world over came to watch this great exhibition of athletic prowess. However, the greatest thrills of all did not come from the competition. Thrills of a greater magnitude than one could imagine were prevalent among all in attendance.

As we marched into the stadium for the opening ceremonies, I realized (and I was not alone) how proud I am to be an American. And then as our flag was raised to the top of the standard and our National Anthem played, the team members stood at attention. It seems as though one really never learns to appreciate the "Star Spangled Banner" until one hears it played in a foreign land. We tried to sing the words, but nothing came out. We were choked up inside. Outwardly, tears were falling from the eyes of world-record-holders and some of the greatest athletes were realizing for the first time what it meant to represent the greatest nation in the world.

The competition commenced the following day and continued for two weeks. Each day, and when I was not competing, I would go to the stadium and watch the events. Every jump, every dash, every throw had me on the edge of my seat. At the conclusion of each event, I would look out onto the field and try to recognize the familiar U.S.A. on the shirts of the winners. In some events, we didn't fare well at all, but in the events that we placed, I felt like running onto the field and being the first to congratulate a teammate.

The slogan of the games brought out the point that the greatest achievement is not winning but having the opportunity to compete against one's fellowmen. And so the days went by, and the greatest athletes in the world competed against each other. Win or lose, I am sure they all felt the same.

The closing ceremonies officially ended the competition. Again, the athletes from all over the world marched into the stadium. The flag of each nation was lowered and its National Anthem was played. We then marched out of the stadium and for me the greatest thrill in my life had come to an end. As I walked through the long tunnel leading from the stadium to our village, I had but one thought in mind.—I am proud to be an American.

So never give up struggling in your own life. If you attain your dream, go after another and greater one. In the long run the happiest achievement in this life is making a man out of yourself; and the greatest joy of all is in the struggling to do something really worthwhile. Struggle and happiness are opposite sides of the same coin. As each of us go out into the world in our daily quest for happiness and security, keep in mind a little saying, it is my favorite—If what you did yes-

terday seems great, you've not done much today.

My thanks to each and everyone of you who by serving your country has made is possible for me to have achieved this great love of our country. I want you to personally know that here is a fellow who scorns the activities of the dissenters and the draft card burners, that here is a fellow who says to you—Thanks!

May God bless each and everyone of you.

## ADJOURNMENT TO 9 A.M. TOMORROW

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 9 o'clock tomorrow morning.

The motion was agreed to; and (at 10 o'clock and 10 minutes p.m.) the Senate adjourned until tomorrow, Thursday, December 11, 1969, at 9 a.m.

## NOMINATIONS

Executive nominations received by the Senate December 10 (legislative day of December 9), 1969:

DIPLOMATIC AND FOREIGN SERVICE

The following-named person, now a Foreign Service officer of class 2 and a secretary in the diplomatic service, to be also a Consular Officer of the United States of America:

Thomas D. McKiernan, of Massachusetts.

For appointment as a Foreign Service officer of class 4, a consular officer, and a secretary in the diplomatic service of the United States of America:

Howard K. Walker, of Maryland.

For appointment as a Foreign Service officer of class 5, a consular officer, and a secretary in the diplomatic service of the United States of America:

Robert E. Day, Jr., of Virginia.

For promotion from Foreign Service officers of class 7 to class 6:

Frederick Brenne Bachmann, of the District of Columbia.
Ralph Edwin Bresler, of Ohio.
Hugh D. Camitta, of New York.
Lewis I. Cohen, of New York.
Michael W. Cotter, of Wisconsin.
Jon D. Glassman, of California.
David Crane Halsted, of Vermont.
David Taylor Jones, of Pennsylvania.
Miss Alexandra B. Keith, of New York.
Thomas L. Lauer, of California.
James A. S. Leach, of Iowa.
Elliot Rothenberg, of Minnesota.
Joseph C. Snyder, III, of Connecticut.

For promotion from Foreign Service information officers of class 7 to class 6:

Dennis A. Allred, of Illinois.
Sheldon H. Avenius, Jr., of New York.
Robin A. Berrington, of Ohio.
Russell T. Campbell, of Colorado.
Stephen M. Chaplin, of Hawaii.
Ronald D. Clifton, of Florida.
Miss Margaret A. Eubank, of Maryland.
Richard B. Fitz, of California.
Ludlow Flower, III, of California.
John Frankenstein, of the District of Columbia.
Wayne F. Gledhill, of Utah.
Frederick E. V. LaSor, of California.
Miss Marilyn McAfee, of Pennsylvania.
Robert E. McDowell, Jr., of New York.
Miss Caroline V. Meirs, of New Jersey.
H. James Menard, of California.
Robert W. Proctor, of New Mexico.
Christopher W. S. Ross, of the District of Columia.
Miss Janet E. Ruben, of Pennsylvania.
Michael R. Saks, of Indiana.
E. David Seal, of Missouri.
Jack A. Sears, of South Dakota.
John Scott Williams, of Virginia.
Michael M. Yaki, of California.

For promotion from Foreign Service officers of class 8 to class 7:

Morton R. Dworken, Jr., of Ohio.
Hartford Jennings, of Ohio.
George L. Knox, Jr., of Alabama.
Nicholas R. Lang, of New York.
Harlan Y. M. Lee, of Hawaii.

For promotion from Foreign Service information officers of class 8 to class 7:

Raymond D. Anderson, Jr., of the District of Columbia.
Miss Jan Carol Berris, of Michigan.

Miss Anne D. Jillson, of Connecticut.
David I. Kemp, of New York.
Howard H. Lange, of Washington.
John Egan McAteer, of West Virginia.
Alan R. McKee, of New Hampshire.
Mark E. Mohr, of New Jersey.
Anthony Carson Perkins, of the District of Columbia.
Mark J. Platt, of Connecticut.
Craig Emerson Richardson, of Ohio.
William van B. Robertson, Jr., of California.
Richard W. Ruble, Jr., of California.
Paul I. Schlamm, of New York.
Raymond F. Smith, of Pennsylvania.
Douglas K. Stevens, Jr., of Florida.
William H. Twaddell, of Maryland.
Miss Mary von Briesen, of Massachusetts.
Frank Joseph Zambito, Jr., of Florida.

For appointment as Foreign Service information officers of class 7, consular officers, and secretaries in the diplomatic service of the United States of America:

John L. G. Archibald, of Massachusetts.
Thomas W. Switzer, of Colorado.

For appointment as Foreign Service officers of class 8, consular officers, and secretaries in the diplomatic service of the United States of America:

Donald Lee Field, Jr., of California.
Lawrence Mrashall Grossman, of Nebraska.
Albert Lee Halff, of Texas.
David Ellis Henderson, of Illinois.
Robert Taylor, of Texas.

Foreign Service reserve officer to be a consular officer of the United States of America:

Charles E. Behrens, of Pennsylvania.

Foreign Service reserve officers to be consular officers and secretaries in the diplomatic service of the United States of America:

Raymond J. Albright, of Maryland.
Terry T. Baldwin, of Virginia.
James Taylor Blanton, of California.
Richard A. Cleveland, of Pennsylvania.
Jacques Cook, of the District of Columbia.
Christopher D. Costanzo, of the District of Columbia.
Roy G. Davis, of Ohio.
José L. Fernández, of Puerto Rico.
Joseph P. Forry, of Massachusetts.
William J. Galbraith, Jr., of Virginia.
Frederick P. Hitz, of Virginia.
Naran S. Ivanchukov, of New Jersey.
Samuel L. Jefferson, of the District of Columbia.
Miss Patricia Ann Langford, of Mississippi.
Edward R. McGivern, of Maryland.
James F. Myrick, of Illinois.
Robert L. Padgett, of Washington.
Robert K. Sharkey, of the District of Columbia.
Miss Marguerite M. Simonson, of Pennsylvania.
Harry S. Slifer, Jr., of Michigan.
Osborn T. Smallwood, of the District of Columbia.
John H. Trattner, of Virginia.
Mrs. Gerry Van der Heuvel, of Virginia.
James E. Walker, of New York.
James H. Yellin, of Pennsylvania.

Foreign Service staff officers to be consular officers of the United States of America:

Joseph N. Alexander, of North Carolina.
Miss Grace M. Glasgow, of Ohio.
Russell L. Keeton, of California.
Richard E. Kibel, of Ohio.
John M. Long, of Maryland.
Samuel E. Lupo, of North Carolina.
Miss Dolores J. Mann, of Ohio.
David W. McCoy, of California.
James W. McWilliams, of Virginia.
Charles E. Pedonti, of Massachusetts.
Richard A. Ronollo, of Pennsylvania.
L. Benjamin Sargent, Jr., of Wisconsin.
Carroll L. Simmons, of Georgia.
Mitchell Styma, of Ohio.

IN THE COAST GUARD

The following-named officers of the Coast Guard for promotion to the grade of lieutenant commander:

David W. Hiller
Nils Linfors, Jr.
Leon Z. Katcharian
Bruce W. Thompson
Joseph J. O'Connell
Franklin B. Taylor
Roy L. Foote
Harold J. Gellert
Richard J. Kiessel
John G. Denninger, Jr.
Lawrence M. Schilling
David H. Whitten
Jon P. Ryan
Lance A. Eagan
Hugh L. Thomas, Jr.
William J. Wallace, Jr.
Harold L Bonnet
Arthur W. Mergner, Jr.
Elmer Sorensen, Jr.
Frederick A. Kelley
Raymond D. Bland
James F. Greene, Jr.
Joseph J. Smith
Peter C. Hennings
Walter M. Coburn
Henry B. Traver
Wade M. Moncrief, Jr.
David S. Gemmell
Carl H. Burkhart
Neal Mahan
Glenn E. Haines
Timothy G. McKinna
Peter T. Muth
Richard E. Shrum
Michael O. Murtagh
Joseph L. Crowe, Jr.
Cary R. Hall
David Corson
Anthony J. Soltys
William H. Roth
William C. Heming
James A. Umberger
Kwang Ping Hau
Albert F. Baker
William S. Murray
George E. Mason
Norman H. Huff
Don M. Keehn
Thomas D. Smith
Raymond J. Houttekier
David K. Carey
Louis M Casale
Peter M. Bernstein
Wayne P. Stevens
Harry N. Hutchins, III
Thomas W. Watkins, III
James F. Sanders
Hugh W. Nabors
Bly R. Elder
Gary L. Rowe
Branson R. Epler
Stephen L. Richmond
Richard L. Kaufman
Theodore H. Hofer
John K. Andrews
Alan B. Pell
Cyrus E. Potts
Billy D. Lovern
John E. Streeper
Charles J. Niotke
Billy G. Cunningham
Alfred T. Miles
Harold T. Sherman
Heloma L. Goforth
Edward G. O'Keefe
James R. Walsh

The following named Reserve officer to be a permanent commissioned officer in the Coast Guard in the grade of lieutenant commander:

Paul L. Milligan

The following-named Reserve officers to be permanent commissioned officer in the Coast Guard in the grade of lieutenant:

Theodore M. Nutting
Joseph O. Fullmer

## CONFIRMATIONS

Executive nominations confirmed by the Senate December 10 (legislative day of December 9), 1969:

U.S. CIRCUIT JUDGE

Henry L. Brooks, of Kentucky, to be U.S. circuit judge for the sixth circuit.

U.S. DISTRICT JUDGES

David L. Middlebrooks, Jr., of Florida, to be U.S. district judge for the northern district of Florida.

Alfred T. Goodwin, of Oregon, to be U.S. district judge for the district of Oregon.

R. Dixon Herman, of Pennsylvania, to be U.S. district judge for the middle district of Pennsylvania.

Cristobal C. Duenas, of Guam, to be judge of the district court of Guam for the term of 8 years.

U.S. ATTORNEY

Robert W. Rust, of Florida, to be U.S. attorney for the southern district of Florida for the term of 4 years.

U.S. MARSHAL

Harry Connolly, of Oklahoma, to be U.S. marshal for the northern district of Oklahoma for the term of 4 years.

LAW ENFORCEMENT ASSISTANCE

Clarence M. Coster, of Minnesota, to be an Associate Administrator of Law Enforcement Assistance.

U.S. PATENT OFFICE

John Henry Schneider, of Virginia, to be an Assistant Commissioner of Patents.

# EXTENSIONS OF REMARKS

## ALL KINDS OF PEOPLE CAN WORK TOGETHER

### HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. BURTON of California. Mr. Speaker, on October 26, 1969, the San Francisco Examiner contained an article entitled "All Kinds of People Can Work Together" concerning the firm of Fred Meyer of California, and the men and women who make up that firm.

It was a warm story, a story of the American ideal at its brightest and best. It was the story of Fred Meyer himself, but it was also the story of everyone who is a part of this unique fireplace accessory firm in San Francisco's Potrero District.

It is the kind of thing that can happen in San Francisco and be taken for granted by all who are directly concerned.

I am taking the liberty of placing the full text of the article in the RECORD at this time, to share it with my colleagues and to give special recognition to the men and women of Fred Meyer of California for whom humanity and decency and democracy are not words but a way of life:

[From the San Francisco Examiner, Oct. 26. 1969]

ALL KINDS OF PEOPLE CAN WORK TOGETHER

(By Jim Harwood)

After a visit to Fred Meyer's little fire-screen factory, you wonder where the rest of the country went wrong.

Because a lot of American industry seems to have lost—or never latched onto—what Fred and his 80 employees take for granted: People can work together without a lot of hassle between races, between management or between male and female.

There are no real clues at Fred Meyer of California on Potrero as to why this is so. But there's considerable evidence that it is so.

First, there's Meyer himself, a semibearded Jewish leprechaun who goes around dropping lines not usually heard from company presidents. "I might be a Communist if I thought Communism would work. Let everybody own everything. But Communism doesn't work—it's too afraid of freedom. So I'm not a Communist."

Although a lot of his liberal ideas would rattle the china at the Commonwealth Club, Meyer actually makes a fairly good exhibit for the capitalistic system. Fleeing the Nazis who murdered his parents in Hamburg, Meyer arrived in New York in 1938 with his wife Ellen. As in all good immigrant success stories, he only had $8.50 in his pocket.

Drifting to California during the war ("I had to go west since on the East Coast we Germans were considered 'enemy aliens.' But out here, the Japanese were the 'enemy' and nobody worried about me"), Meyer fell into selling steel fireplace grates and andirons, two items he knew nothing about.

Joined by several boyhood friends from Hamburg who are still with him, Meyer formed his manufacturing company in 1948 and took off in a Hudson on a national sales tour, driving at night, selling by day and often sleeping in the car.

Today, Fred Meyer of California is among the top six in the fireplace accessory industry, averaging sales of 100,000 screens a year and 60,000 accessories. And Fred Meyer is presumably a moderately wealthy man.

A lot of his employees have been with him the whole 20 years. And it's out in the plant where a visitor finds more evidence that people don't have to claw to accomplish something.

The tour is led by the plant production chief, Hank Morioko, a Japanese who's been with Meyer for 15 years. "When I got married, he bought champagne for all my guests. Four hundred people." He's a great guy." Morioko notes that all employees are members of Local 128 of the Metal Polishers union, but there's never been a strike or even an arbitration case

The employee names roll by. Gus Gimarelli and Joe Rio and Robert Rios and Ernesto Fernandez. A Chicano in charge of this. A Black in charge of that. An Oriental running something else. And there's Millie Robinson, 21 years with the company, boss of the paint department

At big corporations they hire labor experts who go around hanging labels like "fully integrated work force" on such situations and try to figure out how they come into being.

At the little factory on Potrero St., nobody worries about it. "We never set out to hire any particular kind of people," says Fred Meyer. "They all just kind of wandered in here."

## EUGE POETA

### HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

*Wednesday, December 10, 1969*

Mr. METCALF. Mr. President, Congressman PODELL of New York, on May 20, 1968, inserted in the CONGRESSIONAL RECORD the poem of our colleague, the senior Senator from Minnesota, GENE MCCARTHY, entitled "Three Bad Signs." This poem has now been awarded a prize by the National Endowment for the Arts. This award confirms Congressman PODELL'S evaluation of Senator MCCARTHY as one who "belongs in the front rank of American lyric poets."

As the Senator from Idaho, Mr. CHURCH, has said, there is no record of another Senator achieving this distinction. For most of us poetry is not our cup of tea.

Senators have written erudite tomes, economic studies, historical reminiscences, essays, doggerel, but never has a Senator earned a prize for poetry.

In achieving distinction as a genuine poet, Senator MCCARTHY can bask in the opinion of Oliver Wendell Holmes who said:

There was never a poet who had not the heart in the right place.

The poem, "Three Bad Signs" inserted in the RECORD by Congressman PODELL and the poem "Ares" called to our attention by Senator CHURCH, are genuine poetic accomplishments.

It used to be that poetry had to rhyme and scan. It was Dorothy Parker who declared:

FIGHTING WORDS

Say my love is easy had,
Say I'm bitten raw with pride,
Say I am too often sad—
Still behold me at your side.
Say I'm neither brave nor young,
Say I woo and coddle care.
Say the devil touched my tongue—
Still you have heart to wear.
But say my verses do not scan
And I get me another man!

The poetry of MCCARTHY is not tnat of the scanning and rhyming variety. It is the modern poetry of *T. S. Eliot*, E. E. Cummings, Marianne Moore, and others. It is of an excellence entitled to be considered with these paragons.

Therefore, I was disturbed that the Washington Star commented on MCCARTHY'S prize-winning poetry as follows:

POET MCCARTHY

The National Endowment for the Arts has awarded a $500 prize to Senator Eugene McCarthy for his poem, "Three Bad Signs." This confirms a long-held suspicion of ours that McCarthy is better at being a poet than he is at the other trades he's dabbled in, such as baseball and politics.

It has been reported that McCarthy, on being informed of his windfall, express the hope that politicians would now stop criticizing his poetry. That seems fair enough. Only those with some knowledge of poetry are properly qualified to comment on the work of a poet.

By the same token, it would seem reasonable to suggest that Poet McCarthy should stop sounding off on the work of professional politicians.

I wonder what test the Evening Star would put on professional politicians. GENE MCCARTHY has won five elections to Congress and two elections to the U.S. Senate. That is playing in the professional league for quite awhile. In addition, he has made a substantial showing in the presidential league. If not being professional means not winning a presidential nomination then there are few professional politicians. If being a professional means success in the highest professional challenge, then GENE MCCARTHY meets the test.

As only an amateur in the poetry business, I salute Senator McCARTHY.

As one professional politician to another, I salute a pro for his achievement in an area in which most of us are dilletantes.

Euge Poeta.

## LETTERS TO PARIS

### HON. DURWARD G. HALL

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. HALL. Mr. Speaker, during the week of the 24th of November, I took great pride in calling the attention of this body to the "We Love America Week," which blossomed in Joplin, Mo., and spread to many neighboring cities and States.

The observance was highly successful, attested to by the fact that more than 73,000 red, white, and blue armbands were distributed and worn by the people of the area.

Now, the city of Neosho, Mo., has added a bit more luster, to the already shining example set by the patriotic Americans of southwest Missouri.

The Optimist Club of the city of Neosho in Newton County, has had a quantity of letters printed to be distributed to the Neosho area residents. The letter is addressed to the North Vietnam delegation to the Paris peace talks. The letter pledges support to the American peace effort and requests open inspection of the North Vietnam prison camps by the International Red Cross.

The individuals who live in the area, have been requested to sign and mail them to Paris. It is hoped by the Neosho, Mo., Optimist Club, that hundreds of these letters will be mailed.

Mr. Speaker, I commend these people on their resourcefulness and offer a copy of the letter, to be read by the Members of this body.

The letter follows:

Mr. XUAN THUY,
*North Vietnam Delegation, Paris Peace Talks, Paris, France.*

DEAR SIR: I am just an average American who has become concerned over the conditions of the Vietnam War. Like any decent American or human being, I desire the war to be over, but I believe in a just and honorable peace for all men, both North and South. Therefore, I pledge my support for our valiant American effort to bring peace in Vietnam as well as the rest of the world. I also pledge my support of the policies of the past administration of President Johnson and the present administration of President Nixon.

There is one thing that bothers me extremely, and that is the condition of our American prisoners in North Vietnam. I appeal to your basic goodness as a member of the human race to open the prison camps for inspection by the International Red Cross. Also, I further appeal to you as a fellow human being to release our prisoners as a measure of good will. Please, sir, make an effort for the benefit of the good people of both America and Vietnam to ease the tragic conditions of this terrible war.

Sincerely,

## YOUNG PEOPLE DO UNDERSTAND ISSUES OF TODAY

### HON. PAUL J. FANNIN

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

*Wednesday, December 10, 1969*

Mr. FANNIN. Mr. President, because of the work on the tax bill that has taken us far beyond a normal adjournment date, many of us have been forced to cancel speaking engagements of long standing that were made months ago when we thought surely this Congress would conclude its business at a reasonable time.

One of the addresses which I was scheduled to make was at the Flowing Wells High School in Tucson, Ariz. Unfortunately, I was forced to cancel that speech, but the patriotic program was held anyway and a friend read the speech in my place.

Shortly afterward, I received a copy of an "answer" to my remarks by Miss Stephanie Daniel, a student at Flowing Wells High School. Miss Daniel has, I believe, demonstrated an extraordinary and lucid understanding of the problems facing America. Her statement is particularly welcome because we hear so much about certain small irresponsible elements in today's society of young people.

I was impressed with Miss Daniel's presentation. I feel other Members of the Senate will share my appreciation for her statement and I ask unanimous consent that her remarks be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

AN ANSWER TO SENATOR FANNIN

(By S. Daniel)

Senator Fannin, honored guests, Dr. Yoder, Mr. Meneley, faculty, and the Student Body: On behalf of Flowing Wells High School, we thank you for your provocative words, your philosophy and your challenge.

We are a restless generation, a generation in search of true knowledge. We listen to your words of wisdom, your words of experience. And with your words and your suggestions, we will attempt to guide the United States toward a more complete, successful and accomplished society. The time is now for positive thinking and constructive action on the part of our nations youth. If we are to survive, if we are to continue in the greatness of our Founding Fathers, if we are going to be the World Leader, if we are to have peace at home and abroad, we must bind the wounds of the Generation Gap, and accept the guiding hand of all generations. We will need your help, you the "older" generation. And we will need your patience, for sometimes we appear too eager, too aggressive, and too thoughtless. But our youthfulness cries out for action now. Action to rebuild our cities. Action to eradicate air pollution, action to feed the hungry, and action to find jobs for the jobless.

We know these programs take time. And let me also say to those who would destroy the nation with lawlessness, our nation was built on laws and rules of conduct, and without the protective hand of Law and lawmakers, our nation's future is one of anarchy and total destruction. Little is gained, and much is lost when we ignore the property rights of every individual, and take up the rioter's call of "Change through destruction". The many problems of our society can be healed, but must be healed, with laws to abide by and strong men to guide us.

We hear your challenge, Senator Fannin. We answer your call for understanding between peoples and nations. As the class of 1969 moves into the '70's with footprints small in size, we realize that one day our footprints will be the giant steps that will cure cancer, stop the common cold, rebuild our cities, make people laugh again, smile at one another, and say, "Hi brother", what can I do for you today?", and really mean it! Let us from this moment on, move into a new era of greatness for our country. Let the 1970's be remembered as the turning point in American History. A turning point from want, from destruction, from suspicion, from gaps between ages and races, and a move towards a century of goodness, love, peace and understanding. We thank you Senator Fannin, for "lighting the first candle for us". Now it is up to my generation to take up the light, and shine ahead and up, instead of behind and down.

Thank you.

## EDGAR ALLEN POE

### HON. HALE BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. BOGGS. Mr. Speaker, the New Orleans Times Picayune recently published a well-deserved tribute to its Washington correspondent, my good friend, Edgar Allen Poe.

Needless to say, it is unusual for a newspaper to publish a tribute to one of its own reporters, but Edgar Poe is no ordinary reporter. He is a professional journalist with almost 40 years of outstanding reporting experience.

Because of his ability and warm disposition, Edgar Poe's colleagues have elected him to offices in numerous professional organizations' including the White House Correspondents Association, and Sigma Delta Chi journalism fraternity.

For these reasons, I am inserting in the RECORD the following article by Craddock Goins and calling it to the attention of my colleagues:

POE'S CAREER IS LIVING PROOF NICE GUYS DON'T FINISH LAST

(By Craddock Goins)

(NOTE.—This being the Christmas season, publication of a newsman's rhapsody about a fellow newspaperman (particularly when the latter happens to be our favorite Washington correspondent) seems in order. Mr. Goins has known Mr. Poe in New Orleans, in Jackson and in Washington when both were writing news in those cities.)

WASHINGTON.—Perhaps no paper has had superior capital coverage more consistently in this century than The New Orleans Times-Picayune. That is believed by many who have known the late Paul Wooton and the unassuming chap who now walks his beat—one Edgar Allen Poe.

In his 22 years here Poe has been up front where the action is and the pressure runs high. He lists himself on the press-gallery roster as Edgar Poe, refers to himself as plain Ed and leaves the thought that he is just another Poe boy trying to get along.

Poe had to walk high and fast to match Wooton's strides. That spectacular man had kept pace with the period's public giants, including founding fathers of the National Press Club and the prestigious Gridiron Club, to rate high favor in the White House.

Wooton was probably the only newsman to achieve family-friend status with the presidency. That was won by his empathy for a child in tears. This child had fallen in front of her parents' apartment. As Wooton helped her up, she said her name was Margaret and "my father—boo hoo—is Senator Troo—boo hoo hoo—Trooman!"

Wooton's kindness to Margaret was so appreciated that Truman's ear was always ready when he needed information not available elsewhere. The Times-Picayune had status position on the executive's reading table.

"NICEST MAN"

Before going to Washington, in 1947, Edgar Poe served in The Times-Picayune's Mississippi bureau. Ten years in Jackson won him esteem for integrity and graciousness. Washington Post's Jack Gould described him in these words:

"Edgar Allen Poe was once described by his wife as 'the nicest man I ever met.' She's right. It was a privilege to work with Ed in New Orleans, Baton Rouge and Jackson, and see him help others, particularly other newsmen. He is a man of his word, a great reporter and as respected in Washington as he was there."

Mississippi's Secretary of State Heber Ladner backs that thought: "It is appropriate that you do a profile on my long time personal friend Edgar Poe. I am glad to have the opportunity to endorse his contributions in journalism to our state, the South and the nation. Ed exemplifies the highest ideals, always sticking to truth and fact, refusing to take statements out of context to mislead the public. He reports objectively without inflicting injury."

Poe is a member of the Gridiron Club, treasurer of the White House Correspondents Association and a past president of the Washington group of Sigma Delta Chi, a journalistic body.

As a member of the Senate and House Standing Committee of Correspondents governing admission to the galleries, Poe resisted a step to bar Soviet Russia's Tass correspondent in respect for America's free-speech traditions.

FAIRNESS, ACCURACY

Two senators who have known Poe from early days are Mississippi's James O. Eastland and Louisiana's Allen J. Ellender. Ellender knew Poe from stormy days when the Senator was speaker of the Louisiana House of Representatives and believes he is "a credit to journalism, very personable, trustworthy and, unlike some Washington commentators, is not prone to exaggerate. His reputation is based upon close attention to facts. He views thorny problems incisively while presenting an objective view."

Senator Eastland could recall Poe's record from early Mississippi days: "Ed Poe is one of the finer newspapermen in Washington. He had the ability to dig out stories where other reporters often miss them. You can count on him to make an in-depth treatment of any story. His reputation for fairness and accuracy is unequalled. I am proud to call Ed my friend."

A Poe story that drew admiration from Georgia's Senator Herman Talmadge was a review of Senator Ellender's long public career. In asking for unanimous consent to have that story published in The Congressional Record, Talmadge said: "One of the most respected newsmen in the nation's capitol is Edgar Allen Poe. He writes with balance and insight and is a credit to New Orleans and the South."

Louisiana's Senator Russell Long believes Poe is "one of the fairest, most conscientious men I have ever known. He has a tough job and he does it well. He has the ability to write and the ability to convey, an asset very important to the American republic. Ed is truly outstanding."

WAR CORRESPONDENT

One knowing Poe longest is Louisiana's First District Rep. F. Edward Hébert. He remembers when Poe was a local staffer on The Times-Picayune while Hébert was a New Orleans State deskman. "Ed Poe is one of the nicest guys I ever met," he said. "His compassion is something foreign to many newshounds. He is a mixture of good and accurate reporting and human understanding. Will Rogers said, 'I never met a man I didn't like.' Edgar could say he never met a man who didn't like him."

A tribute that touched Poe very much was never intended for publication. He received it in May, 1968, from Mrs. Ruth Lloyd Miller of Jennings, La. Congratulating him for an award from Alabama University "for outstanding political and legislative reporting," she added "a belated thank-you for something you did for me 23 years ago. It was your radio message from the USS Mississippi in Tokyo Bay that brought the first word that my husband, who had been missing, was alive."

Poe had taken time out from his Mississippi bureau assignment to be a war correspondent. He steamed from Okinawa to the Yokoshuba Naval Base to cover the Japanese surrender on the USS Missouri. His Pacific reporting won commendation from Navy Secretary James Forrestal.

Poe joined The Times-Picayune in 1930 after experience on a Birmingham newspaper. In his Deep South days, he covered historic political events: the campaign of the Longs, Theodore G. Bilbo, Pat Harrison, Hugh L. White, Martin Sennett Conner, Jimmy Morrison, Dudley LeBlanc and others. He was born in Jasper, Ala., first met printer's ink on The Mountain Eagle, a weekly published by his grandfather, James R. Gunter. He is married to the former Frances Margaret Harwood. They have two sons, Edgar A. Jr., of Washington and Thomas L., of McLean, Va.

---

## PENNSYLVANIA SUPPORT FOR REPEAL OF UTILITY EXEMPTION FROM THE TRUTH-IN-LENDING ACT

---

## HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

*Wednesday, December 10, 1969*

Mr. METCALF. Mr. President, on October 13, Senator SCOTT and I introduced S. 3018, to repeal the unfair exemption from the provisions of the Truth-in-Lending Act now enjoyed by utilities. As I pointed out in my introductory remarks, this exemption was never discussed in hearings on truth in lending, but rather was added to the legislation in conference, in acquiescence to the powerful utility lobby.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a recent front-page editorial from Building and Realty Record, a Pennsylvania publication, objecting to this discriminatory treatment of the oil heat and other industries and supporting repeal of that exemption as we have proposed.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ELECTRIC & GAS UTILITIES

(By S. Beryl Lush)

The electric and gas utilities are exempt from the Truth-in-Lending act.

The oil heat industry is not.

As the law now stands it penalizes the independent businessman—and favors the utilities.

Truth-in-lending legislation was before the Congress for many years prior to passage of the Consumers Credit Protection act of 1968. When the bill was passed they snuck in a clause whereby the utilities were exempt.

The reason is obvious! Most people believe that when they get the bill from the electric or gas company they get a discount when they pay within 20 days.

Thus a bill for $4.42 carries an imaginary discount if paid within 20 days.

This would make the actual cost $4.10 and not $4.42.

But what are the facts?

When you are billed a net and a gross amount depending upon whether the bill is paid before or after a specific date, it is not a discount from the bill for prompt payment as many people believe.

The amount you owe is really the net sum.

The Gross Sum is a Charge for Credit!

Thus the 32c charge in this case makes an interest rate of 142% per annum.

No wonder the utilities fought tooth and nail not to be included in "truth in lending."

If the truth were known the people would be justly disturbed.

The Utility companies run very little risk on late bills, because no one wants to risk having the service cut off.

We know of no other business that has such a club to hold over the head of their slow paying customers.

Where there are late payment penalties they would be regulated under State law, but very little attention is paid to the subterfuge of an imaginary discount which carries a hidden penalty of interest at the rate of 142%.

A bill has now been introduced to repeal the exemption of utilities—but the chances are good that the utility lobby will let it die with the Committee on Banking and Currency.

Utilities are supposed to be regulated by State agencies and the rates are approved by these agencies.

But this approval does not call for penalty allowances. The utilities get around that by billing gross and net.

They have no right to bill gross, as the net charge is the actual amount due.

The difference between the gross and net is the interest for delayed payment and, assuming they are entitled to some interest, how by the stretch of imagination can they have the nerve to charge 142%?

And no regulation is in effect to hinder this charge.

In addition, the poor consumer relishes the idea that he is getting a discount when in fact he is getting nothing.

We have nothing against our utilities. In fact we own stock in them. But when an injustice appears our duty is to reveal it.

---

## GUARANTEED ANNUAL INCOME

---

## HON. THOMAS S. KLEPPE

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. KLEPPE. Mr. Speaker, I want to share with my colleagues a letter I received from a constituent. This letter again, I think, exemplifies the fact that normal, every-day people can probably express themselves better than the rest of us on a subject of vital importance to all of us. In this instance, Mrs. Weyrauch has said so well what she and her husband believe and think about the pros-

pects of a guaranteed annual income of $5,500. As for me, I find it most difficult to argue with her. I commend her for her very brief and exacting explanation. I particularly call your attention to her remarks regarding work:

TIOGA, N. DAK.,
*December 3, 1959.*

Mr. KLEPPE: I have just finished listening to the Huntley-Brinkley report on TV. I am writing you regarding the demonstration in progress urging Mr. Nixon to pass legislation guaranteeing everyone a minimum income of $5,500 yearly, plus free food stamps. What is this country coming to, that people have the idea that someone else owes them a living? Have they not heard of an old-fashioned project called work? My husband listened to this report on TV tonight, and made the remark that if the government would put out a guarantee of $5,500, why should he work? I believe a huge majority of people have this same idea. I do not mean to say that people should go hungry, as a child, I know my parents got commodities from the government; sacks of potatoes, onions, oranges, et. We did not go hungry. Nowadays, I see people using food stamps to buy steaks, frozen TV dinners and fresh coconuts, for example, while I buy hamburger and macaroni to feed my family. As for the housing a lot of these people live in, granted it is terrible, but do they try to improve it? Soap and water is cheap, and a can of paint goes a long ways if a person has the ambition to use it. My family lives in a house that two rooms were built by homesteaders to this state. It is clean, warm and comfortable. Even if you should provide the majority of these people new housing, would they furnish upkeep on it, or say in 10 years, would it look exactly the way the tenements do now? It is very discouraging to work for a living, and then hand over part of it to someone else who is too lazy to hold a job. Anyone can have hard luck, due to illness or accident—and temporarily need a helping hand. These are not the people who are demonstrating and constantly demanding more for nothing. These are the people who make a career out of being lazy leeches who want someone else to support them.

I urge you to do something in Congress to clean up this welfare mess.

Sincerely,

MRS. FRANK WEYRAUCH.

## A GREAT PATRIOT

### HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. CHAPPELL. Mr. Speaker, we are sometimes prone to think of too many Americans as being self-seeking; to feel that too many distain our Government, and that the love and respect of the very symbol of our liberty—the flag—has been too often trampled underfoot.

There is an opposite side to this picture, Mr. Speaker. This brighter side is epitomized by a great patriot from my own hometown in Ocala. I speak of Mr. Herb Romines, who 21 years ago as he traveled about Florida, suddenly realized how very few flags were flying and determined to do something about it.

Since that day, 21 years ago, Mr. Romines has personally donated 386 flag poles in Florida, from Miami to Tallahassee. Not content with donating the flag poles, Mr. Romines has personally helped in the actual installation of the poles.

I know the various schools, Little League ball clubs, and the many civic and fraternal organizations which have received these flag poles, will join with me in paying tribute to Herb Romines as a great and truly patriotic American.

## TRIBUTE TO DAVID R. COKER

### HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

*Wednesday, December 10, 1969*

Mr. THURMOND. Mr. President, a great South Carolinian was honored recently, and I would like to make note of this occasion. Coker Life Science Building, located on the University of South Carolina campus, was named in honor of Mr. David R. Coker, one of the finest citizens our State has produced. The dedication remarks were made by Hon. R. Beverley Herbert, Sr., an able lawyer from Columbia. The remarks adeptly portray Mr. Coker as the type of man who makes this country great.

Mr. David Coker was an able and courageous man who contributed greatly to the progress of South Carolina and the Nation. Members of his family are equally distinguished. He married the daughter of the Honorable Daniel Roper, who served as Secretary of Commerce under President Franklin D. Roosevelt. His son, Robert R. Coker, is one of the foremost plant breeders in the country, and an estimable and highly esteemed citizen. His other children and his grandchildren are also talented and gifted citizens.

Mr. David R. Coker is a man whom we in South Carolina and the South held in high esteem and admiration, and are pleased that he was our own. He will be long remembered as a distinguished citizen who rendered great service to his State and Nation. During his lifetime, I was honored to know him and to claim him as a friend. I am also proud to claim the friendship of his distinguished son, Robert R. Coker, and of other members of the Coker family.

Mr. President, I ask unanimous consent that the remarks by Mr. Herbert eulogizing Mr. David Coker at the dedication ceremony, and those of Mr. Robert Coker in response, be included in the Extensions of Remarks.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

COKER LIFE SCIENCE BUILDING

(Remarks of R. B. Herbert, September 1969)

We are met here today to name and dedicate this splendid and useful building. It is named Coker Life Science Building in honor of David R. Coker who was a graduate of this University in 1891 and was a trustee of the University from 1911 until his death in 1938.

He was Chairman of the Board at the time of his death.

The Board of Trustees and the President are to be congratulated on their honoring one of its greatest alumni and a truly great man and at the same time of honoring and perpetuating the name of the Coker family of which David R. Coker was a member. The Coker family and David R. Coker believed in South Carolina and have helped to make it a great State, and this University does well to perpetuate their name and example. I have sometimes wondered if we sufficiently appreciate and honor our home people. The Cokers have been remarkable for many splendid qualities, and one of the most notable is that they have found in South Carolina the conditions and products they needed for success, and it is therefore peculiarly appropriate that their name should be honored in their State.

David R. Coker was the son of Major James Lide Coker of Hartsville, who, when I came to South Carolina seventy years ago, was known as the great man of the PeeDee. Although terribly wounded and left a cripple by the Civil War and living in a country that was left prostate by the War, Major Coker built a career that any man might envy. He became a highly successful trader and farmer. He raised a family of distinguished children. He helped his oldest son, James Lide Coker, Jr., found Sonoco Products, one of the great corporations of America. He helped his second son, David R. Coker, develop the Coker Seed business, and he helped his third son, William C. Coker, to become the great botanist of the University of North Carolina. He built a railroad into Hartsville, and he founded and endowed Coker College—some achievements for a man left a cripple in a desolate country. Perhaps greater than any or all of these and more important was Major Coker, the man. Countless people have been influenced for good by him and by people who he influenced. If I may say a personal word, my old friend Judge Woods, the greatest man I ever knew, used to talk more about Major Coker than anyone else. He told me the most important things any of us do are not some achievements on some great occasion but are things we do as a matter of course, the standards we set from day to day and he cited Major Coker.

David R. Coker was the second son of Major Coker. After he graduated at this College in 1891, he clerked for a time in his father's store and became a humble farmer and learned the problems of the farmer and cotton grower. He learned as tens of thousands of other farmers had done how hard it was for our farmers to make a living, the small yield, the short staple and poor price of the crop and he set out to do something about it. Let us consider for a moment the courage of this man who at the turn of the century was starting out to grow a better product for a better price. He relied only on intelligence and hard work and endless care in his seed breeding experiments. He had not long been at his work when he was faced with a crisis. An invader more ruthless than Sherman's Army crossed the Rio Grande River without sound of trumpet or beat of drum and came steadily northward and eastward destroying the South's great money crop as it came—the Mexican boll weevil. It is doubtful if any agricultural people ever faced such complete destruction of their money crop. The weevil came at the rate of about fifty miles per year, and I well remember that the Governor of South Carolina and associates visited the boll weevil area and came back and reported they traveled a whole day and did not see a single cotton bloom.

What did David Coker do? Did he give up as many thousands did? Not only did he not give up, he redoubled his efforts. The plight of the Southern cotton planter became to him the plight of David R. Coker and he risked his all. He not only continued to improve his seed, to grow a tougher longer staple, a tougher boll, but he circulated information in every way he could how to plant and grow cotton and poison boll weevils.

Then came on top of the boll weevil the depression years and bank failures, and Dave Coker's brother, J. L. Coker, Jr., in true Coker fashion, knowing his difficulties came to him and said "When you go broke, I go broke."

There is no more dramatic story in America than how he strove and he won. When he started his work, the staple South Carolina was growing was less than an inch long; today 90 per cent of it is over an inch long. The yield than was 159 pounds of lint cotton per acre; today by the last Clemson report,

it is 443 pounds, nearly three times as much and David R. Coker is the man who wrought the change.

The University of North Carolina Press has published a book entitled "The Cokers of Carolina" by Mr. Simpson. Two of the Coker family were eminent professors at that University. I wish that book could be made required reading in our schools in South Carolina. It is a good book. I do not find but one thing in it I would change. It says in effect the great success of the Cokers has been due to fair dealing and technical skill. I would add as a third—invincible courage. They like Columbus "sail on" when lesser men stop.

David Coker was a great man and his widow, who we are fortunate to have with us today, is a great lady. Every measurement I can put on Dave Coker gives but one answer—greatness. In an excellent paper about him, Mr. A. L. M. Wiggins quotes Dr. Douglas Freeman who wrote the biographies of George Washington and General Lee and knew greatness when he saw it, he said David R. Coker "was one of the half-dozen inately great men I ever had the honor of knowing." As long as South Carolina continues to produce such men and the University keeps their example before our people, we shall have a great State. It is a splendid thing that this building carries his name.

Having been privileged to know Mr. David Coker and having read much about what he did and said, I have asked myself wherein his greatness lay.

His greatness lay in his consuming passion to lift the South Carolina and Southern farmer out of the drab poverty-stricken life he had been leading and set him on the high road to prosperity and happiness. He had proved to himself it could be done and he wanted to give it to the world. The great heart of this truly great man beat for his fellow man.

I am sure he must have been internally a very happy man because he was being used for a very great purpose.

This University could not possibly do better than to hold up his example to her people.

---

REMARKS OF ROBERT R. COKER AT DEDICATION CEREMONIES OF THE DAVID R. COKER LIFE SCIENCES BUILDING, UNIVERSITY OF SOUTH CAROLINA, COLUMBIA, S.C., SEPTEMBER 9, 1969

Mr. Herbert, Chairman Osborne and members of the Board of Trustees, President Jones, distinguished guests, and ladies and gentlemen: For myself and the other children of David R. Coker; for Mrs. May Roper Coker, his widow who shared in full measure his dreams and aspirations and who, as his co-worker, walked faithfully by his side during many years of humanitarian and scientific endeavor; for his grandchildren and great grandchildren; for his relatives beyond the immediate family; for the family members of his colleagues and contemporaries in scientific plant breeding; for his successors who carry on the work in the company he founded; for all these I bespeak profound and humble gratitude to the trustees and administration of this institution for their decision to memorialize, in this center of learning, the life and work of the one whom we loved, whose memory we cherish, and whose heritage and tradition are our constant inspiration.

When a great university honors the memory of one of its sons by giving his name to a building dedicated to the discipline to which he gave himself, it is his family, most of all, who is moved by that decision; for it is we who knew him best, who loved him most, who more than any others were influenced by his counsel, and who were most inspired by his spirit of selfless devotion to the great cause to which he committed his talents and gave the full measure of his mental and physical energies. We are, therefore, deeply moved by the events of this day, by the gracious words which have been spoken, and by the thought that this building shall memorialize in perpetuity, through succeeding generations of students and teachers, the spirit and work of David Robert Coker.

It is impossible, of course, for brick and mortar to capture the spirit of a man. But it IS possible for a building of brick and mortar to be so dedicated to learning and service, and for those who pursue learning within its walls to be so imbued with the desire to know and to share that knowledge with their fellowman, that the building itself shall come alive with the spirit of the one whose name it bears.

It is our sincere hope, indeed our prayer, that the Coker Life Sciences Building shall be such a place; that within these walls the students of this and succeeding generations shall so apply themselves to the principles of scientific learning, and so go from here with a desire to make their learning serve the cause of human progress, as to make this building, its classrooms, its lecture halls, and its laboratories a continuing center from which enlightened minds and dedicated spirits go to serve all mankind.

In so doing, it will do more than honor the memory of a man. Far more importantly, it will be a lasting interpretation of the spirit of education and service itself. It will build character as it expands knowledge; it will grow men as it furthers learning; it will enlighten man's spirit as it stimulates his curiosity and cultivates his intellect. This was the combination my father sought to achieve in his life, and for which we, the members of his family, are indebted as his heritage.

Again, we are deeply grateful for this memorial tribute to him on the campus of the university where, as a student, he found added stimulation to that obtained from his father before him to make the life sciences the commitment of his life, and through their discipline a life service to his native and beloved South.

---

## "SESAME STREET"

### HON. WILLIAM D. HATHAWAY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. HATHAWAY. Mr. Speaker, 1 month ago today, American educational TV commenced the daily broadcast of a children's educational program which is fast proving itself as an invaluable learning tool for millions of this Nation's preschool children.

I refer to a program called "Sesame Street," a creative, enjoyable, and well-planned ETV production, which began a 26-week series on more than 170 television stations throughout the country on November 10.

"Sesame Street" is the product of a unique cooperative effort undertaken about 2 years ago by the U.S. Office of Education, the Carnegie Corp., and the Ford Foundation. The three organizations determined that extensive television viewing consumed a substantial portion of a child's day. Indeed, they learned that most young children were exposed to television for about 50 or 60 hours per week—that is quite an audience, when you consider that more than 96 percent of all American homes have at least one television set.

Based on this evidence, the cooperating organizations created the Children's Television Workshop, to research and develop an experimental series of programs which would educate young children and help make them more receptive to learning and more eager to learn. "Sesame Street," designed and produced for the preschool youngster, is one of many laudable results of this effort—developed over an extended period of intensive research into what children react to, how they learn, what their minds retain, and how they are able to apply what they have learned to specific situations. Among the show's many features are exercises with letters, words, and numbers, as well as with impressive personal and social values, which are enlivened by a cast of human and illustrated characters.

Not long ago, Mr. Speaker, the executive director of the Children's Television Workshop, Mrs. Joan Ganz, appeared before a subcommittee of the House Education and Labor Committee to discuss the educational potential of American television. Mrs. Ganz related the sorry facts that half of the Nation's school districts have no kindergartens and that only about one out of every four children from so-called disadvantaged neighborhoods are exposed to social services in any way educative.

The Education Committee has undertaken extensive hearings relative to the educational needs of our elementary and secondary schools for the 1970's. It is hoped that "Sesame Street" will provide a model for some of the committee's considerations.

"Sesame Street" and projects like it, whether commercial or noncommercial, can have a very large role in preparing our children during the new decade to face the challenges of learning and the challenges of life. This is public service in its highest state.

---

## BUSINESS BARRELS TOWARD A TRILLION DOLLAR ECONOMY

### HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. PUCINSKI. Mr. Speaker, for sometime now I have been calling attention in my public speeches to the fact that the United States is headed toward a trillion dollar economy by next year.

I have pointed out time and again that this phenomenal growth has created many of our social problems and that these problems must be met.

I have stressed the need for intensified and vastly expanded education to produce the skilled manpower that this Nation will need to sustain a trillion dollar gross national product.

On many occasions, some doubting colleagues challenged my confidence in the future in America and some even accused me of exaggerating our fantastic growth.

I am including in the RECORD today an article which appeared in the November issue of Nation's Business which shows how this Nation is headed toward a trillion dollar economy.

I am pleased that this very prestigious business publication confirms what I have been saying for a long time.

I am even more pleased to have been a Member of this Congress during the past 11 years and have participated in many landmark legislative decisions which have brought America to this fantastic pinnacle of economic growth.

All of us who have served in the Congress during this past decade can take great pride in having been partners in his magnificent and enormous growth of our Nation.

But this is only the beginning. While it took us almost 19 decades as a nation to reach a trillion dollar GNP, our Nation's wealth will more than double in the decade of the 1970's.

By 1980, I have every reason to believe that America's GNP will surpass the $2 trillion mark.

It is important for us in Congress to realize that this fantastic growth will bring problems never anticipated by civilization and we as responsible legislators should begin to start addressing ourselves to these problems today.

As we anticipate this fantastic growth during the next 120 months, it would be my hope that much of the petty and meaningless debate which so frequently divides us in this Congress would be set aside and that we—as Americans—would address ourselves to a realization of the problems ahead.

In this next decade we can bring about the fulfillment of man's eternal dream—the hope to stamp out want, destruction, brutality, and conflict.

We shall make discoveries in medicine and environmental health never before dreamed of by the human mind.

The article which I am enclosing in the RECORD today clearly demonstrates the degree of achievement that the human animal is capable of projecting and is indeed a prelude of what enormous opportunities lie ahead for our Nation and mankind so long as we remain—above all—free and resolute.

The article follows:

THE 1970'S: BUSINESS BARRELS TOWARD A TRILLION DOLLAR TOMORROW

The big American Airlines 727 jet roared at dusk into Washington's National Airport. Only 65 minutes earlier, it had taken off from Boston.

As the plane braked to a halt, a safety-belted businessman peered out a window and turned to a companion.

"Everywhere you go," he said, "you see the same thing. . . ."

He gestured toward a massive new airport terminal wing being built for TWA

"Either tearing down, or building up."

He had summed up a major quality of American business in the 70's: Change—highlighted by growth.

Much of it will be due to America's two greatest resources—technology and an educated people.

John Diebold, whom many credit with coining the word automation, points out:

"Half the research conducted in the United States since the republic was founded has been crowded into the last eight years. And 90 per cent of the scientists who ever lived, live today.

FASTER AND FASTER

The result: a highly technical, sophisticated society, its foot on the gas pedal, traveling at an ever faster clip.

Here are some statistics which show where we stand today, and how far we will go in the next 10 years.

In 1969, our gross national product will reach $932 billion, according to financial consultant Louis J. Paradiso, former assistant director of the Commerce Department's Office of Business Economics.

Next year, the National Planning Association estimates, it will be more than $1 trillion. By the decade's end, NPA says, it will be nearly $2 trillion in then-current dollars.

In 1969, 81 million Americans held jobs. By 1980, close to 100 million will. The increase alone nearly equals the entire population of Canada.

In 1969, we're spending $580 billion on food, fun, health, housing, education and other personal items. By 1980, we'll spend almost $1.2 trillion.

But we'll be able to afford it.

At the end of the 70's, nearly one third of the nation's families will be in the $10,000 a year bracket and up—in 1969 dollars. They will receive more than half the national income.

That's growth. It will help business.

Change will hurt as well as help.

Change means three Japanese firms, Canon, Inc., Hayakawa Electric Co., Ltd., and Tokyo Shibaura Electric Co., Ltd., grabbing off a big share of the U.S. market for calculators. It means Volkswagen selling more than 500,000 German-made autos a year in the country where the Tin Lizzie was born.

But it also means IBM cornering a large part of the world market for computers.

HIGH ON TECHNOLOGY

That's the recent past. The future will mean an even more rapid ebb and flow in markets and products.

In this environment, well-run, high technology firms will flourish, experts say.

But some other companies will fall by the wayside. In the 60's, scores of the big, well-known American companies disappeared. Some are just names on corporate headstones. Most were swallowed up in mergers.

The accompanying table (pages 30–31) summarizes how major American industries will fare in the next decade. It tells what their output is now (based on latest available figures) and what it will be in 1980.

It gives also their average annual rate of growth in the 70's.

The table was adapted from the National Planning Association's "National Economic Projections Series."

From the evidence, America won't have enough workers, skilled and unskilled, to do all it wants to do.

Today, the U.S. population totals about 204 million. In 1980, it will be some 235 million.

With few dissents, most forecasters see American prosperity hitting new peaks in the 70's.

Arthur Okun of Brookings Institution, a chairman of the Council of Economic Advisers during the Johnson Administration, says:

"I think we're going to stay on a high growth path. We're going to have to try to solve the problem of inflation. And I think we're going to."

A FLATTER BUSINESS CYCLE

NPA economist Morris Cobern notes his Association's forecast assumes the economy will have a real growth rate of 4.4 per cent a year. It adds 2.7 per cent a year for inflation, which it expects to ease, but not stop.

"Our Future Business Environment," a General Electric Co. study based on the views of "upwards of 100 of this country's best thinkers" on social, political and economic trends, says economic stabilization is expected to be a hallmark of the next decade.

"There is now widespread agreement," it says, "on the prediction of a further flattening of the business cycle. Whereas in the 15 years, 1949–64, the unemployment rate had a five-point swing, from a low of 2.5 per cent to a high of 7.5 per cent, the next 15 years may see the swing kept within a 1–1.5 point range, at a level of about 3–4.5 per cent.

"Again, whereas post-World War II recessions have averaged 10 per cent cutbacks in industrial production, future declines are expected to be only half as deep."

It adds that large-scale unemployment "has become too great a political liability for any Administration to tolerate for long." And it also cites these new factors which tend to keep factories running and people at work:

Technology and automation, which involve long-range programs and high fixed overhead, and place a premium on stable production.

Computerized inventory control, which helps to narrow wide swings in the inventory-sales ratio.

A new kind of labor force, with more and more men and women in white collar jobs where layoffs are fewer.

Higher unemployment compensation, plus company-paid supplemental unemployment benefits, which make layoffs more costly.

UNPARALLELED PROSPERITY

All this helps add up to unparalleled prosperity.

U.S. per capita income, now $3,420 a year, will be $6,340 in 1980, NPA says.

If this outlook sounds unduly rosy, a look back may put it in perspective.

In the last 10 years, one authority points out, "this nation has doubled the value of its annual output of goods and services.

"What we now produce in a month ($78 billion) approaches in value the total annual output in 1939—or even 1929."

Will only corporate giants be able to survive in this new decade? Jesse W. Markham, Harvard Business School professor of business administration, thinks not.

"Actually," he says, "the number of businesses big and small tends to grow roughly at the same rate as the population." That means that small businesses will continue to outnumber corporations about 10 to one.

In 1966, the last year for which Internal Revenue Service has statistics, 1,468,725 U.S. corporations filed returns, compared to 9,086,714 proprietorships and 922,680 partnerships.

THE CLIMATE IS CHANGING

There will be some sweeping changes in the climate, at home and abroad, in which American businesses will operate.

Domestically, our rising affluence, economic growth and higher and higher level of education will be major influences.

Just as in the 60's, new industries will rise or mature in the 70's.

Prof. Kenneth R. Andrews, chairman of Harvard Business School's Advanced Management Program, sees industry taking over many tasks once considered government's private preserve—for example, in health services, in social service functions such as operating day care centers, and in education, especially vocational or technical.

Prof. John G. Kemeny of Dartmouth College foresees a national network of large time-sharing computer systems, comparable to today's public utilities. They could be used, among other ways, to match jobseekers with job openings in an entire city or region; to help would-be college students find colleges which want applicants, and to replace costly private and public libraries with an electronic reference service.

SMALL WORLD

American business will operate in an expanding economy, but a shrinking world.

"The impact on world trade will be tremendous when we get new aircraft like the C5A," predicts Harvard Business School Prof. John Glover. "Mozambique will then be closer to Boston than Chicago was in 1940.

"The total cost of air transport will be so cheap that it will cost a German manufacturer less to roll an auto aboard a plane and fly it to St. Louis than to load it on a

truck or train, carry it to a port or dock, put it on an oceangoing cargo carrier, take it off at New York City, then ship it overland.

"Our old natural tariff barriers—distance and cost of handling and shipping goods—will disappear."

Experts predict a great upsurge in U.S. world trade. Today, Americans are importing goods made abroad at annual rate of $35.3 billion, and exports come to $36 billion. By 1980, some experts say, annual imports will be $90 billion, but our net exports will top that by $15 billion.

Commerce Secretary Maurice Stans is a bit more cautious. He says, "Our exports could be close to $100 billion by 1980.

"To do this, of course, we need a great deal of successful negotiating to reduce trade restrictions and provide for orderly markets."

As for the American economy as a whole, the Secretary says:

"We have every reason to expect a substantial growth in the 70's, provided that we manage our economic affairs properly, and don't allow inflation to get out of hand again.

"If we do that, we can operate at a high level of prosperity with a high level of employment.

"But to finance this growth will take money. We must see that our tax laws don't inhibit capital formation. That's why the bill recently passed by the House is unfortunate. It taxes industry too heavily.

"For progress in the 70's, we must find ways to reduce taxes on corporations and permit the capital growth that is necessary.

"After all, it is American enterprise that has given us everything we have now. If we encourage it, it can give us about anything we want."

GROSS PRODUCT BY INDUSTRY—THE NATIONAL PLANNING ASSOCIATION, LOOKING INTO THE DECADE AHEAD, SEES THIS

[Billions of dollars]

| Industry | Now | 1980 | Average annual growth rate percent |
|---|---|---|---|
| Agriculture, forestry, fisheries | 27.2 | 28.5 | 0.4 |
| Farms | 25.0 | 24.9 | 0 |
| Agricultural services, fisheries | 2.2 | 3.6 | 4.3 |
| Mining | 14.2 | 20.2 | 2.9 |
| Metal minig | .8 | 1.9 | 6.9 |
| Coal mining | 1.7 | 1.6 | −.7 |
| Crude petroleum, natural gas | 9.8 | 13.2 | 2.5 |
| Nonmetallic mining | 1.9 | 3.5 | 5.3 |
| Contract construction | 39.5 | 99.9 | 8.0 |
| Nondurable goods manufacturing | 98.7 | 179.7 | 5.1 |
| Food | 23.3 | 38.9 | 4.3 |
| Tobacco | 3.6 | 5.2 | 3.0 |
| Textiles | 7.6 | 8.2 | .6 |

## LEGAL ACTION TO PROTECT RIGHTS OF STUDENTS

### HON. DAN KUYKENDALL

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. KUYKENDALL. Mr. Speaker, back in October, instigators of the Vietnam moratorium promised widespread disruption of classes at universities across the Nation. Their escalating timetable called for 1 day in October, 2 in November, 3 in December, and so on through 8 days in May.

The October event did result in the shutdown of certain universities. But the November and December moratoriums seem to have fizzled out. The 27 days of threatened lockouts simply have failed to materialize. Why?

Perhaps one reason is that the prospect of protracted lawsuits have been made painfully clear to those few college administrators who would accede to radical demands for formal cancellation of classes.

In August, Young Americans for Freedom held its national convention in St. Louis. At that convention, a plan proposing lawsuits for money damages against the universities and their administrators was proposed.

It was pointed out that the U.S. Supreme Court has approved the proposition that the "First amendment rights—are not a license to trample upon the rights of others." Those who demand "free expression have no right to deny to those who disagree with their demonstrations the equal right to express themselves freely at attending classes rather than marching. Nor do the universities have any right to yield to demands for a lockout of the scholarly."

The universities have accepted the students' money. YAF feels that even if only one student demands it, the university must give that one student the education for which he—or his father—paid. When a teacher willfully refuses to show up for a scheduled class, the university has breached its contract. Courts long have held that college catalogs are binding contracts. The schedule of classes printed in the catalog forms a part of the contract.

Legal action already has been taken as a result of isolated class cancellations on October 15. News travels fast in academic circles. No doubt the painful prospects of litigation and publicity had a salutary effect in November and December. Perhaps YAF has succeeded in encouraging certain university administrators not to falter in the exercise of their leadership.

Typical of the nationwide publicity accorded YAF's legal attack on disorder are the following news items:

[From the Sunday Star, Washington (D.C.), Aug. 31, 1969]

LAWYER SUGGESTS TUITION REFUNDS IN CAMPUS DISORDERS

ST. LOUIS.—A lawyer recommended yesterday that college students sue for a refund of tuition fees for days classes are interrupted by campus disorders.

Maurice R. Franks of New Orleans, legal adviser to the Louisiana delegation to the Young Americans for Freedom convention, said courts have held that a college catalog is a binding contract between the school and its students.

"Whenever the class schedule listed in the catalog is altered, as for example by leftist campus disorders, any student has a right to sue to compel refunds to all students of tuition for the days on which classes were interrupted," he told a news conference.

He said he would place his proposal before the convention today during a panel on YAF's legal attack on the new left.

---

[From the New Orleans (La.) Times-Picayune, Oct. 5, 1969]

TUITION REFUND POSSIBLE—YAF STUDENTS CAN SUE WHEN CLASS DISRUPTED, VIEW

Tuition-paying college students have a right to demand refunds if their education is denied by class disruption, representatives of the Louisiana Young Americans for Freedom said here Friday.

YAF spokesmen declared at the Press Club of New Orleans that the parents of disruptors who are minors are legally responsible for any damages caused by their children.

The press conference conducted here was one of several held across the nation by the YAF Friday to alert students and parents of the possible legal consequences of student disruption on the campus.

The time is ripe for massive lawsuits against certain universities, according to Maurice R. Franks, legal adviser to the Louisiana YAF.

Under a 1968 federal court decision in Louisiana, he said, "College officials have a legal duty to expel students for attending meetings of groups conspiring to breach the peace."

Franks added that other federal appeals court decisions and the First Amendment to the U.S. Constitution "are not a license to trample on the rights of others" and that any unlawful obstruction which denies the majority of students the right to attend classes for which they paid "constitutes illegal interference with the contract between the students and their university."

YAF representatives from Tulane, Loyola and Louisiana State University in New Orleans attended the conference.

Franks called a college catalog a binding contract between the students and the university.

He said that whenever the class schedule listed in the catalog is altered, "as for example by leftist campus disorders, any student has the right to sue to force a tuition refund to each and every student for the days on which classes were interrupted."

Franks said that this could amount to a quarter of a million dollars in a short disruption at the larger private universities.

He urged students to file "representative suits" on behalf of their fellow students when disturbances occur.

In the case of public high schools which do not charge tuition, Franks said students should "file for a mandamus to compel the school's leaders to hold classes."

Franks said the national YAF has prepared several briefs to help the student who feels he is being deprived of his education by class disruption but that the YAF does not file suits or act for the student in such cases.

---

[From the Dyersburg (Tenn.), Mirror, Oct. 16, 1969]

HIT WHERE IT HURTS

One of the sidelights of the campus coddling of disruptive demonstrators in recent years is the drop in donations to colleges and universities. The normal level of contributions from graduates to their alma maters has declined in many instances, and the reason frequently cited has been the failure of school administrators to punish those who use destruction and obstruction as a means of registering their grievances.

No matter what the cause, graduates are not going to give their dollars to a college only to see a mob of radicals tear down its facilities, go scot-free and be readmitted for a repeat performance. We cannot fault this logic. We are of course, not discussing legitimate protest by law-abiding students. We limit these observations to the wrecking crews and sit-in types who disrupt the studies of other students.

The Young Americans for Freedom (YAF), a campus-oriented, conservative group, recently held its national convention in St. Louis. One of the programs proposed by the group was a legal action plan to be taken against radical student groups and the college and university administrations that take no steps to halt disruptive actions.

Maurice R. Franks of New Orleans, legal adviser to the Louisiana YAF delegation, stated that college catalogs have been held by the courts to be binding contracts between the school and its students and, as such would justify suit against the school by students whose class meetings are interrupted by campus disorder.

Mr. Franks said: "Whenever the class schedule listed in the catalog is altered, as for example by leftist campus disorders, any student has a right to sue to compel tuition refunds to all students for the days on which classes were interrupted."

We favor the use of legal action to stop the wreckers and their protectors. Perhaps the administrations will begin to understand that there are rights for law-abiding students—notably the right to the education they are paying to get.

There is reason to believe that the SDS is planning to invade more schools in the new academic year with their message of rule or ruin. Perhaps it's time to warn public boards that the right to sue may well extend to taxpayers, whose children lose school sessions due to the codling of offenders.

---

## VIOLENCE

---

## HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. EDWARDS of California. Mr. Speaker, recent events in Chicago and Los Angeles have demonstrated that violence continues unabated even as we enter into the Christmas season and prepare for a new decade.

Eight of my colleagues and I have asked President Nixon in the light of those recent events to continue the National Commission on the Causes and Prevention of Violence in order that it may investigate the running war between some police departments of our Nation and the Black Panthers. I made the request not as judgment, but as a request for an impartial investigation; one which can gain the trust of both sides. There has been no reply yet from the President and it may well be that there will be no reply, or a negative reply. Even so the need for this kind of study, investigation, mediation, and reconciliation is self-evident. If the President does not choose to act, then the Congress in some form must act.

The National Commission on the Causes and Prevention of Violence has done much to explore and expand our knowledge of the violent side of American life. Marquis Childs in today's Washington Post has outlined the work of the Commission and its Chairman, Dr. Milton Eisenhower, in an excellent article, I ask that this article be reprinted in the RECORD for the benefit of all Members of this House. The article demonstrates why the Commission should be continued.

Mr. Childs also points to the Commission's excellent work on the causes and prevention of violence on the campuses. His comments, and the Commission's work, are particularly applicable to my home State of California. I recommend all Californians study the underlying cause of campus unrest. They are far different than one might believe if one listens to some Californians who have political stake in continuing violence on campus.

I would hope the Commission will be continued. It could do further valuable work, and there are areas where its efforts are sorely needed. If this healing work is not done, we will face a bleak future.

We must in the next decade come to grips with the problem of violence in America and overcome it.

The article follows:

VIOLENCE COMMISSION PROVIDES ACCURATE STORY OF DIVIDED U.S.

(By Marquis Childs)

In the babble of angry and excited voices rising from every quarter the task of separating fact from impassioned prejudice seems hopeless. But even as the clamor has grown there has been a guide to sanity and reason.

The staff reports of the National Commission on the Causes and Prevention of Violence have in one instance after another put the facts on the line. Demonstrations, the black militants, student rebellion—all the symptoms of upheaval in a time of troubles have been subjected to clear, cool analysis by specialists and scholars. Their conclusions have often been contrary to popular prejudice as they have looked beneath the boiling surface into underlying causes of divisiveness and unrest.

Chairman of the commission for the past year and a half is Milton S. Eisenhower, brother of the late President Dwight Eisenhower.

In assuming a demanding and difficult chore at the age of 69, Milton Eisenhower showed once again the response to public service that has marked his career. As government official, educator and, above all, as close adviser to the President during the eight Eisenhower years, this youngest of the five Eisenhower brothers has dedicated himself to the public good.

In the age of the quick buck and the cynical grab for profit and power, the Eisenhower example—and a host of men and women like him in education, the foundations, at every level of public office—is too seldom noted. As did two of the five brothers, Milton might have gone in for money-making with the rewards so conspicuous in a money-oriented society.

If his name had not been Eisenhower he might have held high public office. As confidant and adviser to President Eisenhower he was content to subordinate himself, keeping out of the news and rarely, if ever, speaking out in public. His advice was on the moderate-liberal side, countering, it was reported at the time, the conservative businessmen in the Eisenhower Cabinet. During those years Milton was, first, president of

Pennsylvania State University and then of Johns Hopkins.

Staff reports of the Eisenhower commission do not necessarily reflect the views of the commission itself. A foreword by Chairman Eisenhower in each report specifically states that it is a work of scholarship to be judged on its merits so that the commission as well as the public may benefit from the study and the debate growing out of it. This disclaimer does not, however, lessen the usefulness of the reports.

A recent report deals with the politics of protest and the violent aspects of protest and confrontation. It would be hard to conceive of a touchier subject generating more hostility and prejudice. Nevertheless, the voice of reason comes through clear and strong.

"The overriding issue," the report states, "is whether an educational system can endure without the consent and support of faculty and students and whether such higher authorities as trustees, boards of regents and legislatures can expect tranquility on a campus that is governed on controversial issues by remote authorities whose understanding of academic values is minimal and who are empowered to undercut academic and administrative decisions with which they disagree. Reform of the present condition of university governing boards is a prerequisite to campus order in the future."

Essential, too, the report declares, is the increased participation of students in university decision and policy-making. This last taking hold on campus after campus recovering from painful disorders. It is not an infallible solution but, as the report notes, it is neither realistic nor justifiable to expect students today to be content with second-class citizenship.

Some admirers of the impressive work of the commission have been disturbed by a statement on group violence issued under the imprimatur of the chairman. As a means of coping with right of free speech in violation of the first amendment, the commission recommends giving the federal courts the power, on request of the attorney general or private individuals, to grant injunctions against "threatened or actual interferences" with speech or assembly. The proposed law would also authorize suits for either damages or an injunction by persons believing themselves aggrieved and allow the attorney general to intervene in such suits.

This would put the federal government in the role of policeman and arbiter in disputes without end. It would give the attorney general extraordinary powers and, in light of the record established by the current incumbent, John M. Mitchell, the Congress will want to think twice before any such grant of power.

The long series of reports by the commission, soon to conclude its work, tells the story of divided and disrupted America as it is. To cloud this monumental work, to which seekers after the truth can repair, with a dubious and highly controversial proposal is a disservice to the scholars and specialists who have given so much of their time and effort.

## MASSACRE AT MYLAI

### HON. F. BRADFORD MORSE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. MORSE. Mr. Speaker, the reports of the alleged massacre at Mylai have stirred the conscience of every American and deeply troubled the people of this Nation, a compassionate people who cherish human life.

The article by Emanuel Goldberg in the Jewish Times of December 4, is a demonstration of the profound impact that these events have had on a nation founded on the basic principles of humanity and freedom. It is a moving testimony to the desire to preserve these principles, our hopes, and our idealism, and I include it here for the consideration of my colleagues.

[From the Jewish Times, Dec. 4, 1969]

HEAVEN AND HELL AT SONGMY: A PROPOSAL

(By Emanuel Goldberg)

Just before the national moratorium against the Vietnam war, a Valparaiso University professor of government, Dr. Albert Wehling, gave a newspaper interview in which he endorsed "ten moral issues" intimately connected with the participation of the United States in the conflict. He was not a proponent of the demonstrations.

Topmost was his assertion that four Presidents and four secretaries of state had agreed upon our country's commitment under the Southeast Asia Collective Defense Treaty and its protocol, "both made to respond to the criminal trespass of international villains."

He repeated President Nixon's assurance that our presence in Vietnam 'and the devotion of our troops there in support of our position constitute one of the finest hours in our history.' Dr. Wehling also stated that our military forces have fought "under unprecedented orders" not to seek a military victory but "to use every reasonable precaution to protect noncombatants, while fighting an enemy who rejected the laws of war and gave no quarter."

Then came the revelation of the massacre of Songmy—and I wonder if Professor Wehling is having any afterthoughts.

The world obviously is and so is every thinking American.

Adequate ventilation of mankind's latest agony has been made by the much-maligned media. Whatever the investigations and trial further bring out will probably do little to ease the initial trauma—for, in microcosm, the merciless slaying of men, women and children by American soldiers in the little South Vietnamese village has the grim, apocalyptic design of the holocaust and the bombings of Hiroshima and Nagasaki.

The religious among us live under the shadow of atonement and eventual punishment for crimes of this magnitude. Even some nonbelievers recognize a threat to self-preservation.

I would like to see the village of Songmy become an international shrine—a hallowed, functioning, dedicated place where a vast hospital and medical research facility, free and available to all who can come, would be built.

Nearby perhaps—an international airport, an agreed upon strip of extraterritoriality, and the place where many visitors could also arrive—to gaze upon a suitable scroll containing each slain person's name, biography and reconstructed likeness. The latter would stress the sacredness of every human life, no matter how humble in origin or defiled—a reminder to the world that there have been societies in which a Zola could write "J'Accuse!" and a Gandhi could starve out the human conscience.

All of this should be financed by America and my only misgiving here is the fear that this nation would be accused of trying to buy off a bad conscience. Nevertheless, the federal government should provide the capital outlay for hospital, research buildings and laboratories, perhaps even a medical school, the airport and other enriching, surrounding institutions that might grow in the future.

The American people—you and I—would be asked to give individual gifts of $1 or more, annually (for mankind apparently needs constant reminder) to the Village of Songmy. This would account for operating costs, the wherewithal to provide doctors, nurses, administrators, other staff and equipment designed to offer hope and relief to hundreds, perhaps thousands, of unfortunate persons who would come regularly to the village and begin to recount its name with a gradually changing connotation.

If money mounted and Songmy's installation was well underwritten, others in other lands could spin off and underscore the testament that Americans still cherished their humanity and freedom, and could never forgive themselves (and here I intentionally omit reference to the benighted, criminal soldiers) for what had transpired.

This sort of practical, idealistic action is now needed in our country.

## HE DID NOT WANT TO GO INTO THE SERVICE, BUT WHEN HE WAS DRAFTED HE WENT IN TO SERVE HIS COUNTRY TO THE BEST OF HIS ABILITY

### HON. WILLIAM B. WIDNALL

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. WIDNALL. Mr. Speaker, in our congressional district, we have the good fortune to have a very dedicated young man, who has served with outstanding distinction during the Vietnam conflict. The people of Ramsey, N.J., and the State, and the Nation, are very, very proud of his record.

Sgt. Richard S. Polak has demonstrated extraordinary courage in the performance of his duty. He is today New Jersey's most decorated soldier in the conflict. He wears two Silver Stars, two Bronze Stars, three Air Medals, and he has also received the South Vietnamese Gallantry Cross.

The young sergeant is presently an instructor at the Scofield Barracks in Oahu, Hawaii. According to his mother, "Richard didn't want to go into the service any more than anyone else, but when he was drafted he went in to serve his country to the best of his ability." He certainly has. His sense of responsibility to his country and to his fellow servicemen transcended any self-serving actions he might have taken. His courage and realization of duty are in such marked contrast to the comparatively few young men in our country who scurry across our border when they are drafted, or create pockets of revolt in the service.

We salute him and congratulate him on his record, and the example that he has set. I am appending an editorial from the Ridgewood, N.J., Herald News of December 4, 1969, which speaks for itself. Also appended are articles from the Ridgewood Herald News of December 4, 1969, and the New York Sunday News of November 30, 1969.

The materials follow:

[From the Ridgewood Herald, Dec. 4, 1969]

PICTURE OF AMERICA

The nation is now embarked on a long galling journey into shame in the investigation of the alleged atrocities by our soldiers in Vietnam, but no matter what finding issues from the slow-grinding mills of the military, we will declare right now that we

do not associate atrocity with our concept of the typical American youth in war. Our own thoughts tend more toward the words of a mother of a man who has been in action: "He didn't want to be drafted but when he was he went in to serve his country to the best of his ability." This was not merely wish-fulfillment by the mother, because her son is Staff Sergeant Richard S. Polak of Ramsey, who is one of the most decorated soldiers of the unhappy conflict in the Far East.

Neither do we mean to imply that every young man bearing arms is a hero; but we do think that every American tries to do his best, in service and otherwise. The nation, our area and Ramsey may be particularly proud of Sgt. Polak, who has been breath-taking in his deeds. He wears two Silver Stars, two Bronze Stars, three Air Medals and the South Vietnam Gallantry Cross. He achieved aerial distinction, fought off a sally single-handed, almost miraculously destroyed two fortified enemy bunkers when he was under direct fire. No, we cannot expect every soldier to equal the feats of the Don Bosco graduate who won that school's athletic award of the "Iron Man" but we do believe the vast majority of our men in arms is somewhere near Sgt. Polak in spirit at least.

---

[From the Ridgewood (N.J.) Herald-News, Dec. 4, 1969]

RAMSEY HERO RECEIVES PLAUDITS OF HIS NATION

(By Pat Hall)

RAMSEY.—What makes a hero? Staff Sgt. Richard S. Polak of 58 Lake St. is one. He is winner of two Bronze Stars, two Silver Stars, and three Air Medals as well as the Gallantry Cross with Bronze Star from the Vietnamese government.

"Richard didn't want to go into the service any more than anyone else," says his mother, Mrs. Stanley Polak. "But when he was drafted he went in to serve his country to the best of his ability. I think he has," she added quietly.

The number of medals won by the 22-year-old Don Bosco graduate makes him one of the most decorated servicemen in the county.

The two Bronze Stars were awarded "for heroism and outstanding achievement involving conflict with an armed hostile force in the Republic of Vietnam," according to the citations accompanying the medals.

Each of the Air Medals, issued by direction of the President, commemorated more than 25 aerial missions over hostile territory in support of counterinsurgency operations. "During all these flights he displayed the highest order of air discipline and acted in accordance with the best traditions of the service in spite of inherent hazards," according to the citations.

Staff Sgt. Polak was awarded a Silver Star on June 21 for gallantry. While on a reconnaissance mission, serving as Platoon Sergeant with Company D, 4th Battalion, 39th Infantry, his group was ambushed. After positioning his men for return fire, he was suddenly confronted with two Viet Cong charging his position. According to the citation, "he showed absolute disregard for his own safety by standing up completely exposed to the enemy and eliminating them."

Again, in July, he was awarded the Silver Star. On a reconnaissance mission with Company D, the group came in contact with North Vietnamese soldiers in well fortified bunkers, according to the citation. Repeatedly exposing himself to enemy fire, he destroyed one bunker with an M–72 anti-tank weapon. He crawled 75 meters, again through heavy fire, to a position from which he was able to destroy another bunker with a hand grenade. The Silver Star citation notes extraordinary heroism in close contact with an armed hostile force.

His latest medal, the Gallantry Cross with Bronze Star, awarded by the government of South Vietnam, cites action in search and destroy operations late last spring. In Dinh Twong province, under enemy fire, Staff Sgt. Polak led his platoon to deliver an assault on the Viet Cong. The citation terms him an "excellent platoon leader with abundant experience in combat, and with exemplary service spirit."

Staff Sgt. Polak entered the army in 1968 with basic training at Fort Dix, advanced training at Fort Polk infantry school in Louisiana and was graduated from Airborne School at Fort Benning, Ga. in November, 1968. He was sent with his outfit, 39th Infantry, 9th Infantry Division to Vietnam, the Mekong Delta area. He has recently been transferred to Scofield Barracks, Oahu, Hawaii, to instruct at the non-commissioned officers school.

Staff Sgt. Polak has a younger brother serving in the Air Force. His father, Stanley Polak served during World War II in the Air Force.

What sort of a boy becomes a war hero? "A typical American boy," according to his father noting the advantages of growing up in this community. Richard liked sports and the tall, brownhaired youth was selected as an "Iron Man", an athletic award given at Don Bosco.

The family is counting the days for his return ("He'll be home 99 days from this past Thanksgiving"), said his mother.

Seated on a hassock, and flanked by two of the family pets, friendly sandy colored dogs, Polak's sister, Eileen, aged 10, speaks of her big brother.

Do you feel proud of Richard? "Oh very proud!"

Do you miss him? "Yes, I do. He used to play with me."

---

[From the Sunday News, Nov 30, 1969]

RAMSEY MAN BECOMES TOP NEW JERSEY SOLDIER

(By Brian Vachon)

When Staff Sgt. Richard S. Polak of Ramsey received the Silver Star for bravery for action in Vietnam recently the 22-year-old became New Jersey's most decorated soldier in the war.

The Silver Star was Polak's second in his one-year tour of duty in Southeast Asia. He has also received two Bronze Stars, three Air Medals and the Vietnamese Gallantry Cross with Bronze Star.

Polak, the son of Mr. and Mrs. Stanley Polak of 58 Lake St., was a draftee and he's uncertain whether to become a career soldier or return to civilian life when his time is up in March.

NOW AN INSTRUCTOR

He is presently an instructor at the Scofield Barracks in Oahu, Hawaii.

In the special order awarding Polak his second Silver Star, which his parents received this week, his actions were described this way:

"S Sgt. Polak is awarded the Silver Star for gallantry in action involving close combat with an armed hostile force in the Republic of Vietnam. He distinguished himself by exceptionally valorous action on 27 June 1969 while serving as a platoon sergeant with Company D, 4th Btn., 39th Infantry, on a reconnaissance mission. When his lead squadron came in contact with North Vietnamese soldiers in well fortified bunkers.

"Sgt. Polak moved through the murderous hail of rounds to an exposed position in the front of the battle where he destroyed one bunker with an M–72 light anti-tank weapon. Showing complete disregard for his own life, Polak boldly crawled 75 meters through the hostile fusillade to a position from which he was able to destroy another bunker with hand grenades.

"His valiant actions were instrumental in crushing the enemy force," the order concluded.

"He's alive and we're satisfied," said his father, who ran unsuccessfully last year for the Assembly on the Conservative ticket. "He figured when he was drafted it was his job to serve his country and do the best job he could. But who would have expected this?"

---

## IS OUR FLAG WORTH THE TROUBLE?

## HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. DUNCAN. Mr. Speaker, in the Sunday Knoxville, Tenn., News-Sentinel, I read what I consider the best letter I have ever seen written by a representative of young America. Miss Kay Lovett's statements are penetrating and thought provoking, and I only wish that all high school and college students in this country could have the opportunity to hear what she has to say about our flag and the meaning of this great country.

Her letter follows:

DOYLE HIGH SENIOR ASKS: IS OUR FLAG WORTH THE TROUBLE?

EDITOR, THE NEWS-SENTINEL: An article appears in the newspaper entitled, "New Look on Campus: Stark Naked Flagpole", and continues with, "The U. of Penn., fearing a confrontation with student war protesters, has lowered its American flags and placed them in storage . . ."

When the people of America are afraid to fly the emblem of their heritage, it is a sad commentary on the sacrifices of our forefathers. It is shameful easy way out of bowing to a handful of student protestors. In a situation of this kind, surrender is much simpler than fighting, even when fighting for what is right.

If our ancestors had yielded so effortlessly, perhaps the United States would never have been created, and the colonies would still be bound to Great Britain by the invisible chains of slavery. To many people of the Twentieth Century, the names Bunker Hill, Saratoga, and Valley Forge are merely words in a history book. Have the bold endeavors of the American colonists been so carelessly obliterated from our memories?

The American Flag represents all the struggles of our ancestors to attain the wealth we enjoy today. This wealth is not measured in terms of riches and money, but it refers to the rights and freedoms so precious that thousands of our forefathers sacrificed their lives so that future generations might inherit them.

When we salute the Flag, we are honoring much more than a colorful piece of cloth with 50 stars and 13 stripes upon it. We are recognizing the sweat, blood, and tears of the many devoted men and women who helped build our great nation to remarkable heights. The American people should not sit back and allow various organizations and individuals to slowly but steadily erode all these efforts commemorated in one noble symbol of national honor.

When an American sees his country's Flag, he should think about its true meaning and feel in his heart a throb of loyalty, courage, and dedication to freedom of mankind. Like our ancestors, one should be proud to exhibit this banner, instead of thinking, "What does it matter to me?" When one has this kind of attitude and is afraid or ashamed to fly the Flag of the United States, he is no longer a true American.

Hopefully the time will come (with God's help) when the Star-Spangled Banner will again wave "o'er the land of the free and the home of the brave."

KAY LOVETT,
*Senior, Doyle High School.*

## THE TRAGEDY AT MYLAI 4

### HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. WOLFF. Mr. Speaker, the tragedy of Mylai 4, like so much that has surrounded our existence in the war, has raised many questions. However, this incident more than any one event of our involvement, has raised a question that we cannot let pass with the mere statement that it was the alleged decision of a single man.

Rather, it brings us irrefutably to the reality which is war.

This reality was recently discussed in an exceptionally fine editorial in the Westbury Times, an important weekly newspaper in the Third Congressional District that has gained a strong and consistent following among its readers. Mr. Martin E. Weiss, the outstanding editor and publisher, and a man whom I have had the good fortune of knowing for a long time, approaches the tragedy of Mylai 4 in a manner deserving of all our attention. He deftly discusses the breadth and depth and impact of this event, an impact which we know is far greater than the appalling tragedy of the wanton destruction of so many lives.

I, therefore, would like to take this opportunity to extend my remarks to include this editorial in the RECORD:

THE TRAGEDY AT MYLAI 4

The alleged massacre at Songmy, and there would seem to be enough confirmation that it is fact, brings up far more than the legal question as to whether the lieutenant already charged, and those who may have participated, can adequately be judged.

We will, at some point, have to define war. And this, even in its simplest terms, will be difficult.

The focus of the tragedy at Mylai 4, one of the six Songmy hamlets, is 1st Lt. William L. Calley, Jr., who is charged with having ordered the death of anywhere from 100 to 370 Vietnamese living in what the Army has labelled as "Pinkville".

Everyone is suddenly "shocked" and "sick" over what Lt. Calley's orders may have caused.

So are we at the reported deaths of men, women and children by American bullets—but we can be no less concerned over this specific brutality than we can over the random destruction which has been visited over both North and South Vietnam by the indiscriminate bombing and shelling of such hamlets by American planes, artillery and warships.

Are those who drop the bombs and fire the shells any less guilty than Lt. Calley?

The recent history of warfare has distinguished only lightly between the military and the civilian; we suggest that though this is where the error lies, it is impossible, because of the nature of such warfare, for troops in the field to distinguish between "right" and "wrong".

Let us say that if the charges against Lt. Calley are correct, the first platoon of Company C, 1st Battalion of the 11th Infantry Brigade's 20th Regiment, engaged in an action which was, at best, criminal.

However, how can we reasonably delineate the charge against this platoon without indicting all of our forces in Vietnam? Or all of the U.S. troops who fought in Korea? Or of all the Americans who battled in World War II?

The fact is that we have suddenly been confronted by a reality of war—and it is war itself, not individuals, which must answer.

History has given us siege and starvation; history has given us slaughter on the battlefield and subjugation by force; history has given us the martyrs of Rome and those destroyed in a moment at Hiroshima; history has given us a generation emaciated at Verdun and the fact of genocide as practiced by Nazi Germany.

Songmy is but a moment in the chronicle of man's inhumanity to man. It is a chronicle which will end only when we learn to live in peace.

## ARCHBISHOP IAKOVOS OF GREEK ORTHODOX CHURCH VISITS LATIN AMERICA

### HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. BRADEMAS. Mr. Speaker, the primate of the Greek Orthodox Church in North and South America, Archbishop Iakovos, recently traveled to five Latin American countries, where he visited Greek Orthodox parishes in 17 cities of Argentina, Chile, Uruguay, Venezuela, and Brazil.

Upon his return, Archbishop Iakovos released a statement commenting upon his impressions of his Latin American tour.

Mr. Speaker, I am inserting this statement, made on November 24, 1969, at this point in the RECORD:

ARCHBISHOP IAKOVOS SEES "REVIVED RELIGIOUS FEELING" IN LATIN AMERICAN COUNTRIES

Upon my return to the United States of America today, I thank the Lord and Glorify His Name for these past thirty days. I have been on a pastoral and missionary tour and study of our Greek Orthodox parishes in five countries in South America—Argentina, Chile, Uruguay, Brazil and Venezuela. Truly, this month has been most rewarding. The experience I gained through my countless contacts with religious, state and civic leaders, in addition to the "ordinary people" and congregations, can be categorized as follows:

(1) There is a revived religious feeling; a definite spiritual thirst for revised and purified religious standards and concepts.

(2) People are becoming more ecumenical minded, less chauvinistic, and are in general most interested in the Church Unity movement. They hope that Churches will be able to do what other institutions (political, social and economic) have failed to achieve. In other words a more enlightened leadership.

(3) They pray that the revolution or crisis which the Church is presently experiencing may result in a renewal of the individual as a believer, with a new, more dynamic interpretation of the Gospel of Christ, the God of love.

(4) They expect, in fact, they demand, that the Church part with the "ceremonial" and embark upon a more activist policy. This will come closer to satisfying the "modern man" and help to detach him from the vain sloganisms and the empty verbalism of our times.

(5) They also seem to prefer a good neighbor, rather than an exploiter, freedom instead of protectionism, which in their minds belittles their dignity and offends their sensitivity.

(6) Our neighbors to the south are not anti-United States nor anarchistic. In only one city did I observe anti-American slogans still in use. Latin-Americans are concentrating their efforts on improving their standards of living and elevating their industrial, cultural and academic levels.

(7) There is poverty, even in the richest lands, but it seems to exist for one reason only: to put to shame those of us who are concerned with, yet not brave or determined enough to bring an end to it, through our personal work, sacrifice and sharing.

(8) People are concerned with many problems: the rather slow pace of the ecumenical movement, the pill (contraceptives), the celibacy of the clergy, youth, the war in Vietnam and the Middle-East, social injustice, political sterility and instability, inflation and racism and with technology and disbelief. I found, however, that their concern is more sincere and more painful than ours. They think that these issues need to be confronted with greater seriousness and a higher sense of responsibility than they are met with today.

(9) I found that political freedom is restricted in many facets of public life. I will refrain, however, from expressing any criticism, for I am convinced that a clergyman's task and obligation is to announce good news and not to denounce situations unless he is in a position to do something more essential than mere criticism.

(10) Catholics, Protestants and Orthodox in Latin America are experiencing a state of spiritual re-awakening and ecumenical agony. They reach for one another in search for solidarity and unity. While they join their hearts in prayer, they also join their hands in an effort to break down existing prejudices. They desire to lay the groundwork for cooperation, so that they may rebuild the image of the Church to the point that the people expect. They will become involved in the kind of Christian activism which will free them from self-illusion, and their respective congregations from the state of frustration that keeps them confused. Unhappy in their distrusts, and pessimistic in their very personal and subjective way of thinking, Latin American Christians need to be convinced of the possibility that the spiritual and moral values of Christianity may at last regain their powerful impact in the lives of men and replace materialistic and nihilistic views that seem to torment their minds and hearts.

## MYLAI—MANKIEWICZ AND BRADEN

### HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. FRASER. Mr. Speaker, the Washington Post printed December 9 a Frank Mankiewicz-Tom Braden column concerned with the Songmy incident:

Vice President Agnew was right—

About the news media—

but for the wrong reasons. The press, yielding to Pentagon direction and public expectation, has largely failed to make Americans see what this war was.

This is the theme of their statement. Vietnam is not the sort of war we have

experienced previously. This column is useful in reminding us just what kind of war it is:

[From the Washington Post, Dec. 9, 1969]

MYLAI IS A TYPICAL VIETNAM BATTLE IN A WAR THAT'S DIRECTED AT CIVILIANS

(By Frank Mankiewicz and Tom Braden)

An unconscious yearning does much to explain American shock at the massacre of Mylai.

Unconsciously Americans want the war in Vietnam to be like the wars they've fought before. They want "fronts"; "battle lines"; progress in ground taken and cities held. They want to think of their boys—upholding the right—fighting against enemy soldiers—upholding the wrong.

The press, because it also yearns, has by and large given the people what they want. The daily communique from Pentagon East becomes the wire service account of action in Vietnam. The body count indicates "progress," and it is always the "allies"—that comfortable, reassuring and in this war totally meaningless word—who are making it.

There have been exceptions to this standard fare and those exceptions—filmed scenes of U.S. troops burning villages, or written reports by special correspondents on the use of chemicals—have shocked a public longing for the familiar past.

The result of yearning is that Americans were unprepared for Mylai. Vice President Agnew was right but for the wrong reasons. The press, yielding to Pentagon direction and public expectation, has largely failed to make Americans see what this war was.

Take, for example, the public testimony of Capt. Ernest Medina. It reveals the problem in whole. His orders, he said, were to destroy Mylai and its livestock. He did not find it in the least extraordinary to receive an order not to kill women and children. The village, he explained, was a "free fire zone," meaning a shooting gallery into which death could be poured without nice distinctions about innocent people. Customarily, he explained, it is permissable anyhow to shoot anyone who runs, and his words recalled the familiar complaint of Vietnam veterans: "Sometimes it's awful hard to tell the difference between a run and a fast walk."

But Medina went on. He saw 20 to 28 civilian bodies, and he didn't bother to count how many were those of women and children. He felt a little uncomfortable when he discovered that the woman he shot had been unarmed. But she had moved and he had a right to be afraid. The 20 to 28 bodies did not seem to him to evidence atrocity or deliberate action against civilians.

The terrible truth is that Medina was describing a rather typical day of battle in a war which is largely a war against civilians.

Three-hundred-thousand of them have been killed in the past four years, mostly by United States troops, mostly by bombing. The Senate Subcommittee which released these figures cannot say how many of these dead are Vietcong and how many are "Friendlies" or "Gooks," as the soldiers say. Neither can anybody else.

We kill civilians because the enemy is among them. We kill their livestock because it may feed the enemy. We use chemicals forbidden in the United States because—although they may cause deformed births—they defoliate so that the enemy can be found. By these standards, can Medina be far from the mark by suggesting that there was no "atrocity" at Mylai.

The press is guilty, not for doing what Agnew said it was, but for not doing it enough. It failed to bring home to Americans that they were sending their uniformed sons into battle—not primarily against other uniformed sons, but against civilians, women and children and aged men. Americans have never understood that there are no young men in the villages. Young men are gone to the uniformed ARVN or are out in the countryside with the civilian-clad Vietcong.

The American people are guilty, too—we didn't want to hear it the way it was. In a war where friend is distinguishable from foe only by what is in his heart and mind, you can always win the count of bodies, but you must always lose the count of souls.

## EMOTIONAL REACTION IN AGNEW–TV HASSLE

### HON. GLENARD P. LIPSCOMB

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. LIPSCOMB. Mr. Speaker, I would like to call to the attention of my colleagues an editorial which appeared in the Progress-Bulletin, a newspaper which has served the residents of the Pomona Valley in California for 84 years. The editorial is concerned with the speech Vice President AGNEW made on November 13, 1969, on the subject of the television news medium and in my view is very helpful in setting the record straight with regard to what the Vice President actually said in his speech as opposed to what has been implied from his remarks by representatives of the broadcasting industry.

In my view the editorial is correct in its interpretation of Mr. AGNEW's speech as a direct challenge to the broadcasting industry for self-improvement in connection with its presentation of the news rather than a call for Government censorship of the television medium which has been suggested by some critics of the Vice President's remarks.

The editorial is also helpful in that it focuses on the fact that in our free and democratic society the only control which can be maintained over the powerful medium of television is one of the main elements of our free enterprise system itself—competition. In this case, the competition is provided by other information media. The editors of the Progress-Bulletin further emphasize the need for initiative on the part of the American public to broaden their knowledge of the news rather than relying on the television medium alone for information of world events.

Because of the importance of an informed citizenry to a free and representative democracy, I consider the views expressed in this editorial to be worthy of the consideration of my colleagues and under leave to extend my remarks, I insert it in the RECORD at this point:

EMOTIONAL REACTION IN AGNEW-TV HASSLE

Vice President Spiro Agnew's attack on the television industry unmistakably touched a responsive chord among a lot of not-so-silent-any-more Americans. The vibrations go on.

Letters and telephone calls to the headquarters of the three major broadcasting networks and to local stations all over the country have run overwhelmingly in his favor. Even more than his remarks about an "effete corps of impudent snobs" (or was it an "impudent corps of effete snobs?") involved in the October 15 Vietnam Moratorium, the vice president's targeting of "a small group of men" which determines what news goes out over the air clearly hit something close to the heart, or guts, of many people.

As usual, however, it is not what the vice president said but what he allegedly implied that has caused the agitation.

What he implied, some defenders of the industry have been quick to warn, is government censorship of television, followed inevitably by censorship of the press, followed eventually by a police state and dictatorship and the abolition of all the freedoms Americans hold dear.

What he actually said, and it bears repeating, is this:

"Tonight, I have raised questions. I have made no attempt to suggest answers. These answers must come from the media men. They are challenged to turn their critical powers on themselves. They are challenged to direct their energy, talent and conviction toward improving the quality and objectivity of news presentation. They are challenged to structure their own civic ethics to relate their great freedom with their great responsibility.

"And the people of America are challenged, too—challenged to press for responsible news presentations. The people can let the networks know that they want their news straight and objective. The people can register their complaints on bias through mail to the networks and phone calls to local stations. This is one case where the people must defend themselves, where the citizen—not government—must be the reformer, where the consumer can be the most effective crusader."

This does not sound like a call to censorship and repression.

Unfortunately, these words came near the end of the vice president's address, following many paragraphs criticizing the shortcomings—which are numerous—of the television industry, and neither his critics nor his supporters seem to have heard them. The total effect was to appeal not to our intellects but to our emotions.

One wonders whether the popular enthusiasm which has greeted the vice president's speech stems from real dissatisfaction with the way in which the broadcasting industry presents the news or from dissatisfaction just with the news itself, which has been uniformly dismal for the past half-decade, it seems. One wonders if many of us are not, in fact, guilty of failing to distinguish between the news broadcaster and the news he broadcasts.

By its very nature, television is a medium unlike any other in the immediacy and concentration of its impact.

While a newspaper may center a story on the front page and proclaim it with bold headlines, the printed news is still passive and is surrounded by a mass of other news, advertising and features. The newspaper reader scans, but the television viewer is forced to concentrate his whole attention on whatever happens to be playing in that small square of light at a given moment. He lives what he is seeing.

This is television's greatest strength and also its severest limitation.

The only kind of control over television that is permissible and practical in a democracy is that which results from the competition of other information media—newspapers; magazines and books, which by their nature are able to examine news and social developments more leisurely and in greater depth and width.

To utilize them, of course, requires a measure of initiative on the part of the public beyond that required for the mere flipping of a dial, sitting back and sponging up sensory impressions from a flickering tube.

Another alternative is the system they have in South Africa, where the govern-

ment has never permitted any kind of television at all, good, bad or indifferent. There the people are spared this problem by the thoughtful men who rule them.

## LOWERING THE VOTING AGE

### HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. PUCINSKI. Mr. Speaker, the Chicago Sun-Times of December 1, 1969, put into proper perspective the need for lowering the voting age in America.

I believe this is a most timely editorial and performs a notable public service.

The editorial follows:

LOWER VOTING AGE

A plank in The Sun-Times' platform calls for a voting age lower than 21. We have suggested that the Constitutional Convention could consider such a change when it meets to modernize the state's basic charter.

Now, the National Commission on Causes and Prevention of Violence has lent its considerable support to a reduction in the voting age, suggesting a minimum age of 18.

The commission contended that much of the frustration of today's youth, and some of the violent manifestations of that frustration, might be eased if youth were given earlier access to the ballot box. Milton S. Eisenhower, commission chairman, said also that "there is a lot of good common sense in the statement that those who are old enough to carry out the foreign policy of this country by offering their lives in war are also old enough to decide (through voting) if they are to have a war."

The Sun-Times, which has supported a reduced voting age since 1954, took a position similar to that of the commission's two years ago. Recognizing that dissent was rising among the young, we said: "While violence must not be countenanced . . . the right to dissent must be protected. The best way to protect that right is to channel it constructively in a way that will encourage response from national leaders. The answer is to channel dissent through the ballot box."

Granting of the right to vote should not, of course, be considered a means of lowering the decibel count, or a means of buying society's way out of uncomfortable situations created by youthful questioning and vigor. The fundamental reason for lowering the voting age is that, because of improved education and communications, today's younger generation is smart enough and alert enough to vote as wisely as any older age group does.

It won't be easy to lower the voting age. Citizens of Hawaii, one of the four states with a voting age under 21, last year rebuffed an effort to lower the standard from 20 to 18. Also, entrenched politicians always are fearful of unleashing a new bloc of potentially independent votes.

Nonetheless, the voting age should be lowered, as the violence commission has said, and as we have said so often. And since the Congress is reluctant to act, and since the Illinois Legislature has failed to act, the matter should certainly be on the agenda for the Constitutional Convention.

## WHAT MORE, FOR PEACE, COULD MR. NIXON DO?

### HON. WILLIAM C. CRAMER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 10, 1969*

Mr. CRAMER. Mr. Speaker, the Miami Herald on December 4 asked a reasonable question: What more could the President reasonably do to obtain a just peace?

The implied answer was "nothing."

Most of the Nation agrees that the President is doing all that can be done in that regard.

The text of the Herald editorial follows:

[From the Miami Herald, Dec. 4, 1969]

WHAT MORE, FOR PEACE, COULD MR. NIXON DO?

Hawks and doves in the House became birds of a feather in voting 333 to 55 for a resolution endorsing President Nixon's efforts to negotiate a "just peace" in Vietnam.

For that reason the resolution, which seems to mean all things to all men, is meaningless. But it does serve to highlight the Nixon program in Vietnam which goes far beyond the position of the Johnson administration and, indeed, rather out-doves the rejected minority plank in the 1968 Democratic platform.

That plank, which was howled down in Chicago, called for immediate cessation of the bombing of North Vietnam and of the offensive search and destroy missions by combat units, for a negotiated withdrawal of troops by opponents in the hostilities and for a negotiated coalition government that would include the Communists.

In his speech Nov. 3, Mr. Nixon "set forth our peace proposals in great detail," as follows:

"We have offered the complete withdrawal of all outside forces within one year.

"We have proposed a cease-fire under international supervision.

"We have offered free elections under international supervision with the Communists participating in the organization and conduct of the elections as an organized political force . . ."

To be sure, Hanoi rejected these proposals but in other respects the President was acting on his own.

He had already withdrawn unilaterally the 60,000 troops—including 20 per cent of all combat troops—he promised would be out by Dec. 15.

He has put into effect the Vietnamization plan announced in March.

He has worked out a plan for the withdrawal of a U.S. troops and their replacement by Vietnamese.

He has continued the bombing suspension ordered just before the election last year by President Johnson, who also decreed no other change whatsoever in his own Vietnam program.

So Mr. Nixon has gone beyond the dove at Chicago and he has reversed most of the Johnson policy. Thus it is all the more remarkable to us that the vote Tuesday on the House resolution was not unanimous. What more, as of today, could the President reasonably have done?

# SENATE—*Thursday, December 11, 1969*

The Senate met at 9 o'clock a.m. and was called to order by the Acting President pro tempore (Mr. METCALF).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

God of our fathers, who in times past hast called men to serve Thee in the Government of this Nation, and hast not ceased to call, call us this day from life on all lower levels to service in the higher realm of Thy kingdom of righteousness and truth. Bless the labor of the Members of this body for the welfare of the whole Nation. Keep us from running out or wearing out until our work is done. When nerves grow taut and spirits tense, bring us to Thy peace. Walk with us amid the difficulties and uncertainties of the day's work that we may have Thy light upon our pathway, and with joyful hearts and radiant spirits bring to completion the divine intention for all men: For Thine is the kingdom and the power and the glory forever. Amen.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Wednesday, December 10, 1969, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary, the Committee on Labor and Public Welfare, and the Subcommittee on Small Business of the Committee on Banking and Currency be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar, beginning with "New Reports."

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations on the Executive Calendar will be stated, as requested by the Senator from Montana.

## U.S. AIR FORCE

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Air Force.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

## U.S. NAVY

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Navy.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

## DISTRICT OF COLUMBIA

The assistant legislative clerk read the nomination of Graham W. Watt, of Ohio, to be Assistant to the Commissioner of the District of Columbia.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

## U.S. MARSHALS

The assistant legislative clerk proceeded to read sundry nominations of U.S. marshals.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

## NOMINATIONS PLACED ON THE SECRETARY'S DESK—THE AIR FORCE, THE ARMY, THE NAVY, AND THE MARINE CORPS

The assistant legislative clerk proceeded to read sundry nominations in the Air Force, the Army, the Navy, and the Marine Corps which had been placed on the Secretary's desk.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of executive business.

There being no objection, the Senate proceeded to the consideration of executive business.

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the calendar, beginning with Calendar No. 576 and the succeeding measures in sequence.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## CIVIL SERVICE COMMISSION REVOLVING FUND

The Senate proceeded to consider the bill (H.R. 9233) to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the Civil Service Commission in connection with certain functions of the Commission, and for other purposes, which had been reported from the Committee on Post Office and Civil Service with amendments, on page 4, after line 3, insert a new section, as follows:

SEC. 2. The provisions of section 8341(e) of title 5, United States Code, as amended by section 206(b) of Public Law 91–93 (83 Stat. 140), shall be effective as of October 20, 1969.

And, after the amendment just above stated, insert a new section, as follows:

SEC. 3. Section 8340 of title 5, United States Code, is amended by adding the following at the end thereof:

"(g) Each annuity payable from the Fund based on involuntary separation and having a commencing date after November 1, 1969, but before January 2, 1970, shall be increased, from the commencing date of the annuity, by 5 percent."

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 581), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The basic purpose of H.R. 9233 is to increase the scope of the reimbursable services for which the revolving fund of the Civil Service Commission may be used. In 1952, Congress appropriated $4 million to be established by the Civil Service Commission as a revolving fund to finance full-field investigations conducted by the Commission for other departments and agencies (5 U.S.C. 1304(e)). The cost of the investigations to the Commission is paid by the agencies into the revolving fund so that the fund is continually replenished (5 U.S.C. 1304(f)).

Since 1952, the Civil Service Commission has been called upon to perform a number of additional services, which are reimbursable, for the departments and agencies. Among these services are training courses, executive seminar centers, examining Peace Corps applicants, and scores of other services performed for agencies under individual agreements involving reimbursement.

This bill provides that the revolving fund may be used to finance all reimbursable services performed by the Commission for other Government departments and agencies if those services are covered by budget estimates submitted to the Congress for that fiscal year.

COST

No additional cost is involved.

STATEMENT

The Civil Service Commission states that in 1968 a general overhaul of its accounting system was completed and that a new system has been installed. With use of revolving-fund financing limited to investigations only, budgeting and control over funds have become difficult, and the Commission's financial structure has been made unduly complex. These conditions contribute to lack of efficient program administration. Revolving-fund financing of all reimbursable activities combined with the revised accounting system, will correct these deficiencies.

This measure was recommended by the Civil Service Commission in 1968. In the 90th Congress, the House passed a similar measure; and the Senate approved its provisions as part of another bill. Final action, however, was not taken prior to adjournment.

AMENDMENTS

The committee has amended H.R. 9233 by the addition of two sections unrelated to the revolving fund.

Section 2 corrects an error in the effective date of survivor annuity protection for the children of a Federal employee who died with fewer than 5 years' service between October 20, 1969, and November 1, 1969. The amendment makes the survivor annuity protection effective on the date of enactment of Public Law 91–93 (October 20, 1969) rather than the effective date included in Public Law 91–93 (November 1, 1969). Thus the children of such an employee would be entitled to a survivor annuity. The committee knows of one such case. The cost of the amendment would be minimal.

Section 3 would amend section 8340 of title 5, United States Code, to provide a 5-percent cost-of-living annuity increase for those who retire after November 1, 1969, and before January 2, 1970, and whose retirement is based upon involuntary separation. Subsection 8340(b) of title 5, as amended by Public Law 91–93, approved October 20, 1969, authorized a 5-percent cost-of-living annuity increase for annuitants on the rolls as of November 1, 1969.

The Department of Defense advises that it is closing a number of bases and reducing the size of its civilian work force. On October 29, 1969, the Department announced its intention of eliminating approximately 27,000 civilian positions. The timing of the announcement allowed employees affected only 2 days in which to decide whether to undergo the forthcoming reduction in force or to retire and receive the 5-percent annuity increase.

It is the view of the Department—and the committee agrees—that it was not possible, in the time span available, for many employees to make reasoned decisions on a matter of such importance.

Section 3 would remedy the inequity by extending eligibility for the 5-percent annuity adjustment for 2 months to those involuntarily separated—for the period after November 1, 1969, but before January 2, 1970.

COST

The Secretary of Defense states that he is unable to estimate the number of employees facing involuntary separation who would avail themselves of the extension. Therefore, he cannot determine the cost of this provision. The best estimate is that the cost to the retirement fund would be approximately $3,000 per retiree over the full length of the annuity.

## BILLS PASSED OVER

The bill (H.R. 13000) to implement the Federal Employee Pay Comparability System, to establish a Federal Employee Salary Commission, and a Board of Arbitration, and for other purposes, was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

## SOUTHWEST METROPOLITAN WATER AND SANITATION DISTRICT, COLO.

The resolution (S. Res. 239) to refer S. 2807, together with all accompanying papers, to the Chief Commissioner of the U.S. Court of Claims was considered and agreed to, as follows:

*Resolved,* That the bill (S. 2807) entitled "A bill for the relief of the Southwest Metropolitan Water and Sanitation District, Colorado", now pending in the Senate, together with all the accompanying papers, is hereby referred to the Chief Commissioner of the United States Court of Claims; and the Chief Commissioner of the United States Court of Claims shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28 of the United States Code, and report to the Senate, at the earliest practicable date, giving such findings of fact and conclusions thereon as shall be sufficient to inform the Congress of the nature and character of the demand as a claim, legal or equitable, against the United States, or a gratuity, and the amount, if any, legally or equitably due from the United States to the claimant.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–584), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the resolution is refer S. 2807 entitled "A bill for the relief of the Southwest Metropolitan Water and Sanitation District, Colorado," now pending in the Senate, together with all the accompanying papers to the Chief Commissioner of the U.S. Court of Claims; and the Chief Commissioner of the U.S. Court of Claims shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28 of the United States Code, and report to the Senate, at the earliest practicable date, giving such findings of fact and conclusions thereon as shall be sufficient to inform the Congress of the nature and character of the demand as a claim, legal or equitable, against the United States, or a gratuity, and the amount, if any, legally or equitably due from the United States to the claimant.

STATEMENT

The Executive Office of the President in its report to this committee opposes S. 2807 but states that if the claim is to receive further consideration, Senate Resolution 239 would be an appropriate means for this purpose and if this resolution be passed, it would be glad to further review and comment on the bill in light of the Chief Commissioner's report.

The Office of the Deputy Attorney General opposes S. 2807, but states that "whether peculiar equities of the Southwest Metropolitan Water and Sanitation District are such as to justify special relief from Congress in this case is, of course, a legislative rather than a judicial determination."

The Department of the Army in it report to this committee recognizes that there may exist equitable considerations in this case which the Congress may determine justify granting of the relief sought and further states that the Department in view of the difficulty present in the determination of the amount of compensation due, if any, and of the desirability for a thorough review of the claim to determine whether sufficient equities are present to justify relief, referral of the bill S. 2807 to the Court of Claims, as provided for in Senate Resolution 239, would be appropriate. The Department of the Army would have no objection to Senate Resolution 239.

Copies of the reports of the Department of the Army, the office of the Deputy Attorney General and the Executive Office of the President are attached hereto and made a part hereof.

The facts relative to this claim are set forth in the report of the Department of the Army as follows:

"The Southwest Metropolitan Water and Sanitation District was organized in 1961 and is a governmental subdivision of the State of Colorado. The district encompasses about 6,000 acres in Arapahoe, Douglas, and Jefferson Counties. The outfall sewer, which is the subject matter of the bill, was constructed to service a planned industrial park at Blakeland, Colo.

"The industrial park, comprising about 500 acres, was established by the Rio Grande Land Co., a subsidiary corporation of the Denver & Rio Grande Western Railway. Acquisition for the park, for resale, began in 1954. Sales were made by the land company in 1963 to the International Pipe & Ceramics Corp., and in 1964 to the U.S. Rubber Co., both of which firms have constructed industrial facilities. These plants are served by the outfall sewer constructed by the district from the Littleton sewage disposal plant, Littleton, Colo., to the industrial park. The district also furnishes potable water to the plants.

"The Chatfield Dam and Reservoir project was authorized by the act approved May 17, 1950, and is one unit of a comprehensive plan for flood control of the South Platte River and its tributaries. Funds for initial construction and land acquisition were appropriated in 1966 and construction and land acquisition were commenced in 1967. The damsite is located in the South Platte River immediately downstream of the confluence of the South Platte River and Plum Creek, approximately 8 miles south of Denver, Colo. It is estimated that approximately 6,135 acres of land will be required for the project, of which about 1,075 acres are within the boundaries of the Southwest Metropolitan Water and Sanitation District. A major portion of the industrial park will be taken.

"The basis for the relief sought by the district is the loss of lands, particularly within the industrial park, which constitute a portion of its tax base for repayment of its bonded indebtedness. With further development of the industrial park foreclosed by construction of Chatfield Dam, the district's capability of repaying its bonded indebtedness is seriously impaired. It is understood that the amount of the recovery sought by the district represents the cost incurred by it in construction of sewer and water facilities to serve the industrial park.

"Present plans of the Department of the Army are to negotiate a contract with the district for the relocation of the affected portions of its facilities. The large outfall sewer serving the park will be left undisturbed, as it will be able to continue to operate under project conditions without any adverse effects either to it or to the Chatfield project, and will continue to serve the two existing industrial facilities, which will not be affected by the project.

"It is noted that, while the district is apparently seeking to recover the entire cost of constructing the sewer and water facilities involved, some of the capacity of these facilities will continue to be utilized. In addition, although the present high mill levy has tended to depress the market value of lands lying within the district, future urbanization of the area within the district's boundaries, which is within the metropolitan area of Denver, Colo., may be anticipated which would broaden the tax base and its immediate effect upon the district's ability to discharge its indebtedness may be of temporary rather than permanent duration. Complete factual data concerning the facilities are not available so a recommendation concerning the amount of the payment cannot be made by the Department of the Army.

"We note that there has been referred to your committee Senate Resolution 239, 91st Congress, which would refer the bill to the Chief Commissioner of the U.S. Court of Claims for preparation of a report to the Senate giving such findings of fact and conclusions as shall be sufficient to inform the Congress of the nature and character of the demand as a claim, legal or equitable, against the United States, and the amount, if any, due the claimant.

"The Department recognizes that there may exist equitable considerations in this case which the Congress may determine justify granting of the relief sought. However, the Department considers that, in view of the difficulty present in the determination of the amount of compensation due, if any, and of the desirability for a thorough review of the claim to determine whether sufficient equities are present to justify relief, referral of the bill S. 2807 to the Court of Claims, as provided for in Senate Resolution 239, would be appropriate. The Department of the Army would have no objection to Senate Resolution 239."

In view of all of the foregoing the committee believes that there is sufficient conflicting evidence of the claimant and the Government to warrant the Chief Commissioner of the Court of Claims to make his findings and conclusions as to whether or not there is a legal or equitable claim existing against the United States and report thereon to the Congress.

The committee therefore recommends that the resolution, Senate Resolution 239, be agreed to.

## WYLO PLEASANT

The bill (H.R. 11503) for the relief of Wylo Pleasant, doing business as Pleasant Western Lumber Co.—now known as Pleasant's Logging & Milling, Inc.—was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–585), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The proposed legislation would authorize the payment of $12,000 to Wylo Pleasant, doing business as Pleasant Western Lumber Co. (now known as Pleasant's Logging & Milling, Inc.) in full settlement of his claim for losses sustained in performing a timber sales contract with the Forest Service as the result of performing work elsewhere at the request of Government personnel.

STATEMENT

The Comptroller General of the United States has no objection to the enactment of this legislation as amended in the House of Representatives. The House report on H.R. 11503 relates the following:

"The bill, H.R. 11503, was introduced in accordance with the recommendations of the Comptroller General transmitted to the Congress in accordance with the meritorious claims provisions of section 236 of title 31 of the United States Code. In accordance with the provisions of that section the Comptroller General has determined that the claim of Wylo Pleasant contains in the language of that section "such elements of legal liability or equity as to be deserving of the consideration of the Congress."

"The contract referred to in the bill was a timber sales contract dated November 17, 1959, with the Forest Service of the Department of Agriculture. This contract was designated No. 12–11–092–29 and provided for an estimated 3,843,000 board feet of timber to be cut in the Tower Mountain area of the Rio Grande National Forest by November 30, 1962.

"The Forest Service established the appraised value for the timber at $6 per thousand board feet. The successful bid submitted by the contractor was $9.61 per thousand board feet which became the tentative contract rate.

"Section 2B of the timber sale contract provides for adjustments to the $9.61 tentative contract rate, based on fluctuations in the quarterly market price indexes for Engelmann spruce. The contract specified a base payment rate of $4 per thousand board feet which was set forth in the advertisement for bids. This rate is a minimum rate representing the floor below which the selling price cannot be reduced by subsequent price adjustments no matter how much the relevant market prices fall below the original lumber price index. The contract has been extended three times to December 31, 1969, pursuant to section 5a3 of the contract, and this is a relevant fact in view of the Government-induced delay involved in this matter.

"The sale contract originally specified that rate adjustments would be based on the 1953–54 Western Pine Association (currently the Western Wood Products Association) quarterly adjusted lumber price index for Engelmann spruce. The contract stated the lumber price index to be $86.63 per thousand board feet. This price index was to be used as a basis for determining the subsequent changes in the market price indexes.

"The Comptroller General in his explanation noted that under the provisions of the Tower Mountain contract the sale timber is subdivided into blocks, or payment units, and is released for cutting by payment units, ordinarily upon the request of the timber purchaser. The units are charged for, and the required deposits are made, at the adjusted rates in effect when the timber units are released for cutting.

"Thus, in November 1962, at the time of the first contract extension, the market price index for Engelmann spruce lumber had fallen from the original $86.63 to $75.32 per thousand board feet. Accordingly, the adjusted payment rate for the Tower Mountain contract would have been $4 per thousand board feet for any blocks of timber released during the quarter ending December 31, 1962.

"During the second quarter of 1966, due to a rising market, the stumpage rate required to be paid by the contractor increased substantially because of application of the section 2B escalation clause. However, on May 22 and June 15, 1961, prior to beginning the logging of the Tower Mountain sale, the contractor had purchased two additional timber sales in the Middle Cross Creek and West Cross Creek sales units of the Rio Grande National Forest. Both of these sales were salvage sales of timber that had become insect infested. In addition, the contractor continued to log another insect salvage sale on the Upper Pass Creek sales unit which he had purchased on September 24, 1957.

"The contractor states that he was directed by the Forest Service to cease logging operations in the Tower Mountain area and concentrate on harvesting the insect salvage sales. It is the contractor's position, therefore, that operation of the insect salvage sales at the direction of the Government entitled him to an extension of time for the Tower Mountain sale equivalent to the time spent operating the insect salvage sales. The contractor also contends that the stumpage rate should have been frozen at $4 since it understood from comments made by representatives of the Forest Service that in such cases it was Forest Service policy to freeze the payment conditions (apparently meaning to stop any further adjustments to the payment rate by suspending the escalation clause contained in the contract for a period of time) for the same period of time that the contractor was engaged in harvesting the insect salvage sales. The contractor has cited in support of this contention Forest Service Handbook, title 2400, paragraph 2433.12, which provides in pertinent part that—

" 'There may be cases in which it is to the advantage of the United States to terminate the adjustment provision and extend the sale at flat rates.'

"The administrative office reports that, while it may have urged the contractor to bid on the two insect-infested sales and may have agreed to consider favorably future requests for extension of sales already under contract, it can find no evidence to show that either party considered any such urging as constituting a directive to operate those sales in preference to Tower Mountain. In view of the report of the officials denying that they neither directed cessation of logging operations on Tower Mountain nor promised to freeze the rates in such event, the Comptroller General was unable to find a legal basis for reforming the contract to reduce the stumpage rate to $4 per thousand board feet as requested by the contractor.

"The committee is impressed by the fact that the officials of the Forest Service admit that Mr. Pleasant was urged to bid on the salvage sales of timber that had become insect infested and to give priority to cutting such salvage timber. Further the Comptroller General states that he was advised that favorable consideration would be given to extending the Tower Mountain contract period, and therefore it is not only possible but probable that Mr. Pleasant was misled in believing that he would have the time extended for cutting the Tower Mountain timber for the same period of time that he was engaged in harvesting insect sales without inclusion of the escalation clause of the contract. Since this is true and since the Government did derive a considerable benefit in that the spread of infestation was successfully controlled in the Rio Grande National Forest, which undoubtedly resulted in substantial savings to the Government, the Comptroller General concluded the claim does contain such elements of equity, as to be deserving of consideration of the Congress under the provisions of the act of April 10, 1928, 45 Stat. 413, 31 U.S.C. 236, which provide as follows:

" 'When there is filed in the General Accounting Office a claim or demand against the United States that may not lawfully be adjusted by the use of an appropriation heretofore made, but which claim or demand in the judgment of the Comptroller General of the United States contains such elements of legal liability or equity as to be deserving of the consideration of the Congress, he shall submit the same to the Congress by a special report containing the material facts and his recommendation thereon.'

"The General Accounting Office received a letter dated April 15, 1969, from the contractor enclosing assigned statement agreeing to accept the sum of $12,000 in full and final settlement of his claim. Mr. Pleasant's original claim was submitted in the amount of $14,680.02. In a letter dated February 20, 1969, he had stated that his losses then amounted to over $17,000. At the time General Accounting Office representatives examined the records of the Forest Service on the Tower Mountain sale it was determined that as of July 31, 1968, Mr. Pleasant had been charged about $27,000 for the timber cut, whereas had he paid the $4 rate the charge to him would have been about $15,000. Thus, at that time, the amount of Mr. Pleasant's claim, as verified by the General Accounting Office, was $12,000. It was therefore the conclusion of the Comptroller General that a bill be enacted to authorize payment of that amount.

"In view of the facts outlined above and referred to in the recommendations of the Comptroller General, the committee concluded that this matter is a proper subject for legislative relief. The equitable considerations referred to by the Comptroller General provide a firm basis for relief in this instance and establish the meritorious nature of the claim. Accordingly it is recommended that the bill be considered favorably."

After a study of all of the foregoing together with the letter of the Comptroller General of the United States the committee concurs in the action of the House of Representatives and recommends that the bill (H.R. 11503) be considered favorably.

## COMMUNITY MENTAL HEALTH CENTERS AMENDMENT OF 1969

The Senate proceeded to consider the bill (S. 2523) to amend, extend, and improve certain public health laws relating to mental health, and for other purposes, which had been reported from the Committee on Labor and Public Welfare, with an amendment, to strike out all after the enacting clause and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Community Mental Health Centers Amendments of 1969".

TITLE I—GRANTS FOR CONSTRUCTION OF COMMUNITY MENTAL HEALTH CENTERS, EXTENSION OF DURATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 101. (a) Section 201 of the Community Mental Health Centers Act (42 U.S.C. 2681) is amended (1) by striking the word "and" which appears immediately before "$70,000,000", and (2) by inserting immediately before the period at the end thereof the following: ", $95,000,000 for the fiscal year ending June 30, 1971; $115,000,000 for the fiscal year ending June 30, 1972; and $115,000,000 for the fiscal year ending June 30, 1973.

(b) Section 207 of such Act (42 U.S.C. 2687) is amended by striking out "1970" and inserting in lieu thereof "1973".

ALLOTMENTS TO STATES; INCLUSION OF TRUST TERRITORY

SEC. 102. (a) The first sentence of subsection (a) of section 202 of such Act (42 U.S.C. 2682) is amended by striking out "and Guam," and inserting in lieu thereof "Guam, and the Trust Territory of the Pacific Islands,".

(b) The second sentence of such subsection (a) is amended by inserting after "State" the first time it appears ", other than the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands,".

(c) Such subsection (a) is further amended by adding at the end thereof the following new sentence: "Sums so allotted to the Virgin Islands, American Samoa, Guam, or the Trust Territory of the Pacific Islands, for a fiscal year and remaining unobligated at the end of such year shall remain available to it for such purpose for the next two fiscal years (and for such years only), in addition to the sums allotted to it for such purpose for each of such next two fiscal years."

(d) Section 401(a) of such Act (42 U.S.C. 2691(a)) is amended by inserting immediately before the period at the end thereof the following: "; and, for purposes of this title and title II only, includes the Trust Territory of the Pacific Islands".

(e) The amendments made by this section shall be effective with respect to allotments under section 202 from funds appropriated for fiscal years beginning after June 30, 1970.

PERCENTAGE OF ALLOTMENTS AVAILABLE FOR STATE PLAN ADMINISTRATION

SEC. 103. (a) Effective with respect to expenditures referred to in paragraph (1) of subsection (c) of section 403 of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 made after June 30, 1970, such paragraph (42 U.S.C. 2693) is amended by striking out "2 per centum" and inserting in lieu thereof "5 per centum".

(b)(1) The first sentence of section 403(c)(1) of such Act is further amended—

(A) by inserting "for any fiscal year" immediately after "title II";

(B) by striking out "during such year";

(C) by striking out "for a year" and inserting in lieu thereof "for any fiscal year"; and

(D) by striking out "for such year".

(2) Section 403(c)(1) of such Act is further amended by inserting immediately after the first sentence thereof the following new sentence: "Amounts made available to any State under this paragraph from its allotment or allotments under part A of title II for any fiscal year shall be available only for such expenditures (referred to in the preceding sentence) during such fiscal year or the following fiscal year."

COST OF LAND INCLUDED IN COST OF CONSTRUCTION

SEC. 104. Effective with respect to projects approved after June 30, 1970, under title II of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, section 401(e) of such Act is amended by striking out "architect's fees, but excluding the cost of offsite improvements and the cost of the acquisition of land" and inserting in lieu thereof "architect's fees and the cost of the acquisition of land, but excluding the cost of offsite improvements."

FEDERAL SHARE TO BE MAXIMUM; HIGHER SHARE FOR DISADVANTAGED AREAS

SEC. 105. Effective with respect to projects approved after June 30, 1970, under part A of title II of such Act—

(1) section 402 of such Act (42 U.S.C. 2692) is amended by striking out "or title II";

(2) subsection (h) of section 401 of such Act is amended by redesignating clauses (1) and (2) as clauses (A) and (B), respectively, by inserting "(1)" after "(h)", by inserting under part C of title I" after "with respect to any project", and by adding at the end thereof the following new paragraph:

"(2)(A) The term 'Federal share' with respect to any project approved under part A of title II means the portion of the cost of construction of such project to be paid by the Federal Government under such part A.

"(B) The Federal share with respect to any project approved thereunder in the State shall, except as provided in paragraph (3), be an amount equal to 66⅔ per centum, or the Federal percentage for the State, if lower, or such lesser amount as may be determined by the State agency designated in the State plan. Prior to the approval of the first such project in the State during any fiscal year, such State agency shall give the Secretary written notification of the maximum Federal share established pursuant to this paragraph for such projects in such State to be approved by the Secretary during such fiscal year and the method of determining the actual Federal share to be paid with respect to such projects; and such maximum Federal share and such method of determining the actual Federal share for such projects in such State approved during such fiscal year shall not be changed after such written approval has been given.

"(3) In the case of any facility or center which provides or will, upon completion of the project for which application has been made under part A of title II, provide services for persons in an area designated by the Secretary as a rural or urban poverty area, the maximum Federal share shall be equal to such per centum of the costs of the construction of the project as may be determined by the State, except that such per centum shall not exceed 90 per centum.

PERIOD FOR PROMULGATING FEDERAL PERCENTAGES

SEC. 106. Section 401(j)(1) of such Act is amended by striking out "August 31" and inserting in lieu thereof "September 30".

## TITLE II—GRANTS FOR OPERATION OF COMMUNITY MENTAL HEALTH CENTERS

FEDERAL SHARE

SEC. 201. Effective with respect to cost of establishment and operation of any center, for any period after June 30, 1970, for which a grant has been or is made under subsection (a) of section 220 of the Community Mental Health Centers Act (42 U.S.C. 2688), subsection (b) of such section is amended to read as follows:

"(b) Grants for such costs for any center under this part (other than grants made from funds made available under section 224(b)) may not exceed—

"(1) except as provided in paragraph (2), 75 per centum of the costs for each of the first two years after the first day of the first month for which such grant is made with respect to such center, 60 per centum of such costs for the third year after such first day, 45 per centum of such costs for the fourth year after such first day, 30 per centum of such costs for each of the next six years after such first day; and

"(2) in the case of grants to any center which provides services for persons in an area designated by the Secretary as a rural or urban poverty area, 90 per centum of such costs for each of the first two years after the first day of the first month for which such grant is made with respect to such center, and 75 per centum of such costs for each of the next eight years after such first day.

No grant shall be made under this section, in the case of any center referred to in paragraph (1), for any period of time which is later than the last year referred to in paragraph (1), or, in the case of any center referred to in paragraph (2), for any period of time which is later than the last year referred to in paragraph (2)."

INITIATION AND DEVELOPMENT OF SERVICES

SEC. 202. (a) Section 224 of such Act (42 U.S.C. 2688d) is amended (1) by inserting "(a)" immediately after "Sec. 224," and (2) by adding at the end thereof the following new subsection (b):

"(b) Not to exceed 5 per centum of the amount appropriated for grants pursuant to subsection (a) for any fiscal year shall be available to the Secretary to make grants to local public or nonprofit private organizations to cover up to 100 per centum of the costs (but in no case to exceed $50,000) of projects, in areas designated by the Secretary as rural or urban poverty areas, for assessing local needs for mental health services, designing mental health service programs, obtaining local financial and professional assistance and support for community health services, and fostering community involvement in initiating and developing community mental health services. In no case shall a grant under this subsection be for a period in excess of one year; nor shall any grant be made under this subsection with respect to any project if, for any preceding year, a grant under this subsection has been made with respect to such project."

(b) Section 221(a) of such Act (42 U.S.C. 2688a) is amended (1) by striking out "and" at the end of paragraph (4), (2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; and", and (3) by adding after paragraph (5) the following new paragraph:

"(6) in the case of a grant from funds made available pursuant to section 224(b), the Secretary is satisfied, upon the basis of evidence supplied by the applicant, that persons broadly representative of all elements of the population of the area will be given an opportunity to participate in the project with respect to which application for such grant is made."

MAINTENANCE OF EFFORT

SEC. 203. (a) Paragraph (4) of such subsection (a) of section 221 of the Community Mental Health Centers Act (42 U.SC 2688a) is amended to read as follows:

"(4) the Secretary determines that there is satisfactory assurance that (A) the services to be provided will constitute an addition to, or a significant improvement in quality (as determined in accordance with criteria of the Secretary) in services that would otherwise be provided, and (B) Federal funds made available under this part for any period will be so used as to supplement and, to the extent practical, increase the level of State, local, and other non-Federal funds, including third party health insurance payments, that would in the absence of such Federal funds be made available for the program described in paragraph (2) of this subsection; and".

(b) Section 221(a) of such Act (42 U.S.C. 2688a) is further amended by adding at the end thereof the following new sentence: "Notwithstanding the provisions of paragraph (2) of this subsection, the requirement therein with respect to essential elements of comprehensive mental health services shall not apply, in the case of an application for a grant to any center which will provide services in an area designated by the Secretary as an urban or rural poverty area, for the eighteen-month period commencing on the date such applications is filed, if the Secretary is satisfied that such center will meet such requirement prior to the end of such period."

CONTINUATION GRANTS

SEC. 204. Section 221(b) of such Act (42 U.S.C. 2688a) is amended by striking out "1970" each place it appears and inserting in lieu thereof "1973".

AUTHORIZATION OF APPROPRIATIONS

SEC. 205. (a) The first sentence of section 224(a) of such Act (42 U.S.C. 2688d), as amended by section 202(a) of this Act, is amended (1) by striking out the word "and" which appears immediately after "1969" and (2) by inserting immediately after "1970," the following: "$60,000,000 for the fiscal year ending June 30, 1971, $60,000,000 for the fiscal year ending June 30, 1972, and $80,000,000 for the fiscal year ending June 30, 1973."

(b) The second sentence of section 224(a) of such Act (42 U.S.C. 2688d), as amended by section 202(a) of this Act, is amended by striking out "seven" and inserting in lieu thereof "fifteen".

STAFFING, OPERATION, AND MAINTENANCE GRANTS FOR CENTERS

SEC. 206. (a) Effective with respect to costs of operation of any center, for any period beginning after June 30, 1970, for which a grant has been or is made under subsection (a) of section 220 of the Community Mental Health Centers Act (42 U.S.C. 2688), such subsection is amended by striking out "a portion of the costs (determined pursuant to regulations under section 223) of compensation of professional and technical personnel for the initial operation" and inserting in lieu thereof "a portion of the costs (determined pursuant to regulations under section 223) of operation, staffing, and maintenance".

(b) The heading of part B of such Act (42 U.S.C. 2688 et seq.) is amended to read as follows:

"GRANTS FOR INITIAL COSTS OF OPERATION OF CENTERS"

## TITLE III—ALCOHOLISM AND NARCOTIC ADDICT REHABILITATION

EXTENSION OF PROGRAMS FOR FACILITIES FOR ALCOHOLICS AND NARCOTIC ADDICTS

SEC. 301. (a) Section 261 (a) of such Act (42 U.S.C. 2688o) is amended by striking out "and $25,000,000 for the next fiscal year" and inserting in lieu thereof $25,000,000 for the fiscal year ending June 30, 1970, $25,000,000 for the fiscal year ending June 30, 1971, and

$30,000,000 for the fiscal year ending June 30, 1972".

(b) Subsection (a) of such section 261 is further amended by inserting before the period at the end of the first sentence the following: "and section 246".

(c) Section 261 of such Act is further amended by adding at the end thereof the following new subsection (c):

"(c) (1) Not to exceed 5 per centum of the amount appropriated pursuant to the preceding provisions of this section for any fiscal year shall be available to the Secretary to make grants to local public or nonprofit private organizations to cover up to 100 per centum of the costs (but in no case to exceed $50,000) of projects for assessing local needs for programs of services for alcoholics or narcotic addicts, designing such programs, obtaining local financial and professional assistance and support for such programs in the community, and fostering community involvement in initiating and developing such programs in the community. In no case shall a grant under this subsection be for a period in excess of one year; nor shall any grant be made under this subsection with respect to any project if, for any peceding year, a grant under this subsection has been made with respect to such project.

"(2) A grant under this subsection with respect to any project may be made only if the Secretary is satisfied, upon the basis of evidence supplied by the applicant, that persons broadly representative of all elements of the population of the area will be given an opportunity to participate in the development of the project with respect to which application for such grant is made."

(d) Subsection (b) of such section 261 is amended by striking out "three" and inserting in lieu thereof "ten", and by striking out "for the fiscal year ending June 30, 1969, or the fiscal year ending June 30, 1970" and inserting in lieu thereof "for any fiscal year ending prior to July 1, 1972".

CONSTRUCTION GRANTS; ALCOHOLISM AND NARCOTIC ADDICTION

SEC. 302. Effective with respect to the cost of construction of any facility, for any period beginning after June 30, 1970, for which a grant from appropriations under section 261 of such Act has been or is made, subsection (b) of section 241 of such Act, subsection (d) of section 243 of such Act, and subsection (b) of section 251 of such Act are each amended by striking out "66⅔" and inserting in lieu thereof "90".

STAFFING, OPERATION, AND MAINTENANCE GRANTS; ALCOHOLISM AND NARCOTIC ADDICTION

SEC. 303. (a) (1) Effective with respect to the costs of operation of any facility, for any period after June 30, 1970, for which a grant from appropriations under section 261 of such Act has been or is made, subsection (a) of section 242 of such Act is amended by striking out "a portion of the costs (determined pursuant to regulations of the Secretary) of compensation of professional and technical personnel for the initial operation" and inserting in lieu thereof "a portion of the costs (determined pursuant to regulations of the Secretary) for operating, staffing, and maintenance".

(2) Effective with respect to the costs of operation of any facility, for any period beginning after June 30, 1970, for which a grant from appropriations under section 261 of such Act has been or is made, subsection (a) of section 243 of such Act is amended by striking out "compensation of professional and technical personnel" and inserting in lieu thereof "operation, staffing, and maintenance", and subsection (c) of such section is amended by striking out "compensation of professional and technical personnel" and inserting in lieu thereof "operation, staffing, and maintenance".

(3) Effective with respect to the costs of operation of any facility, for any period beginning after June 30, 1970, for which a grant from appropriations under section 261 of such Act has been or is made, subsection (a) of section 251 of such Act is amended by striking out "the costs, determined pursuant to regulations of the Secretary, of compensation of professional and technical personnel for the initial operation" and inserting in lieu thereof "the costs, determined pursuant to regulations of the Secretary, for the staffing, operation and maintenance", and subsection (c) of such section 251 is amended by striking out "Grants made under subsection (a) for the cost of compensation of professional and technical personnel" and inserting in lieu thereof "Grants made under subsection (a) for the costs of operating such facilities".

(b) Effective with respect to costs of establishment and operation of any facility for any period after June 30, 1970, for which a grant has been or is made under subsection (a) of section 242, 243, or 251 of the Community Mental Health Centers Act (42 U.S.C. 2688g, 2688h, 2688k), subsection (b) of section 242 of such Act is amended to read as follows:

"(b) Grants for such costs for any facility under this section may be made only for the period beginning with the first day of the first month for which such a grant is made and ending with the close of ten years after such first day; and such grant with respect to any facility may not exceed 90 per centum of such costs for each of the first two years after the first day of the first month for which such grant is made with respect to such facility and 75 per centum of such costs for each of the next eight years after such first day."

DIRECT GRANTS FOR SPECIAL PROJECTS; ALCOHOLISM

SEC. 304. Part C of the Community Mental Health Centers Act is amended by redesignating section 246 as section 247, and adding after section 245 a new section 246 to read as follows:

DIRECT GRANTS FOR SPECIAL PROJECTS

"SEC. 246. The Secretary is authorized during the period beginning July 1, 1970, and ending June 30, 1972, to make grants to any public or nonprofit private agency or organization to cover part or all of the cost of (A) developing specialized training programs or materials relating to the provision of public health services for the prevention or treatment of alcoholism, or developing inservice training or short-term or refresher courses with respect to the provision of such services; (B) training personnel to operate, supervise, and administer such services; (C) conducting surveys and field trials, to evaluate the adequacy of the programs for the prevention and treatment of alcoholism within the several States with a view to determining ways and means of improving, extending, and expanding such programs; and (D) programs for treatment and rehabilitation of alcoholics which the Secretary determines are of special significance because they demonstrate new or relatively effective or efficient methods of delivery of services to such alcoholics."

DIRECT GRANTS FOR SPECIAL PROJECTS; NARCOTIC ADDICTS

SEC. 305. (a) Section 252 of the Community Mental Health Centers Act is amended (1) by striking out "1970" and inserting in lieu thereof "1972", (2) by striking out "and" at the end of clause (B), and (3) by adding immediately before the period at the end thereof the following: "; and (D) programs for treatment and rehabilitation of narcotic addicts which the Secretary determines are of special significance because they demonstrate new or relatively effective or efficient methods of delivery of services to such narcotic addicts".

(b) The heading to such section 252 is amended to read as follows: "DIRECT GRANTS FOR SPECIAL PROJECTS".

TITLE IV—MENTAL HEALTH OF CHILDREN

CONSTRUCTION AND STAFFING OF TREATMENT FACILITIES

SEC. 401. The Community Mental Health Centers Act is amended by adding at the end thereof the following new part:

"PART F—MENTAL HEALTH OF CHILDREN

"GRANTS FOR TREATMENT FACILITIES

"SEC. 271. (a) Grants from appropriations under section 272(a) may be made to public or nonprofit private agencies and organizations (A) to assist them in meeting the costs of construction of facilities to provide mental health services for children within the States, and (B) to assist them in meeting the costs, determined pursuant to regulations of the Secretary, of the staffing, operation, and maintenance of (i) facilities providing such services which were constructed with grants made under this part or part A, or (ii) existing facilities which provide new mental health services for children.

"(b) The grant program for construction of facilities authorized by subsection (a) shall be carried out consistently with the grant program under part A of the Act except to the extent, in the judgment of the Secretary, special considerations make differences appropriate; but (1) before the Secretary may make a grant under such subsection for the construction of a facility for the provision of mental health services to children he must find that the application for such grant meets the requirements of section 205(a)(5) (relating to the payment of prevailing wages), and (2) the amount of any such grant with respect to any project shall be such percentage of the cost thereof, but not in excess of 90 per centum as the Secretary may determine

"(c) Grants for the costs of staffing, operation, and maintenance of facilities providing mental health services to children, authorized by subsection (a) of this section, may not exceed 90 per centum of such costs for each of the first two years after the first day of the first month for which such grant is made with respect to such facility, and 75 per centum of such costs for each of the next eight fiscal years after such first day. No grant may be made for any period of time which is later than the last year referred to in this subsection.

"(d) Grants may be made under this section only with respect to (1) facilities which are part of or affiliated with a community mental health center providing at least those essential services which are prescribed by the Secretary, or (2) where there is no such center serving the community in which such facilities are to be situated, facilities with respect to which satisfactory provision (as determined by the Secretary) has been made for appropriate utilization of existing community resources needed for an adequate program of prevention and treatment of mental health problems of children.

"(e) No grant shall be made under this section with respect to any facility unless the applicant for such grant provides assurance satisfactory to the Secretary that such facility will make available a full range of treatment, liaison, and followup services (as prescribed by the Secretary) for all children and their families in the service area of such facility who need such services, and will, when so requested, provide consultation and education for personnel of all schools and other community agencies serving children in such area.

"SEC. 272. (a) There are authorized to be appropriated $18,000,000 for the fiscal year ending June 30, 1971, $30,000,000 for the fiscal year ending June 30, 1972, and $45,-

000,000 for the fiscal year ending June 30, 1973, for grants authorized under this part.

"(b) There are also authorized to be appriated for the fiscal year ending June 30, 1971, and for each of the next thirteen fiscal years such sums as may be necessary to continue to make grants with respect to any project under this part for which a staffing operation and maintenance grant was made under this section for any fiscal year ending before July 1, 1973".

TITLE V—MISCELLANEOUS

APPROVAL BY NATIONAL ADVISORY MENTAL HEALTH COUNCIL

SEC. 501. (a) Section 303(b) (42 U.S.C. 242a) of the Public Health Service Act is amended by inserting after the words "subsection (a)" the following: "or under title II of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, as amended".

(b) Part E of the Community Mental Health Centers Act, as amended, is amended by adding a new section 264 at the end thereof to read as follows:

"APPROVAL BY NATIONAL ADVISORY MENTAL HEALTH COUNCIL

"SEC. 264. Grants under this title may be made only upon recommendation of the National Advisory Mental Health Council, established by section 217(a) (42 U.S.C. 218(a)) of the Public Health Service Act."

Mr. YARBOROUGH. Mr. President, I recommend to the Senate enactment of S. 2523, to amend, extend, and improve the community mental health center program.

This program was started in 1963. It was a response to recognition that the millions afflicted with mental illness recover sooner and more fully when they have treatment and care in their home communities. The old practice of sending people to State institutions was better than no care at all. But rates of admission to these institutions soared after World War II. Mental hospitals were crowded with men and women whose sheer numbers prevented individual treatment.

Under the program begun in 1963, local health agencies were encouraged to develop a unified mental health service to serve a local population. Continuity of care and inclusion of a basic group of essential srevices were stressed. As a result of this improved local care, plus great advances in medication, the need to hospitalize the mentally ill has greatly declined, and the length of hospitalization for emergency cases has been greatly shortened.

We are already reaping great returns from this program, in other words. But it is still not available to many millions of Americans. In 1963, we envisioned 2,000 centers, each to serve an average of 100,000 people. From July 1965 when the first center was funded until the end of fiscal year 1969, 376 centers had been funded. By the time the present law expires next June, it is anticipated that only 450 centers will have been funded, when 2,000 are needed.

So the number funded is still less than a fourth of the number needed. And many of these funded are not not yet operational, due to difficulty in gaining local financial support to sustain them after Federal support runs out.

Therefore, in extending the law for 3 years, the Committee on Labor and Public Welfare has also amended it to assure Federal support for operation of the centers for a total of 10 years, rather than the 51 months now permitted, and has provided a higher level of Federal participation in construction and operation of centers to be located in low income communities. It is in areas of widespread poverty, both urban and rural, where the most difficulty is encountered in setting up a center. Yet, it is these very communities, and the people in them, who need centers the most.

In addition, the committee added a special section to encourage development of children's services within the centers. Mental and emotional disturbances among children and young people afflicts some 8 million; fewer than half a million of them receive appropriate attention. Services for children and adolescents need to be specially designed for them, and professional people need to be specially trained to handle their problems.

Finally, the committee extended for 2 years rather than 3 the grants for alcoholism and narcotic addiction services within the centers. This was because our Subcommittee on Alcoholism and Narcotics is making a separate study of these problems, and working to develop a long-range program.

Enactment of S. 2523 will assure extension of one of the most effective health programs we have. More people suffer from the blight of emotional and mental illness than from all physical illnesses combined. We are making great strides in treating it effectively. I urge that we expand, enlarge, and continue this progress. This bill does expand, enlarge, and continue this progress.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "To amend the Community Mental Health Centers Act to extend and improve the program of assistance under that act for community mental health centers and facilities for the treatment of alcoholics and narcotic addicts, to establish programs for mental health of children, and for other purposes."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–583), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

The bill reflects the committee's determination to respond to mounting evidence that the mentally ill recover sooner and more fully when they have a comprehensive treatment program in the home community. It was this determination that led to enactment in 1963 of Public Law 88–164 (title II). That act authorized grants to meet part of the cost of constructing community-based treatment facilities, and marked the beginning of the community mental health centers program.

Because newly developing centers were shown to need funds to help meet the initial costs of their operation, the act was amended in 1965 to provide grants to cover part of initial costs for professional and technical staff. In 1967, the act was further amended to extend construction and staffing grants through fiscal year 1970.

In 1968, the Alcoholic Rehabilitation Act and Narcotic Addict Rehabilitation Act were added in growing recognition of the detriment to persons and communities from alcoholism and narcotics addiction.

The total program has been guided by fundamental concepts of a catchment area of specified population size to be served, continuity of care, and inclusion in all centers of a basic group of essential services. Thus, a center affords unified treatment and rehabilitation for the general population of the community.

From July 1965, when the first center was awarded a grant, until the end of the fiscal year 1969, 376 community mental health centers had been funded. These centers are located in every State, and will provide services to 52 million people when fully operative. They will serve every kind of community—rural, suburban, urban, Appalachia, and Great Plains.

Applicants include State and local government units, public mental hospitals, public and nonprofit private general hospitals, independent mental health cliics, charitable institutions, and community mental health boards.

By Jue 30, 1970, when present law expires, about 62 million people will be served by an anticipated 450 centers.

S. 2523 will extend the program for 3 years, and make changes designed to speed the organization of centers, and improve their services.

CONSTRUCTION GRANTS

The bill extends for 3 years the authorization for construction grants for community mental health centers, as follows:

$95 million for fiscal year 1971;

$115 million for fiscal year 1972;

$115 million for fiscal year 1973.

Section 104 amends present law to permit the cost of acquisition of land to be included in the cost of construction. This change is especially important to low-income communities, where the high cost of land has often been a prohibitive factor in the establishment of centers.

The present minimum Federal share of one-third of construction cost is eliminated. The two-thirds maximum is retained, except that in poverty areas, as defined by the Secretary, the Federal share may go as high as 90 percent.

GRANTS FOR OPERATION

A major hindrance to the creation of centers has been the limited Federal support for their operation. Present law permits such support for only 51 months, and for only a portion of salaries of professional and technical people employed in them. In order to organize and develop quality services, the center must have assistance for a greater share of operating costs and for a longer period of time. Federal support now starts at 75 percent of salaries the first 15 months, and declines to 30 percent the fourth and final year thereafter. Thus, Federal staffing grants account for only 40 percent of the average center's first year operating cost, and a declining rate in succeeding years.

The committee therefore recommends that all operational expenses be covered in the continuation grants (section 206), and that the Federal share continue at 30 percent for 6 additional years (section 201).

An exception is made for centers to serve poverty areas. Here, the committee bill permits the Federal grant to cover 90 percent of operating costs the first 2 years and 75 percent for 8 years thereafter.

A change is made in existing law to permit centers to begin operation in poverty areas without furnishing all the "essential" services as defined by regulation. Centers in these areas will be given 18 months in which to furnish all these five services (day care,

outpatient care, inpatient care, 24-hour emergency service, and education and consultation).

It is the hope of the committee every effort will be made to provide full services as soon as possible.

Authorization of grants for initial operating expenses is extended for 3 years, as follows:

$60 million for fiscal year 1971;
$60 million for fiscal year 1972;
$80 million for fiscal year 1973.

Authorization for continuation grants is open, as it is in present law.

ALCOHOLISM AND NARCOTICS ADDICT REHABILITATION

The committee decided to extend this section of the law for 2 years, rather than 3, because its Subcommittee on Alcoholism and Narcotics is separately studying this area, and working to develop a long-range program for alcoholism and narcotics addiction.

The authorization for all construction, operating costs, and special project grants is in one sum, fixed by the bill at $25 million for fiscal year 1971 and $30 million for fiscal 1972.

However, construction grants may cover 90 percent of the total cost, all operating expenses are included in continuation grants, and such grants may cover 90 percent of operating costs for the first 2 years and 75 percent for 8 additional years.

The committee notes with disappointment that the alcoholism portion of the Narcotic Addiction and Alcoholism Amendments of 1968 has not yet been implemented, although alcoholism is a major mental health problem in the United States. It directly affects over 5 million persons, plus their families and associates.

In an effort to stimulate imaginative treatment for both alcoholics and narcotics addicts, the committee added an authorization for the Secretary of Health, Education, and Welfare to make direct grants for special projects, not necessarily tied in with a community mental health center. These grants may be for specialized training programs, training of personnel, the conducting of surveys, or to support programs for treatment and rehabilitation which demonstrate new techniques or show special promise of effectiveness.

SERVICES FOR CHILDREN

The committee added to existing law a new category of aid for community mental health centers, to encourage them to provide services aimed at children and adolescents.

The recent report of the Joint Commission on Mental Health of Children so recommended, after noting that 10 to 12 percent of the under-18 population needs mental health services. Of these estimated 8 million emotionally disturbed young people, only about 500,000, or 6 percent, receive appropriate attention.

All centers funded under the act do provide some services for children; but few provide a comprehensive program oriented to meet their special needs.

Therefore, the committee bill authorizes grants for construction and to operate these special services, as follows:

$18 million for fiscal year 1971;
$30 million for fiscal year 1972;
$45 million for fiscal year 1973.

Continuation grants may be made out of this authorization to support the operation of children's services for a total of 10 years, covering 90 percent of their costs the first 2 years, and 75 percent for 8 additional years.

A new service applicable to children is required. The applicant must assure that followup service will be provided, so the disturbed child will have continuous supervision in his dealings and relationships with schools and other community agencies.

GRANTS FOR INITIATION OF A PROGRAM

Another crucial new provision in the bill allows up to 5 percent of money appropriated for initial operating grants to be used in poverty areas without any matching requirement, to help local communities in poverty areas do the organizational groundwork leading to development of a community mental health program. This groundwork includes assessment of local mental health needs, the design of appropriate services, and acquiring financial support. Grants for this work may go only to local agencies.

The same arrangement is made in the bill for initiation of alcoholism and narcotics addiction programs as an incentive for their development.

STATE ADMINISTRATION

Another provision in the bill increases from the existing 2 percent to 5 percent the amount of a State's construction allocation that may be applied to the cost of administration of the State plan. This change was prompted because of the small amounts available to States with minimum construction allocations. However, the current maximum of $50,000 is retained.

The committee included in the bill S. 3101, by Senator Dominick, allowing these funds to remain available for State use in the year following the year of allocation.

ADDITION OF TRUST TERRITORY

The definition of the term "State" has been amended to include the Trust Territory of the Pacific Islands, previously excluded. The territories will be allowed to use their allocations for 3 years, since these allocations are very small.

## BILL PASSED OVER

The bill (S. 2809) to amend the Public Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public health was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

## ALEX G. W. MILLER

The bill (S. 1389) for the relief of Alex G. W. Miller was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, for the purposes of the Immigration and Nationality Act, Alex G. W. Miller shall be held and considered to have been lawfully admitted to the United States for permanent residence as of October 25, 1959, and the periods of time he has resided in the United States since that date shall be held and considered to meet the residence and physical presence requirements of section 316 of such Act.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–587), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to enable the beneficiary to file a petition for naturalization.

## JAMES HIDEAKI BUCK

The bill (H.R. 2208) for the relief of James Hideaki Buck was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–583), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill to facilitate the adjustment of status as an immediate relative of the adopted child of citizens of the United States.

## SA CHA BAE

The bill (H.R. 4560) for the relief of Sa Cha Bae was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–589), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to grant the status of permanent residence in the United States to Sa Cha Bae. The bill provides for payment of the required visa fee, and for deduction of an appropriate visa number.

## PAGONA ANOMERIANAKI

The bill (H.R. 5133) for the relief of Pagona Anomerianaki was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–590), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to grant to the adopted daughter of U.S. citizens the status of a first-preference immigrant, which is the status normally enjoyed by the natural-born alien sons and daughters of U.S. citizens.

## PANAGIOTIS, GEORGIA, AND CONSTANTINA MALLIARAS

The bill (H.R. 6600) for the relief of Panagiotis, Georgia, and Constantina Malliaras was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–591), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to grant the status of permanent residence in the United States to Panagiotis, Georgia, and Constantina Malliaras. The bill provides for payment of the required visa fees, and for deduction of appropriate visa numbers.

## LIDIA MENDOLA

The bill (H.R. 10156) for the relief of Lidia Mendola was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–592), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to deem the adopted daughter of lawful residents of the United States to be a child within the meaning of section 101(b)(1)(E) of the Immigration and Nationality Act.

## PERCY ISPAS AVRAM

The Senate proceeded to consider the bill (S. 2102) for the relief of Percy Ispas Avram, which had been reported from the Committee on the Judiciary, with an amendment, to strike out all after the enacting clause and insert:

That the periods of time Percy Ispas Avram has resided in the United States and any State since his lawful admission for permanent residence on December 15, 1962, shall be held and considered to meet the residence and physical presence requirements of section 316 of the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "A bill for the relief of Percy Ispas Avram."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–593), explaining the purpose of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to enable the beneficiary to file a petition for naturalization. The bill has been amended in accordance with established precedents and to correct the spelling of the beneficiary's name.

Mr. MANSFIELD. That concludes the call of the calendar, Mr. President.

## LEGISLATIVE BRANCH APPROPRIATIONS, 1970—CONFERENCE REPORT

Mr. MONTOYA. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13763) making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes. I ask unanimous consent for the present consideration of the report.

The ACTING PRESIDENT pro tempore. The report will be read for the information of the Senate.

The assistant legislative clerk read the report.

(For conference report, see House proceedings of December 9, 1969, pp. 37946–39947, CONGRESSIONAL RECORD.)

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. MONTOYA. Mr. President, the House concurred in all Senate amendments except No. 37. The only real difference between the two Houses on this appropriation bill was on amendment No. 37, which related to the west front of the U.S. Capitol.

The House bill provided $2 million for preparation of detailed plans and specifications for extending the west central front. The Senate bill struck this provision and substituted an appropriation of $250,000 to be transferred to the National Park Service for use in conducting studies to determine the feasibility and cost of restoring the west central front. The conference agreement which has been adopted in the House will provide an appropriation of $2,275,000. The language reads that not to exceed $250,000 shall be used for the employment of independent, nongovernmental engineering, and other services for studying and reporting on the feasibility and cost of restoring the west central front, under such terms and conditions as the Commission for Extension of the Capitol may determine. The language further provides that pending completion of the restoration study and report, none of the funds shall be available for any further work toward extension of the west central front.

The language provides further that after the submission of such a report and study, the Commission shall direct the preparation of final plans for extending the west central front unless such restoration study report establishes to the satisfaction of the Commission certain criteria. Among these criteria are:

First, that the work can be done without undue hazard to safety of the structure and persons and that the west front can be made safe and beautiful for the foreseeable future;

Second, that restoration can be accomplished with no more vacation of west central front space that would be required under the extension plan;

Third, that the method or methods of accomplishing restoration can be so described and specified as to form the basis for performance under a competitive fixed-price contract;

Fourth, that the cost of restoration would not exceed $15,000,000; and

Fifth, that the time schedule for accomplishing restoration would not exceed the time projected for accomplishing the extension plan.

Should the restoration study meet all five of the conditions I have described, the Capitol Building Commission would then make recommendations to the Congress on the question of whether to extend or restore.

In the statement on the part of the managers of the House it has been made very clear that the Senate and the House desire the Commission to secure the services of a completely independent group to make this study and this group should have no previous connection with proposals to either extend or restore the west central front.

Mr. President, I believe a fair compromise has been agreed to and I hope it will be adopted by the Senate.

Mr. PROXMIRE. Mr. President, as I understand it, the conference report has not yet been agreed to. I have some concern about this matter, and I might require a rollcall if we cannot reach an agreement.

Mr. MONTOYA. If the Senator from Wisconsin has any questions, I would be willing to answer them.

Mr. PROXMIRE. Mr. President, I have serious reservations with regard to the agreement reached by the House-Senate conferees on the legislative appropriations bill. There was really only one point of disagreement on this bill. There was cooperation between the Senate and House on all other points.

I thought the Senator from New Mexico (Mr. MONTOYA), the chairman of the subcommittee, handled this extremely well. But there was one point on which there was sharp disagreement because, as we know, the House had passed a bill providing for $2 million to begin a $45 million project for the extension of the west front of the Capitol. The Senate discussed this matter at some length, and by a 2-to-1 margin, the Senate rejected the notion of proceeding with the extension of the west front, provided no money for the extension, and provided $250,000 for a study of the feasibility of restoration.

Frankly, although the House and Senate did reach an agreement in conference, I, for one, refused to sign the conference report so far as it pertains to this amendment.

Nevertheless, I believe we can make useful floor history today in discussing the amendment. We can inform the Commission for the Extension of the U.S. Capitol, which has been charged by the conference agreement with overseeing a restoration study of the west front, exactly how we interpret the language of the conference report. In this way, the Commission can proceed with an adequate knowledge of what the Senate expects of it, as it contracts for the restoration study.

My major reservation to this provision, arises from the conference committee's decision to place the matter in the hands of a Commission, which by its very title—"Commission for the Extension of the United States Capitol"—can be expected to favor extension rather than restoration. In other words an extension commission will be commissioning a restoration study.

However, the Commission is made up of honorable men, including the distinguished majority leader and the distinguished minority leader, and other of our colleagues in both Houses of Congress. Furthermore, it would appear to me from the language of the conference report that the one noncongressional member of the Commission—J. George Stewart—who is deeply committed to extension would be barred from taking part in the process of selecting the firm or firms performing the restoration study. Mr. Stewart and his office have been com-

pletely committed to extension of the west front since early in this decade. Over 6 years ago—on June 5, 1963—Mr. Stewart told the Legislative Subcommittee of the Senate Appropriations Committee:

I am on record as advocating extension and reconstruction of the west front at an early date.

I believe that the following language in the conference report would be considered by the Senate to bar Mr. Stewart's participation in the selection of a restoration study firm:

The conferees of both Houses are agreed that the nongovernmental engineering and other necessary services engaged by direction of the Commission to study and report on the feasibility and cost of restoration should be, in the Commission's opinion, completely independent, with no previous connection with proposals to either extend or to restore the west central front, *including any expressed predisposition for or against the extension or the restoration of the west central front.*

I believe that it would be a patent conflict of interest if, given this language, Mr. Stewart, who strongly supports extension, were to play a role in choosing the firm to do the restoration study.

I wish to ask the distinguished Senator from New Mexico this question: The language on page 5 of the report indicates that the firm to make the study on the feasibility of restoration of the west central front of the Capitol should be, as I quoted earlier, "completely independent with no previous connection with proposals to either extend or to restore the west central front, including any expressed predisposition for or against the extension or the restoration of the west central front."

First, would this mean that the determination would be made by the Commission but without that decision being influenced by the Architect of the Capitol or his Office?

Second, it is my understanding that it will be necessary for the independent firm to work with the contracting officer, who will give them an interpretation of the contract during the 6 months' study and will provide details and information needed to complete the study. Can the chairman of the subcommittee assure the Senate that this function can be performed independently of the Office of the Architect of the Capitol, inasmuch as the Architect is the principal advocate of extension and is recognized as completely opposed to restoration?

Mr. MONTOYA. Mr. President, in answer to the Senator's question, and I think he will agree with me that we both recognize the Commission for the Extension of the Capitol is the administering agency of the will of Congress in this matter. I would expect the Commission for Extension of the Capitol to be completely cognizant of the vote taken here in the Senate with respect to this issue and what considerations played a part in arriving at the vote here in the Senate on the issue. I believe the vote and the debate eloquently expressed the feeling that this evaluation and feasibility study should be done completely independent of the Office of the Architect and that the Commission should undertake to insure that a firm is selected separate and apart from any possible loyalty or leaning toward the Architect's wishes. The conference report has endorsed this plan. The conference report enunciates it and I would certainly express, as part of the history of this legislation, the urgent desire on the part of the Senate conferees as well as the Senate that the Architect not play any dominant or substantial or significant part in this endeavor, but that the Commission should speak as one authority in trying to bring about a completely independent study as described herein.

Mr. PROXMIRE. Mr. President, I appreciate the response.

It might well be asked if, in the absence of Mr. Stewart's recommendation, the Commission can make an informed choice. Certainly. In fact this is a golden opportunity for the Commission to lay to rest claims that a favored few firms have been engaged for all work contracted for by the Commission and the Capitol Architect's office. This can be done by inviting all qualified firms to submit their qualifications, by making the selection process a matter of public record, and by seeking the advice of the General Services Administration and the Interior Department's historic buildings staff in evaluating potential contractors. These are suggestions only, but they would guarantee full acceptance by the Congress and the American people of the result of the restoration study.

I would also hope that the Commission, because it has in the past taken a firm stand in support of extension, would release to the Congress and the public the restoration study and its result as soon as they were made available. If the study shows restoration to be feasible then the Congress should have an opportunity to decide on whether to extend or restore. Thus the Commission ought not to proceed with extension without consulting Congress if restoration is feasible.

We should all recognize that the Commission will fairly evaluate the possibility of restoration. I know that they will keep Congress and the public informed of the progress of the restoration study. Given all of these conditions I am very hopeful that we can lay to rest once and for all the question of whether the west front of the Capitol should be restored or extended.

This Senator expresses the hope and desire that the Commission will designate and retain a person or agency that will handle day-to-day details during the 6 months' study on behalf of the Commission, and that that person or agency be assigned apart from the Architect of the Capitol or his office inasmuch as that office has taken a clear and conspicuous position on this matter.

Mr. MONTOYA. I would certainly agree and express the hope that the Commission would do just that.

Mr. PROXMIRE. Mr. President, I wish to say to the Senator, who is the chairman of the subcommittee, that I think he has done a very fine job in this regard. I think the House has gotten a considerable concession from the Senate. I think the Senate should know that what we have done is to provide that the study of the feasibility of restoration must meet certain specific criteria, that it must be done on the basis of a fixed price, cannot be open-ended, must cost less than $15 million which is a third as much as extension, and has to be done in a way so as not to evacuate part of the capital for a longer period than extension would require. Other criteria are specified.

The Commission will be the judge of whether these criteria of feasibility are met. We are leaving it up to the Commission which has been studying this matter to determine whether or not this restoration feasibility study meets certain very strict criteria. Under the circumstances this is the best we can do in a very difficult situation.

I think the chairman did an excellent job and I thank him for his patience and consideration.

Mr. MONTOYA. Mr. President, I wish to thank the Senator from Wisconsin for his kind remarks. I also wish to say to this body that the Senator from Wisconsin made a very valuable contribution in trying to resolve this issue. I believe the solution we arrived at is a worthy solution and that it approximates the position the Senate has expressed heretofore.

The PRESIDING OFFICER (Mr. MONDALE in the chair). The question is on agreeing to the conference report.

WEST FRONT OF THE CAPITOL

Mr. KENNEDY. Mr. President, I do not intend to object, but I would like to take this opportunity to present some views and comments on the question of the west front extension.

Once again I wish to express my appreciation to the distinguished Senator from New Mexico (Mr. MONTOYA) for permitting me to testify on this question, and for exploring in the kind of detail he and his committee did, the whole question of the extension.

I wish to commend the distinguished Senator from Wisconsin (Mr. PROXMIRE) for providing such leadership on this entire question, because it is a matter, I think, of great significance. Although it is initially a matter of small funding, the potential is for a considerable outlay—some $45 million.

I know the very deep consideration that the chairman of this committee gave to this entire project, and I would like to take this opportunity to comment on the action of the conference committee.

When the House bill came over here, carrying in it $2 million for beginning the work on extending the Capitol's west front, I was pleased to have the opportunity to testify against the extension. We have never had an independent study of the feasibility of costs of restoration, and that consequently my recommendation was to authorize such a study. This was reinforced by the need to hold down all but the most vital public works spending when inflation is such a peril to a sound economy.

The Senate Appropriations Committee recommended, and the Senate overwhelmingly approved, this position. Those of us concerned with the preservation of the last original remaining portion of the Capitol were greatly heartened.

The conference committee's resolution of the two differing versions of the bill is somewhat mixed, from my own viewpoint. On the one hand, no work on extension can go forward until after a study on restoration. On the other hand, the study's criteria are very restrictive, and the identity of the organization to carry out the study is less than clear.

It is my hope that the Commission on the Extension of the U.S. Capitol—the entity charged with administering this bill's mandate—will be imaginative and sensitive in selecting a study contractor, and in monitoring the study itself. For example, I am sure that the American Institute of Architects, the National Trust for Historic Preservation, and other organizations would be pleased to advise and consult on the study. I would hope that the Commission would invite their expert and committed suggestions.

We must not forget that if the west front is extended, we will have shrouded the last remaining original exterior portion of the Capitol forever from view. It now stands as it stood when our first Presidents saw it. We do not often have an opportunity to preserve something so priceless. But when we do, then we should be vigilant to do so.

Let me thank the Senator from New Mexico and once again commend him for his work.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER. The clerk will state the amendment of the House to the amendment of the Senate numbered 37.

The assistant legislative clerk read as follows:

In lieu of the matter stricken out and inserted by said amendment, insert the following:

"EXTENSION OF THE CAPITOL

"For an additional amount for 'Extension of the Capitol', $2,275,000, to be expended under the direction of the Commission for Extension of the United States Capitol as authorized by law: *Provided*, That such portion of the foregoing appropriation as may be necessary shall be used for emergency shoring and repairs of, and related work on, the west central front of the Capitol: *Provided further*, That not to exceed $250,000 of the foregoing appropriation shall be used for the employment of independent nongovernmental engineering and other necessary services for studying and reporting (within six months after the date of the employment contract) on the feasibility and cost of restoring such west central front under such terms and conditions as the Commission may determine: *Provided, however*, That pending the completion and consideration of such study and report, no further work toward extension of such west central front shall be carried on: *Provided further*, That after submission of such study and report and consideration thereof by the Commission, the Commission shall direct the preparation of final plans for extending such west central front in accord with Plan 2 (which said Commission has approved), unless such restoration study report establishes to the satisfaction of the Commission:

"(1) That through restoration, such west central front can, without undue hazard to safety of the structure and persons, be made safe, sound, durable, and beautiful for the foreseeable future;

"(2) That restoration can be accomplished with no more vacation of west central front space in the building proper (excluding the terrace structure) than would be required by the proposed extension Plan 2;

"(3) That the method or methods of accomplishing restoration can be so described or specified as to form the basis for performance of the restoration work by competitive, lumpsum, fixed price construction bid or bids;

"(4) That the cost of restoration would not exceed $15,000,000; and

"(5) That the time schedule for accomplishing the restoration work will not exceed that heretofore projected for accomplishing the Plan 2 extension work: *Provided further*, That after consideration of the restoration study report, if the Commission concludes that all five of the conditions hereinbefore specified are met, the Commission shall then make recommendations to the Congress on the question of whether to extend or restore the west central front of the Capitol."

Mr. MONTOYA. Mr. President, I move that the Senate concur in the amendment of the House to the amendment of the Senate numbered 37.

The PRESIDING OFFICER. The question is on agreeing to the notion of the Senator from New Mexico.

The amendment was agreed to.

Mr. MONTOYA. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a tabulation which gives by appropriation line item in the bill the comparisons of the budget, estimates, House bill, Senate bill, and final conference report.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE BILL, H.R. 13763

| Item | New budget (obligational) authority, 1969 | Budget estimates of new (obligational) authority, 1970 | House bill | Senate bill | Conference action |
|---|---|---|---|---|---|
| **SENATE** | | | | | |
| **Vice President and Senators** | | | | | |
| Compensation of the Vice President and Senators | $3,762,565 | [1] $4,703,270 | ..... | $4,685,530 | $4,685,530 |

## DISTRICT OF COLUMBIA APPROPRIATIONS, 1970

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 559, H.R. 14916.

The PRESIDING OFFICER. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (H.R. 14916) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the District of Columbia appropriation bill.

Mr. PROXMIRE. I thank the Chair.

Mr. President, on behalf of the Committee on Appropriations, I report to the Senate the 1970 appropriations bill for the District of Columbia, H.R. 14916, in the amount of $645,342,000, which is $37,764,300 below the House bill and $107,602,300 below the revised budget estimate. Although the bill and the report reflect the economies which the committee was compelled to make in restricting the appropriation to funds available to the District government, it is important to note that significant new programs have been begun in an effort to make the District government responsive to the needs of the District's citizens and to improve the quality of life here. Among these are:

First and foremost, full funding of every dollar requested for the police department and the courts and implementation of all priority programs in the President's recommendation to curb crime in the District of Columbia. Crime in the Nation's Capital is a national disgrace and the committee has dealt with the problem as a matter of grave concern and utmost importance.

Second, new personnel have been provided in the executive office to assist the city's able new executive team to implement creative and resourceful new methodology and to revitalize old programs to make them more responsive to the needs of the people living here, the almost 20 million visitors, and all Americans who desire that the Nation's Capital be the type of city upon which they can look with pride—not only in its spectacular beauty, but in the quality of its institutions as well.

Third, a record school operating budget with priorities as to programs and the allocation of available funds established by the city government and board of education—not by a committee sitting far from the day-to-day problems of improving education for those who need it most to survive and compete in today's world.

Mr. BYRD of West Virginia. Will the Senator from Wisconsin yield?

Mr. PROXMIRE. I am happy to yield to the Senator from West Virginia who for many years had this job as chairman of the Appropriations Subcommittee on the District of Columbia and did such a tremendously effective one that none of us who follow him will be able to achieve the diligence and the ability the distinguished Senator put into his work.

Mr. BYRD of West Virginia. I am very grateful for the kind remarks of the Senator from Wisconsin. I merely interrupted to invite attention to the fact that the committee report is not on the desk of each Senator. I think it would be well if someone would instruct the pages to put the committee report on the desk of each Senator.

Inasmuch as the Senator so kindly yielded to me, I want to take this opportunity to say that the distinguished Senator from Wisconsin has, in my judgment, performed admirably as chairman of the Appropriations Subcommittee on

the District of Columbia. He has done an excellent job and has been most diligent.

He brings to the Senate today a good bill and committee report when one considers the limited revenues available. I have seen the report prior to today but I thought it should be on the desk of each Senator.

Mr. PROXMIRE. I thank the distinguished Senator from West Virginia. That concerns me also, but I am delighted that the Senator is insisting on the committee report being on the desk of each Senator. I think that the Senate in an appropriation bill involving such enormous amounts of money, should know what it is doing. That is the function of the committee report. We worked hard on it. It is a good report.

In this regard, let me attempt to set the record straight on what I believe to be one of the greatest misapprehensions with reference to the problems of this city, namely, that the problems of the schools are directly related to congressional neglect. There are contained in the report accompanying this bill comparative tables on expenditures per pupil and professionals per 1,000 pupils in eight comparable jurisdictions, together with a statement of appropriations for the District of Columbia public schools for the last 10 years.

Mr. President, I ask unanimous consent that these tables be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

1969-70 SCHOOL YEAR ESTIMATES [15]
EXPENDITURE PER PUPIL IN EIGHT COMPARABLE CITIES

| School system | Expenditure per pupil | Costs relating to capital outlay projects included | Present and anticipated future costs of retirement programs included |
|---|---|---|---|
| Atlanta | $772.00 | No | Yes. |
| Baltimore | 814.19 | No | Yes. |
| Boston | 885.00 | No | Yes. |
| Cleveland | 800.00 | No | Yes. |
| Milwaukee | [16] 840.06 | No | Yes. |
| St. Louis | 871.87 | Yes [17] | Yes. |
| San Francisco | 830.00 | No | Yes. |
| Average of expenditures in above jurisdictions. | 830.00 | | |
| District of Columbia (budgeted). | [18] 982.00 | No | No. |

[15] Data based on estimated average daily attendance and supplied Senate Appropriations Committee by school systems concerned. In the District of Columbia, average daily attendance computations are considered to be 91 percent of average daily membership computations. Also included in the per student cost figure are Federal grants which the District of Columbia estimates will be $79 per student for fiscal 1970.

[16] Including $29.06 per pupil as employer contribution to teachers retirement.

[17] However last successful bond issue was passed in 1962 and there is no existing authority to issue additional bonds.

[18] The District of Columbia school budget provides only $4,000,000 of $19,100,000 estimated by the U.S. Treasury Department as being necessary to fully fund present and anticipated future costs of the District of Columbia Teachers Retirement System. When adjusted to include full funding of Teachers Retirement System. District of Columbia per pupil cost would be $1,094.51.

COMPARISON OF PUPIL ENROLLMENT AND PROFESSIONAL STAFF PER 1,000 PUPILS FOR THE YEARS 1964-65 AND 1968-69 (EXCEPT WHERE INDICATED, WHEN LATEST AVAILABLE DATA ARE GIVEN) IN 8 SELECTED SCHOOL SYSTEMS HAVING AN ENROLLMENT OF OVER 90,000 PUPILS

| | Pupil enrollment | | Professional staff per 1,000 pupils | | | |
|---|---|---|---|---|---|---|
| | | | Fiscal year 1965 | | Fiscal year 1967 or 1968, total professional staff | |
| | Fiscal year 1965 | Fiscal year 1969 | Teachers | Total professional staff | | |
| Washington, D.C. | 141,396 | 152,400 | 37.7 | 41.8 | 58.8 | 1968 |
| Atlanta | 107,770 | 114,184 | 37.7 | 40.5 | 42.1 | 1967 |
| Baltimore | 188,020 | 192,362 | 34.5 | 39.5 | 49.3 | 1968 |
| Boston | 94,266 | 94,766 | 39.4 | 43.5 | 55.2 | 1968 |
| Cleveland | 151,242 | 153,043 | 33.9 | 37.9 | 40.3 | 1967 |
| Milwaukee | 120,045 | 130,540 | 35.7 | 38.7 | 36.3 | 1967 |
| San Francisco | 91,577 | 93,672 | 41.0 | 44.7 | 43.0 | 1967 |
| St. Louis | 114,987 | 116,102 | 34.2 | 38.7 | 39.7 | 1967 |

Note: Data for this study were obtained from Educational Statistics of the Office of Education, U.S. Department of Health, Education, and Welfare and from the Research Division of the National Education Association.

APPROPRIATIONS, DISTRICT OF COLUMBIA PUBLIC SCHOOLS, 1959-69

| Fiscal year | Operating expenses | Capital outlay | Federal funds | Total |
|---|---|---|---|---|
| 1959 | $44,043,668 | $8,920,300 | (1) | $52,963,968 |
| 1960 | 47,184,500 | 6,911,000 | (1) | 54,095,500 |
| 1961 | 51,652,700 | 6,944,000 | (1) | 58,596,700 |
| 1962 | 54,016,210 | 8,886,000 | (1) | 62,902,210 |
| 1963 | 59,504,750 | 7,693,000 | (1) | 67,197,750 |
| 1964 | 63,860,593 | 15,626,000 | $1,751,280 | 81,237,873 |
| 1965 | 72,038,300 | 14,405,100 | 3,280,626 | 89,724,026 |
| 1966 | 75,641,500 | 17,568,950 | 15,375,280 | 108,585,730 |
| 1967 | 86,114,000 | 30,105,100 | 15,088,882 | 131,307,982 |
| 1968 | 101,876,900 | 49,054,600 | 20,577,268 | 171,508,768 |
| 1969 | 115,931,930 | 35,950,900 | 20,442,499 | 172,315,329 |
| 1970 (as recommended) | 122,583,000 | 28,132,400 | 20,799,000 | 171,514,400 |

[1] Unobtainable.

Mr. PROXMIRE. Mr. President, the table on professionals per 1,000 shows that the District of Columbia with 58.8 professionals per 1,000 in 1968 is far ahead of such cities as Atlanta with 42.1, San Francisco with 40.3, or Milwaukee with 36.3. There might be some variation, inasmuch as the latter three figures were the latest available, which were for 1967, and the Washington figure is for 1968. However, the spread is so great as to make the fact clear.

Insofar as per-pupil expenditures are concerned, the table referred to indicates that the average of seven comparable cities computed on the basis of average daily attendance is $830 with none exceeding $900, and each reporting to the committee that the estimate reflected full funding for present and anticipated future costs of retirement programs for teachers and other school personnel. For the District of Columbia, per-pupil expenditure computed as above on an average daily attendance basis is $982, as provided in this bill. This estimate does not take into consideration full funding of present and future costs of retirement programs for District school personnel. If this figure were adjusted to include full funding of retirement costs, as it is understanding the other cities reporting to the committee have done, the figure for the District would become $1,094.51. This compares with the $830 per-pupil average in other cities so the District pays more than 30 percent more per pupil than the average of comparable cities and 23 percent more than the next highest.

The last of the three tables clearly shows that at least for the last 10 years the Congress has been most responsive in providing for the educational needs of the District.

Fourth, in addition, the bill, as recommended, provides full support of the programs proposed to deal with the very grave narcotics problem confronting the District and significant new funds—$1.4 million—and personnel—215—for the District of Columbia General Hospital.

There is no question in my mind that the narcotics problem is closely tied in with crime and that one of the big reasons for the phenomenon of increase in crime in the District of Columbia and the Nation at a time when we have unparalleled prosperity and very low unemployment is the need of many drug addicts for money to purchase drugs, and the only way they can do it is by committing crimes.

Last, but by no means least important, are the funds provided in the bill for sufficient modernized equipment which, as soon as it can be made available, will make possible the long sought goal of biweekly collection of refuse at every residence from the far southeast to the far northwest.

While the report makes clear that the committee strongly supports the able Commissioner and outstanding City Council and Board of Education, it deals forthrightly with the problems of budgeting within available resources, cooperation with the Congress, reprograming of activities, and restriction of supplemental appropriations.

The committee report also points out that total Federal assistance in the District of Columbia, as estimated by the General Accounting Office, is in excess of a half billion dollars per year—or, more graphically, it is an equivalent to $2,381 for every family in the District of Columbia. Also noted is the often overlooked fact that the Federal contribution to the District's budget of $100 million is $30 million in excess of the amount which the Federal Government would be required to pay in real property taxes,

which of course it is not, either here or anywhere else.

The question of soaring personnel rolls which committee estimates constitute a ratio of one District of Columbia employee to every six employed District citizens has been a matter of grave concern to this committee as to its sister committees in both Houses of the Congress.

In other words, if you take all the people employed in the District of Columbia, one out of six works for the District of Columbia Government.

The committee fully supports the personnel limitation imposed in the Revenue Act, and when considered in conjunction with the personnel freeze proposed by the Commissioner, the bill before you establishes a limitation which is almost 700 below the 41,500 which was established through the revenue bill's personnel ceiling. The committee also strongly urges vigorous and inclusive study and critical analysis of the District's present and future manpower needs with a first-year goal of reducing by at least 1,000 the total of authorized positions established in this bill.

Because only a portion of the year remains for the District of Columbia to undertake a capital outlay program, and because of the committee's feeling that the District of Columbia has a special obligation to respond to the President's request to curtail new construction starts, the bill, as recommended, is $70 million below budget estimates and $30 million below the House bill. These reductions are primarily related to funding and scope and are within priorities established by the District Government.

When we made this cut we did not make it arbitrarily. We made it on recommendations to us of the Mayor, and of city officials who indicated projects that could be stretched out or deferred in response to President Nixons' request that we curtail Federal construction wherever it could be done.

Included is the full amount of $40 million for the Washington Metropolitan Area Transit Authority, $28 million for public school construction, and initial funding for a new jail, new District of Columbia court building, and a new administration building.

There is one error in the hearing record that should be noted. Upon inquiry the committee has been informed that certain information relating to the pay of District of Columbia chauffeurs was incorrectly computed and reported to the committee by the District of Columbia government, and therefore, appears incorrectly in the hearing record.

On page 1105, the calendar 1968 gross salary, including overtime of the chauffeur to the Commissioner, is correctly stated $16,951.69—a combination of $6,385.60 in regular pay and $10,566.09 in overtime. There was also, however, a submission of regular pay from January 1 to June 14, 1969 as $3,474.40 and overtime for the same period as $9,381.59. The latter figure was a result of an erroneous computation in the District's Department of Highways and Traffic and should correctly read $5,907.19. This rate of pay projected through calendar 1969 would result in a total pay of the Commissioner's chauffeur of $17,791.10.

The committee strongly supports the District's very capable Commissioner and believes that we of the Nation's Capital are fortunate to have him as the leader of the District government. We are also aware of his dedication to the people of the District and his untiring effort to meet the almost limitless demands upon his time.

It goes without saying, however, that there are countless other responsible government officials who have virtually impossible schedules to meet who are not furnished transportation of any type, much less a chauffeured limousine.

I shall not object to the Chief Executive Officers of the District government being furnished a limousine—if he feels he needs one—and driver who is reasonably compensated for reasonable daily requirements. It is my position, however, that additional chauffeurs and limousines for District officials are a luxury that the District—which for the lack of resources has been compelled to curtail and eliminate so many vital and needed projects—cannot afford. To pay a chauffeur more than $17,000 a year, no matter how many hours a day he works, is hard for taxpaying American citizens anywhere to understand. This practice should stop now.

Lest there be any doubt, I make specific reference to the six other chauffeurs whose pay cost alone was over $50,000 in calendar 1968. These are listed on page 1105 of the committee hearings. In addition, I include a number of others throughout the District government who serve largely as personal drivers although their titles and job descriptions do not identify them as such.

Last, let me state, in no uncertain terms, that the committee fully recognizes its obligations to provide the funds that are necessary not only to continue and expand the physical beauty of this Capital City, but to improve the quality of life here. At the same time, the committee recognizes that money is only part of the problem. Washington residents should show a deeper and broader willingness to work and help their educational, law enforcement, and administrative officials.

With the greater amount of funds devoted by this city and the Federal Government to education, to welfare, and to law enforcement in relation to population than elsewhere in the Nation, the results in a better life are not forthcoming. The answer must lie in securing a greater participation and a deeper sense of responsibility from this city's residents.

Mr. President, I understand the distinguished Senator from Missouri may have an amendment to offer.

Before the Senator from Missouri gets the floor, Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill as thus amended be regarded for the purpose of amendment as original text, provided that no point of order shall have been considered to have been waived by reason of this order.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? The Chair hears none, and it is so ordered.

The amendments agreed to en bloc are as follows:

On page 2, line 3, after "1970", strike out "$107,000,000" and insert "$100,000,000".

On page 2, line 15, after "(D.C. Code, Sec. 9–220 (b); 81 Stat. 339)", strike out "$77,763,000" and insert "$60,263,000"; and, in line 19, after the word "fund", where it appears the first time, strike out "$74,735,000" and insert "$57,235,000".

On page 3, line 4, after the word "expenses", strike out "$39,209,000" and insert "$39,201,000".

On page 4, line 14, after the word "purposes", strike out "$130,324,000" and insert "$129,724,000,".

On page 5, line 15, after the word "amended", strike out "$140,077,000" and insert "$137,767,000,".

On page 6, line 7, after the word "Park", strike out "$18,337,000" and insert "$16,984,000,".

On page 6, line 16, after the word "Health", strike out "$137,382,000" and insert "$134,638,000".

On page 8, line 10, after the word "only", strike out "$18,450,000" and insert "$18,006,000,".

On page 8, line 18, after the word "only", strike out "$33,340,000" and insert "$33,019,000,".

On page 10, line 15, after the word "expended", strike out "$149,928,000" and insert "$119,943,700,"; and, in line 18, after the word "That", strike out "$65,170,000" and insert "$15,024,000".

AMENDMENTS NO. 394

Mr. EAGLETON. Mr. President, I have amendments at the desk, No. 394, which I offer for myself and Senators GOODELL, KENNEDY, and MATHIAS.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk proceeded to read the amendments.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments (No. 394) are as follows:

On page 2, line 4, strike out "$100,000,000" and insert in lieu thereof "$108,706,000".

On page 3, line 4, strike out "$39,201,000" and insert in lieu thereof "$39,971,000".

On page 4, line 14, strike out "$129,724,000" and insert in lieu thereof "$130,801,000".

On page 5, line 16, strike out "$137,767,000" and insert in lieu thereof "$141,250,000".

On page 6, line 7, strike out "$16,984,000" and insert in lieu thereof "$17,419,000".

On page 6, line 17, strike out "$134,638,000" and insert in lieu thereof "$137,297,000".

On page 8, line 11, strike out "$18,006,000" and insert in lieu thereof "$18,206,000".

On page 8, line 19, strike out "$33,019,000" and insert in lieu thereof "$33,101,000".

Mr. EAGLETON. Mr. President, this amendment, No. 394, is offered by myself and cosponsored by Senators GOODELL, KENNEDY, and MATHIAS.

Mr. President, this amendment would restore to the District of Columbia budget $8,706,000 which the committee has set aside as a reserve to finance possible future increases in the salaries of District police, firemen, and teachers.

In order to find the money for this reserve in a budget which had already been heavily cut—some $99 million below the District request and $29 million below the amount approved by the House—the committee reached into the budget base and reduced the level of

funds for current programs by an average of about 2 percent across the board. The effect is the same as any other budget cut. It means the District will have an $8.7 million cut on top of the $99 million reduction otherwise made by the committee.

The departments which will suffer and the amounts involved as a result of creating this reserve are as follows:

| | |
|---|---|
| Schools (millions) | $3.14 |
| Health (millions) | 1.23 |
| Welfare (millions) | 1.40 |
| Fire department | 580,000 |
| Corrections | 360,000 |
| Federal City College | 240,000 |
| Washington Tech Institute | 103,000 |
| Recreation | 245,000 |
| Library | 116,000 |
| All others (millions) | 1.27 |

In seeking to have this salary reserve eliminated, I do not mean to leave the impression that there will be no pay increases. On the contrary, as the chairman of the Senate District of Columbia Subcommittee considering the legislation, I believe there is an excellent chance the increases will be approved in this Congress, although it will not be until the next session in 1970.

But I do not believe that we ought to deprive our schools and our health programs to pay for them. The District has requested, and I for one strongly support, the authorization of new revenue to cover whatever increases are granted. Any other course would, in my view, be fiscally irresponsible. The District budget has already been cut by $99 millions and some of its most urgently needed programs have had to be cut back sharply. Additional reductions could seriously impair the efforts of the District government to begin meeting the enormous backlog of problems in this city.

I know that the senior Senator from Wisconsin has acted with the greatest reluctance in setting aside this reserve. He did so on the judgment that there is little chance of new revenue being approved by the Congress to pay for the salary increases which almost certainly will be enacted. I disagree with that view, but I respect and admire the Senator's adherence to the principle of fiscal responsibility even when it means taking a painful course.

Nevertheless, I feel compelled to introduce this amendment and in its support I would make four principal points:

First. The salary legislation in question is not likely to be passed in this session of Congress, and it may be many weeks into the next session before it is acted upon. At the present time neither the Senate nor the House District Committees have reported bills, and the House has not even held hearings as yet. Certainly, it is premature to say that there is no chance that this legislation will contain revenue measures sufficient to meet the cost of the increases.

Second. By setting aside a salary reserve to cover these prospective increases, the committee tends to foreclose any chance there may be of getting additional revenue. Again, as the chairman of the principal Senate legislative subcommittee involved, I am confident that we can make the case for this revenue, and I would note in this connection, that the Bureau of the Budget has fully supported the District's request. It prejudges the issue, however, to provide for a salary reserve and I believe that action, if allowed to stand would just about eliminate any chance we have.

Third. Further, I submit that a salary reserve is unnecessary regardless of what happens to the District request for new revenue to pay for salary increases. Assuming the worst and the District is not given new revenue, it would have no choice but to make room for the increases by cutting back its other programs. In short, it would have to do about what the committee has done in setting aside a salary reserve. The difference is that the District will have the opportunity at least to make a case for the additional revenue.

Fourth. Finally, I would note that the House Appropriations Committee took no action to provide for these prospective salary increases even though it was aware that such legislation is pending. I think that in itself is evidence that there is indeed a chance that new revenue to meet the costs of any salary increases will be forthcoming.

The amendment I have sent to the desk contains a number of line item changes, but its purpose is quite simple. It would restore the cuts made to establish the salary reserve by:

First. Increasing the Federal payment from $100 million to $108,706,000, which would be higher than the $107 million approved by the House but below the $110 million authorized this year.

Second. Putting back the appropriations which were taken from the various departments as their share of this reserve.

Mr. President, the District of Columbia budget has already been cut to a point where many urgently needed programs will be jeopardized. It cannot afford to absorb these additional cuts, and it is unnecessary, in my judgment, to make them at this time.

Mr. President, so that what we are discussing here does not remain in the realm of the vague, the ethereal, and the unidentifiable, I think it is appropriate that we consider some of the matters, some of the programs, which will inevitably have to fall by the wayside if the position of the Senator from Wisconsin prevails. In other words, when you cut $3.14 million from the District of Columbia school budget, something has to give. Some program that is either in being or contemplated will have to be eliminated.

What are some of these programs that would inevitably have to be canceled in order to place $3.14 million of school funds into a contingency reserve? It is my information that they would include the following:

Orders for new textbooks, library books, and other school supplies would have to be canceled.

A freeze would have to be placed on all nonteaching positions, including teacher aides.

There would have to be a sharp curtailment of school dental examination and school health services, including testing of children for hearing and vision problems.

Let us consider these matters for a moment because they would be directly affected by the funds the Senator seeks to strip from the educational budget.

In recent weeks, much has been said and written in the public arena concerning the inadequacies of public education throughout this country—and much, specifically, with respect to the District of Columbia. Can the U.S. Senate, at this particular time in history, say that it is going to cut back on an educational program that already, in the minds of almost every knowledgeable educator in the country, is inadequate? Are we going to cancel orders for new textbooks? Are we going to fail to expand the public school libraries?

We heard much testimony at President Nixon's Conference on Food, Nutrition, and Health held here in the Nation's Capital in the past few days, about the inadequacy of diet and consequences for the health of youngsters, and their ability to adjust in school and absorb education. With these facts in mind, are we going to cut back on the health services of the District's public schools? Is this fiscally prudent? Is it normally prudent?

Are we so obsessed and possessed by our zeal for neat figures on a balance sheet that we are willing to cut back on the textbooks, health services, and ancillary teaching personnel connected with the District's public schools?

Mr. President, I for one am not.

Another reduction that will have to be made as a result of this resrve is $1.23 million in public health services.

What will that cut mean to the District? It will mean a reduction in birth control services, crippled children's services, and in the availability of infant and preschool and maternity clinics open to the public. It will mean an elimination of some visits by public health nurses.

It will mean an elimination of community health education programs which are designed to foster better health standards and practices. It will mean a reduction in the number of persons who will be treated in the community mental health and retardation program and an increase in the physician-patient ratio.

It will mean a cutback in the services of the Glenn Dale Hospital for tuberculosis and other chronic diseases. The options there are, increasing the nurse-patient ratio, deferring needed maintenance cost, or closing some of the wards and discharging some of the employees.

Mr. President, these health services reductions could mean a cutback in the immunization program. This could lead to an increase in the incidence of communicable diseases. These are some of the hard choices that will have to be made—the atrocious choices that will be forced upon Mayor Washington and the District of Columbia government if this $1.23 million is stripped from the health budget. This comes at a time when the Nation's health has to rank on anyone's list as one of the top five priority issues in this country.

Is the U.S. Senate, which has jurisdiction of the District of Columbia—sadly speaking, insofar as the people of the District is concerned—going to say to its citizens: "We will cut back on

health. We are not moving forward. We are not even standing still. We are going to cut you back $1.23 million. We are going to reduce the availability of birth control services. We are going to reduce the availability of infant and preschool and maternity clinics."

Is this the kind of answer that the U.S. Senate wishes to give to the residents of the District of Columbia? I do not think that any of them ever asked that this Congress take control of their destiny. It was foisted upon them years and years ago. I daresay if the option were theirs to get out from under the yoke of Congress, the vote would be overwhelming to so do. However, for so long as Congress has the distasteful and unhappy responsibility of controlling the destiny and the welfare of the hundreds of thousands of residents of the District, can it in conscience tell them that, "Although as Members of the Senate we advocate expanding better health care services for the rest of this Nation"—and I am a member of the Senate Subcommittee on Health—"and although we are going back to our home States where we are politically accountable and give our usual pious speeches in favor of expanding and improving health services, when it comes to doing something for the people of the District of Columbia, to whom we are not politically accountable, we will cut back health programs by $1.23 million."

What do these cuts mean in the correctional field? The dollar figure is $263,000. No issue is talked about more in this day and age than law and order, safety on the streets, punishing the offenders, taking care of them when they are in jail, preventing them from abusing each other, and so forth.

So we go home to our respective States and tell the voters how much we are for law and order, how we are for building bigger and better prisons. And what do we do for the nonvoters of the District of Columbia? Apparently we are going to cut their correctional program $360,000. And in so doing, we will leave vacant about 80 prison guard positions in the city jail, the Women's Detention Center, the Lorton Reformatory, and the Lorton Youth Center.

One does not have to be an expert in penology or have a graduate degree in criminology to understand what this will mean. All one has to be is to be a daily subscriber of the local press and he will quickly learn that there is already inadequate supervision of the institutions I have mentioned.

Almost daily there are reports of drug abuse and attacks on other inmates.

We decry these things. We say, "Isn't it deplorable? Isn't it awful?" But then how do we act? We cut back 80 positions in the number of prison guards in these same institutions.

What does this reserve mean insofar as recreation is concerned? Well, in dollars, it seems $245,000. But, what does it mean in terms of humanity? What does it mean in terms of people, not figures, but people.

It means that 15 large swimming pools, which normally would open May 15, next summer will not open until July 1. It means that day camps, that normally open on May 15, next summer will not open until July 1.

It means that 165 playground facilities for school children, which normally open on June 15, will not open until July 1.

It means the closing of the mobile recreation program which brings recreational facilities to the poor and the infirm.

It eliminates the position of 20 young leader aides who work with juveniles in the streets.

Perhaps it does not mean an awful lot to the 100 of us whether the swimming pools open on May 15 or July 1. It is perhaps of little immediate consequence to us in terms of the enjoyment of those facilities. However, I would say it means an awful lot to those who do not have the kind of recreational opportunities and facilities available to so many of us.

We talk about crime in the streets. We talk about it in the summer months. We are always reminded of the hot summers that commenced with Watts and continued with Newark and Detroit.

We remember what happened last summer.

The summertime can be troublesome. Children are out of school. Time lays heavily on their hands. We worry about these things and talk about them among ourselves in the corridors. We say that we have to devise programs to help the youth in the summer. We vote for a large amount of funds for the summer job corps.

We try to get the Nation's businessmen to emphasize summer jobs.

That is our thinking.

These are the things we favor for public consumption nationwide. And we are deemed to be modern, progressive thinkers.

We say this, but when we apply our philosophy to the District of Columbia, the unrepresented, we then say, "Well, delay the opening of your swimming pools from May 15 to July 1. There will be enough time to splash around in the months of July and August. You don't have to be in the pool in June. It is not a make or break situation."

To me this is an indication of cynicism. We advocate a sound public program for our Nation. Yet we sadly fail to not apply the same policies in our treatment of those who are under our charge by no choice of their own—the residents of the District of Columbia.

Mr. President, I think if we proceed with this reserve, if we set aside this $8.7 million, two things will happen:

First, we will be foreclosing any chance of getting additional revenue in order to pay for the salary increases that unquestionably are forthcoming.

I am for those increases. So is the Senator from Wisconsin. And I dare say there would be almost a unanimous vote in the Senate in favor of this legislation which would apply to teachers, police, and firemen.

But, if we set up this reserve, then it is inescapable that there will be no additional funding to pay for those salary increases, and those budget cuts that I have enumerated will of necessity go into effect.

That is the financial argument. That is the budget argument. That is the dollars-and-cents bookkeeping argument. And I think it is a persuasive one, in its own right.

But, we will also be doing a second thing. This is not dollars and cents. This is not the kind of thing that a certified public accountant can put down neatly on a ledger sheet with red ink or black ink and strike a balance. This is not the kind of thing one can approach with the precision of figures or arithmetic. But it is the kind of thing that one can feel in his heart and knows to be true. If we go ahead with these cuts, we are telling the people of the District of Columbia that, they are not to participate fully in the benefits of the abundant society that we espouse for the rest of the country.

I do not think any one of us would go to our respective States—I know I would not go to my State of Missouri—and say, "Gentlemen, I'll tell you what I've done for you. I'm canceling your new textbooks. I'm going to curtail your public educational health services, even though I know many students come to school with deplorable health conditions and need help. But I'm going to cut those back for you, my good citizens, and I'm going to cut the number of nurses and the maternity care center.

"I know you have a bad crime situation in Missouri, you 4½ million people who sent me to the Senate, but I'm going to help you out by cutting your correctional program and cutting back the number of guards, so that the inmates can go at each other with even more reckless abandon. I'm going to cut your day care and day camp programs in the summer and restrict the operable dates of your swimming pools as narrowly as I possibly can. My good citizens of Missouri, I want to tell you how progressive and forward looking I am, how imaginative I am, in serving your public interest."

If I went to my State and made those recommendations, I guess that would be my farewell address, as well it should be, to the electorate of my constituency. How is it that I would be reluctant to make those recommendations in my own State, as indeed I think any Member of the Senate would be with respect to his State? How is it we can so easily, so casually, make similar recommendations to those to whom we are not politically accountable? I think I have already answered my question. We are not politically accountable to the residents of the District of Columbia. They cannot elect us, and they cannot defeat us. What they have to say about how we manage their destiny is of little moment or of little concern.

I ask, Mr. President, that the Senate give its respectful attention to what I think is embodied within this amendment. Its significance transcends the $8.7 million involved. It indicates to me the true feeling of the U.S. Senate toward the voteless people of the District of Columbia.

Finally, let me say this: I think political observers would agree that insofar as District of Columbia appropria-

tions are concerned—especially in recent years—the House of Representatives has been, shall we say, enormously cautious in its allocation of funds while the Senate has been, shall we say, somewhat more enlightened. Yet, in this instance we find that the budget, as recommended by the Senate committee, is $29 million below the amount approved by the House.

So with this bill we are taking a new turn in the course of governmental history so far as the District is concerned. Now the House can be considered the enlightened body, sensitive to the District's needs; and the Senate will be the cautious, citadel of fiscal integrity. I much prefer the older arrangement.

The PRESIDING OFFICER. Does the Senator from Missouri wish to have his amendments considered en bloc?

Mr. EAGLETON. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield to the Senator from Indiana.

Mr. BAYH. Mr. President, I do not want to deny the Senator from Wisconsin the opportunity to immediately rebut or address the Senator from Missouri, but I would like to compliment the Senator from Missouri.

I have an amendment which is not as far reaching as his. It is amendment No. 418, which I intend to offer later. It deals with another item which has been stricken from the bill, that of community centers.

It is not, I suppose, a profitable business for a Senator from Missouri or a Senator from Indiana to become overly exercised about what is going on in the District of Columbia. We do not have any constituents living here. But I think it is absolutely imperative for all the Members of this body to realize that, as the law reads now and as the Constitution is structured, we are indeed the representatives of the people of the District of Columbia, and we have a deep responsibility to see that they get the kind of government they deserve.

I salute the Senator from Missouri for taking the lead in this area. I think we must do everything we can in this body to see that the District of Columbia becomes truly an example to the rest of this Nation—indeed, to the entire world—as to what enlightened government can do with respect to municipal leadership and representation and organization. I intend to support the Senator, and I salute him again for his efforts.

Mr. EAGLETON. I thank the Senator from Indiana.

Mr. PROXMIRE. Mr. President, the Senator from Missouri obviously feels very deeply and very sincerely about this matter. He is an extremely eloquent speaker, and I think that his statement this morning and his amendment serve useful purpose.

What we have done in going below the House figure in the area of District operations is simply to recognize—and I think it is almost impossible to expect that this is going to happen—that unless Congress, the House and the Senate, both pass one more revenue act and pass it in a few months, the cuts we recommend here will have to be made.

The Senator from Missouri spent some time in detailing the inhumanity of these cuts and the shortsightedness of these cuts and the lack of enlightenment in these cuts. These cuts were recommended to us by Mayor Washington and the City Council. We are doing exactly what Mayor Washington asked us to do—no more and no less. These are his recommendations.

I am sure that the position taken by the Senator from Missouri does reflect the feeling of the City Council and the Mayor, that they would like to be able to proceed without making cuts of this kind, without setting aside a reserve; but, under the circumstances, I think that would be irresponsible.

Let us consider: We now are acting in December on an appropriation bill for fiscal 1970, the fiscal year having begun July 1, 1969.

Mr. President, this is a disgraceful situation. This is something that should never happen. It is something that no responsible chairman of the Subcommittee on the District of Columbia should permit to happen, if it possibly can be avoided. Why are we permitting it to happen? It is being permitted to happen because we waited 5 months for a revenue act. We could not act until it was passed. But it did not pass until relatively a few weeks ago.

The Senator from Missouri said there will be another revenue act. I suppose it will be a very hot day in January, when we get another revenue act this promptly.

Everyone I have talked to has agreed that the likelihood of getting another revenue act passed is nil. This means that in the event we knock out this reserve, either there will be no salary increase for teachers, no salary increase for policemen, and no salary increase for firemen, or the cuts we provide will have to be made under circumstances far more difficult and under those circumstances there will be real misery in health services and law and order services. Instead of a moderate 2-percent cutback for 6 months, you will have a 6-percent cutback for 2 months.

I yield to the Senator from Missouri.

Mr. EAGLETON. Mr. President, at this point I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. Mr. President, I wish to respond to the two points made by the Senator from Wisconsin. First, with respect to the delay the Senator mentions in the enactment of the tax authorization measures. There was a delay. I wish to set the record straight, however, that such delay as did result was not the work of the Senate and most certainly not of the Subcommittee on the District of Columbia of the Senate.

The District government submitted its recommendations to the House on January 14, 1969. That is about as early in the year as it could be done. It passed the House on August 11, 1969, 7 months later. It was referred to the Senate on August 13. We commenced hearings on August 14, just about as quickly as they could be begun after receiving the report—only 1 day later. It was passed by the Senate on October 3, after time out for 3-week summer vacation.

As far as expedition of the tax authorization bill is concerned, the record of the Senate is commendable.

My second point is that I think the Senator from Wisconsin, and I am sure it is done unwittingly, leaves the impression that the District of Columbia recommends these budget cuts. That is very important. Let us set that straight. I wish to read from the letter of Assistant Mayor Fletcher, which was also signed by Mayor Washington. The letter is dated November 20, 1969, and it reads as follows:

> The Commissioner strongly favors enactment of the salary proposals for policemen, firemen, teachers, and school officers, so long as the Congress also authorizes the revenue to finance the costs of those proposals. In the Commissioner's view, it would be imprudent and not responsible fiscal policy to enact the one without the other.

Now, I wish to direct attention to the language, "so long as the Congress also authorizes the revenue to finance the costs of those proposals."

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. EAGLETON. If I may, I would like to finish my thought. What happened is that the District government was asked by the Senator from Wisconsin and me, "What would happen, Mr. Mayor, and what would you do if we foisted this reserve on you? Where would you make these cuts if we foisted this upon you?"

He said:

> I do not want it that way because I believe these salaries should be taken care of by additional revenue, but if it is thrust upon me I would be forced to make the cuts as follows.

That is the origin of the cuts enumerated in my amendment, some of which I have referred to earlier.

I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I think what the Senator said about the delay in the Revenue Act is exactly correct. The District asked for the money early in January; the House passed it in August.

Does the Senator really think if we have no reserve in this bill the House District Committee and the House are going to act in the next few weeks to pass any revenue act? Is this a reasonable and responsible expectation?

Mr. EAGLETON. It might surprise the Senator, but I do. In the first place, the House has never taken any position with respect to setting up the kind of reserve the Senator from Wisconsin envisions.

Mr. PROXMIRE. That was the House Appropriations Committee.

Mr. EAGLETON. The Senator is correct.

Mr. PROXMIRE. I am talking about the House District of Columbia Committee. They, not the Appropriations Committee, act on the revenue bill.

Mr. EAGLETON. That is right, but as the Senator will acknowledge there is

some interplay, some back and forth relations between these two committees.

I am not going to quote bookmaker odds on whether it is a 2-to-1 shot or a 3-to-1 shot, or what have you, that we will be able to get the additional revenue. But I will quote these odds to the Senator: If this reserve is set up, then the odds are 100 million to 1 our getting additional revenue to pay for increased salaries for teachers, policemen, and firemen. You will have obliterated any chance we have. From an odds-making point of view, the merits of the case are abundantly on our side.

Mr. PROXMIRE. Indications are clear that public assistance payments, welfare payments, are $3 million over the budget estimate. If this situation continues, we will run out of funds for these payments in March or April. How would the Senator meet this situation? Would he await the enactment of the revenue bill?

Mr. EAGLETON. I understand there is an additional $2.4 million set up in the revenue reserve which would cover the items to which the Senator has referred, which are untouched and unaffected by the $8.7 million amendment which I introduced.

Mr. PROXMIRE. It is my understanding that the amendment of the Senator from Missouri would only leave $1.5 million. This is running at a deficit of $3 million so that it would not be sufficient to fund for that purpose.

Mr. EAGLETON. I wish to read a portion of the report of the District of Columbia Appropriations Committee, page 3:

> In order to create a portion of these unobligated reserves, program reductions totaling $2.4 million and across the board reductions in 1970 base programs totaling $8.7 million have been necessary.

I was referring to the $2.4 million.

Mr. PROXMIRE. If the Senator will yield I wish to go a little further.

The legislative committee proposed a bill to accomplish court reorganization, which the Senate passed, and the matter is before the House. If this bill becomes law in January or February, how would the Senator propose to finance it? Would he have to await enactment of the revenue bill?

Mr. EAGLETON. Mr. President, in the first place, the bill has not been enacted; and, in the second place, if and when it is enacted, it would not be effective until 6 months after it had been signed by the President. It would not be effective, in all likelihood, during the next fiscal year.

I have a copy of the bill dealing with court reorganization here before me. I direct the attention of the Senator from Wisconsin to page 315, section 602 of the bill wherein he will note that it does not become effective until 180 days, that is 6 months, after it is signed by the President.

Mr. PROXMIRE. It is our understanding that substantial money would be needed in that area. In addition, there may well be need for medical services and overtime for police. How should that be met? Wait for a new revenue bill?

Mr. EAGLETON. I do not know about police overtime problems or how much that would involve. I do know that we have already cut the budget $29 million below the House, so I presume those cuts took into account the need for adequate money to take care of any overtime situations.

Mr. PROXMIRE. That is one of the reasons why we are providing for the reserve.

Mr. EAGLETON. May I respond to that by saying that it is my understanding the reason the Senator has provided for the reserve is to set aside $8.7 million to pay for salary increases for police, firemen, teachers, and other nonprofessional teaching personnel.

Now, do I understand correctly that the reserve is not for them but now will be used for police overtime and unexpected increments on welfare cases and a whole assortment of other things that the Senator now has in mind as a different reserve from what we were talking about originally?

Mr. PROXMIRE. Yes. A big part of the reserve is the salary increases—$10½ million in reserve which would allow for calling up within that reserve priorities desired by the District government.

Mr. EAGLETON. Of that $10.5 million, $8.7 million is directly attributable to police, firemen, and teachers, which is left untouched. The remainder of that $10.5 million in reserve would be for such other unforeseen contingencies that in due time will develop.

Mr. PROXMIRE. Does the Senator from Indiana (Mr. BAYH) want me to yield to him?

Mr. BAYH. Yes.

Mr. PROXMIRE. I yield.

Mr. BAYH. I appreciate the Senator from Wisconsin yielding to me. I am not a member of the committee or of the Appropriations Committee, so perhaps I should not get involved in this colloquy. But I believe that there is a need for us to do more than is being done to help the residents of the Nation's Capital. If we are going to be consistent, if we are going to set up this type of reserve as good business practice, then there are other areas in Government where we should also establish similar reserves. I have not been in the Senate as long as has the Senator from Wisconsin (Mr. PROXMIRE), but we are continually passing special legislation and making appropriations, while the other committees of Congress are deliberating on measures to provide revenue for services. For us to establish this method of operating for the District of Columbia, where we are anticipating many possible extra expenses, even before the legislation is passed, is the first time this has ever been done, to my knowledge, since I came here.

Mr. PROXMIRE. There is a difference.

Mr. BAYH. One other observation. I deplore the somewhat slow pace of passing some of the appropriations bills and revenue bills.

Mr. PROXMIRE. That is the trouble. We wait and wait for a revenue act. There is delay, delay, and more delay.

Mr. BAYH. Let me continue on a moment.

When Congress has been presented with a "crunch" when the disabled, the unemployed, those on welfare, or indeed policemen, teachers, and firemen are out of money, or when the legislative branch itself needs funding, it has passed in a matter of hours such contingency funds as reasonably could be expected; and that is what would no doubt happen in this instance.

Mr. PROXMIRE. There is a difference. The difference is that this is one appropriation bill and the only appropriation bill on which there is a street limit. The limit is the amount of funds made available under two things: Federal payments, and the Revenue Act. We know what the limits are and what can be spent and no more can be spent than that. This is a different appropriation from those of other departments and agencies. They do not have a strict limit on them, but we have it here.

When the Mayor and the City Council recommends a salary increase, which the Senator has said everyone in the Senate virtually agrees must be provided, we should provide the funds, so that it is irresponsible for us not to provide the funds when we all are virtually certain—at least I am, although the Senator from Missouri disagrees—that there will not be a revenue bill enacted. My experience is that there will not be. We all know that it is virtually certain that there will not be, under these circumstances, a responsible way to handle it is to provide funds for the salary increase which they have requested in a reserve. Either we will not give them the salary increase or we will vote it the other way.

I wish we had a more generous bill. I was for an increase in the tax on cigarettes, as I am sure the Senator from Missouri was, and for increasing other taxes, but that was not done. That was a decision made by Congress. Under these circumstances, we have to act, and unfortunately the needs of the budget are strictly limited. Thus, it seems to me that this is the way to do it.

Mr. BAYH. I have great respect for the judgment of the distinguished Senator from Wisconsin, but I respectfully suggest that Congress will pass a revenue bill and will make the necessary appropriations when its feet are put to the fire, as in other supplemental matters. I see no reason to regard this appropriation any differently than we have treated others.

Mr. PROXMIRE. It took until October of 1969 for Congress to come up with a revenue bill. We waited and waited and waited. I thought the Senate District Committee did an outstanding job on responding so quickly when the revenue bill cleared the House. The Senate Appropriations Subcommittee acted within 24 hours after the House subcommittee had acted. On this bill we set a new record for prompt action. Now we are being asked once more, really, to condition our action on the prospects, which I think are not hopeful, that the House District Committee will pass another revenue act.

Mr. EAGLETON. Let me make one brief observation and then I will have said all I care to say or, indeed, can say on this subject.

I wish to set the RECORD straight as to

where the District will get this additional revenue if Congress authorizes it. It is not requesting a Federal handout. It is not requesting a Federal subsidy. It is sometimes lost sight of that 83 percent of District's general fund expenditures are financed through local taxes. The local people pay it out of their pockets, whether through a property tax, or a tax that the Senate imposes on nonprescription drugs, or groceries, or all the other "lovely" taxes we have so eagerly imposed upon them recently. That 83 percent comes out of the pockets of the residents of the people of the District of Columbia.

Only 17 percent of the District general fund comes from the Federal Government.

Now, so far as the pay increases are concerned, it is requested by the District government that they be given some help only for the first partial year, and in the first full year of operation the full weight and burden of the additional salary increases would be borne by the residents of the District of Columbia through an increase in income taxes.

All they are asking us to do is to give them the authority to tax their citizens. That is a pretty "gutty" request they are making. They want authority to tax their own citizens. I do not see how we can deny them that. I think, in good conscience, that Congress will grant them that authority, in due course. For that reason, I believe the reserve proposed by the Senator from Wisconsin (Mr. PROXMIRE) is unnecessary, unneeded, and unwarranted.

Thank you, Mr. President.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment offered by the Senator from Missouri for himself and other Senators. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from California (Mr. CRANSTON), the Senator from Oklahoma (Mr. HARRIS), the Senator from Indiana (Mr. HARTKE), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Alabama (Mr. SPARKMAN), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS), are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE), the Senator from Oklahoma (Mr. HARRIS), and the Senator from Maryland (Mr. TYDINGS), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT), is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The result was announced—yeas 46, nays 43, as follows:

[No. 220 Leg.]

YEAS—46

| | | |
|---|---|---|
| Baker | Griffin | Muskie |
| Bayh | Hart | Nelson |
| Bellmon | Hatfield | Packwood |
| Boggs | Hughes | Pell |
| Brooke | Inouye | Percy |

NOT VOTING—11

| | | |
|---|---|---|
| Anderson | Hartke | Sparkman |
| Cranston | McCarthy | Symington |
| Goldwater | Mundt | Tydings |
| Harris | Pastore | |

So the amendment was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MONDALE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 418

Mr. BAYH. Mr. President, I call up Amendment No. 418, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. BAYH. I ask unanimous consent that further reading of the amendment be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH's amendment (No. 418) is as follows:

On page 2, line 4, strike out "$100,000,000" and insert in lieu thereof "$100,500,000".

On page 3, line 4, strike out "$39,201,000" and insert in lieu thereof "$39,701,000".

On page 4, line 2, immediately before the period, insert a colon and the following: "*Provided further,* That $500,000 of this appropriation shall be available for municipal services at the local level, through Neighborhood Service Centers".

Mr. BAYH. Mr. President, I shall be be brief. My amendment would increase the appropriations by $500,000, which is half of the amount originally requested in the budget, to provide——

The PRESIDING OFFICER. The Chair informs the Senator from Indiana that his amendment is not in order. It strikes out the same items that were just voted on. It is a duplicitous amendment.

Mr. BAYH. Mr. President, I respectfully suggest the absence of a quorum.

Mr. PROXMIRE. Mr. President, will the Senator withhold that, so that I can discuss another amendment with the Senator from Virginia?

Mr. BAYH. Mr. President, I ask unanimous consent that I may temporarily withdraw my amendment, without prejudice.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 404, 405, AND 406

Mr. SPONG. Mr. President, I call up amendments Nos. 404, 405, and 406.

The PRESIDING OFFICER. Does the Senator ask for unanimous consent that the three amendments be considered en bloc?

Mr. SPONG. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendments.

The LEGISLATIVE CLERK. The Senator from Virginia (Mr. SPONG) offers amendment No. 404, as follows:

On page 10, line 15, strike out "119,943,700" and insert in lieu thereof "$119,608,200".

The PRESIDING OFFICER. Amendment No. 405 is not in order since it amends figures already agreed to by the Senate.

Mr. SPONG. Mr. President, I ask unanimous consent that amendment No. 405 be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state amendment No. 406.

The LEGISLATIVE CLERK. The Senator from Virginia (Mr. SPONG) offers amendment No. 406, as follows:

On page 10, line 15, strike out "$119,943,700," and insert in lieu thereof "$122,795,800,".

On page 10, line 18, strike out "*Provided,*" and insert in lieu thereof the following: "*Provided,* That $5,250,000 of this appropriation shall be available for capital outlay for the District of Columbia Department of Corrections: *Provided further,*".

Mr. SPONG. Mr. President, I call up these amendments on behalf of Senator TYDINGS, who is unavoidably absent today.

Amendment No. 406 would restore all of the money for the correctional facilities in the President's crime program for the District of Columbia. It restores funds for the planning of a new District of Columbia jail, the building of three additional security units at Lorton, and the modernization and securing of the women's detention center.

Amendment No. 404 relates to amendment 406 in that this strikes out $335,500 which had been inserted in the House bill for the planning of a new District government administration building, it being the position of Mayor Washington, in which the Senator from Maryland (Mr. TYDINGS) and I concur, that the need for new penal facilities is more important and has higher priority than a District administration building.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. SPONG. I yield.

Mr. MATHIAS. Mr. President, I associate myself with the remarks of the distinguished Senator from Virginia.

I think the amendment is a very necessary part of the program in which every Member of Congress is interested in an effort to try to find some way to mitigate the terrible burden of crime and the cost of crime to every resident of the Washington metropolitan area.

The penal institutions and the penal programs constitute a part of the entire spectrum of law enforcement. And unless we have the ability to improve the penal program in the District of Columbia, we are not going to improve the total spectrum of law enforcement.

I very strongly urge that the Senate approve the amendments.

Mr. SPONG. Mr. President, I thank the Senator. I would say that insofar as the jail project and the facilities at Lorton are concerned, they are all a part of the President's crime program and have within the last 2 days been specifically endorsed by President Nixon.

Mr. PROXMIRE. Mr. President, I have had a chance to discuss this with the Senator from Virginia (Mr. SPONG), the Senator from Maryland (Mr. TYDINGS), and the Senator from Maryland (Mr. MATHIAS). They have made a very strong case for it.

They are all items in the area of public safety. They do affect the President's crime package.

I have discussed it before. They are capital outlay items in the amendment as amended.

Though the committee felt we ought to restrict ourselves on construction at the present time because of the fiscal situation and the desire of President Nixon to do so, under the necessity of putting more resources into the area of public safety, I am happy to accept the amendment. I have discussed it with the Senator from Kansas (Mr. PEARSON), the ranking minority member, and I understand that he is willing to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to Amendments Nos. 404 and 406.

The amendments were agreed to.

AMENDMENT NO. 418

Mr. BAYH. Mr. President, a moment ago I called up amendment No. 418, which was ruled out of order because it dealt with a previous line.

My only alternative is to ask unanimous consent, which I intend to do in a moment, which would permit any Senator to object and exercise his right.

I have previously discussed the matter with the subcommittee. They agree to accept the amendment and take it to conference.

The amendment provides $500,000 to implement recommendations made recently in San Diego by the National League of Cities.

This would establish in the District of Columbia an innovative creation known as Neighborhood Multi-Service Center.

I read from the policy adopted at the conference in San Diego. On section 203.1, it says that these centers will perform wherever possible the everyday functions of the city government through the neighborhood centers and other centers in the community to help contribute to greater citizen involvement and confidence in the government.

As I see it, there are four good reasons for this type of government center.

It would strengthen the delivery of government services and do a better job providing services.

It would provide better coordination and less duplication. I am advised by those who know that there are as many as 10 different departments providing government services in the District of Columbia. Some duplication in overlapping exist, and indeed, because of the lack of knowledge, some citizens are omitted altogether.

It would make the services more acceptable to the public so that those who are ill or disabled, as well as those who are uninformed, would have a better chance to get the services.

Most important, in this day of increasing pensions in our cities, it creates a better sense of citizen involvement so that the local citizens feel they are a direct part of their government.

With that explanation, and with the hope that no one will object, I ask unanimous consent that amendment No. 418 be considered.

Mr. PROXMIRE. Mr. President, I have had a chance to discuss the amendment with the Senator from Indiana and the Senator from Kansas (Mr. PEARSON), the ranking member on the committee.

We agree that it is a meritorious amendment. It involves $500,000, which is a modest sum. We think it is a very good cause.

I would be happy to take the amendment to conference.

The PRESIDING OFFICER. The amendment is still not in order; it amends items already agreed to by the Senate.

Mr. BAYH. Mr. President, I ask unanimous consent that it be considered.

Mr. MANSFIELD. Mr. President, that is impossible. It has to be corrected.

Mr. PROXMIRE. Mr. President, I misunderstood. I thought the amendment had been corrected.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ALLEN in the chair). Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I direct the attention of the chairman, the manager of the bill, to page 53 and page 54 of the Senate report, under "Summary of Capital Outlay, by Project." I direct his attention to "Public schools" under "Public building construction." I note that on these pages in the report, perhaps 30 or 35 schools in the District are named. After the naming of the final school, the West Elementary School addition, there is a total for public schools. The budget estimate is some $55 million. The House bill provided some $43 million, and some $28 million is recommended to the Senate.

## TAX REFORM ACT OF 1969

The PRESIDING OFFICER. The hour of 11 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The LEGISLATIVE CLERK. A bill (H.R. 13270), the Tax Reform Act fo 1969.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid aside temporarily, and that the Senate continue consideration of the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

## DISTRICT OF COLUMBIA APPROPRIATION BILL, 1970

The Senate resumed the consideration of the bill (H.R. 14916) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes.

The PRESIDING OFFICER. The Chair recognizes the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, some $28 million is recommended to the Senate, which is one-half of the estimated funds necessary for the building, renovation, and reconstruction of the District schools.

I have had the opportunity in the last year to visit six of these schools on my own, and to speak to some of the classes and some of the assemblies. I—as well as any members of the committee who have taken the time to visit the schools—realize the extraordinarily dilapidated conditions of schools attended by many of the young people who live in the District.

I wonder whether the chairman of the committee, the manager of the bill, could review this matter with us, at least to the extent possible. I have not had a chance to give him additional notice on this question. As I understand, the hearings just came to the floor a few minutes ago. I wonder whether the Senator could review the overall budget item and give us some general observations on this very dramatic reduction in the outlay, and then perhaps review, to some extent, why these significant cuts were made.

Mr. PROXMIRE. There were two principal reasons for the reduction.

One reason is that we felt that it was proper for the Nation's Capital, of all the cities in the country, to respond to the President's request for a delay, a stretchout, in construction projects by States and localities, especially when Federal money was involved.

As the Senator is aware, the President has made this request, and we felt that, to the extent that we could do it in the District, we should do it.

The second reason is that it was late in the year. It seemed to us unlikely, with only 6 months left, that the same amount of funding could be used appropriately if we funded in full funds that would be available for only 6 months.

Taking these two considerations into account, we then asked the District itself to make its own recommendations as to where the stretchouts and the postponements should be, where was the greatest need, and so forth. We followed the recommendations of the District government, the responsible officials, to the letter. These are their recommendations. These are not arbitrarily made.

We do feel, however, that it is proper for Congress to react constructively to the President's request that we postpone those construction projects that can be properly postponed.

Mr. KENNEDY. One fact exceedingly distressing to me, as I am sure it is to all of us, is that if we look at the results of the Armed Forces Qualification Tests, which are given to people in all parts of our country, we find, with respect to those who have graduated from the District schools or those who, perhaps, have not graduated but are still taking these tests, that in excess of 60 percent do not pass this examination.

I am sure that many different kinds of factors and considerations enter into those results, other than the facilities themselves. But I certainly think that when we are taking into consideration the President's request for austerity and for budgetary ceilings, and when we, in Congress, have attempted, under title I and the other education bills, to recognize the concept of compensatory education, we ought to be willing to be more understanding of the needs of schools in the District, rather than cutting back.

Mr. PROXMIRE. I think the Senator makes a good point. I direct his attention to the fact that we have funded the teaching aspect of education very fully. As a matter of fact, we now provide an average of $1,094 per pupil, which is 30 percent higher than other comparable cities, 23 percent higher than the next most generous city with respect to its teachers. We provide far more professionals including teachers per pupil than any other city in the country. I think we are devoting a substantial amount of resources to education in the District.

I agree with the Senator from Massachusetts that it could be more. But I think it would not be proper for me, as the chairman of the committee, to say that the committee has not been extremely generous in this area over the years and in this year, also. In the area of construction, we are providing $28 million. It is less than the House. It is less than we would like it to be. But in a period of inflation, it seems to me that this is a responsible position to take.

Mr. KENNEDY. Mr. President, I am aware of the estimates——

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. KENNEDY. Mr. President, I am aware of the per-pupil expenditures indicated on page 34, and the statement the chairman gives on page 33. But this really does not tell the story.

In many ways we have seen that when a child goes to school hungry in the morning, no matter how many teachers there are to teach him, he is going to have a good deal of difficulty in learning. No matter how many teachers there are per pupil, if the classroom is noisy, if it is a classroom in which the pipes rattle, he is going to have even more difficulty in learning.

For instance, in the Anacostia school, the number of seats necessary in their common room to provide not just facilities for lunch, but for rotation of those students who bring their own sandwiches, we see the kinds of interruptions which work adversely to the learning process.

I think all the educators we have had a chance to listen to in the Subcommittee on Education pointed out very plainly the relationship between the facilities, the curriculum, the adequacy of books, and also the physical facilities. I think we delude Members of this body in suggesting that only with the per pupil expenditure and the professional staff per thousand pupils can we feel we are really meeting the demands which exist in the schools of the Nation's Capital. This is true particularly when we have seen that there really is a growing need in the Capital's schools, if we take any kind of testing, such as the armed services test. Of course, that it is not the most scientifically devised test or the most perfect test, but it does provide some kind of medium for testing the young people in the kinds of education they are receiving.

I think, as well, that educators themselves talk about the atmosphere and the climate within the home, the interest in studying, and study habits. When we come to Congress and to the Senate and talk about the needs of the District of Columbia, the fact which distresses me is the fact that we have not had much higher consideration given to this matter than we have to the matter of construction. I am deeply concerned about the kinds of recommendations made, even with the fiscal position in which we find ourselves.

I think it would be extremely unfortunate to apply those fiscal standards to the opportunity for young people in the District of Columbia to study and learn in an atmosphere and in classrooms which are now not really conducive to learning.

Mr. PROXMIRE. Mr. President, I thank the Senator. I think this colloquy has been extremely helpful. It highlights a great need in the District of Columbia. It is true. I am conscious of the fact that the committee did not fully fund the construction; we are substantially below the House. I do not think the Nation could make a better investment than education. We should make a better investment than we have in the past. If I am chairman of the committee next year, I intend to do all I can to respond to the very eloquent, moving, and proper observations of the Senator from Massachusetts in this area.

Mr. KENNEDY. Mr. President, I wish to go into one additional area—the District of Columbia Hospital. I think all of us are aware of the tremendous demands that exist upon the urban hospitals in our country.

At the present time the Hill-Burton Act is before the Subcommittee on Health of the Committee on Labor and Public Welfare, and there is consideration within that committee, with respect to altering or changing the formula, because there is a recognition that we are really not meeting our responsibilities in the urban hospital field.

Mr. PROXMIRE. Mr. President, the Senator is correct. I wish to point out that the committee not only funded the original estimate, but we went beyond that and above the House and provided more funds than the House provided because we fully funded the final request.

This is an area in which the Senator is properly interested and the committee was also.

Mr. KENNEDY. Mr. President, I commend the chairman for going higher. Directing the attention of the Senate and the manager of the bill to page 55, we see the estimate was $3 million. Although there was nothing in the House bill for it, the Senate included $1.118 million and that is higher than the House bill. But it is considered below the estimate.

I think all of us realize we have a number of teaching colleges, teaching universities, and medical schools in this area. We know there is some effort, although I am not satisfied there is a sufficient effort, to try to coordinate the kinds of medical services among the teaching schools in the District of Columbia and the District of Columbia General Hospital.

We know certain teaching opportunities are available in the District of Columbia General Hospital. But in providing the real kind of quality there, I do not believe there is the kind of coordination, communication, and interrelationship which should exist.

However, Mr. President, at this time I want to direct attention to the fact that although the Senate placed in the bill in excess of $1 million of the $3 million estimated, the $3 million estimate was a very hard figure.

I have had an opportunity to visit the District of Columbia General Hospital myself, and to see the enormously crowded conditions which exist in the waiting room, and the new X-ray areas, and in many of the outpatient areas. It is an area of great need.

I would certainly hope that in a new budget the committee would be as sympathetic as possible in its consideration of this problem.

Mr. PROXMIRE. I thank the Senator.

Mr. President, I yield to the Senator from Virginia.

The PRESIDING OFFICER. The pending business before the Senate is the request of the Senator from Indiana for unanimous consent to be allowed to offer an amendment at this time.

Mr. PROXMIRE. That is my understanding. For that purpose, I ask that the Senator from Virginia (Mr. SPONG) be allowed to make a unanimous-consent request because that is the amendment to be modified.

The PRESIDING OFFICER. The Chair directs its statement to the Senator from Indiana.

Mr. BAYH. Mr. President, I yield to the Senator from Virginia.

Mr. SPONG. Mr. President, I ask unanimous consent that amendment No. 404, previously agreed to, be reconsidered and disagreed to; that amendment No. 406 be reconsidered, modified, and agreed to as modified, and that the clerk report the modification.

The PRESIDING OFFICER. Is there objection?

Mr. PROXMIRE. Mr. President, as far as the proposal being agreed to, it would be desirable if the Senator from Indiana would let us know what we are voting on.

Mr. BAYH. I think we are dealing with two different lines.

The PRESIDING OFFICER. The Senator from Virginia will state the first portion of his request.

Mr. SPONG. Mr. President, I ask unanimous consent that amendment No. 404, previously agreed to, be reconsidered and disagreed to.

The PRESIDING OFFICER. Is there objection?

Without objection, the amendment is reconsidered and rejected.

Mr. SPONG. Mr. President, I ask unanimous consent that amendment No. 406 be reconsidered, modified, and agreed to as modified.

I might say for the benefit of the Senate that this is done to combine the two amendments so that they are not in conflict with each other as far as the mathematics are concerned.

Mr. PROXMIRE. To make it possible to provide funds for the community centers which was the thrust of the amendment of the Senator from Indiana. Is that correct?

Mr. SPONG. No. That is not correct. The Senator from Indiana was correct in stating that what he seeks to do is not related to what I have done.

Mr. PROXMIRE. Very good.

The PRESIDING OFFICER. The Senator from Virginia requires unanimous consent that amendment 406 be reconsidered and that it be modified—and that it be reconsidered on that basis—be adopted as modified. Is there objection?

Mr. PROXMIRE. I wish we could get an explanation of what the modification is.

Mr. HOLLAND. Mr. President, yes, I do not object at this time, but I would like to know what the modification is, too.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

On page 10, line 18, strike out *"Provided,"* and insert in lieu thereof the following: *"Provided,* That $5,250,000 of this appropriation shall be available for capital outlay for the District of Columbia Department of Corrections: Provided further,".

Mr. PROXMIRE. Will the Senator from Indiana yield? Does this mean he is satisfied that the community centers he has provided are——

Mr. BAYH. Let me make one motion on behalf of the Senator—if the Senator will permit me. I should like to move that—have unanimous consent that—amendment No. 418 be accepted, despite the fact that the line to which amendment No. 418 addresses itself has been amended previously. This is the request made by the Senator from West Virginia, only he used different verbiage. I think this one will deal with the problem of adding $500,000, as the Senator discussed earlier, for municipal services at the local level through neighborhood services centers.

The two amendments are not related.

Mr. SPONG. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Virginia will state it.

Mr. SPONG. Has the unanimous-consent request on amendments Nos. 404 and 406 been acted upon?

The PRESIDING OFFICER. Amendment No. 404 has been acted upon. Now the Senator from Virginia asks unanimous consent that amendment No. 406 be reconsidered—that it be modified and agreed to as modified.

Mr. HOLLAND. Mr. President, I am not objecting, but I certainly would like to know what the modification is.

Mr. SPONG. Mr. President, I would be glad to tell the Senator from Florida what the modification is. It takes $335,500 out of the total figure. What the two amendments sought to do was to put money in the appropriations bill to take care of the crime package insofar as a new District jail and improvements at Lorton were concerned, and take out of the appropriations bill the money for a new administration building in the District.

The PRESIDING OFFICER. Without objection, the amendment will be reconsidered and as modified is agreed to.

Mr. BAYH. Mr. President, I ask unanimous consent that amendment No. 418 be in order.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, reserving the right to object, I should like to know what the amendment does.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk proceeded to read the amendment.

Mr. BAYH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. MANSFIELD. No. Let us read it all.

The assistant legislative clerk read as follows:

On page 2, line 4, strike out "$108,706,000" and insert "$109,206,000".

On page 3, line 4, strike out "$39,971,000" and insert "$40,471,000".

On page 4, line 2, immediately before the period, insert a colon and the following: *"Provided further,* That $500,000 of this appropriation shall be available for municipal services at the local level, through Neighborhood Service Centers".

The PRESIDING OFFICER. Is there objection to the offering of the amendment of the Senator from Indiana? Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MATHIAS. Mr. President, I should like to thank the chairman of the committee not only for his work on the whole bill but also for his clear explanation this morning of some of the possible economies which he sees as proper and necessary in the District of Columbia, and with which I agree.

He has pointed out some of the frills that could and should be eliminated over the whole structure of government where we can try to find places for economy. I want the distinguished Senator from Wisconsin to know that although I have been one who has urged him on on a number of occasions to approve larger amounts than he has, I am basically in accord with his desire to get a dollar's worth of value for every dollar invested in the government of the District of Columbia.

The Senator from Massachusetts (Mr. KENNEDY) has raised the question of the District of Columbia General Hospital.

Again I want to thank the chairman of the committee for his support of the requests that were made by the Commissioner of the District for a total of $3.2 million in additional funds for the District of Columbia General Hospital which will permit the addition of 254 people in new positions.

The committee report states on page 39 that no overall reduction is to be made in the 1970 base program for the District of Columbia General Hospital. The committee has been extremely fair with the District in this matter and, as the report notes, the figures which have beeen recommended here are those which I understand, to the penny, are those requested of the District.

What I should like to say at this point is that I hope the whole community of the District of Columbia not just the Commissioner or the city council, but the whole community, will raise its sights with respect to what is needed at the District of Columbia General Hospital.

I ask unanimous consent to have printed in the RECORD just one example, a letter from the Department of Health, Education, and Welfare, dated September 23 of this year, in which it withheld approval of eight of 13 of the laboratories in the District of Columbia General Hospital. Only five were approved as meeting minimal standards of the Public Health Service. This is the kind of situation that cannot be tolerated in any hospital, certainly not one in which the Congress has direct responsibility.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
*Atlanta, Ga., September 23, 1969.*

Dr. JOHN P. NASOU,
*Medical Director, District of Columbia General Hospital, Washington, D.C.*

DEAR DR. NASOU: Based upon our on-site examination of your laboratory on August 29, 1969 and a review of your application, we are recommending the Main Laboratory, Division of Pathology be approved for interstate licensure only in the following categories:

Syphilis serology, urinalysis, histopathology, nonsyphilis serology, and immunohematology.

We cannot recommend approval in the following categories:

Bacteriology, parasitology, endocrinology, hematology, mycology, blood and cerebrospinal fluid chemistry, toxicology, and exfoliative cytology.

Please note that the items of noncompliance indicated on the enclosed "Suggestions for Laboratory Improvement" refer to specific Sections of the Regulations. You should read these Suggestions, and the Regulations, carefully to determine how you may make appropriate corrections.

Enclosed is your license covering the approved categories. We look forward to working with you in this program and will schedule your laboratory for reinspection on or about December 1, 1969.

Sincerely yours,

DAVID J. SENCER, M.D.,
*Assistant Surgeon General, Director, National Communicable Disease Center.*

Mr. MATHIAS. Mr. President, I concur with some of the complaints which have been made about the situation at the District of Columbia General Hospital where we find that people with serious health problems and injuries are not treated promptly. In one case in particular, a man with a broken neck had to wait 45 minutes to be moved from one part of the hospital to the other. These are conditions which are so far below the adequate level that they must not and cannot be tolerated.

Thus, Mr. President, in expressing my appreciation to the committee for having gone as far as it went in meeting the requests of the District government, let me say a word beyond these walls to the residents of the National Capital, who must develop a sense of public awareness and conscience so that the area's requests to Congress can be brought up to a level commensurate with need.

I thank the distinguished Senator for yielding to me.

Mr. PROXMIRE. I thank the Senator from Maryland. He has served so well on the District Committee and is an ex officio member of the subcommittee. His interest and his ability in this area have been most helpful.

Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, I send to the desk two technical amendments and ask that they be agreed to.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

On page 2, after line 21, insert:

"THE COMMISSION ON REVISION OF CRIMINAL LAWS OF THE DISTRICT OF COLUMBIA

"For expenses necessary to carry out Title X of the Act of December 27, 1967 (81 Stat. 742, 743), establishing The Commission on Revision of the Criminal Laws of the District of Columbia, $150,000 to remain available until expended."

On page 5, line 3, strike out "$620,000" and insert "623,000".

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc; and, without objection, the amendments are agreed to.

Are there further amendments? If not, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. PROXMIRE. Mr. President——

Mr. SPONG. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. SPONG. Mr. President, before we vote on the bill, I would like to commend the Senator from Wisconsin and the Senator from Kansas for their diligence with regard to the bill. I particularly would like to say to the Senator from Wisconsin that I applaud the efforts he has made to inject a higher degree of efficiency in the operation of the District of Columbia government.

I might say to the Senator that on yesterday, when the hearing on the nomination of a new Deputy Mayor, Mr. Watt, was being considered, both Mayor Washington and Mr. Watt pledged themselves to work toward a survey of the District government in its entirety, with a view toward seeking every way possible to make the District government more efficient and less expensive.

Again I commend the Senator.

Mr. PROXMIRE. I thank the Senator. Of course, we have had much talk in the past about the need for further financial aid for the District, but there is no question that there is a tremendous amount of waste in every sector of the operations of the District government. We must concentrate on more corrective action to remove that waste.

Mr. MONTOYA. Mr. President, recently, I have received several communications from responsible civic leaders from the Mount Pleasant, Columbia Heights, and Adams-Morgan areas in the District, expressing their concern that the District of Columbia government has thus far failed to effectively deal with the problems of language, unemployment, and other problems related to Washington's Spanish-speaking Americans.

I believe it is time the District of Columbia government does something about assisting the Spanish-speaking American community. They could do this by establishing within the office of the Mayor an investigating committee who will: first, prepare a report to the Congress on the extent of poverty, hunger, unemployment, and other problems confronting the Spanish-speaking American; and second, make recommendations to the Mayor and Congress as to how to alleviate these problems. I strongly recommend that the city government undertake such a venture immediately.

I find that apparently only the Metropolitan Police Department has recently taken steps to meet the problems of the District's Spanish-speaking citizens and their families. They have done this by assigning several policemen to a Spanish language course. Other than this isolated instance, apparently no other funds are being used by the District of Columbia government to aid Spanish-speaking citizens, and yet, as we look to Arlington County, we find that an office has been specifically established to deal with the problems confronting the Spanish-speaking community. No comparable office has been established for the Spanish-speaking citizens in the District despite the fact there is 10 times the number of Spanish-speaking people living in the District. The information I have is that the Spanish-speaking citizens in Arlington are living under better conditions.

The Spanish-speaking population in the District of Columbia has grown rapidly since the 1960 census. Although there are no accurate numbers on the size of the community, it is estimated there are upwards of 50,000 to 70,000. I am confident that when the facts related to the problems of the Spanish-speaking community are presented to the Mayor and to the Congress, the help that Spanish-speaking people are asking for will be undertaken.

For this reason, I am at this time calling upon the District government, as we consider the District budget, to make the necessary funds available to establish within the office of the Mayor a committee to investigate immediately the problems confronting the Spanish-speaking citizens of this city. Once the problems have been investigated—and it is my hope they will be promptly—and recommendations are presented to the Mayor and the Congress, I would recommend to the District of Columbia government that they continue the special office on Spanish-speaking affairs in order to carry out the recommendations and insure that the various programs reach the Spanish-speaking residents of this city.

Mr. President, as a member of the Appropriations Subcommittee on the District of Columbia, I intend to continue following actions of the city government in this respect.

I am taking particular interest in this, Mr. President, not only because I wish to improve conditions for the Spanish speaking here in Washington, D.C., but because I think this will help us focus national attention on a problem which is in fact nationwide. The Spanish-speaking citizens of this Nation, as a group, are living in substandard conditions. They are at the bottom of the totem pole, as an ethnic group, in education, employment, housing, and all the other segments of American society. And, yet, we have been unable to bring the necessary national attention to bear on this situation. Perhaps by focusing national attention on conditions of the Spanish speaking in our Nation's Capital, we can have the necessary attention focused on the disgraceful conditions in other parts of the Nation.

I have sponsored legislation, S. 740, which hopefully will be enacted before we adjourn this year to establish a Cabinet Committee on Opportunities for the Spanish Speaking. This committee will be the spokesmen for the Spanish speaking to the administration and the Congress. However, unless we are able to make all Americans aware of the problems confronting the Spanish speaking of this country, little progress may be made in providing equal opportunities for them.

We have made progress in many areas of the country. In New Mexico, for example, we enjoy a very harmonious tricultural society, with Spanish Americans, American Indians, and other Americans living together as equals. There is still lack of opportunities for some, but they are isolated instances and not as a matter of policy. We must do away with all vestiges of discrimination and lack of opportunity wherever they exist and the place to begin is our Nation's Capital.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point copies of correspondence regarding problems confronting the Spanish speaking here in the District of Columbia, including my letter to Mayor Walter E. Washington of November 6, 1969, on which I am still awaiting a reply; my letter to Gilbert Hahn, Jr., Chairman of the District of Columbia City Council of December 9, 1969; and, correspondence with enclosures from

Mr. George Frain, Secretary of the Adams-Morgan Federations, Inc., Washington, D.C.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOVEMBER 6, 1969.

HON. WALTER E. WASHINGTON,
*Mayor, District of Columbia,*
*Washington, D.C.*

DEAR MAYOR WASHINGTON: I have long wanted to discuss with you personally a matter which has been of great concern to me, and which I feel must be of equal concern to you as well. I speak of the plight of the estimated 50,000 to 70,000 Spanish-speaking residents of the District of Columbia.

As you so well know, the Spanish-speaking residents of the District have in recent years been congregating in the Mt. Pleasant, Columbia Heights, and Adams-Morgan areas. Because of the common problems and common cultural ties, this congregation has been inevitable. As a result, many of the problems have been compounded.

In June of this year, I testified before the Senate Subcommittee on the plight of the Spanish-speaking Americans throughout the country. I also testified in support of my legislation, S. 740, a bill to establish a Cabinet Level Committee on the Opportunities for Spanish-speaking people. I felt it was essential that we have a Federal office, of a cabinet level, to ensure that Federal programs were reaching the Spanish-speaking people.

While it would seem only natural that all Americans should have an opportunity to participate in our Federal programs—especially those designed to assist the underprivileged—it is a fact that the Spanish-speaking American has been left out of the mainstream. Until my testimony, the Congress appeared to be completely ignorant of the fact that the Spanish-speaking people of this country ranked at the bottom of the totem pole on education, employment, housing, poverty, and all the other segments of our society. From what I have seen and from what I have been told, conditions for the Spanish-speaking in Washington, D.C., are no exception.

I wish to enlist your own personal assistance and cooperation in improving the terrible conditions which exist here in the District for Spanish-speaking residents, with the hope that by improving conditions here in the Nation's capital, we can point to our accomplishments here with pride and use our experiences here in improving conditions throughout our Nation. I am hopeful that we may be able to meet on this matter some time in the near future to discuss it in more detail. In the meantime, I would appreciate being supplied with the following information in order that I may be better able to assess the problem here in the District. Your answers to the following questions would be most helpful and appreciated.

1. What is the size of the Spanish-speaking population in the District of Columbia?

2. Are most of these individuals concentrated within one specific area, and if so, where?

3. Are most of these individuals American citizens?

4. What is the educational attainment of the Spanish-speaking American in the District as opposed to the Negro and other Americans?

5. What is the rate of unemployment of the Spanish-American as opposed to the above groups?

6. What percentage of the Spanish-speaking residents in the District live in substandard housing; how does this compare with other groups in the city?

7. Do you have an office within the District Government, or any individuals, whose specific duties are to assist in the peculiar problems of the Spanish-speaking?

Your response to the above questions would be most helpful to me. Assuring you of my desire to cooperate with and assist you on this and all other problems confronting the District, I am

Sincerely,

JOSEPH M. MONTOYA,
*U.S. Senator.*

---

DECEMBER 9, 1969.

Mr. GILBERT HAHN, Jr.,
*Chairman, District of Columbia City Council,*
*Washington, D.C.*

DEAR CHAIRMAN HAHN: I am enclosing a copy of the November 6 letter which I addressed to Mayor Walter Washington expressing my concern for the well being of Spanish-speaking residents in the District of Columbia, and raising a number of questions. I am presently awaiting a response from the Mayor.

I have noted present accounts quoting you as announcing "hearings next March on the problems of the city's Spanish-speaking community. I commend you for this action and anticipate that the hearings will be extremely valuable in pinpointing the problems of this particular group of citizens. I am concerned, however, that the hearings will not be held until next March. I anticipate that one reason I have not received a reply from Mayor Washington to my November 6 letter is because the information I have requested is simply not available. To wait until March for this information would certainly not be acceptable.

As a member of the Appropriations Subcommittee of the District of Columbia, I wish to assure you of my every interest on behalf, and cooperation in, seeking to improve conditions for the Spanish-speaking citizens of the District. I wish to be of all possible aid to you and to the Mayor in attacking the problems of these citizens.

In order to provide me and the other members of Congress the necessary data that we need, and as promptly as possible, I urge that you reschedule your proposed March hearings for January. This will assist in providing those of us in Congress interested in this matter the additional data that we will need in order to assist wherever we can, and will also permit the City Government to move expeditiously with your present resources and authority to attack the particular problems which your hearings will reveal.

Urging your every cooperation, I am

Sincerely,

JOSEPH M. MONTOYA,
*U.S. Senator.*

---

ADAMS-MORGAN FEDERATION, INC.,
*Washington, D.C., December 8, 1969.*

HON. JOSEPH M. MONTOYA,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR MONTOYA: Growing concern is being expressed over the problems of the 50,000 Spanish-speaking residents of the District of Columbia, as shown by the attachments which include:

1. An "Open Letter" to Mayor Walter E. Washington, and the D.C. City Council, presented by the Rev. Antonio R. Welty, head of the Good Shepherd United Presbyterian Church in the Adams-Morgan area at 15th and Irving Streets, N.W.

As you will note, Mrs. Geneva K. Valentine, president of our Adams-Morgan Federation, points out the "Open Letter" was unanimously adopted at the conclusion of the luncheon meeting which was attended by two City Councilmen, Vice Chairman Sterling Tucker, and Dr. Henry S. Robinson, Jr.

2. A proposal to teach Spanish to the Police.

3. Hearings by the D.C. City Council on the problems of the Spanish-speaking community.

Rev. Welty, & Carlos Rosario—chairman of "The Committee for the Aid and Development of Latin Americans in the Nation's Capital" ("CADOLANCA"), feel these hearings should be held early in January, as shown by the "Open Letter" attached. We agree, and we urge you to support holding the hearings in January. We feel this is an entirely reasonable request by the Spanish-speaking community. We urge you to write at once.

May we hear from you at your earliest convenience, and please send us copies of any correspondence on the above points.

Respectfully yours,

GEORGE FRAIN,
*Secretary.*

ADAMS-MORGAN FEDERATION, INC.,
*Washington, D.C., December 6, 1969.*

*Hon. Walter E. Washington, Mayor, and Hon. Gilbert Hahn, Jr., Chairman, and all Members, D.C. City Council:*

We note in the *Washington Post* (Dec. 3, page C5) that the City Council will hold hearings "next March on the problems of the city's Spanish-speaking community."

We understand that this March date was decided on because, in the meantime, the City Council would be deeply involved in the development of the District Budget. But it is vitally important to provide funds in the D.C. Budget to help solve the Spanish problems. It is clear that it is absolutely essential to provide funds in the D.C. Budget to aid and help the D.C. Government establish—(1) a permanent office to serve the Spanish-speaking community, and (2) a high-level Spanish-speaking advisory committee in the Office of Mayor Walter E. Washington, to consider and advise the District Government on all problems related to the Spanish-speaking citizens and their families. Arlington County has such an office and it is directed by the Spanish-speaking community, yet the number of Spanish-speaking citizens in the District is 10 times the number in Arlington County; and they are relatively better off, and better provided for, in Arlington.

It is astounding that only the Metropolitan Police Department is taking steps to meet the problems of the District's Spanish-speaking citizens, and only this week the leaders of the Spanish-speaking community met with Dr. Robert Shellow, director of the Pilot Police Project in the Third Police District to start a crash program. This was reported in both the *Washington Post* and *Evening Star* on December 5, attached herewith.

We, the undersigned, urge hearings be held on the Spanish-speaking problems early in January by one or more members of the D.C. City Council so that funds can be included immediately in the D.C. City Budget to help meet these problems by the steps cited above. May we have an immediate answer to this reasonable request, since these problems can not, and must not, be put off year after year? The Spanish-speaking District citizens must no longer be ignored by Congress, the District Government, or the White House.

Sincerely,

Rev. Antonio R. Welty, Good Shepherd United Presbyterian Church; Mrs. Margaret Wilde, reporter, Spanish Panel, Adams-Morgan Federation Conference; Carlos Rosario, Chairman, "Calolanca," 1614 Hobart Street NW.; Garry Garber, member, Spanish-speaking community; Luis H. Vidana, member, Spanish-speaking community; John J. Schulter, editor, News and Views; Prof. Juan Casasco, City and Regional Planning Department, Catholic University of America; Rev. B. Frank Foster, Assistant Pastor, National Baptist Memorial Church, Inner City Ministry; William K. Scheirer, president, Kalorama Citizens Association; George Frain, administrator-secretary, 18th and Columbia Road Business Association.

DECEMBER 8, 1969.

The above "telegram" to Mayor Walter E. Washington, Chairman Gilbert Hahn, Jr., and all members of the D.C. City Council, was presented to the Adams-Morgan Federation—MEDCO-BLACK ECONOMIC UNION—Conference on December 6 by the Rev. Antonio R. Welty, Pastor, Good Shepherd United Presbyterian Church, at the end of the conference luncheon. City Council Vice Chairman Sterling Tucker, and Councilman Dr. Henry S. Robinson, Jr. were present. After spirited discussion, it was unanimously adopted by a show of hands. We urge immediate scheduling of the Council hearings on the Spanish-speaking problems early in January, 1970, instead of in March 1970 for the reasons stated in this vitally important message to the D.C. City Council.

Mrs. GENEVA K. VALENTINE,
*President, Adams-Morgan Federation.*

P.S.—There were over 200 people present at the luncheon when the above message (or letter) was adopted. They were drawn from all walks of life and all groups in the Adams-Morgan area. This letter represents a real consensus that immediate steps must be taken to solve the problems of the 50,000 Spanish-speaking citizens of the District of Columbia, most of whom live in the Adams-Morgan-18th & Col. Rd. area, served by the Adams-Morgan Federation. The Rev. Welty's Church has one of the largest Spanish-language congregations in the District of Columbia.

Mrs. GENEVA K. VALENTINE,
*President, Adams-Morgan Federation.*

---

COMMITTEE FOR THE AID AND DEVELOPMENT OF LATIN AMERICANS IN THE NATION'S CAPITAL ("CADOLANCA"),
*Washington, D.C., October 20, 1969.*

Hon. JOSEPH M. MONTOYA,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR MONTOYA: We are writing with regard to two matters (1) we want to express strong support for your bill, S. 740, to establish a Cabinet Committee for Spanish-Speaking People, which we understand has passed the Senate but is log-jammed in the House; and (2) to request you to urge Senators Tydings, Mathias, and Spong to take whatever steps are necessary—including the early establishment of a permanent Spanish-speaking office or Agency in the District Government—to meet the needs of the 50,000 Spanish-speaking District residents—as the needs of Spanish-speaking residents are being met in other major cities from coast-to-coast. We urge you to meet personally with the leaders of the Spanish-speaking community resident in the Nation's Capital which includes six churches, the American Legion Puerto Rican Post 69, Curculo de Puerto Rico, the Coordinating Council for the Metropolitan Area, and CADOLANCA. We would have a delegation of 12 (approx.) to meet with you on this issue—and to meet also with Senators Tydings, Mathias and Spong.

Maryland and Virginia governments, at all levels, State, county, and municipal, are helping their Spanish-speaking residents, but the 50,000 Spanish-speaking citizens of D.C. —whose numbers compare with that of many cities—are largely ignored and by-passed while others unqualified and unfamiliar with their culture and needs speak for them. That there are some 50,000 Spanish-speaking citizens in the District was noted by the *Washington Post* (Dec. 28, 1968) in an article titled "50,000 Latin Good Neighbors Settle Here." The *Sunday Star* (Jan. 5, 1969) published an article titled "The Silent Minority". These 50,000 residents live in the Mt. Pleasant, Columbia Heights, and Adams-Morgan areas—where they are largely concentrated, and in many other areas of the District of Columbia. Spanish-language restaurants: Omega, El Caribe have been written up as fine restaurants in the newspapers. They are located on Columbia Road, and a large number of stores, a barber shop are located on Columbia Road, and on 18th Street.

The White House, in a letter dated May 12, 1969, said that: "The condition of Spanish-speaking residents of the District of Columbia is of course a concern to the President. I am sure he would be the first to assert that our efforts in housing, education, and other areas of need have not been adequate. Steps to meet these problems for Spanish-speaking residents of Washington and for others, not only here but across the country, are being pursued and that effort will continue." The 50,000 Spanish-speaking residents of the District are encountering major problems in education, housing, recreation, health, crime—they are often the subject of criminal attack and assault. The requirements of Title VII of the Elementary and Secondary Education Act of 1965 as to bilingual education have never been implemented in the District of Columbia. We invite you and Senators Tydings, Mathias, and Spong to tour the Mt. Pleasant, Columbia Heights, and Adams-Morgan areas and see our problems for yourself at first-hand. We also urge you to meet with us, and to bring this matter to the attention of the Senate D.C. Committee. May we hear from you?

Respectfully yours,

CARLOS ROSARIO,
*Chairman.*

---

[From the Washington Post, Dec. 3, 1969]

SPANISH HEARINGS

Washington City Council Chairman Gilbert Hahn Jr. said the Council will hold hearings next March on the problems of the city's Spanish-speaking community.

Representatives of that community asked city officials two weeks ago to establish a liaison office through which they could work for the community's betterment.

Hahn said the March hearings will attempt to identify the problems of Washington's Spanish-speaking community and try to find out which of its needs that could be cared for at the municipal level were not being met.

---

[From the Washington Post, Dec. 5, 1969]

GROUP URGES PILOT PROJECT TO TEACH SPANISH TO POLICE

(By Martin Weil)

Representatives of Washington's Spanish-speaking community called yesterday on the police pilot district project to start a crash program of Spanish language training for 10 to 15 policemen.

The representatives said that the city has 50,000 Spanish-speaking people, most of them within the pilot (third) district, who face a "sound barrier" that makes them a "silent majority," often unable to communicate with police.

Dr. Robert Shellow, director of the pilot project, expressed enthusiasm for the community proposal, which asks also that residents be used as teachers. Dr. Shellow said he will work to see that instruction begins as soon as possible.

Carlos Rosario, speaking for 12 Spanish-speaking organizations, called also for hiring bilingual persons at the third district station house. Yesterday's meeting was held at the Spanish Catholic Center, 3055 Mt. Pleasant St. N.W.

Community representatives asked that police be trained in Spanish culture and behavior. While asserting their belief that few Spanish-speaking people violate the law, they cited examples of how misunderstandings can occur when such citizens do meet police.

The Rev. Antonio R. Welty, of the Good Shepherd United Presbyterian Church, told of watching recently as an officer dealt unsympathetically with both a Spanish-speaking-man charged with running a red light, and with a Spanish-speaking witness in the man's favor.

In talking with each other, Mr. Welty said, the suspect and his witness used "their hands, their heads, their eyes."

The officer decided they were both drunk, Mr. Welty said. Asked why, Mr. Welty said the officer cited "the way they moved their hands, their heads, their eyes."

"We Spanish-speaking people are different in so many ways" Mr. Welty said. "We are a little more emotional . . . There is a desperate need to train police in the way of living of Spanish-Americans . . ."

Interviewed later, Shellow said he believes that no more than two or three of the 300 officers in the pilot district speak Spanish. To insure 24-hour availability of a Spanish-speaking officer, he said, 10 would be desirable, 15 even better.

---

[From the Washington Evening Star, Dec. 5, 1969]

TRAIN POLICE IN SPANISH, EDUCATIONAL GROUP ASKS

(By John Fialka)

Members of the District's Spanish-speaking community have asked the city for more involvement in the Pilot Police District Project.

Carlos Rosario, president of the Educational Organization for Latin Americans, a coalition of 12 organizations, said the project should train 10 policemen in Spanish and give more training in the customs of the Spanish community.

The project, a $1.4 million experiment in improving police services in an inner-city area, is located in the Third Police District, an area in Northwest Washington bounded by L Street, 4th Street, Harvard Street and Connecticut Avenue.

The area also is the home of many of the 50,000 persons of Latin origin living in Washington, Rosario pointed out.

He said that the Spanish community supports the city's attempts to plan an election in the Third District to choose a citizens' board to help determine police policy.

At a press conference held yesterday at the Spanish Catholic Center, 3055 Mount Pleasant St. NW, Rosario and 10 other community leaders said their main concern was the rise in crime.

"President Nixon talks about the silent majority. The Spanish-speaking people are in the silent majority in this town. People are afraid to move here," said Luis Vidana, one of the leaders.

Another, the Rev. Antonio R. Welty of Good Shepherd United Presbyterian Church, said that the problem is compounded when people are unable to express themselves to the police.

"This morning I had a man who had a run-in with a policeman. He was charged with crossing against a red light. This man had a witness, but the police did not recognize him. The policeman thought they both were drunk because they were talking with their hands, and moving their heads and eyes. That's the way we talk," said Welty.

Dr. Robert Shellow, director of the project, said he would take up the question of language and cultural training with the mayor and the chief of police.

"I think what you're asking for here makes a good deal of sense," he said.

Shellow said the department is now paying for Spanish courses for 20 officers at the Washington Technical Institute.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this ques-

tion the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that the Senator from Louisiana (Mr. ELLENDER) is absent on official business.

I further announce that, if present and voting, the Senator from New Mexico (Mr. ANDERSON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Rhode Island (Mr. PASTORE), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 92, nays 0, as follows:

[No. 221 Leg.]

| Goldwater | Pastore | |

So the bill (H.R. 14916) was passed.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD of West Virginia. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. PROXMIRE, Mr. MONTOYA, Mr. EAGLETON, Mr. PEARSON, and Mr. YOUNG of North Dakota conferees on the part of the Senate.

## DANGERS OF POLITICAL PARTISANSHIP IN THE FIGHT AGAINST HUNGER

Mr. JAVITS. Mr. President, I take this time today, and I shall be brief, to call the Senate's attention to the issue of hunger, in which we have a burning interest. I address the Senate as a member of the Select Committee on Nutrition and Human Needs—of which the Senator from South Dakota (Mr. MCGOVERN) is the chairman. This issue is very pertinent because the other body is now in committee considering what to do about the food stamp program and is going through the administration bill section by section. We understand that the House Agriculture Committee has already rejected the Senate-passed bill sponsored by the Senator from South Dakota (Mr. MCGOVERN) and me.

We have had in the select committee a very fine spirit of bipartisanship. Only in that way can we achieve our objectives. The select committee is being continued until the end of January.

Mr. President, over 7 months ago, early in his new administration, President Nixon called for substantial improvements in our Federal food programs and for an "end to hunger in America—for all time."

The administration followed up by breaking the redtape barriers that inhibited its predecessor administrations from acting decisively to meet the challenge of hunger in our society. Its record is certainly better than that of the predecessor administrations and it has been responsible for specific highly commendable initiatives, including free food stamps in two South Carolina counties; a supplemental food program for pregnant women and infants in the District of Columbia; a reduction in the number of counties without food assistance programs from nearly 500 at the first of the year to 307 today; the establishment of new food-stamp allotments based on uniform national standards which will enable all participating families to purchase the Department of Agriculture's "economy diet"; a reduction, to the extent permissible under present law, of the amount that a family must pay for its stamp allotment; and new "outreach" efforts.

A number of these steps were taken in response to initiatives of the Select Committee on Nutrition and Human Needs, on which I have served as the ranking Republican for the past year. The impact and success of these steps thus far is in large part attributable to the select committee's search for bipartisan commitment in the fight against hunger.

Last week, the President convened the White House Conference on Food, Nutrition, and Health. The high purpose of the Conference, an end to hunger in the Nation, was a tribute to the President and to Dr. Jean Mayer, his special consultant on nutrition. Most importantly, President Nixon, by being the first President to convene such a conference, became the first to give explicit recognition to the fact that hunger does exist in America. The controversy over the concrete accomplishments of the Conference in no way detracts from its historic significance. It signaled the support of the President and the wide breadth of public support in the Nation—at all levels—for ending hunger in America.

Now, as a result of the Conference recommendations and proposals, I believe the President is in a position to declare that the existence of hunger in the United States constitutes a national emergency and to order the prompt distribution of commodities and free food stamps under existing emergency authority.

We must now move forward from the White House Conference, and in that regard, the select committee has an important role to play. However, the achievement of that objective hinges on a continued spirit of bipartisanship. There must be continued cooperation between the Senate committee and the administration. The committee has cooperated with the administration—particularly with Secretary of Agriculture Clifford Hardin—in pursuing the administration's initiatives.

The administration has also introduced a food stamp bill—which seeks very material reform, although it does not go as far as the Senator from South Dakota and I would like to go or as far as the Senate would like to go.

But now there is a clear and present danger that this spirit and this cooperation could be eroding. We could be headed for a partisan struggle over what to do about hunger in America. And the ending of bipartisanship could signal also a material reduction of our chances of ending hunger and malnutrition—and this would be a tragedy for the hungry poor of our Nation.

I would consider the end of bipartisanship in the select committee a grave mistake.

In this regard, I am concerned about one matter. I have conferred with the chairman of the select committee, the Senator from South Dakota, about this. He knows what I am going to say and is prepared to make his own statement on the subject. Senator MCGOVERN, on the television interview show, "Face the Nation," broadcast on Sunday, November 30, said: "I call on the administration to stop this doubletalk and get behind a serious effort to push that bill through the House of Representatives, where it is now blocked."

Senator MCGOVERN was referring to the Senate-passed food stamp bill in which some two months ago the Senate adopted a major reform and expansion of the food stamp program. That bill, which could not have been passed without Republican support and is now pending in the House of Representatives, would give the administration the tools that are needed to wage the battle against hunger.

The administration advises me it is not lobbying against or speaking against the Senate-passed bill, and that it does not propose to do so. No good can come from partisan efforts to describe its position in any other way; nor does the

administration deserve such condemnation.

Reference was there made to a memorandum which had fallen into his hands. This was an internal memorandum from an official from the Department of Agriculture, passed on, ostensibly, to the Secretary. I am advised that this particular memorandum was not circulated and that it has no official standing in terms of the administration. It was an internal memorandum and it expressed a particular point of view. It began with a particular official and that is where it ended. The memorandum expressed concern over the costs of the Senate-passed bill. It is understandable in a cost-conscious administration for an official to make that kind of analysis.

No good can come, in my opinion, from part of the efforts to discredit the administration upon this issue, nor do I believe it deserves it.

One of the counter bills on hunger is the school lunch bill. On the school lunch bills pending in the Senate and already passed by the House, to which Senator McGovern also referred in the interview, I am advised that the administration has generally expressed a favorable position except for the "special milk" provisions and that it is up to the Senate Agriculture Committee—of which the chairman of the select committee is a member—to take action. Even in that regard, the administration was unfavorable because this is a general program, that does not zero in on the hungry poor. I think that is creditable.

In the televised interview, Senator McGovern, referring to the House and Senate Agriculture Committees, also said:

> And I do regard them as the principal bottlenecks at the present time to adequate food assistance reform—that, plus the lack of real leadership in the Executive Branch.

Now, I definitely agree that the Agriculture Committees could certainly move more expeditiously in their consideration of these vital antihunger measures, but this is ours—not the executive branch's—problem. Yet, the statements I have quoted regarding the executive branch could, if persisted in, unwittingly undermine the bipartisan effort to combat hunger.

The select committee has brought the attention of the Nation and the power of Congress to bear on appalling conditions of hunger and deprivation. As the ranking Republican member of the committee, I would consider it a grave mistake to draw the lines with the administration on hunger on a partisan basis. I hope the administration will conclude that it should show its support of the Senate-passed reform of the food stamp program. I hope also that the chairman of the select committee will moderate his criticism of the administration in the interest of a framework of balance and objectivity within which there is the best chance for ending hunger in America.

Mr. President, I should like to yield to the Senator from South Dakota. But, first, how much time do I have remaining?

The PRESIDING OFFICER. Six minutes.

Mr. JAVITS. Mr. President, I yield 3 minutes to the Senator from South Dakota (Mr. McGovern) and 1 minute to the Senator from Kentucky (Mr. Cook).

Mr. McGOVERN. Mr. President, let me first commend the senior Senator from New York for his statement. I think it once again demonstrates his deep concern about this issue and his sincere desire to see every hungry American receive an adequate diet.

I especially appreciate his comments about the need to maintain a completely bipartisan stance in the effort to end hunger in America. I am sure that Senator Javits knows that I am aware of the tremendous contribution that he, as the ranking member of the select committee, and Senator Cook and Senator Percy and other Republicans on the committee and in the Senate as a whole have made to the great progress we have made this year.

We all know that the passage of the historic food stamp reform bill in the Senate this year would not have been possible without Republican leadership and support.

I also want the Senator from New York to know that I fully appreciate the efforts that have been made by the President and the administration. They have gone further than any previous administration in recognizing the problem and recommending measures to deal with it.

Any statements I have made that might appear critical of the administration's commitment to end hunger have stemmed from my sincere conviction that when we are dealing with this most basic human problem—hunger—it is simply not good enough to do better than we have before. When dealing with hunger, we simply must go all the way—as the bipartisan bill of the select committee did go. I have spoken out of a sense of urgency and commitment, not with an eye to partisan advantage. It is my conviction that there has been a struggle within the administration as to how big a commitment should be made for food assistance. My public comments including my criticism has been designed to strengthen the hand of Secretary Finch, Secretary Hardin, Dr. Mayer and others in the administration who have been pushing as the Senator from New York has for a more adequate food program.

But the position of the administration has been somewhat confusing. For this reason, I am particularly pleased with Senator Javits' remarks today.

I am particularly gratified to learn that the President is now "in a position to declare that the existence of hunger in the United States constitutes a national emergency and to order the prompt distribution of commodities and free food stamps under existing emergency authority." Perhaps the Senator from New York and I should join in a call for the declaration of a national emergency. The request that hunger be declared a national emergency was at the top of the list of action recommendations adopted by the President's White House Conference on Nutrition. To meet this request would be a statesman-like response of the highest order. It would surely put to rest the understandable doubts about the administration's response to the White House conference which have been expressed by many of its participants who have so often been disappointed in the past.

I also join with the senior Senator from New York in calling upon the administration to support the Senate-passed food stamp reform bill. While I am pleased that the administration has now at least adopted a position of neutrality with respect to the Senate food stamp bill and Senator Talmadge's school lunch bill, I believe, as I know the Senator from New York believes, that the need for food stamp and school lunch reform and for adequate funding of those programs requires the active leadership of the executive branch and action by the Congress.

If the White House Conference on Nutrition demonstrated nothing else, it demonstrated that the day has passed when America's poor families will be satisfied with more promises and more rhetoric. The White House conference by acclamation adopted at its closing session last week an action statement proposed by seven voluntary action task forces. The 3,000 conference participants—including representatives of the food industry, the health professions, religious groups, students, labor, women's organizations as well as the poor and their representatives—called on the President to implement a five-point action priority program.

The first call to action was that the President immediately declare a national hunger emergency and invoke the Disaster Relief Act of 1969, revise food stamp price schedules, implement a food program in every county using section 32 funds, support immediate passage of the Senate food stamp bill, the Talmadge school lunch bill, and instruct schools to provide all children on public assistance with free school meals.

The action statement also called for a guaranteed adequate income, immediate reform of food stamp and school lunch programs, the institution of a national free lunch and breakfast program and transfer of program administration to the Department of Health, Education, and Welfare.

I hope that these recommendations will be implemented by the administration and the Congress.

Because questions have been raised about the administration's previous position on school lunch and food stamp legislation, I believe the record should speak for itself. Accordingly, I ask unanimous consent that the following materials be printed in the Record.

The first item is a memorandum from the Department of Agriculture dated October 23, 1969, together with a paper entitled "Fact Sheet—S. 2547." As the memorandum states, it was distributed within the administration at the subcabinet level. The memorandum states:

> The food stamp legislation passed by the Senate is not acceptable to the Administration.

This memorandum will speak for itself.

I ask also that an analysis of this Department of Agriculture memorandum which has been prepared by the staff of the Select Committee on Nutrition be printed in the Record. I also ask unanimous consent that two documents be

printed in the RECORD at this point. The first is a letter to the chairman of the Senate Agriculture Committee in response to the chairman's letter of July 8, 1969, requesting an Agriculture Department report on S. 2548, Senator TALMADGE's bill to amend the National School Lunch and Child Nutrition Acts. As this letter states, the department then opposed several of the key reform provisions of S. 2548.

Finally, I ask that an editorial from the Des Moines Register of December 6, 1969, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, D.C., October 23, 1969.*

From: Philip C. Olsson, Assistant to Assistant Secretary for Marketing and Consumer Services.

Subject: Food Stamp Legislation.

The draft memorandum on Food Stamp Legislation which was distributed at this morning's Subcabinet Working Committee meeting contains a critical error on page 2.

The projected cost estimate for the Senate Food Stamp bill with a $4,000 cutoff and our best estimate of participation should read *$5.6* billion.

A corrected draft is enclosed. Would you please destroy any copies which you picked up this morning.

---

FOOD STAMP LEGISLATION

The food stamp legislation passed by the Senate is not acceptable to the Administration. Its cost is excessive. It would make it hard to limit eligibility to the poor. It is incompatible with the current trend toward more cash assistance. It contains a number of inflexible provisions that would be difficult to administer. These are described in more detail on the attached fact sheet.

The Administration believes that it is urgent and important that the House act on the Administration food stamp proposals. These proposals are contained in H.R. 12222, a bill introduced by Congresswoman Catherine May and 38 of her colleagues.

The changes in food stamp legislation requested by the President will:

1. Provide a participating family with enough stamps to purchase food for a nutritionally adequate diet.
2. Assure that no family pays more than 30% of its income for its food stamp allotment.
3. Provide food stamps at no cost to the very poorest families.
4. Allow simultaneous operation of commodity distribution and food stamp programs.
5. Establish uniform national eligibility standards for recipients.
6. Establish a fair hearing procedure for aggrieved participants.
7. Permissive variable purchase of food stamps is not now included in the bill but an amendment will be requested by the Administration for this purpose.

FACT SHEET—S. 2547

*Large Overall Cost:* The following table shows projected costs under the Senate and Administration bills:

*Cost with best estimate of participation*

| | |
|---|---|
| Senate with $4,000 cutoff (billion) | $5.6 |
| Participants (million) | 21.6 |
| Administration with $4,000 cutoff (billion) | 2.4 |
| Participants (million) | 13.7 |

The $2.5 billion authorized by the Senate Bill for fiscal '72 would be inadequate to support the program.

Under each proposal participation is concentrated at the lowest income brackets. At higher income levels participants pay larger amounts for their stamps and receive proportionately smaller bonuses. Therefore, participation tends to fall off at higher income levels of any food stamp plan.

*Incompatible with Move to Cash Assistance:*

*Senate Bill Provides:* Large allotments of stamps will only be good for a limited range of purchases (chiefly food).

*Comment:* Families with income below $150 per month will have more stamps than cash and this will create pressure to use stamps for ineligible purchases in violation of Federal law.

*Senate Bill provides:* Senate Bill allows purchase of non-food hygiene items and of complete meals by the elderly.

*Comment:* These special needs could be better met with cash assistance.

*Eligibility Not Limited to the Poor:* $4,000 eligibility cutoff contained in Bill inconsistent with $1,500 allotment at not more than 25% of income.

*Comment:* If all those people for whom $1,500 is more than 25% of income are included, families will be eligible up to $6,000. This embraces 63.5 million possible participants.

*Inflexibility:* Stamps to be issued by participating retail food stores.

*Comment:* Difficult to monitor stores that both issue and redeem stamps.

*Inflexibility:* Households "shall be certified for eligibility solely by execution of an affidavit . . ."

*Comment:* USDA should be allowed to continue working with HEW toward common procedures of simplified certification.

*Inflexibility:* Provides that "a household may . . . purchase any amount of coupons less than the full coupon allotment."

*Comment:* Secretary should have discretion to set levels for variable purchases that will be administerable by local issuing offices.

*Inflexibility:* Senate bill sets out precise levels for food stamp allotments and free stamp eligibility.

*Comment:* Preferable to give Secretary discretion to determine these levels within guidelines set by Congress.

---

ANALYSIS OF DEPARTMENT OF AGRICULTURE MEMORANDUM OPPOSING SENATE FOOD STAMP BILL (S. 2547)[1]

*Department of Agriculture Memorandum:* The food stamp legislation passed by the Senate is not acceptable to the Administration.

*Comment:* White House Press Secretary, Ron Zeigler, said on September 25 that the President "is very pleased that the Food Stamp Bill has passed [the Senate]." The Press Secretary said that he knew of "no discussion within the White House which indicates that there is going to be a move to forcefully push for another position when it [the Senate bill] goes to the House."

*Department of Agriculture Memorandum:* Its cost is excessive.

*Comment:* The cost of the Senate bill is fixed at 1.5 billion dollars for F.Y. 70, 2.0 billion dollars for F.Y. 71 and 2.5 billion dollars for F.Y. 72. The cost is in line with estimates of the likely expense of operating an adequate food stamp program in conjunction with an expanded welfare system and continued economic growth.

*Department of Agriculture Memorandum:* It would make it hard to limit eligibility to the poor.

*Comment:* Under the Senate bill the Secretary of Agriculture is specifically authorized to establish an eligibility level of $4,000 per year. This is only $400 above the $3600 poverty line established by OEO December 1, 1969. Since the $3,600 poverty line is arbitrary and widely regarded as too low, the inclusion of a limited number of near poor Americans in the Food Stamp Program should be seen as an advantage of the Senate bill over other food stamp proposals.

*Department of Agriculture Memorandum:* "It is incompatible with the current trend toward more cash assistance."

*Comment:* The food stamp program passed by the Senate is compatible with the trend toward more cash assistance. Like all food stamp programs, it considers welfare payments as income and therefore would be automatically phased out as cash assistance rises to a level which is adequate to provide a family with a nutritious diet.

*Department of Agriculture Memorandum:* "It contains a number of inflexible provisions that would be difficult to administer."

*Comment:* While the Senate bill does establish national guidelines for the food stamp program, the Secretary retains the flexibility to vary standards within the guidelines set by the Senate. The purpose of S. 2547, the Senate bill, is to insure minimal adequacy of program benefits without establishing rigid administrative requirements.

*Claims for the President's food stamp proposal (H.R. 12222):* 1. "Provide a participating family with enough stamps to purchase food for a nutritionally adequate diet."

*Comment:* According to USDA itself the amount of stamps provided under the President's bill is not enough to provide a nutritionally adequate diet. In written testimony prepared for the Nutrition Committee USDA estimates that "less than ten percent" of the families spending $100 per month for food actually achieve a nutritious diet. Speaking of the $100 per month "economy" diet the Agricultural Research Service of the USDA says, "* * *. Many welfare agencies base their food cost standards on the USDA Low-Cost Food plan ($125 per month plan written into the Senate bill) which costs about 25 percent more than the Economy Plan."

*Claims for the President's food stamp proposal (H.R. 12222):* 2. "Assure that no family pays more than 30% of its income for its food stamp allotment."

*Comment:* The Senate bill asks a payment of 25% of family income. The average American family spends only 17 percent of its total income on food.

*Claims for the President's food stamp proposal (H.R. 12222):* 3. "Provide food stamps at no cost to the very poorest families."

*Comment:* The "very poorest families" under the Administration bill means families earning less than $360 per year. This figure is 1/10th of the poverty level and ¼th of the cost of food alone.

Under the Senate bill free stamps would be available to families earning up to $750 per year. This figure is still only half the cost of buying food alone. Even the $750 figure leaves many very poor families paying for food stamps. To require families earning less than $750 per year to pay for their stamps is simply to write them out of the food stamp program.

*Claims for the President's food stamp proposal (H.R. 12222):* 4. "Allow simultaneous operation of commodity distribution and food stamp programs."

*Comment:* The Administration bill *permits* simultaneous distribution of commodities and stamps during the transition from the commodity program to the stamp program. The Senate bill *requires* simultaneous distribution during such transition until participation in the new stamp program equals previous participation in the commodity program. This provision of the Senate bill is designed to prevent participation drops during transition. The Select Committee found earlier this year that participation has declined by an average of 40% and a total

[1] Prepared by the Select Committee on Nutrition and Human Needs.

of over 1.1 million persons in counties which have switched from commodities to stamps.

*Claims for the President's food stamp proposal (H.R. 12222)*: 5. "Establish uniform national eligibility standards for recipients."

*Comment:* The Administration stamp bill does establish the principle of national standards, but it fails to set guidelines for such standards. It does little to prevent the continued tailoring of program regulations to the availability of appropriations rather than to the need of the hungry.

*Claims for the President's food stamp proposal (H.R. 12222)*: 6. "Permissive variable purchase of food stamps is not now included in the bill but an amendment will be requested by the Administration for this purpose."

*Comment:* A variable purchase provision is already written into the Senate bill to insure that lump sum purchase requirements will no longer be permitted to keep the poor out of the stamp program.

*Department of Agriculture Fact Sheet:* "The $2.5 billion authorized by the Senate bill for fiscal '72 would be inadequate to support the program. The Senate program will cost '5.6 billion' and will have '21.6 million participants' and '63.5 million possible participants.'"

*Comment:* According to the Agriculture Department fact sheet, the Senate food stamp bill would reach 21.6 million participants at an annual cost which would reach 5.6 billion dollars by 1972. This figure does not appear to take into account either the large new family assistance program which the Administration itself has said will be operating by 1972 or the fact that the Senate bill permits partial purchase of food stamps by recipients. Both of these factors would substantially reduce the 5.6 billion dollar figure cited by the Administration. While it has frequently been testified that it is impossible to calculate the precise cost of a program whose expense varies according to such unpredictable factors as unemployment, it appears that the 2.5 billion dollars authorized by the Senate bill for F.Y. '72 should be sufficient to finance the food stamp program in that year so long as unemployment remains at a low level and the Family Assistance System proposed by the President is fully implemented. If the 2.5 billion dollar figure is not enough to end hunger, it would seem appropriate to raise that figure to an adequate level rather than to propose a less adequate program to fit a low cost figure.

*Department of Agriculture Fact Sheet:* The Administration plan will cost 2.4 billion and will reach 13.4 million people.

*Comment:* Neither the 2.4 billion cost or the 13.4 million participation figures for the Administration program have been actually requested by the Administration. If their program will cost 2.4 billion dollars, they should request that amount.

*Department of Agriculture Fact Sheet:* Incompatible with move to cash assistance.

*Comment:* The Agriculture Department fact sheet claims that the Senate food stamp bill is incompatible with the move to cash assistance for a number of reasons. It says first that "large allotments of stamps will only be good for a limited range of purchases." It contends that because of this limitation families with incomes below $150 per month will have more stamps than cash and will therefore, be tempted "to use stamps for ineligible purchases in violation of Federal law." It then reverses itself and criticizes the Senate bill for allowing food stamp users to purchase items necessary for personal cleanliness and hygiene on grounds that these needs "could be better met with cash assistance."

The comment of the Agriculture Department fact sheet with respect to the alleged pressure to use stamps illegally is neither backed by experience with existing food stamp programs nor does it take into account the fact that the new food stamp program will be operating in conjunction with an expanded family assistance system. The Administration has said that it intends to be operating a liberalized family assistance system by 1972. If this promise is carried out, then there will no longer be a single family in the category which the Agriculture Department claims will be tempted to use food stamps illegally.

*Department of Agriculture Fact Sheet:* Eligibility not limited to the poor.

While it may be true that the need for items necessary to personal cleanliness could be met with cash assistance, it is not consistent to claim on the one hand that limiting the use of food stamps to the purchase of food creates pressure for illegal use of food stamps and to claim on the other hand that broadening the use of food stamps to include items necessary for personal cleanliness dilutes the program and is an inadequate substitute for cash assistance. The fact is that a clean home and sanitary cooking conditions are prerequisites to proper nutrition and cannot be provided with present or projected welfare level budgets. Unless the food stamp program is expanded to meet these needs they will not be met.

*Comment:* Contrary to the Agriculture Department fact sheet, the Senate food stamp bill specifically provides the Secretary with the authority to establish a $4,000 national eligibility limit for the food stamp program. The Secretary is given the flexibility to raise the standard if he feels it is necessary, but the implication that the Senate food stamp bill would require distribution of stamps to "63.5 million participants" is totally false and misleading.

The question as to whether or not a 25% purchase requirement is compatible with a $4,000 per year eligibility limit can only be answered through actual experience with the program.

If it were to pose a major problem, the Secretary of Agriculture would be free under the Senate bill to raise the eligibility limit to whatever level he felt necessary to eliminate that problem. If it were not a problem the eligibility limit would remain at the $4,000 level specified in the Senate bill.

*Department of Agriculture Fact Sheet:* Inflexibility.

*Comment:* The Agriculture Department memorandum charges that the Senate food stamp program would require issuance of food stamps by participating retail stores. It claims that this sort of issuance would be difficult to monitor. In fact, the Senate food stamp bill simply permits the issuance of food stamps in this manner. It also permits the issuance of food stamps in a number of other specified ways and states that stamps should be issued in whatever manner best insures the participation of needy households.

The Agriculture Department memorandum also criticizes the Senate food stamp bill for permitting certification "solely by execution of an affidavit." It says that "USDA should be allowed to continue working with HEW toward coordinated procedures of simplified certification." Since certification by execution of an affidavit is precisely the same method of certification suggested by the President in his new family assistance system, it is hard to understand why USDA should object to use of this procedure in the food stamp program.

According to the USDA fact sheet, another inflexibility in the Senate bill is its setting of "precise levels for food stamps, allotments and free food stamp eligibility." "It is preferable," says USDA, "to give the Secretary discretion to determine these levels within guidelines set by Congress." It is simply not true that the Senate bill ties the Secretary to precise levels of any kind. Actually, the Senate bill merely establishes minimum requirements. The Secretary is free to establish whatever levels and allotments he deems appropriate so long as he respects minimum guidelines established by the bill.

---

DEPARTMENT OF AGRICULTURE,
*Washington, D.C.*

HON. ALLEN J. ELLENDER,
*Chairman, Committee on Agriculture and Forestry, U.S. Senate.*

DEAR MR. CHAIRMAN: Your letter of July 8, 1969, requested a report on S. 2548 to amend the National School Lunch and Child Nutrition Acts in a number of respects.

The Department does not favor enactment of this bill in its present form. Although this Department believes steps should be taken to improve the child nutrition programs, and we favor many of the concepts in this bill, a number of the provisions of S. 2548 would present serious administrative and operational problems.

1. The first section of the bill provides that appropriations for the child food service programs may be made a year in advance and that the data upon which State apportionments are calculated shall be the program year completed two years immediately prior to the fiscal year for which the appropriation is requested. This section also provides that funds appropriated shall remain available until expended.

The Department does not object to the provisions of this section.

2. Section 2 provides for funding of section 5 or the nonfood assistance phase of the National School Lunch Act in the amounts of $38 million for fiscal year 1970; $33 million for fiscal year 1971; $15 million for fiscal year 1972 and $10 million for each succeeding fiscal year. The funds are to be apportioned to the States in amounts "which bear the same ratio to the total amount to be apportioned among all the States as the number of schools programed for new or replacement food preparation facilities in all the States."

The Department does not favor enactment of this provision.

Section 5 of the National School Lunch Act has not been funded since the first year after enactment and the appropriation bills for the Department of Agriculture have for many years carried an explicit prohibition against the use of section 5 purposes of any of the funds appropriated for the National School Lunch Program. On the other hand, section 5 of the Child Nutrition Act of 1966 authorizes assistance in the acquisition of food service equipment by low-income area schools and carries permanent authorization authority. It also provides that States shall finance at least one-fourth of the cost of any equipment financed.

The Department believes this provision of the Child Nutrition Act is preferable to that contained in S. 2548, particularly since the latter in no way differentiates between those schools that can well afford to finance equipment and those that cannot. The use of the number of schools in the apportionment of funds rather than enrollment would also result in serious inequities in the disbursement of funds. Generally, we feel that the factor of enrollment or average daily attendance in schools without a food service combined with a need factor would better reflect the relative magnitude of need in each state.

3. Section 3(a) would authorize the Secretary to provide foods acquired by direct purchase under section 6 of this Act for use in school breakfast programs and to service institutions such as day-care centers, settlement houses and summer recreational projects.

This section also provides for a program of nutritional training and education for workers, cooperators and participants in the broadest sense.

The Department favors this provision.

Section 3(b) states that the Secretary shall, to the maximum extent practicable, use this

authority to purchase "highly nutritious foods, especially those foods with a high content of vitamin A or vitamin C."

Both vitamins A and C are essential nutrients. However, as a practical matter, the greatest need lies in assisting schools in meeting the protein requirement. Meat and meat alternates are the most expensive elements of the meal and the most difficult for the schools to finance day-in and day-out. Foods with a good vitamin A content are, for the most part, more palatable to children when served raw rather than cooked. This means that procurement locally is more practical in many instances than a nation-wide purchase program. As for vitamin C, the recommended daily allowances for school-age children were substantially reduced by the Food and Nutrition Board of the National Research Council in 1968.

The Department does not believe that it is either necessary or advisable to designate in legislation specific nutrients for special attention. However, we will continue to place emphasis in the section 6 procurement program on foods rich in vitamins A and C as well as those including other important nutrients.

4. Section 4(a) provides for amending State matching requirements by gradually substituting a one-to-one State-Federal matching for the present three-to-one basis. Section 4(b) provides that State tax funds must be used to meet a portion of the matching requirement.

The Department favors utilizing State revenues in financing the National School Lunch Program. At present the States are more than achieving the existing matching requirement by relying on children's payments and local contributions. The Department believes that State revenues should bear at least a portion of what has always been designated the "State share" of National School Lunch costs. If the "State share" is properly borne by State revenues, children's payments and local contributions there will be no need to alter the present three-to-one matching requirement.

5. Section 5 is a technical and clarifying amendment with reference to assistance to State agencies for administrative expenses where more than one State agency is providing direct services to child food service programs.

The Department has no objection to this section.

6. Section 6(a) would place a ceiling of 20 cents on any reduced price meal offered under the School Lunch Program.

The Department does not favor this provision because it imposes a restriction that many schools may not be able to meet until the time comes that fully adequate funding from Federal, State and local sources is assured. This concept could more effectively be fulfilled through program regulations that can be adopted to changing situations.

Section 6(b) provides that in the child food service programs there shall be no overt identification of those children who receive free and reduced price meals.

The Department favors this approach but believes it should be strengthened by requiring that each school's policy and procedures with respect to eligibility for free and reduced price meals should be a publicly announced policy setting forth the specific criteria for eligibility. Only in this way can there be assurance that everyone in the community knows and understands the rules.

Section 6(c) provides a legislative base for strengthening regulations related to the donation of price support and Section 32 foods to schools that do not participate in the National School Lunch Program. The provisions of section 6(c) would enable the Secretary to establish standards for these schools similar to the policies with respect to free meals and nutritional requirements as now apply to schools in the National School Lunch Program.

The Department favors this provision.

7. Section 7 proposes substantial changes in the administration of section 11 of the National School Lunch Act with respect to special financial assistance to particularly needy schools.

Section 7(a) authorizes $200 million for section 11 in fiscal year 1970; $250 million for fiscal year 1971 and $300 million for fiscal year 1972.

Section 7(b) would, in effect, permit section 11 money to follow the child rather than restricting assistance to reach only eligible schools. Section 7(b) would also authorize reimbursement for up to 80 percent of the cost of operating a lunch program in situations of severe need.

The Department is sympathetic to the intent of these proposals. However, we believe it would be preferable to have an appropriation authority but to eliminate specific authorizations and to amend section 11 to eliminate the criteria involving school eligibility and substitute a simple, direct authority for the Secretary to provide additional assistance for any needy child in any participating school.

8. Section 8 authorizes the issuance of standards relating to the operation of separate food services in a school that are in direct competition with the nonprofit programs assisted under the National School Lunch and Child Nutrition Acts.

The Department favors this provision.

9. Section 9 provides for assistance in a variety of ways to strengthen State and local administration and training in child food service programs.

At the present time, funds are available to assist in strengthening State administration of the food service programs directed primarily to needy children. The Department does not favor the extension of this type of assistance to the local level. Basically, this would involve the Department in financing a part of local administrative costs in thousands of individual school districts throughout the country.

Section 9 would also establish a National Advisory Council on child food programs. Although the Department does not object to the formation of such a Council, it is felt that the proposal should not specify in detail, as it does, the membership of such a Council. As the provision now stands, Council membership would draw from a very limited group of experts.

10. Section 10 extends school food service participation to the Trust Territory of the Pacific Islands. This is consistent with the authority in P.L. 90–302 to assist food service operations in the Trust Territories for children in pre-school and summer recreation programs.

There was not sufficient time prior to the hearing of this bill to obtain the advice of the Bureau of the Budget.

Sincerely,

———— ————.

———

DEPARTMENT OF AGRICULTURE,
*Washington, D.C., September 29, 1969.*

Hon. ALLEN J. ELLENDER,
*Chairman, Committee on Agriculture and Forestry, U.S. Senate.*

DEAR MR. CHAIRMAN: Your letter of July 23, 1969, requested a report on H.R. 11651, a bill to amend the National School Lunch Act, as amended, to provide funds and authorities to the Department of Agriculture for the purpose of providing free and reduced price meals to needy children not being reached.

This Department is in agreement with the objectives of H.R. 11651. The level of funding proposed in the revised budget for 1970 which has been approved by both Houses of Congress, will fulfill the intent of H.R. 11651 by providing free or reduced price meals for the estimated 6.6 million needy children who require this level of assistance during the 1969–70 school year.

The total budget request for child feeding for fiscal 1970 is $638 million. This includes $133.8 million for cash grants to States for free and reduced price lunches for needy children, for school breakfasts and for assistance in providing equipment to initiate or expand food service in low-income area schools and for State administrative expenses And $10,750,000 (of which $750,000 would be for State administration) would be available to assist in providing food service to children in non-profit day-care centers, settlement houses and summer recreational projects.

In addition to the funds directed specifically to low-income area schools and needy children, $168 million is proposed for cash grants under the regular school lunch program and $301.6 million in donated foods for child feeding programs.

The budget request also included $20 million to continue the special milk program on a limited basis and to shift the bulk of these resources to providing complete meals to children that include milk. The House has passed an appropriation bill that includes $120 million for the milk program this fiscal year and the Senate has passed an appropriation bill that includes $104 million. Until this difference and others are resolved in conference, the Department of Agriculture is temporarily operating its programs under a joint resolution of the Congress. Under the terms of the resolution, the special milk program will be continued at last year's rate.

Given these circumstances, the Department recommends that the bill not be passed.

There was not sufficient time prior to the hearing of this bill to obtain the advice of the Bureau of the Budget.

Sincerely,

J. PHIL CAMPBELL,
*Under Secretary.*

———

TASK FORCE ACTION STATEMENT

INTRODUCTION

In opening the White House Conference on Food, Nutrition and Health, President Nixon said: "This meeting sets the seal of urgency on the national commitment to put an end to hunger and malnutrition due to poverty in America." We who have come here are already firmly dedicated to that goal. The President said: "Our job is to get resources to people in need, and then to let them run their own lives." He did not provide any new or meaningful program by which this can be accomplished. Obviously, he wanted us to do this, and intended that we should do so. To paraphrase the President, we "not only accept the responsibility, (we) claim the responsibility." Therefore, the combined task forces on Voluntary Action by Women, Consumers, Religious Organizations, Community Organizations, Health Organizations, Faculty and Students, and Organized Labor,[1] present the following action priority program:

I. *A national emergency:* There is a hunger and malnutrition emergency in this country today. Therefore the President must immediately declare that a national hunger emergency exists, and under existing authority must now free funds and implement programs to feed all hungry Americans this winter.

II. *Guaranteed adequate income:* The overriding remedy for hunger and malnutrition is a minimum guaranteed adequate cash income with a floor of $5500 annually (for a family of four). The government must also

[1] The AFL–CIO endorsed the policy statement in principle with no opposition on certain specifics. The Alliance for Labor Action (ALA), including the United Auto Workers, the International Brotherhood of Teamsters, and the International Chemical Workers Union, endorses this statement as written.

guarantee a meaningful job with a living wage to those who can work, elevation of wages and benefits to those presently underemployed, the "adequate income" to those unable to work or find employment, and maximization of the purchasing power of the food dollar for all.

III. *Interim food programs:* As interim measures only, present food programs must be reformed and expanded immediately in order to assure truly adequate benefits and participation by all who need them in all parts of the country.

IV. *Universal school food programs:* A national free lunch and breakfast program must be made immediately available to all children, through secondary school and regardless of income, that will provide at least ⅔ of the minimal requirements of the Recommended Dietary Allowance, while respecting cultural food preferences.

V. *Running the programs:* All administrative responsibilities for all hunger relief and nutrition programs must be shifted from the U.S. Dept. of Agriculture to the U.S. Dept. of Health, Education and Welfare, with corresponding shifts in Congressional committee responsibilities. The recipients of these programs must have responsibility for local administration of the programs under standards determined at the Federal level.

To put these priorities into action requires the following:

This nation today faces a national hunger and malnutrition emergency. This emergency situation requires emergency action.

While we initiate long-term programs to eliminate hunger in America, action must be taken immediately to deliver food now to the millions of Americans whose chronic malnutrition the nation can no longer tolerate. Only within the context of adequate food now can a program of nutrition education for all Americans have meaning.

We therefore call on the President to adopt immediately the following emergency program to feed hungry people this winter:

(a) Invoke Section 11 of the Disaster Relief Act of 1969 and like statutes in order to supply free food stamps to meet the needs of hungry people.

(b) Instruct the Secretary of Agriculture to immediately revise food stamp price schedules of less than $100 per month (based on a family of four) and at a maximum cost of 20% of income.

(c) Instruct the United States Department of Agriculture to implement directly a food program in every county and town in the United States within the next three months using all available funds, including the customs receipt funds (Section 32 funds).

(d) Actively support immediate passage and funding of the following essential legislation.

1. The Senate-passed Food Stamp Reform Bill (S. 2547).

2. A School Lunch Program Reform which consists of the Talmadge school lunch bill, the McGovern amendments and the Javits proposals.

3. The Economic Opportunity Act, particularly its section on emergency hunger relief (Section 401, Title X), and without the Green-Quie type state control amendments which will in effect destroy OEO.

(e) Instruct the Department of Agriculture to immediately require that all schools receiving Federal financial and commodity assistance for their lunch and breakfast programs provide free meals to all children whose families are receiving any type of public assistance.

Because each of these actions is either already authorized or embodied in pending legislation, action to meet this emergency can be taken within the next month.

### II. GUARANTEED ADEQUATE INCOME

To implement this number one remedy to hunger and malnutrition, the following program is imperative:

(a) The adequate cash income presently at $5500 annually for a family of four sets a floor. It should automatically follow the cost of living as defined by the Low Standard Budget of the Bureau of Labor Statistics.

(b) Establishment of government careers in nutrition and allied health professions, in connection with other private and public efforts to solve simultaneously social problems and unemployment problems. These suggestions alone should provide two million new jobs.

(c) Grants to encourage and support broadly based organizations of low income citizens in local ownership and operation of such services as food production and distribution.

(d) Establishment of housing factories on the order of the automotive industry to serve the dual function of provision of low-cost housing and the provision of jobs at desirable wages. This involves creation of 750,000 to 1 million new jobs to produce 3–4 million housing units.

(e) Extension to all working people of the right to bargain collectively for wages, hours, and working conditions, including the right to strike or boycott when necessary.

(f) Extension of unemployment insurance coverage to working groups presently excluded, such coverage to be on the same terms and conditions as provided for other workers now covered.

(g) Improvement of the scope of Social Security laws with a 50% raise this year, so that the program provides a reasonable return on investment.

(k) Reform of certain pricing, packaging, promotion and other food industry policies and practices which add unnecessarily to the cost of food. This cost inflation is unfair to every consumer and particularly disastrous to the poor. We need:

1. Price reduction through mandatory limitation of promotional and advertising expenditure and other means suggested in the Food Marketing Commission Report.

2. Mandatory price marking and posting which facilitates and simplifies price comparison.

3. Effective inspection and regulation to insure availability of safe nutritious food at fair prices and conditions of sale.

4. Mandatory processing, packaging, and labeling requirements to identify and preserve nutrient content and assure accurate and honest promotion.

5. Encouragement of retail distribution systems which take special account of the needs of the poor.

(I) Establishment of a national prepaid health insurance program and new methods for the delivery of health care and extension of existing health programs to all states. The Medicaid Bill should be fully implemented by 1971.

The task forces feel that it is especially important to note that many of the above programs can be self-supporting and/or income-producing, and none will require appropriations higher than a fraction of the cost of the space program. Together they should create substantial new tax revenue (4 million jobs should produce an average increase of $5 billion a year in taxes), substantial increase in income through increased buying power, and a saving of $7 billion of funds misspent under the present public assistance programs.

### III. INTERIM FAMILY FOOD PROGRAMS

None of the existing family food programs—food stamps, commodity distribution, emergency food and medical services—provides an adequate diet or permits the participation of all who have need. Major reforms and expansions are necessary to make sure that all people in need have access to an adequate diet until an adequate income becomes a reality.

As an interim measure only, the food stamp program must be altered so that it can become the primary vehicle for providing an adequate diet to those in need in all parts of the United States and its territories, and on Indian reservations. Free food stamps to those whose income is less than $100 a month (for a family of four), modification of the price schedule so that no recipient must pay more than 20% of his income for food stamps, national eligibility standards, self-certification, a coupon issuance to all recipients equal to the Low Cost Food Plan of the Department of Agriculture, a several-fold expansion of the program—all are necessary to make the food stamp programs adequate. The commodity distribution program should no longer serve as a means of surplus disposal but should provide direct food aid adequate to a nutritious diet wherever necessary, fully respecting the ethnic and cultural preference of the recipients. Hunger programs of the Office of Economic Opportunity should also be expanded to supplement the above.

We must do the following:

(a) The President should support, and the House quickly approve, the Senate-passed food stamp bill. The program should be fully funded and fully implemented in all parts of the United States and its territories, including Indian reservations, before the end of this fiscal year.

(b) The Economic Opportunity Act Amendments of 1969, particularly the new section on emergency hunger relief (Title 4, Section 401—Title X), should be quickly approved and fully funded by the Congress, without crippling amendments subjecting part or all of the programs to state and local government control.

(c) The Federal Government should immediately initiate food programs in the 321 counties still without them.

### IV. UNIVERSAL SCHOOL FOOD PROGRAM

There must be established a national child feeding program which will make available at least ⅔ of the Recommended Dietary Allowance. This is to be accomplished by implementing a free lunch and breakfast program for all pre-school elementary and secondary school children.

To assure maximum participation in the program, the following steps should be taken:

(a) Nutritious food selected shall be consistent with the cultural preferences of the children to be fed.

(b) Funds shall be provided to enable schools, child care centers, and other participating groups lacking adequate facilities for food preparation, to obtain such facilities or to devise ways to provide meals by other means.

(c) Community groups shall be eligible to operate child feeding programs.

(d) Local poor residents must be trained for careers in nutritional planning and food preparation for employment in the program.

(e) Food provided at the schools shall be available at the choice of the children and their parents.

### V. RUNNING THE PROGRAMS

There is a conflict of interest established in the U.S. Department of Agriculture in its dual role—primarily the advocate for the producers of food, and secondarily the distributor of food to the needy, Therefore, all programs relating to the provision of food, services, food stamps, commodity distribution and nutrition services should be removed from the administrative jurisdiction of the U.S. Department of Agriculture and be established in the Department of Health, Education and Welfare, whose primary concerns are the needs and well-being of the people these programs were created to assist. Within that department, the provisions of food services of all kinds should be tied as closely as possible to the provision of overall comprehensive health care. We call on the President to use his Executive authority to initiate these changes.

To provide maximum coordination, Con-

gressional responsibilities for both funding and programming should be reassigned to coincide with the above administrative changes.

The provisions of food services has too often been thwarted by lack of responsiveness at the state and local governmental levels. The poor should run their own programs. Maximum dignified participation by recipients is insured by transferring organizational and operational responsibilities to duly constituted, broad based, local community organizations of the recipients themselves. Certification, review and auditing must be done entirely at the Federal level to circumvent parochial political implications and to insure the protection of individual rights of those presently living in hunger and despair.

From all corners of this nation we have come together out of a deep concern to end hunger in America now. We feel a heavy sense of obligation to follow through on our commitment and on the commitments of this Conference. We brought with us the diversity that is the American people and we believe there is need for on-going active participation of all people in implementing the recommendations of this Conference.

Therefore, we call upon the organizers of this Conference to provide an effective continuing mechanism by which all of us who have this concern can contribute vigorous continuing leadership to ensure that this Conference produces action. Today is a beginning, not an end, of our commitment to end hunger in America.

And the appropriate beginning is conference-wide adoption of the 5 points.

1. A National Emergency.
2. Guaranteed Adequate Income.
3. Interim Food Programs.
4. Universal School Food Program.
5. Running the Programs.

---

[From the Des Moines Register, Dec. 6, 1969]

FOOD ACTION, NOT WORDS

Of all the suggestions which emerged from the stormy White House hunger conference this week, the soundest came from the Rev. Ralph Abernathy, head of the Southern Christian Leadership Conference. It was simply that the House get moving and pass the food stamp bill which cleared the Senate over two months ago.

Representative W. R. Poage (Dem., Tex.), chairman of the House Agriculture Committee, feels food stamps promote laziness. He is keeping the Senate bill on the back shelf, while he holds hearings on watered-down versions of the food stamp bill.

The Senate-passed bill was drafted by Senator George McGovern (Dem., S.D.), chairman of the Senate Select Committee on Nutrition and Human Needs, with the help of three Republican members of the committee. On Sept. 24, in a vote which ranks as a major victory for McGovern's war on hunger, the Senate voted 54-40 to consider his bill instead of the food stamp bill voted out by its own Senate Agriculture and Forestry Committee. The McGovern bill was then passed, 78–14.

The McGovern bill goes far beyond provisions of the original Senate committee bill, which generally followed President Nixon's proposal. Food stamp appropriations for fiscal 1969 amounted to $225 million. Under the McGovern bill, the 1970 appropriation would be $1.25 billion; the 1971 appropriation, $2 billion; and the 1972 appropriation, $2.5 billion.

The bill offers free food stamps in some cases, as for a family of four earning less than $60 a month or for a family already spending 25 percent of its income on stamps. It provides that where local officials will not run a food stamp program, the secretary of agriculture can take on the job.

The plight of the hungry in this country was relatively ignored until 1967, when the then surgeon general of the United States, Dr. William H. Stewart, told the Senate Labor and Public Welfare Subcommittee on Employment, Manpower and Poverty, "we just don't know" the extent of hunger in the nation. "It hasn't been anybody's job," he said. Later, after various investigations began to give some hints as to the extent of the misery, it became the job of Senator McGovern's committee.

Some grim facts spotlighted by the committee—among them, that there are children not getting enough to eat to keep their tapeworms healthy—helped the problem of hunger in America achieve a place in the national conscience. The issue has been showered with some noble phrases, such as Nixon's May 6 special message to Congress, in which he called for "an end to hunger in America itself for all time."

But there have been disturbingly ignoble words, as well—such as Nixon's well-publicized remark to Agriculture Secretary Clifford Hardin: "You can say that this Administration will have the first far-reaching attack on the problem of hunger in history. Use all the rhetoric, so long as it doesn't cost any money." This remark was quoted (from minutes of an Urban Affairs Council meeting) by Nick Kotz, of The Register's Washington bureau, in an article in Look magazine.

It was natural to suspect that the White House hunger conference was another attempt to delay action by substituting another avalanche of rhetoric. But buried within the avalanche were the words of Abernathy, calling not for another study or formation of another committee or another declaration of policy, but rather for immediate action on a food stamp bill which is a vital weapon in the war on hunger. Its passage would demonstrate more clearly our commitment to the problem than have all the words.

Mr. COOK. Mr. President, I want to associate myself with the remarks of the Senator from New York (Mr. JAVITS), the ranking Republican on the Select Committee on Nutrition and Human Needs.

He has forthrightly set the record straight in regard to the administration's intentions in the area of food and food distribution programs.

The distinguished Senator from New York pointed out that President Nixon only recently reiterated his call for an "end to hunger in America—for all time."

This is the administration which has first moved to recognize the seriousness of the hunger problem in America. I am delighted that the distinguished Senator from South Dakota (Mr. MCGOVERN) has as much as said that this administration has done more.

Just as the Senator from New York (Mr. JAVITS) has said, I regret very much the partisan tone which has been much in evidence in recent days. I have worked closely with the majority members of the Nutrition Committee and would like to be able to continue to do so.

However, the spirit of bipartisanship must work both ways. This requires a recognition by the Democrats on this committee of the strides the Nixon administration has made in this whole area.

Once again, let me congratulate the Senator from New York (Mr. JAVITS) for his remarks. I might say, in regard to the memorandum under discussion, that it is really unfortunate that it was ever written because I think the Senator from South Dakota would agree with me that although turned over to the House Agricultural Committee, it was never necessary to write it in the first place, because the bill that was passed by this body and sent to the House would never have moved out of that committee under its present membership.

I can only say that the Senator from New York has been an outstanding advocate for our party on this committee and I certainly hope to be able to continue to work with him, and with the Senator from South Dakota (Mr. MCGOVERN), to make whatever contribution I can towards the elimination of this disgraceful state of affairs in regard to hunger and malnutrition in the United States of America.

Mr. JAVITS. I am very grateful to my colleague for his kind words.

Mr. DOLE. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I am happy to yield to the Senator from Kansas.

Mr. DOLE. I thank the Senator from New York for his very fine statement today and for the work of the select committee.

I have said before, and I say it again, that if the committee is to be used to undercut the administration, whichever administration it may be, it will serve no useful purpose. In fact, it will have a negative impact.

Certainly, there is no place for politics in hunger. There is no reason to pick out the "good guys" or the "bad guys" in this body, or the other body.

I commend Secretary Finch, and Secretary Hardin and Dr. Jean Mayer, and others in this administration, and in past administrations, who have tried to meet this problem head on.

I repeat, I commend the select committee for having prodded the American people into action, but if this is going to be used as a political springboard to undercut the administration, then of course, it should not be allowed to continue.

Mr. JAVITS. Mr. President, to complete this discussion, I recall that the Senator from California (Mr. MURPHY), the former Senator from Pennsylvania, Mr. Clark, and Senator Robert F. Kennedy of New York, and others on the subcommittee, were the ones who unearthed this enormous problem in Mississippi. I remember the tremendous struggle that took place with Secretary Freeman trying to get something done. He said that the bureaucracy blocked action.

I must pay tribute to the present Secretary of Agriculture that he did not let the bureaucracy block action. We will find that the President is in the same mood.

I welcome very much the fine expressions of cooperation and understanding just made by the Senator from South Dakota (Mr. MCGOVERN). It indicates a resumption of the bipartisan cooperation which we have enjoyed on that committee and which is so essential to the achievement to the goals we all seek.

---

## TAX REFORM ACT OF 1969

Mr. MANSFIELD. Mr. President, what is the pending business?

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, which the clerk will state.

The ASSISTANT LEGISLATIVE CLERK. The bill (H.R. 13270), the Tax Reform Act of 1969.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. WILLIAMS of Delaware. Mr. President, I send to the desk a motion and ask that it be read.

The PRESIDING OFFICER. The motion will be stated.

The ASSISTANT LEGISLATIVE CLERK. The Senator from Delaware (Mr. WILLIAMS) moves that the bill (H.R. 13270) be recommitted to the Committee on Finance with instructions to report back forthwith an amendment, in the nature of a substitute for the bill as passed by the House, containing the provisions of the committee amendment, as reported on November 21, 1969, as amended by all amendments adopted by the Senate prior to the offering of this motion with the following exceptions and modifications:

First. The amendment proposed by the Senator from Connecticut (Mr. RIBICOFF) relating to a tax credit for expenses of a higher education shall not be included;

Second. The amendment proposed by the Senator from Indiana (Mr. HARTKE) relating to an exemption from the termination of the investment credit for up to $20,000 of qualifying investment each year shall not be included;

Third. The amendment proposed by the Senator from Alaska (Mr. STEVENS) relating to an exemption from the termination of the investment credit for certain investments in depressed areas shall not be included;

Fourth. Section 515 of the committee amendment—relating to total distributions from qualified pension, and so forth, plans—which was stricken by the amendment proposed by the Senator from Hawaii (Mr. INOUYE) shall be restored;

Fifth. The amendment proposed by the Senator from California (Mr. MURPHY) relating to the medical deduction in the case of individuals who have attained the age of 65 shall not be included;

Sixth. The amendment proposed by the Senator from Arizona (Mr. FANNIN) relating to a deduction for commuting expenses of disabled persons shall not be included;

Seventh. The amendment proposed by the Senator from Tennessee (Mr. GORE) relating to increases in personal exemptions, and making other changes in the provisions of sections 801, 802, and 803 of the committee amendment, shall not be included; and

Eighth. The various amendments proposed with respect to social security benefits—proposed as a new title X of the bill—shall not be included.

Mr. WILLIAMS of Delaware. Mr. President, the motion strikes provisions from the committee bill. It is not a delaying tactic. If the motion should be approved the bill would be reported back forthwith.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LONG. Mr. President, would the Senator desire the yeas and nays?

Mr. WILLIAMS of Delaware. Yes.

Mr. LONG. Mr. President, while there are enough Senators present, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. LONG. Mr. President, would the Senator be willing to agree to a time limitation on his motion?

Mr. WILLIAMS of Delaware. I would rather wait until the Senator from Tennessee is present to make sure he is protected. I told him I would not get any unanimous-consent agreement while he was not present.

Mr. HRUSKA. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HRUSKA. Mr. President, is the motion amendable?

The PRESIDING OFFICER. The motion consists of instructions to the committee. Therefore, it would be amendable.

Mr. LONG. Mr. President, could we agree to consider the amendments en bloc? I would just as soon vote the motion up or down one way or the other.

Mr. WILLIAMS of Delaware. I am going to ask for that later. I did want to wait until the Senator from Tennessee was present to make sure that if he wished to object he would be protected.

I was going to point out that the motion is subject to amendment. Each of these sections would be subject to amendment; however, if we start all over again, we will be back where we were before.

Later I shall ask the Senate for unanimous consent that these sections be considered en bloc in order that we may have a vote on the merits of the issue.

I respect the right of any Senator to vote for his amendment; however, it would only result in moving this matter back into debate.

The effect of the motion very simply would be to strike from the bill the Senate amendments which would result in a loss of revenue in 1970 totaling $10.65 billion.

There will be a total annual revenue loss of $12.35 billion when we include the effect of the Ribicoff amendment, which will result in a revenue loss of $1.7 billion. That provision would become effective in 1972.

The breakdown of the proposals that this motion would delete is as follows:

The Ribicoff amendment, the No. 1 item, would lose $1.7 billion annually in revenue; however, that would not be lost until 2 years hence.

The Hartke amendment, which reinstated a portion of the 7-percent investment tax credit, would cost $720 million a year.

Under the Stevens amendment for the depressed areas, which would restore the investment tax credit for depressed areas, we would lose $70 million a year.

Under the Inouye amendment, which would restore the capital-gains treatment which comes from distribution under pension funds, $10 million a year would be lost.

Under the Murphy amendment for unlimited deductions for medical expenses after age 65 we would lose $210 million per year.

Under the Fannin amendment, which deals with the deductions for commuting expenses for disabled persons, and so forth, we would lose $90 million per year.

The Gore amendment would result in a $2.3 billion additional loss of revenue in 1970. The additional loss of revenue in 1971 would be $3.8 billion.

When we add the Ribicoff amendment to it, we have a loss of revenue as the result of Senate action totalling over $12 billion annually.

The social security amendments that would be deleted involve some $7.5 billion. That refers to the social security 15 percent increase across-the-board amendment at a cost of $4.5 billion; this is the amendment of the Senator from West Virginia (Mr. BYRD) to raise the minimum to $100. That would cost another $2 billion immediately while the second Byrd amendment would cost $600 million for each of the next 2 years.

Mr. BYRD of West Virginia. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. BYRD of West Virginia. Mr. President, I ask the Senator from Delaware, does not the amendment offered by the distinguished majority leader and me pay its own way?

Mr. WILLIAMS of Delaware. It does after 1972 when the new tax would become effective. It does not do so for the next 3 years.

I am talking now about the loss in fiscal 1970. The Senator is partially correct in his statement, as I was going to point out.

The second Byrd amendment, which reduces the retirement age to 60, while actuarially sound over a long period, results in $600 million loss in revenue next year.

The Harris amendment would result in a $150 million annual loss in revenue.

Taking the social security amendments together, we have an annual loss of $7.25 billion.

The Senate action on social security would drain over $20 billion from that trust fund during the next 3 years and there is no method provided for financing these extra costs.

Mr. BYRD of West Virginia. Mr. President, will the Senator yield again?

Mr. WILLIAMS of Delaware. I yield.

Mr. BYRD of West Virginia. Mr. President, the Senator referred to the second Byrd amendment. While it would have an initial impact on the trust fund in the first year, is it not true that in the long run it would level out so that there would be no overall impact? And does the Senator not also agree that it would not likely go into effect next year because of the triggering mechanism which was added?

Mr. WILLIAMS of Delaware. The Senator is correct—5 or 10 years hence. However, I am speaking of the triggering effect for the fiscal year 1970 if all of the amendments are agreed to by the Senate and by the conferees. It would result next year in an additional loss of revenue over and beyond what it would be if we had enacted the bill, as reported by the Senate Finance Committee of $10.650 billion.

Our Government just cannot afford

such a loss in revenue, to do so would be fiscally irresponsible.

That total of $10.5 billion does not include the Ribicoff amendment which goes into effect a couple of years later. Including that revenue loss in the year 1973 would be $12.150 billion. The total loss of revenue for the next 2 years, the 2 calendar years of 1970 and 1971, if the Senate bill were enacted into law as it stands now, would be $22.800 billion. How can we reduce taxes or increase expenditures by such an amount when we are already operating at a deficit.

That is the loss of revenue over and beyond what would have been lost by the bill if the bill approved by the Finance Committee had been approved by the Senate without amendment the day it was reported.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. BROOKE. Mr. President, if the motion is agreed to, would that prohibit a vote in this session on an increase in social security benefits?

Mr. WILLIAMS of Delaware. It would not. I was getting ready to mention that point. That is why these social security amendments were included. It was the thought of some of us that social security should not be a part of the tax bill.

I have conferred with the chairman of the committee and with all the members on our side of the committee, and we are in complete agreement that the social security bill would be stopped at the desk if this motion were to be agreed to.

We make this as a pledge. The House is acting on a social security measure this week. There is no question about that. I suppose that it will be a 15-percent increase across the board. However, it will be subject to whatever amendments may be offered in the House or the Senate.

We agree, and the chairman of the committee will concur on this, that if this motion is agreed to we will stop the bill at the desk when it comes over so that it can go direct to the Senate Calendar.

The question of whether the Senate wants to vote for or against a 15-percent increase in social security and whether it wants to vote for or against the other social security amendments will all be germane to the social security bill and can be acted upon at that time.

This will assure the Senate that if the motion is carried, the Members of the Senate will have an opportunity to vote on the question of whether they should or should not raise social security benefits before we go home this year.

Mr. BROOKE. Mr. President, if the social security bill from the House comes over and is stopped at the desk, would that bill then be amendable in the Senate?

Mr. WILLIAMS of Delaware. Yes. It would be the same position as any other bill. The advantage of stopping it at the desk is that it would eliminate the necessity of the bill going to the committee and the committee having to meet, with or without hearings, and order the bill reported. And the members of the Finance Committee will no doubt be tied up for a day or two in the conference on this bill no matter what we do on the motion.

So, being realistic, I doubt that the Senate Finance Committee would have a chance to hold hearings and report a social security bill. The chairman of the committee and the minority committee members have agreed that we would stop it at the desk, if this amendment is adopted, and then it could be brought before the Senate at the convenience of the leadership.

Mr. BROOKE. That would enable the Senate to vote on an increase in social security benefits in this session, prior to our recess?

Mr. WILLIAMS of Delaware. That is correct. And the motion is being offered with that understanding.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. SCOTT. That is a very reassuring statement, because I am sure that Senators will want to know about that if they vote to support the Senator's motion to recommit—and I intend to support it, because the President has made it quite clear that the bill in its present form is entirely unacceptable. What I want is a bill. What I want is tax reform. Therefore, I also want to know, as the Senator has given this assurance to the Senator from Massachusetts (Mr. BROOKE), that the Senate will have a reasonable expectation of treating the 15-percent increase in social security proposal, now in the other body, in the current session of Congress. It can be so handled only, in my judgment, by stopping it at the door. The other body has that measure before it and reportedly may act on it today.

If we have this reasonable assurance that we can get the social security increase this year, I believe that the Senator's motion offers the Senate an opportunity to go on record with regard to the features of this bill which we may severally and effectively regard as bad. For example, I do not regard as seriously or as ominously bad certain of the amendments which the Senator from Delaware includes in his motion to recommit. But I hope that he will ask that they be voted on en bloc, as he says, in order that we do not have to again go through this lengthy exercise of trying new amendments to the bill by handling his motion other than as a single motion.

Mr. WILLIAMS of Delaware. I thank the Senator. I will make that request at the appropriate time, when Members are advised.

I say to the Members that the position I am taking today, to try to hold what I personally consider is a fiscally responsible position, is not taken because we have a Republican President in the White House. I am not offering this as an administration proposal, although I know the President is very much concerned about the revenues loss entailed in this bill.

I remind Senators that a little over a year ago I stood in this same place and took the same position when President Johnson was in the White House. At that time I cosponsored, with the Senator from Florida, a bill which we felt was essential to the country, the 10-percent surcharge; and I pleaded with my colleagues on both sides of the aisle to support it because I thought our country needed that revenue in order to maintain the solvency of the dollar. I thought that in order to check the threat of inflation that action had to be taken.

I am making the same plea today. I am going to ask at the appropriate time that we can have a vote on this motion en bloc. I would like to think that I am entitled to such a vote, because I feel very strongly that we cannot afford this loss of $10 billion in revenue next year.

So far as the particular amendments are concerned I cosponsored three similar amendments on prior occasions, but today we just do not have the revenue.

I cosponsored on one occasion the amendment sponsored by the Senator from Connecticut (Mr. RIBICOFF). I think there is a great deal of merit to the proposal that we allow some form of tax credit for college tuitions, and I am looking forward to the day when we can afford it. But I do not think we can do it today and remain fiscally responsible and make progress toward checking inflation.

Mr. DOMINICK. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. DOMINICK. I wish to comment on item No. 1, referred to in the Senator's memorandum as the amendment of the Senator from Connecticut (Mr. RIBICOFF). Of course, he and I were cosponsors and the principal sponsors of it. Is is not a fact that this amendment would not become effective until 1972 and that it would not be reflected in revenues until 1973?

Mr. WILLIAMS of Delaware. I have so stated in my opening remarks. The Senator is correct.

Nevertheless, if we have the revenue to do it in 1972 it could then be done. I shall not be in the Senate, but I look forward to the day when this amendment can be made part of the law. I think it is something Congress should consider whenever the money is available, but we do not have it now.

What I was confronted with was not singling out those amendments which I felt were not meritorious. They all have merit. I took them across the board, on both sides of the aisle.

On a few occasions I have offered in the committee the same amendment that was offered by the Senator from California (Mr. MURPHY), and I tried to get it adopted. I think there is merit to it. I think there is great merit to the amendment of the Senator from Arizona. I will not quarrel with the merit of the amendment of the Senator from Tennessee. I know that there is a great deal of sentiment in this country for these exemptions.

The amendment of the Senator from Connecticut and the Senator from Colorado would not become effective until 1972. On the other hand, the Gore amendment represents an additional loss in revenue in 1970 of $2.3 billion beyond the committee bill, and in 1971, $3.8 billion. But the long-range effect of the Gore amendment is that it would not lose any more revenue than would the committee bill. I think in fairness that it should be stated.

So I am not attacking any of these amendments on their merits; not one of them. I am not discussing their merits. I am discussing only the fiscal impact on our budget for the years 1970 and 1971.

Mr. DOMINICK. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS of Delaware. I will yield for a question. I promised the Senator from New York that I would yield to him.

Mr. JAVITS. Mr. President, I ask the Senator, who has gone a little further with his speech than he thought he would have to, if he would yield to me. We are tying up a number of Senators on another matter. I think we could finish all our business within 15 minutes. I will try to make it 10 minutes. We have the hunger problem before us now. I ask him to yield to me, without losing his right to the floor.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that I may yield for 10 minutes to the Senator from New York, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMINICK. Mr. President, will the Senator yield for a question on this colloquy?

Mr. WILLIAMS of Delaware. I yield.

Mr. DOMINICK. If the Senator from Delaware should try to get unanimous consent to consider these items en bloc, would that then prohibit an amendment to strike out one item or another?

Mr. WILLIAMS of Delaware. No; I have checked with the parliamentarian.

I would hope that such amendments would not be offered, and I am appealing to my colleagues not to do that for this reason: If anyone offers an amendment to protect his amendment, naturally each Member will feel obligated to have his amendment restored, and we shall be back on the merry-go-round.

All I am asking for is a vote on this as a package because I believe we have debated the merits of it. There is no question in my mind that the Senate is on record for these amendments. For example, the amendment of the Senator from Connecticut and the Senator from Colorado was adopted by a substantial margin. I do not question the sentiments of the Senate. I would merely like to have one vote. That is all I am asking for.

I was interested in good tax reform measures as early as any other Member of this body. I have been advocating tax reform for years, as Senators know. I regret that this bill has been converted into such a revenue-losing measure. I would like to support it, but I cannot do so unless some adjustment is made.

Since Labor Day our committee has been in session almost daily and occasionally on Saturdays. For months I have neglected other matters in my office for the one purpose of expediting this bill in order to get before the Senate a measure the Senate could support.

But the bill now before us, as amended by the Senate, is not one I can support. I am trying to make one last effort to bring it in line. All I ask is the right to vote on that question.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. RIBICOFF. Mr. President, I would like to make the record clear at this point, because of the debate which has taken place and the discussion between the Senator from Delaware and the Senator from Colorado that the Senator from Delaware points out the merits of the Ribicoff-Dominick approach in the tax credit and expresses the hope that in some time in the future this legislation is adopted.

The only way to get this philosophy impressed upon the country is to pass it as law.

The Senator from New York (Mr. GOODELL), the Senator from Colorado (Mr. DOMINICK), and I were well aware of the problems involved insofar as fiscal responsibility and shortfall are concerned. In our discussions we determined why we believed in the principle. We were deeply concerned that there would not be a revenue loss for the coming year. Consequently our amendment affected 1972, which would first show up in 1973 when the tax returns for 1972 were filed.

So the Senator from Colorado, the Senator from New York, and I do believe that we were being very fiscally responsible on a measure that had great popular appeal not only in the Senate but in the country.

I am at a loss to understand why item 1 is included when we were being so careful to make sure there would not be a revenue impact until 1973.

Mr. WILLIAMS of Delaware. Mr. President, I stated in my remarks that the revenue loss would not take effect until 1973. I shall outline why I still think it should be eliminated from the bill.

Mr. LONG. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I yield.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, I have discussed the possibility of a limitation of debate, hoping we can vote on final passage of the bill today. For that reason, I believe we have an understanding. I will put the request, and see if we can agree to it. I am going to ask that we limit debate on the motion, and on that I am going to ask for time to be controlled by the author of the motion and the Senator from Tennessee.

Then I am going to ask that we have 2 hours on the bill, to be controlled by the Senator from Louisiana and the Senator from Delaware.

I want to make it clear that if amendments are offered to the motion, the Senator from Louisiana would plan to offer, in the event time on the motion had expired, at such time as seems appropriate, time on the bill to any Senator who wants to offer an amendment to the motion, in order to explain his amendment. No Senator would be foreclosed from making a statement, although we would have a 2-hour limitation on the bill and a 1-hour limitation on the motion, if agreement is reached on the request.

Mr. WILLIAMS of Delaware. Mr. President, if the Senator will yield, as I stated earlier, it is my hope that we can get a straight up-and-down vote on this motion, but I have talked with Senators whose amendments are affected and have assured them that they would be protected. I said that if we agreed to any consent agreement we would have 20 minutes, 10 minutes on each side, on any amendment they wanted to offer.

I hope no amendment will be offered, but I am committed to protecting their rights if Senators want to amend the motion.

Therefore, I would suggest that we have 1 hour on the motion itself to be controlled, as I understand, by the Senator from Tennessee, and myself, equally; and if there should be any amendments offered to the motion that they be limited to 20 minutes, to be divided between the maker of the motion and myself, 10 minutes each; and then on the bill we could have 2 hours.

I think that would protect every Senator's rights. Some Senators who are not presently on the floor could be assured they have this protection.

Mr. LONG. Mr. President, I think it would be better to have more time on the bill, which could be yielded. The reason why I say this is that if a Senator wanted to engage in dilatory tactics—and no Senator has indicated any desire to do so—the kind of consent agreement the Senator is suggesting is even more subject to dilatory tactics than would be the ordinary Senate rules.

My thought would be that if a Senator really needed time, I would be happy to yield him time on the bill. I am sure the Senator from Delaware would be happy to yield some time also, if he had time remaining, to any Senator who needed it.

I would suggest that we have 4 hours on the bill, so that any Senator who wants to offer an amendment can do so. Then we will know that eventually we can vote on the bill.

Mr. WILLIAMS of Delaware. I assure the Senator we can vote on the bill at an early hour. This is not going to be a dilatory tactic. In fact, I talked with the majority leader and told him my plans. If it should develop into such a delaying procedure I would withdraw my motion. I do not anticipate any problem at all in that direction. I only want a vote.

I have promised Senators that there would be no unanimous-consent agreement if they were off the floor unless they were protected in their rights.

I am hoping there will not be any amendments offered, but I would suggest, in case there are that we have 1 hour on the motion itself, equally divided, and 20 minutes on any amendment if there should be one, equally divided between whichever Senator makes the motion and myself. I think we can dispose of this matter in very short order.

Mr. LONG. Could we have an agreement on how many amendments can be offered? For example, if we are going to allocate time for amendments to the amendment, since the Senator's motion would strike, as I understand, about 10 amendments from the bill, I would suggest we have no more than 10 minutes on a side for each amendment, with time allocated for those amendments. That is

200 minutes, if we actually take 20 minutes on each one.

I cannot for the life of me see any reason why any Senator, other than Senators interested in the amendments referred to, would want to offer an amendment to the Senator's motion.

Mr. WILLIAMS of Delaware. I do not think they are going to offer amendments. The only reason I offered that suggestion is that we make haste better if a Senator does not think his rights have been ignored. I told certain other Senators that their rights would be protected whether they were on or off the floor, just as I promised the Senator from Tennessee. He is present and can speak for himself.

I would suggest that we proceed in this way. I am confident it will not delay a vote.

Mr. LONG. I am not going to ask for 20 minutes on amendments. That could go on forever.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. GORE. Perhaps I can offer a suggestion. I have examined the motion of the distinguished Senator from Delaware to recommit. His instructions would direct the committee to strike out eight amendments. I find that on all amendments, except the amendment relating to the social security benefits and the amendment relating to an increase in personal exemption, items 7 and 8, I voted the same as the Senator from Delaware. In other words, on his first six items, his position and mine have been exactly the same. Therefore, if we could eliminate 7 and 8, I would be wholeheartedly in favor of his amendment. But if I removed from the instructions, or attempted to remove from the instructions, what I do not like, I daresay other Senators would do the same, and that would open up the bill again.

I am willing to have a vote up or down on the motion to recommit, but I realize that if other Senators start offering amendments, I will feel a necessity to do so—which comes to the suggestion I arose to make: If we could agree to a time limitation on the motion to recommit, plus 20 minutes for any amendment to strike out any one of the eight items of instructions, that would limit it to 160 minutes at a maximum.

Mr. LONG. Item 8 is three amendments.

Mr. GORE. I understand it is, but it would all be together by a motion to strike out item 8 in the Senator's instructions.

Mr. LONG. Mr. President, suppose I put it this way: I ask unanimous consent that further debate on the motion of the Senator from Delaware be limited to 1 hour, to be divided between the Senator from Delaware and the Senator from Tennessee—the manager or a Senator to be designated by him—and that the time on amendments to the amendments that would be stricken—they are listed as eight, but item 8 is three amendments, one by the Senator from Louisiana and two by the Senator from West Virginia—be limited to 20 minutes, to be divided between the sponsor of the amendment and the Senator from Delaware—not to exceed 20 minutes, to be equally divided—and that there be 2 hours of debate on the bill itself, to be controlled by the manager of the bill and the Senator from Delaware (Mr. WILLIAMS).

Mr. WILLIAMS of Delaware. That is agreeable.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Mr. President, reserving the right to object, does that mean there would not be an opportunity for anyone else, other than the sponsors of the affected amendments, to offer amendments?

Mr. LONG. No; it does not. That is the purpose of asking for 2 hours. If someone else wants to offer something, the manager of the bill and the Senator from Delaware then have 2 hours in which they can yield to Senators who might wish to discuss some thought of theirs, or might wish to bring up some additional item of debate on something that may come up later.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none, and it is so ordered.

Mr. HOLLAND. Mr. President, will the Senator from Delaware yield to me so that I may propound a parliamentary inquiry?

Mr. WILLIAMS of Delaware. I yield.

Mr. HOLLAND. Mr. President, it seems to me that it is of the utmost importance that Senators understand what will be the situation in the event that this motion of the Senator from Delaware—or, if it be modified, any modification of it—be agreed to, and if the Finance Committee, acting instanter, reports back a bill shorn of the amendments, heretofore voted, mentioned by the Senator from Delaware in his motion, or any portions thereof.

Therefore, I make this parliamentary inquiry: In the event of the adoption of the motion of the Senator from Delaware to recommit, and the immediate action, as directed by that motion, of the committee in reporting back the bill shorn of the various amendments heretofore voted which are recited in the motion, or which may be recited in the motion as modified, the question is, Would the bill still then be in the position it now is; that is, of having passed third reading and being subject to being voted up or down on the question of passage?

The PRESIDING OFFICER. In the opinion of the Chair, the bill having been read the third time, the question would be on the adoption of what the committee reported back forthwith.

Mr. HOLLAND. I thank the Presiding Officer.

As I understand the ruling of the Presiding Officer—and I think it is correct—it is that, as reported back, the bill would not then be subject to amendment, but the question would be on passage, up or down, in the condition reported back by the committee.

The PRESIDING OFFICER. As reported back; the Senator is correct.

Mr. HOLLAND. I thank the Chair.

Mr. WILLIAMS of Delaware. Mr. President, I might add that having consulted with the Parliamentarian before I made the motion, I concur completely with the ruling. It was for that reason that I waited until after third reading of the bill to make my motion, so that we would not be opening it up for another donnybrook of amendments.

I state again that I advised those whose amendments are proposed to be deleted by my proposal. Senators knew what action I was planning to take here. I have tried to protect their interests so that they will have an opportunity to defend their proposals.

I have checked with the Parliamentarian and am advised that I can ask unanimous consent that the various items in my motion be considered en bloc and that, at the same time, obtaining unanimous consent for that would not preclude any Senator who might wish to offer an amendment to my motion from doing so. Their rights would be protected.

With that understanding I ask unanimous consent that the eight points in my motion be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, I realize that an excellent argument can be made for any one of these amendments, and I realize also that the sponsors of the individual amendments feel very strongly about the merits of their particular amendments and could make a good argument that I should exempt this or that proposal.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LONG. I have been furnished with a tabulation showing the revenue impact of the various items in the Senator's motion, and I find that the biggest revenue item on the Senator's list includes the amendment I offered, which embodied the provisions of the House bill for an increase in social security benefits.

The Senator need not apologize for moving to strike my amendment. If his motion is agreed to, that is perfectly all right with me. When the House bill comes over, we can pass it. There is no problem about that, as far as I am concerned.

Mr. WILLIAMS of Delaware. I appreciate that. I have discussed the matter with the chairman of the committee, and we agreed that when the House bill comes to the Senate, we would stop it at the desk so that Senators would be assured they would have a chance to vote on that social security measure, as the Senator has stated.

We are trying to protect the rights of all Senators, but I say again, the position I am taking, as the Senator from Louisiana knows, is the same as I took very strongly last year, when President Johnson was in office. I thought then that our fiscal situation was such that we could not afford to do without the revenue in the 10-percent surtax proposal. I feel equally strongly now that we cannot afford to lose this revenue, and I am asking my fellow Senators to give me a straight up or down vote on my motion. I certainly hope amendments to my motion will not be offered, although I un-

derstand we could be confronted with an almost indefinite donnybrook here. I do not want that, and I do not think we are going to get it; but at the same time, I did tell the Senators they would be protected in their rights.

The chairman of the committee has been very generous, and I say that, having worked with him for weeks and months in the committee on this bill. He has done a tremendous job as chairman in trying to get out of the committee and before the Senate a bill balanced as to revenue and one that would provide some tax reform and at the same time give some tax relief in other areas.

What the committee was trying to do was report a bill which would not be a tax increase or a tax reduction bill, but one that would be more or less an equalization of the tax load. We were adding taxes in some areas and distributing the benefits of the tax reduction in other areas to people we thought were now paying more than their proportionate share. This was to be more or less an adjustment bill. For those in the higher brackets we were raising their taxes by raising the capital gains tax or by eliminating some of their benefits under pension plans. While we were eliminating benefits in many areas, at the same time we sought to offset the increases for those in the higher brackets where possible by reducing their rates to 65 percent.

For those we felt had been overburdened with taxes we eliminated over 5 million taxpayers from the tax rolls entirely. We passed on to them the benefits of the revenue gained from the repeal of the investment credit, which is really a tax on corporations of about $3 billion. We distributed revenue to the low-income groups. The committee bill was a fair bill.

We tried to be fair. I recognize that there are those who may differ with the bill, but we tried to come up with an answer that would not upset the budget in the long run. But since the bill came to the floor of the Senate it has, in the opinion of some of us, gotten out of hand, and I do not think we can afford the impact of its additional $10 billion loss in revenue. As I stated earlier, one of the biggest items I have in mind, especially for fiscal 1970 and 1971, is the amendments of the Senator from Tennessee (Mr. GORE). This one amendment in 1970 and 1971 would cost the Federal Treasury over $6 billion. That would be highly inflationary.

However, as I stated earlier, the long-range effect of the Gore amendment a few years hence would not lose any additional revenue from the committee bill. In fact, if I recall correctly, it picks up $100 million over a period of time and would be less costly when it gets fully implemented.

Mr. GORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. Mr. President, I am very grateful for the forthright statement of the senior Senator from Delaware. There have been a great many loose statements made to the effect that the amendment which I sponsored to increase the personal exemption was fiscal irresponsibility.

The fact is that my amendment replaced other tax relief provisions in the bill and, as the distinguished Senator has just said, the responsible estimates by our technical staff are that, when fully implemented, the amendment which I sponsored would cost an estimated $100 million less than the tax relief in the bill which my amendment replaced.

I hope that Senators and the American people who read the RECORD will now realize that this is the case. I read editorials and I hear comments to the effect that the Gore amendment is going to bust the budget. As a matter of fact, the Gore amendment, as the able senior Senator from Delaware just said, will, when fully implemented, cost $100 million less than the provisions in the bill which it replaces.

If we look at it in the short run, the amendment which I offered will just about be even with the revenue gains in the bill in the calendar year 1970.

There is a shortfall in the calendar years 1971 and 1972. However, it would not be enough seriously to affect the budget.

So, I rise to express my gratitude to the able Senator not only for his statement, but also for his responsibility and willingness to refrain completely from misinterpretations of the facts with respect to the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I thank the Senator. I tried to point out in presenting this matter earlier when the Senator was not present, both the short- and long-range effect of this bill. The Senator is correct. At the same time, I outlined the financial effect of the amendment of the Senator from Connecticut and the Senator from Colorado, the Ribicoff amendment has no impact whatever in the years 1970 and 1971 but becomes effective after 1972.

I tried to outline statistically exactly what the effect would be of each of these amendments.

Mr. GORE. Mr. President, will the Senator yield again?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. Mr. President, there is one other distinction that we need to be reminded of. That relates to the difference between the calendar year and the fiscal year.

The Government budget is made on a fiscal-year basis. However, taxes are generally levied and collected with respect to calendar years. So, one can take his choice as to which is the most appropriate period to use. As a matter of fact, the able senior Senator from Delaware has referred to both calendar year and fiscal year.

Mr. WILLIAMS of Delaware. The Senator is correct, and changes made in the bill will only have half of the effect for fiscal year 1970, whereas in calendar year 1970 it would be fully effective.

I have tried to keep in context the provisions of the various amendments and the impact they would have in the respective years. Likewise, the provisions of the social security amendments will result in a $7.25 billion drain on the trust fund in 1970, and there would be about the same drain in 1971 and 1972. But in 1973, as the Senator from West Virginia pointed out, there would, under his amendment, be a tax to offset the cost of his amendment. However, in the next three years under the Byrd amendment and the Long amendment we would have a $21.75 billion drain from the social security trust fund over and above the revenue being provided.

I recognize that Congress will pass some kind of social security increase measure in this session of the Congress, but surely it will be properly financed.

I am confident that before Congress goes home it will pass some kind of social security measure, but let the increased taxes for that measure be a part of the same bill. However, my tabulation concerns the next 2 years' loss of revenue in this bill, and as I stated, I hope that we can get a vote up or down on this pending motion, which would save this revenue loss.

Last year I introduced President Johnson's tax bill and coupled it with what I thought was an important additional measure providing for expenditure controls and reducing the expenditures by $6 billion.

A lot of people ask why the surtax was not more successful. It may not be a part of this debate, but I think that it should be mentioned. One reason that the surtax was not successful in controlling inflation was that Congress was a year late in getting it enacted. And after that there was a gradual whittling away by Congress and the administration of the expenditure controls. Expenditure controls were eroded by a series of exemptions, and during the latter half of last year the Federal Reserve Board pumped money into the economy at a faster rate than normal. Both steps contributed to the inflation in my opinion.

Again, if Congress had acted on the administration's recommendations for a repeal of the investment tax credit and extension of the surtax a little earlier, it would have helped. I think Congress could have acted earlier. We delayed and have not acted yet on investment credit. The taxpayers do not know whether they are going to get the tax credit or whether it will be repealed. That has created a problem.

Let us eliminate this uncertainty and take action on the bill, either pass it or do not pass it, and either accept or do not accept my motion. However, we should act so that the taxpayers will know where we stand.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LONG. Mr. President, the Senator from Delaware has compiled two tabulations, I believe with the help of the Joint Committee on Internal Revenue Taxation, which show the increases and decreases in revenues from the committee bill which result from the various actions taken here on the floor. One table shows this information on a fiscal year basis and the other is on a calendar year basis. I ask unanimous consent that the tables, which I understand have been laid on Senators desks, be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

DECREASES (—) AND INCREASES (+) IN TAX LIABILITY AND SOCIAL SECURITY BENEFITS RESULTING FROM SENATE APPROVED AMEDNMENTS AS COMPARED TO SENATE FINANCE COMMITTEE BILL, CALENDAR YEARS 1969–1974 AND LONG RUN

[In millions]

| | 1969 | 1970 | 1971 | 1972 | 1973 | 1974 | Long run |
|---|---|---|---|---|---|---|---|
| Tax relief for individuals | | −$2,251 | −$3,739 | +$85 | +$85 | +$85 | +$85 |
| Investment credit: | | | | | | | |
| Small business exemption | −$520 | −720 | −720 | −720 | −720 | −720 | −720 |
| Depressed area exemption | −10 | −70 | −70 | −70 | −70 | −70 | −70 |
| Medical expenses for aged | | −225 | −225 | −225 | −225 | −225 | −225 |
| Transportation deduction for disabled | | −90 | −90 | −90 | −90 | −90 | −90 |
| Exemption for foster children | −(1) | −(1) | −(1) | −(1) | −(1) | −(1) | −(1) |
| Credit for higher education expenses | | | | −1,800 | −1,800 | −1,800 | −1,800 |
| Capitalization of certain citrus grove costs | | +5 | +10 | +10 | +10 | +10 | +10 |
| Total distributions from pension plans, and so forth | | −(1) | −5 | −10 | −15 | −20 | −55 |

[1] Less than $2.5 million.

Mr. LONG. Mr. President, I think it is correct to say that the calendar year table shows that the bill as presently tailored, would produce a revenue decrease as compared with the committee's bill of $530 million this year—1969; in 1970, the decrease would be $9,226 million; in 1971, it would be $11,449 million.

Mr. WILLIAMS of Delaware. For 1970 it is $9,226 million.

Mr. LONG. For 1971, $11,449 million; for 1972, $9,440 million; and for 1973, $2,755 million. It would stay at about that level thereafter. In the long run, the bill as it now stands would result in an additional revenue loss of $2,860 million.

Mr. WILLIAMS of Delaware. That is correct.

Mr. LONG. The evaluation contained in the Senator's table is a precedent that is desirable. Just as we today are evaluating the revenue impact of this bill, we also at the end of each year, ought to take a look at what we have done, to see where we stand in terms of appropriations, and to determine what is needed in terms of revenue. We should seek to arrive at a balance that would be responsible, so that we would not continue indefinitely to have the fantastic national debt that at present overhangs the economy and the Nation.

We should think about the economic condition of the country, and all other relevant factors being equal, we should try to raise at least as much money as we spend.

The Senator from Delaware is seeking to provide that, at least so far as this bill is concerned—and that is, after all, what the members of the Committee on Finance have to think about—the Government will not be placed in a very bad fiscal situation.

I think I would vote for the Senator's amendment. If we do not do so, we will have something of this sort in conference. In other words, the House of Representatives, having sent us a tax reform and tax reduction bill that it regarded as being fiscally responsible, will undoubtedly be extremely concerned about the fiscal impact of the bill as it now stands. They will say they sent us a bill that was fiscally responsible, taking into account the inflationary pressures, the budgetary problems, and the various other factors that confront this Nation, its tax system and its economy at this point, but that we, on the floor of the Senate, played politics and voted for many things with political appeal and many things that are desirable if we can afford them, without providing the funds to pay for all this.

The Senator knows how concerned House confereees can be when they feel the Senate has put many amendments on a basically good bill which do nothing but create mischief. I find it somewhat embarrassing to go into a room with those men, who have been responsible on their side, and tell them that we have overburdened the bill to the tune of approximately $11 billion.

There is no doubt in my mind that if the Senator's motion is not agreed to, we still will have to take a good amount of the revenue loss out of this bill—in fact, much of what the Senator is seeking to strike from it, including my amendment. So far as I am concerned, I would be content to look at the social security bill when the House sends it to us this week or next week, as the case may be, and consider those items individually and also the administration's objections to putting the program into effect as of January 1. I know they prefer that the effective date be March 1, with the first increased checks being received in April. Also, we could then consider the amendments that have been added to this bill. There is no doubt in my mind that if we consider the social security bill by itself, it will pick up other amendments which may be meritorious and worthy, but I should think we could vote on the social security bill within a week.

Mr. WILLIAMS of Delaware. I think we can. I appreciate the remarks of the Senator from Louisiana.

It should be pointed out that the figures he read from the chart being placed in the RECORD are the differences as compared with the bill reported by the Senate Finance Committee.

The reason I want to make this motion is that if we go to conference with the bill as it is I am afraid that we shall not be able to complete the work in time to get the bill back and signed by the President. Furthermore, it will be

sheer hyprocrisy on the part of the Senate to pass this bill in its present form and then expect the conferees to eliminate those same provisions for which they are now voting. Let us each be man enough to take a firm stand. Congress has already waited too long to act on some of these measures.

For example, the investment tax credit: Either this bill becomes law at the end of this year, or there will be no repeal effective for 1969. We cannot repeal the investment tax credit next year and make it retroactive in the calendar year 1969. We have never done that in our committee. This bill would be retroactive to April 18. Soon the taxpayers will be filing their returns. They get their tax returns in the mail the first of the year, and they have a perfect right to compute their tax liability based on the law as it was at the close of the year, and the present law still provides for a 7-percent investment tax credit. We must complete action on this bill within the next few days, or it will be too late. That is why my motion is so important.

The same is true with the excise taxes, which expire December 31, 1969. The surcharge expires at the end of this year. There is no good reason why the Senate has delayed action on these proposals until this late hour.

With my motion I am trying to get a decision as to what the Senate expects the conferees to do if we go to conference. Members may disagree with what I am proposing to do in this motion, but let us vote. I understand their right for disagreement.

I do not know of a single amendment I propose eliminating that I could not give a good argument for and cosponsor if we only had the revenue. I am not attacking any of them on their merits; none at all. I am trying to present the case of each of them as fairly as I can, because I do not think we get anywhere by trying to misrepresent; but the sum total of these amendments which I propose to delete from the bill would result in a revenue loss next year of over $10 billion.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LONG. The Senator has presented this table to us. While it is true that in the long run the revenue impact of what we have done on the floor is not unusual—$2.8 billion in 1974 and thereafter—it is rather startling to note that as compared to the committee's bill we have an adverse impact on the budget of $9 billion in 1970 and $11.4 billion in 1971.

The Senator is well aware that in the Finance Committee—actually, it was on the suggestion of the Senator from Delaware—we proceeded with our bill step by step through our tax raising sections, our reform sections, to see how much money we would raise; and, having tabulated how much we would raise, we then proceeded to see how much tax relief we could provide.

Mr. WILLIAMS of Delaware. That is correct.

Mr. LONG. The Senator is going about this in an organized fashion, having laid the whole business before us, to see how much we raise and how much we lose by our actions on the floor. The Senator now is offering a motion to bring the bill back into the balance it had when the committee reported it for next year and the year after.

With all deference to what some of these amendments would do in the long run, as a practical matter we had better be thinking about what we do for 1970 and 1971. The impact on the economy of a revenue shortfall as great as we now have in the bill for these years could be exceedingly inflationary.

The Senator has indicated his desire to retire. I hope he will change his mind, and I believe that hope is shared by every Member of this body.

The good Lord could call us home between now and then. But, there will be other Congresses and other sessions when people can think about what happens to the Government in later years. We had better concern ourselves now about what happens in the immediate future. What the Senator seeks to do at this point is to save the Government approximately $20 billion in the next 2 years.

Mr. WILLIAMS of Delaware. The Senator is correct.

I call attention to the fact that 17 months ago, on June 30, 1968, the national debt was $350.7 billion. On November 20 of this year, 17 months later, our national debt was $369.5 billion, or an average increase of over $1 billion per month.

We cannot keep going down this road of deficit spending and finance it with the debt. It should be pointed out that a part of this large increase in debt is because the revenues the first 5 months of a fiscal year are always lower than in the second half. So it would not be quite fair to say that we are running behind at the rate of $1 billion per month, even though the debt has increased that much, because it will average out later. But we are running a deficit of an average of approximately $700 million per month at this time. We just cannot afford to continue down this road. toward fiscal insolvency. We can have a bond-buyers' strike in this country unless this inflation is brought under control.

I promised to yield to the Senator from New York (Mr. GOODELL). He has been very patient.

Mr. GOODELL. I thank the Senator. I appreciate his yielding to me. It has been a pleasure to listen to the Senator from Delaware, and I commend him for his motion. I intend to support it.

I wish to congratulate him for the tremendous contribution he has made to this legislation in committee and in debate on the floor of the Senate. He has made a tremendous contribution over the years in connection with tax legislation.

In the past weeks the Senate has virtually washed tax reform away in a deluge of indiscriminate tax cuts.

We have before us now a bill which is nothing more than an overstuffed Christmas stocking. In its present form, it is not so much a tax reform as a tax relief measure. Its overall impact will not strengthen the Federal tax structure while eliminating inequities. Its wholesale tax cuts will feed inflation and take away revenues desperately needed to meet the social problems facing this Nation. This is particularly true in the next 2 fiscal years.

Amendments to the tax reform bill adopted on the Senate floor will cost about $10 billion a year in each of the next 3 years. Much of this additional cost is attributable to two amendments which I would have favored under circumstances of fiscal responsibility with the provision of adequate revenue to pay for them, but had to oppose under present circumstances because of their inflationary effect. These are the increase in the personal exemption from $600 to $800 and the increase in social security minimum benefits to $100.

Surely, even in the Christmas season we cannot afford to be so prodigal.

A revenue loss of the magnitude contemplated by the Senate bill will gravely aggravate the inflation this Nation is now facing—thus further eroding the savings of millions of Americans and diminishing the purchasing power of their earnings.

Perhaps still more serious, such a loss will make it impossible for the Federal Government to provide effective programs for alleviating poverty, hunger, and urban decay.

Frankly, I find it difficult to comprehend how some of my colleagues, who have been highly vocal in calling for massive new programs at the Federal level for dealing with our social problems, could support enormous cuts in tax revenues needed to fund these programs.

The PRESIDING OFFICER (Mr. SPONG in the chair). All time of the Senator has expired.

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 10 additional minutes on the bill.

Mr. GOODELL. Mr. President, it is difficult enough under present budgetary limitations to provide sufficient funds for welfare reform, revenue sharing, and adequate health, urban rehabilitation, education and job training programs. It is stating the obvious that a reduction of billions of dollars in Federal revenues will make it literally impossible to finance these efforts at adequate levels.

Our budgetary problems have been aggravated by excessive military spending that many of my colleagues and I have opposed. Such military spending, however, remains a reality. The bitter experience of many years suggests that if revenues are cut, it will be domestic programs, not military expenditures, that will suffer most.

I have long been an advocate of tax reform to make the tax structure more equitable and to eliminate the favoritism that now exists in the tax laws for special interest groups.

There are tax reform provisions of this bill that are improvements over present law—such as the imposition of a minimum tax on many wealthy individuals who are now escaping taxation through various deductions; a low income allowance for the poor; a limitation on hobby farm losses for the rich; and various other loophole-closing measures. Several

of these reform measures should, however, have been made much tougher.

In a number of respects, this bill is an improvement over the House bill. It has, for example, eliminated provisions of the House bill that would have made it difficult or impossible for States and localities to obtain financing for needed capital improvements. It adopted more sensible rules for the treatment of capital gains and charitable contributions. And it mitigated the highly punitive provisions of the House bill regarding private foundations.

I very much hope these improvements will prevail in conference.

In other respects, the Senate bill has been unduly solicitous of private interest groups, at the expense of real reform. A glaring example is the oil depletion allowance—which was reduced in the House to 20 percent but only decreased to 23 percent in the Senate.

The Senate bill should be judged, however, not on its individual provisions, but on its total impact.

It has become a wholesale tax cutting bill more than a tax reform bill.

Its tax cuts are so deep as to cripple our economy and hamstring our efforts to solve the Nation's pressing social programs, particularly in the next 2 years.

Its total impact, in short, is negative.

I shall vote against the bill in its present form.

Mr. President, I shall support the motion of the Senator from Delaware to recommit the bill. If the Senator's motion is not agreed to, I shall vote against the bill on the final vote.

I might say to the Senator from Delaware that I was a cosponsor of one of the amendments to which the Senator refers, namely, the tax credit for expenses of higher education. I regret that he has included that proposal, because the Senate at my request amended it so as to have deferred its fiscal impact until taxable year 1973. As much as I have favored this educational tax credit for the 10 years I have been in the House and the Senate, I did not feel we could responsibly put it into effect before 1973.

However, since the Senator from Delaware has included the educational tax credit in his proposal, I want him to know I do not intend to offer an amendment to delete it from his motion to recommit. I believe the Senator from Delaware should have an opportunity to have a vote up or down on his entire motion.

I believe the overall impact of the motion to recommit is so meritorious that even though I do not agree with all its provisions, I will support it.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I shall yield in just a moment.

The Senator mentioned the fact we do not have as much reform in this measure now before us as some of us would like to have. I certainly concur in that point, but at the same time I think I should add this comment.

I have explained the financial impact of some of the amendments which I am trying to delete, including the amendment of the Senator from Connecticut (Mr. RIBICOFF) and the Senator from Tennessee (Mr. GORE). I have tried to outline fairly the impact in my remarks. But I should add that throughout the work on this bill in the Committee on Finance and by our efforts on the floor of the Senate we have been together 90 percent of the time in our efforts to get needed tax reform. I compliment both of those Senators on the efforts they have made. I differ with them on this particular motion. I realize that. But at the same time as one who worked to get needed reform, as the Senator from Tennessee and the Senator from Connecticut know, we have joined together on many of the items.

When it came to trying to get real reform in our Revenue Code I compliment both of those gentlemen for the efforts they made. I wish we had been more successful. At the same time I am now trying to delete a couple of their amendments from the bill which would cost over $4 billion and which I do not think we can afford. I thought the RECORD should show that.

Mr. LONG. Mr. President, I ask unanimous consent that the time in opposition be assigned to the Senator from Tennessee (Mr. GORE).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, as I listen to the distinguished Senator, I know from my 7 years on the Committee of Finance there is no Senator in this body more interested in reform than the Senator from Delaware. But on listening to the Senator's remarks, I cannot help commenting that if it were not for the reforms the Senator from Delaware, the Senator from Tennessee, and myself consistently voted for in committee, and in this Chamber, we would not have this problem because those reforms not only would have closed the loopholes and brought real reform but would have also brought in a considerable amount of revenue.

Mr. GORE. Mr. President, will the Senator from Delaware yield at that point?

Mr. WILLIAMS of Delaware. I yield.

Mr. GORE. The record should also show, somewhat in contradiction of the statement of the Senator from New York (Mr. GOODELL), that the reform provisions remaining in the bill, despite the barrage of amendments, will still produce additional revenue over present law of $5.590 billion. That is to be compared with additional revenue that would have been provided by the reform provisions of the bill as reported by the Finance Committee of $6.650 billion.

Thus, despite all the talk about the barrage of amendments, and all the votes, the amendments have lessened revenues from reform measures only by one-sixth of added revenue from reforms in the bill when fully implemented.

So those who condemn the bill as being without tax reform are beside the point. They have become victims of the noise.

Unfortunately, amendments were adopted that, in my view, should not have been adopted. I think, by and large, that the Senator from Delaware and I voted together about 90 percent of the time on these amendments.

But, Mr. President, the thing I rose to nail down is that the bill still contains a large measure of tax reform.

Mr. WILLIAMS of Delaware. The Senator is correct. I made that point earlier. This is the reason for making this motion. We need a bill to go to conference which could become the law.

Mr. CURTIS. Mr. President, will the Senator from Delaware yield for a question?

Mr. WILLIAMS of Delaware. I yield.

Mr. CURTIS. Is it not true that if we retain those portions in the bill that pick up revenue, including the repeal of the investment credit, extension of the surtax, the other miscellaneous items, and eliminated the tax reduction, a reasonable amount of restrained appropriations and a balanced budget could be a reality?

Mr. WILLIAMS of Delaware. It could. I do not know that it could at the end of this fiscal year, but——

Mr. CURTIS. No. This would take a while.

Mr. WILLIAMS of Delaware. But I think that should be the No. 1 objective. I do not think we shall get control of inflation until we can convince the American people that we are going to stop pyramiding the national debt and balance this Federal budget.

Mr. CURTIS. That is why the vote coming up on recommittal is one of the most far-reaching votes that will be cast in this Congress, or perhaps the next. It is the one chance to obtain a balanced budget. If we miss this, we may miss it for a long, long time.

Also, if we miss it, does not the Senator from Delaware agree that we will have rendered a disservice to the American people, both now and future years?

Mr. WILLIAMS of Delaware. That is my opinion. While tax reductions are very attractive and everyone would like to reduce taxes, I do not believe we should lose sight of the fact that for each 1-percent increase in the cost of living it adds $5 billion to the cost of consumer goods. Thus, we would be taking that money away by fanning the fires of inflation.

Inflation, which I recall was around 6 percent last year, has got to be checked. We have got to bring it under control.

Say a wage earner gets a salary increase. It looks nice. He will get more money. But before he can get home the increase in the cost of living, in groceries, in clothes, and so forth, will have so advanced in price that his salary increase has been gobbled up.

Mr. CURTIS. Does not the Senator believe that the voters of any State in the Union will not demand reductions if we have to borrow the money to do it?

Mr. WILLIAMS of Delaware. Personally, I do not think so. It is not sound practice to cut taxes with borrowed money.

Mr. CURTIS. Is it not also true that if we increase the national debt by $1 billion, at the present cost of borrowing money we would add to the burden of carrying the interest at least $60 million a year, and that $60 million a year will have to be paid year after year after year, until a Congress is elected which will

have the courage to start paying off on the debt; is that not correct?

Mr. WILLIAMS of Delaware. The Government the other day paid 7¾ percent for an 8-year bond. So it will cost $77 million.

Mr. CURTIS. I understand that, but I am figuring it over the long run.

Mr. WILLIAMS of Delaware. That is correct.

Mr. CURTIS. I thank the Senator.

Mr. WILLIAMS of Delaware. Mr. President, I withhold the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GORE. Mr. President, the distinguished former Governor of Alabama, the Honorable George Wallace, appeared today on a national television program which originated in Washington.

Governor Wallace endorsed an increase in the personal exemption as a method of tax relief.

From this, I have taken encouragement in two respects:

First, the influence of Governor Wallace may prove helpful in the conference between the House and the Senate in securing adoption of the Gore amendment. I appreciate his endorsement and welcome his assistance. All assistance is needed. Indeed, every ounce of support on behalf of the people will be needed in that conference, because there are great forces arrayed against the amendment. They are arrayed against the amendment because this benefit for the mass of the people of this country will replace the benefit proposed for the few by the Nixon-Agnew administration. The few are powerful and they have friends in very high places. All of the strength of the White House, the President, the Vice President, the Department of the Treasury, and their political affiliates are moving heaven and earth to defeat the amendment.

The distinguished former Governor of Alabama is a man who has been demonstrated to command the loyalty, respect, and support of millions of Americans.

As a candidate for President, he ran second in the State of Tennessee, and a close second. The people who supported him in my State were, largely, working people, largely people who have been friends and supporters of mine because in my career my efforts have been devoted earnestly to an improvement of the economic status of the people who toil.

So I take encouragement from the endorsement by Governor Wallace of this method of tax relief as one more piece of evidence that I represent the wish and the will of the mass of men and women, young and old, in Tennessee for economic justice which, I think, is demonstrated by the pending amendment.

Mr. President, I ask unanimous consent to insert at this point in the RECORD excerpts from the remarks of Governor Wallace on the television interview this morning.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

Well, I advocated during the presidential campaign a $1200 tax exemption, the same as Senator Allen has introduced. The $800 is a start but it is not enough. It should go more than $800; it should be at least $1000 or $1200. I don't consider it inflationary. I consider the high government spending that brings no return to the American people as inflationary. And I say this Administration ought to remove the inequities in the tax structure that let the filthy, multi-million-billion dollar rich—such as the foundations—get by scot free while every working man and little businessman and little farmer has his nose to the grindstone. And this Administration must give tax relief to this mass of people in our country or they are going to find that it is one of the prime issues of 1972.

Mr. GORE. Mr. President, much has been said and written about fiscal responsibility with respect to this bill. I have a tabulation of measures rejected by the Senate that would have increased revenues to the Government in the sum of $4.170 billion. These amendments were supported by the senior Senator from Tennessee. I do not criticize any of my colleagues in any way when I say that in voting on these amendments there was a composite vote by the members of the minority party of 350 against these revenue-raising measures, and only 71 in favor. The senior Senator from Tennessee supported all these amendments.

So, Mr. President, let us examine the question of fiscal responsibility. The amendment which I offered, and which was adopted by a vote of 58 to 37, does not lose revenue for the Government. Indeed, it represents an increase in revenue of $100 million, when fully effective, as against the provisions in the committee bill which the amendment replaced, it being a substitute amendment.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. RIBICOFF. Is it not true that the list of the amendments the Senator refers to that would have raised substantial sums of money represents attempted corrections of some of the most glaring and consistent loopholes in our entire Internal Revenue Code?

Mr. GORE. Indeed so, and I am sorry that the Senate did not see fit to adopt them.

Second, I would like to refer to amendments that were adopted by the Senate that lost revenue for the Government. These amendments produced a revenue loss of more than $3 billion. The senior Senator from Tennessee opposed each of them, but my distinguished colleagues on the other side of the aisle, in large majority, supported them.

So if the performance of Members of this body need be measured by fiscal responsibility, then I submit that the two Members of this body, by the record, whose votes were most closely parallel during this whole fight are the senior Senator from Delaware and the senior Senator from Tennessee.

I am not sure that he claims that as a mark of prideful distinction or association. I do, and I say now on the floor of the Senate that I hope the senior Senator from Delaware will reconsider his decision and offer to serve another term in this body. I know of no one who can adequately fill his shoes.

Mr. President, this has been a very long and arduous task. I suppose the senior Senator from Tennessee has been the most persistent voice for tax reform in the Senate for the last decade. I am glad to say that we are accomplishing tax reform. I do not like to see the bill blackened and discredited because the Senate has, in my view, committed some errors. There is a great deal of tax reform left in the bill—as I have said, reforms that bring in additional revenues of $5.5 billion. This is a sizable sum, but this is not the end of tax reform. We will try again, and I will try again, to raise the personal exemption to $1,000, where it should be.

Of course, when we consider that my amendment has a low income allowance of $1,000, then the $800 exemption can be realistically interpreted as being equal to $1,000 in personal exemptions for a family of four.

No, tax reform will not end with this, but despite its shortcomings, this is still a good bill, not in all respects, but, as amended, I would rather have it than not have it.

Mr. President, I yield 10 minutes to the Senator from Oklahoma (Mr. HARRIS).

Mr. HARRIS. Mr. President, I rise in opposition to the pending motion of the distinguished Senator from Delaware.

May I say first, Mr. President, as has already been said, that I think the distinguished Senator from Delaware and the distinguished Senator from Tennessee have been as consistent supporters of real tax reform during this and prior sessions of the Senate as any Member of this body.

None of us can overlook the appearance of serious disease in the economy of this country. The consumer price index on meat, fish, and poultry, for example, rose almost as much during the first 8 months of this year as it did in all the previous 8 years combined.

There have been major increases in prices in the basic industries of steel and copper, for example, whence price increases roll ocean waves throughout the rest of our economy. The President of the United States, very early in his administration, indicated quite clearly that he intended to pursue a hands-off policy in regard to price and wage decisions, even in the basic industries. That has been the policy which he has pursued, and I think very unfortunately and with very seriously detrimental consequences for the economy generally.

I was glad that, at long last, he did alter that hands-off policy to some degree recently; but even then, Mr. President, he only sent out a letter to labor and management representatives, simply urging their support in holding the line on wages and prices. It seemed to me that that was a rather halfhearted effort, which came much too late in the day.

I do not think that the President of the United States ought to try to twist arms out of sockets, but I think most of the economists, the experts on the economy of this country, would say with President Theodore Roosevelt that the Presidency of the United States is "a

bully pulpit." It is the focal point for the moral power and influence of this great people. The Presidency is, today, an office which must be occupied by an activist, and in no field is that more true than in the field of the economy. I think we have seen the consequences of a passive Presidency in regard to wage and price decisions.

Second, Mr. President, I think that the worst thing that has happened in this economy, and the worst thing that could happen in this economy, is the fact that interest rates have been permitted to rise to their highest level in 100 years of this Nation's history. I do not think that this kind of tight money policy serves either the cause of the people of the United States—the plain people of this country—or the cause of curbing inflation. Rather, Mr. President, I think it can be clearly demonstrated that the outrageously high, scandalously high interest rates now in effect in this country fuel the fires of inflation and will, unless curbed, unless acted upon, cause this Nation, I am afraid, to fall upon even more difficult economic times.

The stock market does not, in my judgment, serve as a very good barometer to predict the shortrun future of the economy of the country. However, I think there is merit in the belief of many economists that it does serve as some kind of barometer as to what may happen in the economy for the longer run. We have only to look at what is happening in the stock market, Mr. President, and judge by that standard to find that, unless something happens to right this economy and to cure its serious ills, we may be headed for very serious troubles in the months ahead.

This, incidentally, is the first time in history—or it certainly is the first time in history so far as I know anything about it—that this country has had a conscious policy of raising interest rates at a time when we are trying to publicly finance a major war. That is exactly what we have done during the time of the policies which are now in effect.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HARRIS. I am happy to yield.

Mr. GORE. For those who say that there is no way to control interest rates, I should like to recall a little history. Former Presidents Roosevelt and Truman took this country through World War II and the Korean war maintaining an interest rate on Government obligations of 2.5 percent.

Mr. HARRIS. The Senator is quite correct; and, if he will recall, we had before the Senate not long ago a bill which sought to provide more mortgage credit, and at the same time—and as I understood it over the objections of the administration—provide some kind of voluntary credit restraints and credit rationing similar to that system which was in effect during the Korean war. That bill was passed, but that provision was adopted, as I understand it, over the objections of the administration.

Furthermore, as I understand it, there is a bill to provide for a system similar to the kind of system which was in effect during the Korean war presently pending in the House Banking and Currency Committee; and I only hope that finally, at long last, this administration and its Secretary of the Treasury will reverse themselves, and see that it is not in the public interest, that it is not in the interest of the plain people of this country, to continue this outrageously high interest rate policy which is sapping the strength of our economy, which is killing the housing industry, and which is distorting the economy generally.

The President of the United States has, I think, tremendous powers of suasion—and, more than suasion, of actually holding down interest rates—if he desires to use them. So far as I know—and I have watched it rather closely—to this good moment, the President has yet to say that it is against the national interest, as he sees it, to continue these high interest rates.

Furthermore, the President has lately appointed a man, Dr. Arthur Burns, to the Federal Reserve Board chairmanship; and I would think that, with that appointment of his own man, the President could finally, if he wanted to do so, see that the Federal Reserve Board reversed this high interest rate policy which is causing such tremendous economic troubles in this country—and is going to lead us down the road to a recession, in the eyes of so many economic experts whose opinions I trust—unless it is curbed, unless it is reversed, and unless that is done right away.

I think we have to be fiscally responsible, as well. But I wanted to point out these other items to indicate that we have run the wrong course monetarily, in my judgment, with this tight money policy. We have to be fiscally responsible, as well. That is why so many Senators, in recent months, have stood here and attempted to hold down nonessential expenditures, particularly nonessential military expenditures, to which we have to look first if we are really serious about trying to hold the line on the budget and provide a budget surplus. I hope that we will have greater help from the administration in that regard.

I saw a report on some action in the House Committee on Appropriations the other day to cut substantially from the administration budget request for military expenditures. As I understand it, the administration's position is that it is opposed to such deep cuts.

I think we must be fiscally responsible, and that means responsible not only so far as the amounts of revenue raised are concerned, but responsible also with respect to the amounts spent.

That brings us to this bill. I have tried to be responsible in my votes on the bill. In this time of continuing inflation and rising prices, Congress must be responsible in its fiscal policies, so as not to increase the inflationary pressures.

I voted for the Metcalf amendment, which would have raised an additional $200 million; for the Tydings amendment, which would have raised an additional $2.5 billion; and for the Kennedy amendment, which would have raised an additional $480 million. The total increase in revenue that would have been raised had those amendments been adopted by the Senate was $3.18 billion above the revenues that are raised by the bill.

I voted against the Ribicoff amendment, which was agreed to and will cost $1.8 billion in lost revenue.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. HARRIS. Mr. President, I yield myself an additional 5 minutes.

I voted against the Murphy amendment, which was adopted and will cost $225 million in lost revenue; against the Tower amendment, which was adopted and will cost $100 million in lost revenue; against the Hartke amendment, which was adopted and will cost $1.02 billion in lost revenue; and against the Inouye amendment, which was adopted and will cost $55 million in lost revenue. The total revenue that will be lost in those amendments, among others which I opposed but which were adopted by the Senate, is $3.2 billion.

Mr. President, I wish this bill were in better balance. I believe it will be—and it must be—as it comes back from conference.

I could support the motion of the distinguished Senator from Delaware in all particulars except in regard to items 7 and 8. I say, first, in regard to item No. 7, which would strike the increase in personal exemptions, which was adopted by the amendment of the distinguished Senator from Tennessee (Mr. GORE), that the attempt to make a distinction in the bill between tax relief and tax reform, to some degree, is, in my judgment, valid.

However, basically and fundamentally, I believe that tax relief is tax reform. Tax relief is a part of tax reform, especially since at the present time and without the pending bill, the lower and middle income tax payers in America are paying more than their fair share of the taxes.

I believe that the amendment of the distinguished senior Senator from Tennessee with regard to personal exemptions provides the kind of tax relief which a great majority of Americans can understand and, in my judgment, a great majority of Americans support.

It is in line with the kind and amount of tax relief which had been granted in the House bill.

I supported an increase in social security benefits to the extent of 15 percent because it seems to me that if any segment of our society is to have some relief from the growing inflation in this country and these alarmingly rising prices in our country, it ought to be this group of Americans.

I support the statements which were made in support of that increase, which is not inflationary and can be paid out of existing rates.

I believe that when the bill comes back from conference, decisions will have to be made weighing revenue and reform which will strike a balance to the degree that the Senate can agree to it.

There is not any question that changes have to be made in the measure along the lines I indicated I had voted. However, since the changes eventually have to be weighed and decided upon in the conference with the House of Representatives, I believe it would be well not to agree to the motion of the Senator from Delaware now, but, instead, to send the bill to the conference committee so that the conferees may begin immediately to work their will upon the measure

and both Houses will have an opportunity to take another look at it.

I believe that we can then hurry along with what I believe is absolutely essential—not next year, but this year—substantial tax relief and tax reform which is long overdue.

Mr. GORE. Mr. President, I yield 5 minutes to the Senator from Alaska.

The PRESIDING OFFICER. The Senator from Tennessee only has 3 minutes remaining.

Mr. GORE. Mr. President, I yield him 2 minutes in addition on the bill.

The PRESIDING OFFICER. The Senator from Alaska is recognized for 5 minutes.

Mr. STEVENS. Mr. President, there seems to be a great penchant here to equate tax reform with increased revenue to the Federal Government. I would like to get the matter back in perspective, at least as far as my State is concerned.

The investment tax credit has been in effect for the past few years. Just as my State is coming into a period of development, Congress wants to take it away.

We tried to limit the relief provided by my amendment to depressed areas. And Alaska is a depressed area. If my amendment is agreed to it will mean that when new jobs are created in my State, there will be a $1,050 tax benefit for each new job created by people investing in my State.

The real problem concerning the approach to the bill as far as I am concerned is that no attention has been paid to the impact of what will happen as a result of both the House and Senate bills concerning the decrease in depletion allowance.

I have predicted that the price of gasoline all over the country will go up at least 1.5 cents a gallon. How inflationary is that as compared to continuing the depletion allowance that was built into the fabric of our economy for so many years?

In terms of the total impact of the bill, what will be the effect of the exemption we have voted for the individual taxpayer if the taxpayer gets a $200 increased exemption over the period of time provided in the bill in individual exemptions? We talk, and the Senator from Oklahoma has just tal"ed, about the concept of the rising interest rates. Instead of complaining about making more money available to individual taxpayers, if we find ways to encourage our people to save, the money made available by increased exemptions would go into the private stream of investments and would decrease interest costs for everyone, including the Federal Government, because more private capital would be available.

When I look at the decrease in tax liability and social security benefits resulting from the Senate approved amendment—and this table predicting the effect of our amendments has been placed on the desk of every Senator—it reminds me of the numbers game in accounting. One can do almost anything with figures. I do not believe that the impact of the Senate action on the bill can be interpreted simply by a look at the Federal Treasury today—we must realize that increased employment means increased tax revenues—increased savings means lower interest costs.

The investment credit is in effect today. By preserving it for small businesses and depressed areas, how in the world have we affected the budget?

I oppose the Senator's motion to recommit because I feel it does not show confidence in the conference committee.

I did not offer the amendment on depressed areas with respect to investment credit until the Hartke amendment was agreed to. I assume that the conference committee will be composed of people who serve on the Finance Committee who were opposed to these amendments to begin with. We have little chance to succeed in the conference committee. Yet, we are asked to make a decision now.

I note that we are not asked to take out all of the amendments agreed to on the floor, but just a selected few. I would like to have my amendment receive the same consideration in the conference committee as the amendments of the Senator from Tennessee or the Senator from Indiana. I am prepared to abide by the decision of the conference committee, but not by a selective recommittal motion which says that we should take out some measures but that the rest of them are OK. Some of the amendments that are not listed in the motion to recommit have a great deal more effect on the budget than my amendment would have.

This table presented to us today states my amendment would cost $70 million with relation to investment tax credit for depressed areas in the fiscal year 1970. If the Treasury lost $70 million in 1970 as a result of my amendment, there would be 70,000 people who are currently unemployed and probably on welfare rolls who would be put to work and would be paying taxes.

Anyone who states that we would lose $70 million from my amendment is completely unrealistic in my opinion.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. GORE. Mr. President, I yield 5 minutes on the bill to the Senator from Utah.

The PRESIDING OFFICER. The Senator from Utah is recognized for 5 minutes.

Mr. MOSS. Mr. President, we have heard much about fiscal responsibility recently, but we have been hearing it from the wrong people.

Some Senators have been moaning and groaning about the revenue loss of the much-needed tax relief now provided for in this bill. They claim it is fiscally irresponsible. Yet when opportunities are presented to them to vote for amendments which would make up for this revenue loss, they are suddenly very quiet about fiscal responsibility.

Where were all the noisy advocates of fiscal responsibility when the Tydings capital gain amendment, the Kennedy minimum income tax amendment, and the Metcalf hobby farmer amendment were being voted on? Not only were these three amendments desirable on equitable grounds, but, in addition, together they would have added at least $3.2 billion to tax revenues. This sum could easily enough "pay" for the extra $2.3 billion that raising the personal exemption would cost.

Those Senators who are attempting to discredit the tax relief voted by the Senate are also including the 15-percent increase in social security as a further revenue loss. But this increase is not a revenue loss to the General Treasury. Social security is paid for out of a self-supporting trust fund which, without this 15-percent increase, would have an unnecessary surplus.

Although done for legislative convenience, it was perhaps a tactical mistake to add the social security to the tax bill. It really has nothing to do with tax relief, but the confusion has given the traditional opponents of social security a chance to distort it as fiscally irresponsible.

Mr. President, "fiscal responsibility," like "law and order," has become an abused term in the American political language. Behind the rhetoric of fiscal responsibility is the clear but unspoken message of the status quo—keep the loopholes open but oppose tax relief for everybody else.

But we should not let the enemies of meaningful tax reform get away with it. In my opinion, those who vote against tax reform are being fiscally irresponsible, not those who vote for tax relief.

Nor should President Nixon be allowed to get away with the rhetoric of fiscal responsibility. If the President had fought for tax reform with the same determination that he exhibited in the ABM and Haynsworth battles, we could have closed these loopholes and had more than enough increased revenue to cover the revenue loss of the barely adequate tax relief voted by the Senate.

Instead, the Nixon administration not only opposed some of the reforms in the House bill, but also wanted to cut the meager relief in the House bill by $1.7 billion and turn $1.6 of it over to the corporations in the form of a 2-percent reduction in corporate tax rates.

Mr. President, I shall vote against the motion to recommit. The Senate has exercised its responsibility in writing this bill, and I think we must send it on now to the President and let him exercise his function as he sees fit.

I yield the floor.

Mr. DOMINICK. Mr. President, will the Senator yield me 2 minutes?

Mr. GORE. I yield 2 minutes to the distinguished junior Senator from Colorado.

Mr. DOMINICK. Mr. President, I am not going to delay the Senate, but it seems a little difficult—to me, at least—to understand why we should go through 2 weeks of rather heated debate on many of these amendments, take vote after vote on the floor, and decide, as the Senate, what we are going to do, and then be asked to take all this and put it back in committee and vote it out as though we had never considered these items before.

I do not happen to be in agreement with the Senator from Tennessee on his exemption, but the Senate has decided this. I happen to be in favor of the tuition tax credit. It is my recollection that the Senator from Tennessee was not in favor of that. But the Senate has voted on both amendments, and it would seem to me only proper, having had those

votes at this time, that we should send it to conference and see what can be worked out between the differing bills. Heaven knows, we have enough points which differ in both bills to take a rather extensive amount of time in conference if they are going to be gone over with care. So I find great difficulty in seeing why we should do it this way.

Obviously, I could support a motion which provides for taking out the amendment of the Senator from Tennessee, and he could support a motion which provides for my amendment for tuition tax credit to be taken out. What we are doing is saying that we should take out all the major things that have been put into the bill after extensive debate by the Senate, and I cannot see the point in going through this type of exercise.

The PRESIDING OFFICER (Mr. SAXBE in the chair). The time of the Senator has expired.

Mr. GORE. I yield 1 additional minute to the Senator.

Mr. DOMINICK. Insofar as the tuition tax credit is concerned, on which I have been working for 15 years, that was passed by the Senate once. It was taken out in conference last time on the ground that the revenue loss was too high. This time it was passed by the Senate and its effectiveness was postponed until 1973. It seems to me that there is room in this budget, as we go on, to take another look at this matter. If it looks bad at that time, we can change it around or reduce the amount, but at least we will have established a tax reform principle by which one is allowed to use his own gross earnings to further the national policy of making available the opportunity for more people to have an adequate education. This is the basic principle. It is a total reform concept. It seems to me that, in view of the postponement of the effective date so that there would be no real effect on the budget until 1973—not 1972, as shown in the schedule—we should retain this amendment.

Mr. GORE. Mr. President, I yield such time as he desires to the majority leader.

Mr. MANSFIELD. Mr. President, I have been informed that the revenue gain from reforms in the bill reported by the committee and as presented to the Senate amounted to $6.6 billion and that as of now, with all the amendments put in by the Senate, the amount comes to $5.6 billion. That is still a great deal of reform in my judgment—reform that in the end will distribute the tax burden in our society more equitably.

I would point out, Mr. President, that, to achieve this, the Senate has sweated for a number of days, for long hours, voted time and time again on amendments—20 of them yesterday—and that now the Senate is faced with a proposal to undo in a matter of minutes all the work we have done over the past 2 weeks.

What would be the effect of the loss of the amendment offered by the distinguished Senator from Connecticut (Mr. RIBICOFF) and the distinguished Senator from Colorado (Mr. DOMINICK) insofar as helping out the overwrought and overpressed parents who are saddled with the high tuition and expense costs of education.

What would happen to the amendment offered by the distinguished Senator from Indiana (Mr. HARTKE), which would give some small degree of relief to small businessmen—and really small businessmen?

What would happen to the amendment offered by the distinguished Senator from Alaska, who is trying to look after the interests of his State and to compensate, at least in part, for the damages caused by floods, tidal waves, earthquakes, and other disasters?

What would happen to the sound proposal of the distinguished Senator from Hawaii (Mr. INOUYE), which will provide some consideration for retirees under qualified pension plans?

What would happen to the amendment offered by the distinguished senior Senator from California, which only asks that older Americans be given a full deduction for their medical costs?

What about the amendment proposed by the distinguished senior Senator from Arizona (Mr. FANNIN), relating to a deduction for the commuting expenses of disabled persons?

What about the amendment of the distinguished senior Senator from Tennessee, who is trying to raise the income exemption from a piddling $600 to a mere $800—and even that through stages? I think the $600 exemption has been long outmoded, out of date, ridiculous, and in reality without any meaning. Frankly, I do not think the distinguished Senator from Tennessee went far enough. I joined the distinguished Senator from Alabama (Mr. ALLEN) in seeking to raise the exemption rate to $1,200, and even then I do not think you approach the level in a fashion that gives justice to the people who are being hit the hardest—not the rich, but the poor and the middle income groups. These are the citizens who contribute most of the funds which this Government so willingly takes and which the Senate spends, along with our colleagues in the other body.

Next we find that the pending motion would knock out the social security benefits—15 percent. The administration recommended a 10-percent increase. But that would only cover the increase in the cost of living since the last raise in social security. This motion would knock out as well the proposal of the distinguished Senator from West Virginia and the Senator from Montana, which would raise the social security minimum from $55 a month to $100 a month.

Who can live on $55 a month?

It would also knock out the provision that would lower the eligibility age from 65 to 60 with actuarially reduced benefits and to 50 for women—the latter feature with little or no effect on the fund.

Well, Mr. President, all I can say is I have taken my stand on the bill. I voted for some amendments; I voted against others. I am willing to take my chances when I go back to my people and tell them how I voted, whether it was for a depletion allowance, for an increase of 15 percent in social security payments or for whatever. The record is there. We voted. We know where we stand.

I hope most sincerely the Senate will reject the motion to recommit the pending bill. I hope most sincerely the Senate refuses to undo now what it has spent more than 2 weeks to achieve.

Mr. MILLER. Mr. President, will the Senator yield?

Mr. MANSFIELD. Yes, indeed.

Mr. MILLER. Maybe I did not hear the Senator from Montana correctly, but would the Senator mind repeating what he told the Senate about the state of the budget for calendar year 1970 under the bill as it has been amended, as against the bill reported by the Committee on Finance?

Mr. MANSFIELD. I did not refer to the state of the budget. I referred to the fact that the revenue gained from reforms by the committee bill was $6.6 billion, but that as the bill stands now, with all the amendments, there is still a $5.6 billion gain from reforms.

Mr. GORE. From the reform provisions in the bill.

Mr. MANSFIELD. That is correct. From the reform provisions in the bill.

Mr. MILLER. Mr. President, I would like to comment on that statement because, while I am sure these figures are accurate, I do not think they convey the true picture as far as the overall budget is concerned. That is what we have to look at.

Mr. MANSFIELD. We are not talking about the budget, but rather a bill which was reported by the Committee on Finance, a tax reform and tax relief bill. We have expressed our views on it. We had almost 100 votes, I believe. The situation is quite clear. Now is the time to vote it either up or down.

If you are not for the bill, which all of us voted for in part, with one exception, possibly, then I think the best way to do it is to face up to the matter as is; and the best way to do that is to vote down the motion of the Senator from Delaware.

Mr. MILLER. Mr. President, will the Senator yield further?

Mr. MANSFIELD. I yield.

Mr. MILLER Mr. President, I think it is terribly important to look at the budget, that is, the way the budget is under the bill of the Committee on Finance and the way it would be under the bill as now amended with all of these Christmas tree ornaments.

The Senate will find in the committee report that under the committee bill there would be a surplus of $6.5 billion for calendar year 1970, but under the bill as now amended we would have a deficit of nearly $3 billion.

Mr. MANSFIELD. Though I did not refer to the budget, I can suggest to the Senator some areas where we could cut that budget. For instance, I think we could cut it very easily in the Defense Department. Indeed, some of the cost overruns on some of its projects alone exceed many revenue items in the tax bill. There are other exotic items that have been funded in the past in the name of Defense that have been wrong decisions. It seems that all the people in the Defense Department have to do is ask and they receive. The fact is, the budget can be cut and redistributed in line with the needs and priorities of this Nation and we in the Congress have had that opportunity every year. With re-

spect to the redistribution of the tax burden, however, it is not often that we have had the opportunity to provide reforms with a view to greater equity; certainly not every year, not even every decade. I hope we take advantage of the opportunity today.

Mr. MILLER. That is not the proposition before the Senate. That proposition will be reached by the Appropriation Committees, by the Senate and the House Committees on Appropriations.

Mr. MANSFIELD. The Senator used the word "budget" and to me the defense aspect of the budget comprises the overwhelming part of the money spent.

Mr. MILLER. I thoroughly agree on that, but I must point out to the Senator we are not dealing with the budget here; we are dealing with the Finance Committee bill, and the budget will come along later.

The PRESIDING OFFICER. Who yields time? The Senator from Tennessee (Mr. GORE) controls the time on the bill.

Mr. WILLIAMS of Delaware. Mr. President, I yield 2 minutes to the Senator from Iowa on the bill.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. MILLER. Mr. President, I agree with the figures which the Senator from Montana has presented here. They are correct. My point is that they do not go far enough in presenting the true picture. If we are so concerned about high interest rates in this country, we had better keep the Federal Government from competing in the money market with private industry and with individuals who want to buy homes. But we cannot do that if we continue to build up deficits.

The best part of the bill of the Committee on Finance was that it assured a surplus. But under the amendments that have been agreed to, which the Senator from Delaware is trying to get off the backs of the American people, we are not going to eliminate this competition from the Federal Government for money. That is the way high interest rates can go down.

Mr. President, I have one further comment. I think we should recognize this fact and I want to repeat it.

When we increase the personal exemption from $600 to $800, that means that people like most of my colleagues in the Senate, who are at least in the 50-percent tax bracket, get $400 in tax benefits for every exemption they have and the little fellow in the 15-percent tax bracket gets a $120 crumb.

Mr. GORE. Mr. President, will the Senator yield on that point?

Mr. MILLER. I yield.

Mr. GORE. I think frankly that is a poor excuse when the amendment was offered as a substitute for rate changes which would have given $10,000 or more in tax reductions for the wealthy. The Senator is talking about a difference between $400 and $10,000.

Mr. MILLER. If the Senator's amendment would give every taxpayer a similar tax break, that would be one thing, but to give every Member of Congress a $400 tax break and the little fellow who is in the 15-percent bracket $120 is not very much equity and is not tax reform.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Delaware. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia (after having voted in the negative). On this vote I have a pair with the Senator from Louisiana (Mr. ELLENDER). If he were present and voting, he would vote yea; if I were at liberty to vote, I would vote nay. I withdraw my vote.

Mr. LONG (after having voted in the affirmative). On this vote I have a pair with the Senator from New Mexico (Mr. ANDERSON). If he were present and voting, he would vote nay; if I were at liberty to vote, I would vote yea. I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Rhode Island (Mr. PASTORE), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that the Senator from Louisiana (Mr. ELLENDER) is absent on official business.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PASTORE) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "yea."

The result was announced—yeas 31, nays 60, as follows:

[No. 222 Leg.]

YEAS—31

| Anderson | Mundt | Tydings |
| Ellender | Pastore | |
| Goldwater | Symington | |

So the motion to recommit the bill was rejected.

The PRESIDING OFFICER. The question now is on passage of the bill.

Who yields time?

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 5 minutes.

I regret very much that the Senate rejected this motion, which would have established some degree of fiscal responsibility as far as this bill is concerned.

I worked hard for the last 3 months trying to get a tax reform bill that would be properly balanced. The bill as it is now before us, which the Senate is about to vote for, as compared with the bill that was reported by the Finance Committee will lose $10.656 billion next year in additional revenues. That does not count the $1.7 billion amendment sponsored by the Senator from Connecticut and by the Senator from Colorado, which is in the bill but which does not become effective until 1972.

I do not think we can afford that. We are already confronted with a budget deficit of staggering proportions. I know they are projecting a $3.4 billion surplus under this unified phoney budget, but that surplus is only based on the premise that they count as normal revenues the $10.6 billion of accumulations in the trust funds. If those trust fund accumulations were eliminated—which never have been counted before, and they should not be counted—then there is a projected deficit of $6.8 billion for next year, and that does not include the $10 billion extra loss in revenue contained in the bill now before us.

In addition, even that deficit is based on the premise that Congress will increase postal rates retroactive to last July. It is also based on the assumption that social security increases will be effective April 1, 1970, instead of January 1, 1970. It does not include the extra $600 million Congress provided for pollution control. It does not include the $400 million extra for veterans benefits.

The appropriation for HEW has been increased over $1 billion. It does not take into consideration any salary increases over and above what have already been provided for in the budget.

There is no question that we are headed into a serious deficit situation next year and that this bill will only further aggravate the problem.

I regret very much that the Senate has turned what was supposed to be a tax reform bill into a political Christmas package which promises everything to everybody when I do not think Members of the Senate ever expect those promises to be delivered.

Senators speaking against my amendment have said, "Let us pass the bill as it is." I have confidence in the conferees. They want to vote for these top reductions on the floor of the Senate, and then they can go home and tell their constituents how they voted for them, but the conferees took it away.

I will not be a party to any such political hypocrisy. I am sure we are going to pass the bill, but as one member of the committee who has worked long and hard on it and who believes in tax reform, I will not be a party to the irresponsible action the Senate is about to take. I am going to vote against the bill.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CURTIS. If the bill is not passed, is it not true that, from the standpoint of the administrative budget, the deficit will be less than if it is passed?

Mr. WILLIAMS of Delaware. Benefits amounting to $10.650 billion were added on the floor of the Senate to what was already provided in the bill as it was reported from the committee. There were some tax reductions already in the committee bill. The increased revenue to be derived from repealing the investment tax credit, extending the surcharge and the excise taxes all that has gone down the drain under this Senate bill.

This bill represents the most irresponsible piece of legislation that I have seen since I have been in the Senate.

Mr. CURTIS. If the Senator will yield further, I believe it is grossly unfair to ask the American people to accept repeal of the investment credit and extension of the surtax and the many increases that are in this bill for naught, because after all that is done, the deficit will be greater and the debt will be greater. A nay vote is a vote to improve the condition of the budget.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. WILLIAMS of Delaware. Mr. President, I yield myself 5 more minutes.

There is no question about what the Senator from Nebraska has said. As I mentioned earlier in the debate, in the last session when we enacted the 10-percent surcharge, when President Johnson was in office—and I supported that because I thought we ought to have it—as of June 30, 1968, our national debt was $350.7 billion. The national debt on November 20 of this year, just 17 months later, was $369.4 billion, or an increase of over $1 billion per month for that 17-month period.

Now the Senate proposes to increase that debt further by reducing revenues and increasing expenditures by another $10 billion.

I think it is the most irresponsible action ever taken in my 22 years in the Senate. We have cast the impression to a lot of people that they are going to get something. This is a political hoax for the American people. The people have been told that when the bill is passed they will get an increase of 15 percent in their social security benefits. They are told they will get an increase in their minimum social security payments to $100 a month. They are told they can retire at age 60. Under this bill they are being promised a big tax reduction next year. Parents with a child in college have been told they will get a generous tax credit for that student's expenses in college.

They have been promised all these things. How are we going to deliver when we do not have the money to pay for it?

Perhaps I am wrong, but if there are Senators who think that can be done I shall be looking forward to seeing how they do it.

Mr. CURTIS. Mr. President, will the Senator yield further?

Mr. WILLIAMS of Delaware. I yield.

Mr. CURTIS. Mr. President, I shall not delay the Senate, but I take only one moment to praise the Senator from Delaware. Future generations will appreciate him for the fight he has made here, not only today, not only last week, but throughout his career. He has not won on every vote, but he has been true to his convictions. While opinions differ, and I respect the right to have differing opinions, in my opinion he has been eminently right, and I commend him.

I commend the distinguished chairman of the committee for the way he has handled the bill.

Once more I want to raise my voice in praise of the staff of the Joint Committee on Internal Revenue Taxation and the staff of the Senate Committee on Finance.

The task that was imposed upon them by browbeating the committee to bring about this monstrosity in so few short weeks resulted in night work, working weekends, and a very great burden. We must remember also that the end product of their work must stand testing, in court, by the best legal talent in the country. They have done an outstanding job, and they are deserving of the gratitude of the entire Senate.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. In a moment. I yield myself one-half minute.

I thank the Senator from Nebraska. I might say that I am not so conceited as to think that any future generations will remember what I have been doing, but I will say this: The generations to come will remember what the Senate is doing here today because they will be paying the cost of our votes today.

I yield 1 minute to the Senator from Illinois.

Mr. PERCY. I think 1 minute will be sufficient to indicate that I shall vote against this bill. Last night I placed in the RECORD my reasons for voting against the bill as amended by the Senate. I believe that a vote of "no" is really a vote of confidence in the work the Finance Committee originally did. Even though I think it is apparent that the bill will pass, a strong "no" vote will be an indication to the conferees to put the bill more in line with the House bill or the bill as originally reported by the Finance Committee, so as to provide a revenue loss of not more than $3 billion or $4 billion, rather than the $21 billion revenue loss we will otherwise suffer during the next 2 years.

Mr. GORE. Will the Senator from Louisiana yield me 5 minutes?

Mr. LONG. I yield 5 minutes to the Senator from Tennessee.

Mr. GORE. Mr. President, I should like again to spend a moment talking about fiscal responsibility and this bill. A great deal has been said about social security. The fact is that there is a social security trust fund, in which there is now a surplus—a social security trust fund with respect to which the actuarial experts of the Social Security Board testified that there was sufficient surplus to provide for a 15-percent increase in social security benefits across the board; and the record was so impressive that the House Ways and Means Committee reported such a bill unanimously.

How does it happen that now it is fiscally irresponsible to provide the benefits in the social security program, for which the people have already paid and have built up a surplus sufficient to provide for those benefits?

So much for social security. We now come to the tax provisions of the bill. I know we have had a great many votes and a great furor over amendments. I voted against most of the amendments that reduced revenues; but be that as it may, what is the result? As the Committee on Finance brought the bill to the Senate, its tax reform provision would bring in, according to experts in the Treasury Department, $6,600,000,000 in additional revenue. After all of our furor, the tax reform provisions in the bill as it is now ready to be voted, up or down, will produce $5,600,000,000 in additional revenue.

The committee chose to recommend that this additional revenue be used to provide tax relief for individuals. The principal choice before the committee has been who would get the tax relief. The administration recommended that it be done by a change in tax rates, lowering the top bracket on earned income from 70 percent to 50 percent. If Congress should approve that recommendation, it would mean that in one 5-year period, gradualism in our income taxes, above a reasonable level, would have been obliterated. It would mean that in one 5-year period, we would have cut the top rate from 91 percent to 50 percent on earned income. Striking that provision out was the first amendment the Finance Committee approved.

Then the bill came to the floor of the Senate, with the choice whether this additional revenue brought into the government by tax reform measures—more than five sixths of which are still in the bill—should be distributed in tax relief by way of rate changes running to 8 percentage points in the high brackets and only 1 percentage point in the low brackets, or whether that tax relief should be provided by way of increasing the personal exemption. After long debate the Senate chose the latter by a vote of 58 to 37.

So we have a bill that is not perfect, but one that is, on balance, good. It does not accomplish all the tax reform we desire.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GORE. I ask for 1 more minute.

Mr. LONG. I yield the Senator 1 additional minute.

Mr. GORE. But tax reform will not end with this measure, either. Many of us will be pressing harder and harder for more equitable tax reforms.

But this is a great start. Banish those who say it represents fiscal irresponsibility. This is a good bill, and I am prepared to vote for it.

Mr. LONG. Mr. President, I yield myself 1 minute.

I recorded myself as in favor of the Williams amendment, because I like the idea of being fiscally responsible with all revenue bills. But, as the Senator from Tennessee has so eloquently pointed out, there is a lot of good tax reform in this bill, and we are certainly justified in providing tax reduction to the extent that we provide tax reform. If the House of Representatives could do that, I see no reason why the Senate cannot do it. But the House position of a balanced bill for

1969, 1970, and 1971 will be in conference, and we can discuss that there.

After all the long, hard work that the Senate has done on the bill, I certainly would regret to see all this work done for naught. I very much hope that the bill will pass.

I believe that Senators will be happy with the final result of the bill. Between 500 and 700 amendments will be in conference. But it is my judgment that by the time we shape the bill into final form in conference, although it will not please everyone, the Senate will be better satisfied than it is at this moment. I believe that on balance it is a good bill, and that Senators will regret a vote against it.

Mr. METCALF. Mr. President, will the Senator yield 5 minutes to me?

Mr. LONG. Mr. President, I yield to the Senator from Montana as much time as he may desire.

Mr. METCALF. Mr. President, I am going to digress from the vehemence and the eloquence that have been spoken about the bill. I have asked for this time to ask a question of the Senator from Louisiana, who is managing the bill. I wish to ask him about a provision on page 349 of the bill, section 638, of the Internal Revenue Code, a provision which is discussed also in the committee report on page 189, section 7, regarding the Continental Shelf.

The Continental Shelf is the subject of great concern for several committees of the Senate. The distinguished and able Senator from Rhode Island (Mr. PELL) heads a subcommittee of the Committee on Foreign Relations; the able and distinguished Senator from South Carolina (Mr. HOLLINGS) is in charge of a subcommittee of the Committee on Commerce; and I am chairman of a subcommittee of the Committee on Interior and Insular Affairs. The Comittee on Interior and Insular Affairs is the committee that last had jurisdiction over Continental Shelf legislation.

This is a subject of concern in the United Nations, as it was also in the last Interparliamentary Conference, the U.S. delegation too, which was headed by the distinguished Senator from Alabama (Mr. SPARKMAN). It was a matter of much discussion.

We are concerned about whether we should have a 3-mile shelf or should have jurisdiction for 20 miles or, as some South American nations have asserted their jurisdiction, for 200 miles.

The Department of Defense, the Department of State, and other departments have yet to reach a conclusion as to what the recommendation should be made.

The bill provides that the United States shall have jurisdiction to tax provided such area is adjacent to our territorial waters and we have exclusive rights to such area under international law. I understand that the committee has written a provision in accordance with international law with respect to the exploration and exploitation of natural resources. But already we have demonstrated the ability to explore and exploit far beyond the 3-mile limit or the 20-mile limit.

I should like to make it clear today that this is only a tax bill and that we are extending only our tax jurisdiction; that this provision does not establish any precedent or make any statement so far as U.S. jurisdiction over the outer Continental Shelf is concerned for defense purposes or for fishing or for the water column or air column overhead.

Mr. President, for the benefit of my colleagues, I ask unanimous consent that section 507 of the tax reform bill be printed at this point in the RECORD.

SEC. 507. CONTINENTAL SHELF AREAS

(a) IN GENERAL.—Subchapter I of chapter 1 (relating to natural resources) is amended by adding after part IV (added by section 505 of this Act) the following new part:

"PART V—CONTINENTAL SHELF AREAS

"SEC. 638. CONTINENTAL SHELF AREAS.

"For purposes of applying the provisions of this chapter (including sections 861(a)(3) and 862(a)(3) in the case of the performance of personal services) with respect to mines, oil and gas wells, and other natural deposits—

"(1) the term 'United States' when used in a geographical sense includes the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the United States and over which the United States has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources; and

"(2) the terms 'foreign country' and 'possession of the United States' when used in a geographical sense include the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the foreign country or such possession and over which the foreign country (or the United States in case of such possession) has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources, but this paragraph shall apply in the case of a foreign country only if it exercises, directly or indirectly, taxing jurisdiction with respect to such exploration or exploitation.

No foreign country shall, by reason of the application of this section, be treated as a country contiguous to the United States."

(b) SOURCE OF INCOME FOR WITHHOLDING OF TAX.—Section 1441 (relating to withholding of tax on non-resident aliens) is amended by adding at the end thereof the following new subsection:

"(e) CONTINENTAL SHELF AREAS.—

"For sources of income derived from, or for services performed with respect to, the exploration or exploitation of natural resources on submarine areas adjacent to the territorial waters of the United States, see section 638."

(c) CLERICAL AMENDMENT.—The table of parts for subchapter I is amended by adding at the end thereof the following new item:

"Part V. Continental shelf areas."

Mr. LONG. Mr. President, I yield myself such time as I might require to answer the question.

Mr. President, the Senator can rest assured that the Finance Committee has no intention whatever of usurping the functions of the Senate Foreign Relations Committee in this matter.

If the Senator will look at lines 12 through 16 on page 349 of the committee substitute, he will see that in modifying the term "United States" it says:

For purposes of applying the provisions of of this chapter (including sections 861(a)(3), and 862(a)(3) in the case of the performance of personal services) with respect to mines, oil and gas wells, and other natural deposits—

So the application of this provision is limited to chapter 1 of the Internal Revenue Code. It is also limited in that it has application only in the case of natural resources.

It is not intended to affect any other questions which may arise with regard to the Continental Shelf. We are not trying to regulate these activities or get involved in foreign affairs.

All we want to do is clarify the status of the Continental Shelf for income tax purposes in this context. And that is what we are seeking to do—to provide the proper tax treatment for income from natural resource activity on the Continental Shelf.

Mr. METCALF. I am in complete accord that they should be taxed.

Mr. LONG. Mr. President, I yield to the Senator from Rhode Island.

Mr. PELL. Mr. President, I ask the Senator from Louisiana if it would not be correct that the very wording here, where the bill says "submarine areas which are adjacent to the territorial waters of the United States and over which the United States has exclusive rights"—it does not say sovereignty, but it says "exclusive rights, in accordance with international law" underline the point that has just been made in the colloquy between the Senator from Montana and the Senator from Louisiana to the effect that this bill is not a step forward in extending the exercise of national sovereignty?

Mr. LONG. We do not get into the subject of national sovereignty. I have thought about the item. However, all we seek to do is collect the income tax due from U.S. firms who earn income on the Continental Shelf, just as we are collecting income taxes from people who make it within the 3-mile limit.

They owe income taxes to the Federal Government. We do not prejudice what any foreign government can do.

Mr. PELL. Mr. President, what is meant by the phrase:

No foreign country shall, by reason of the application of this section, be treated as a country contiguous to the United States.

Does that mean that resources from the continental shelves of Mexico and Canada will not be included?

Mr. LONG. We just do not want islands in that area to be regarded as continguous for purposes of income tax.

The matter was very carefully considered by the Treasury. That is what the Treasury thinks ought to be done for tax purposes.

There are certain provisions in the law that apply where a nation is contiguous to the United States. And we do not want to get involved in that.

That is why the language is there.

Mr. PELL. It is a self-denying ordinance.

Mr. LONG. The Senator is correct.

Mr. METCALF. Mr. President, the only point is that this definition only has application for tax purposes.

Mr. LONG. The Senator is correct. There is nothing more.

Mr. President, I yield such time as he may require to the majority leader.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MANSFIELD. Mr. President, at this time it would be appropriate to refer

to those whose devotion and dedication made possible a tax relief-tax reform bill this year. To the committee, to its members and staff, to the staff of the joint committee and most of all to the able and distinguished chairman, the Senator from Louisiana (Mr. LONG), and the able and distinguished ranking member—the Senator from Delaware (Mr. WILLIAMS)—we owe our deepest gratitude. Their effort has produced the most singularly outstanding achievement of this session and perhaps of the entire 91st Congress. During the past 2 weeks or so, we in the Senate who are not members of the committee experienced only a little of what was necessary to pass a proposal of this magnitude. In all of my years, in fact, I have never witnessed any committee devote itself more diligently to a task, working from early in the morning until late in the evening, not just for a matter of days but for nearly 4 solid months.

Frankly, I do not know how to express in words my gratitude, the gratitude of the Senate and of the Nation for the service that has been so magnificently performed.

Perhaps no Member will agree that the measure in its present form provides the reform and relief that will achieve absolute equity in our tax structure. No proposal could. In my opinion, however, it goes a long way in that direction and certainly much further than ever before. I am confident as well that when the conferees return with their recommendations it will be an even better proposal.

But the remarkable story is how this measure was achieved.

Last July when the question of extending the surtax was before the Senate, Chairman LONG and the members of the Finance Committee agreed that they would report the tax reform bill in 3 months. I do not believe that even they realized at the time just how much work would be involved in meeting that timetable. But rather than extend the period to accommodate the workload, they intensified their efforts to meet the schedule. In setting such a timetable for his committee, Chairman LONG is to be particularly lauded for his efforts, for his commitment, for his cooperation and performance.

In like manner, the ranking minority member, Senator WILLIAMS of Delaware—who has for years championed the cause of tax reform—as well as all members of the Finance Committee who hammered out a full and distinct set of proposals in a relatively short period, deserve the praise and respect of the entire Senate and of the country.

The expeditious attitude of the Finance Committee set the example for the entire Senate. The bill was scheduled for floor action at the beginning of Thanksgiving week. Voting began the very first day and I must say that from then on the cooperation and consideration exhibited by all Members on both sides of the aisle was of the highest order. Speaking for the joint leadership, we are most grateful. This experience has established beyond question that the Senate can be most efficient when it devotes its full energies to a task. It has taken less than 3 weeks—just 13 working days—to do the job. There are 11 days left to pass at the least five appropriation bills and a foreign aid bill and a comparability pay bill.

Finally, I should say that the achievements of the 91st Congress shall be many, but none can surpass those which will flow from the enactment of the tax reform-tax relief act. It should be highlighted that this bill is one that originated solely within the Halls of Congress. The initiative as well as the follow-through was in the Congress. This act will highlight again that our actions in the Congress are far more significant than anyone's words.

To the chairman of the committee, the Senator from Louisiana (Mr. LONG), to the Senator from Delaware (Mr. WILLIAMS), to the members of the committee, and to the entire Senate I extend my deepest gratitude; and I express the hope that this bill will be reported back to us so that we can consider it once again before we adjourn sine die the first session of the 91st Congress.

Mr. LONG. I thank the Senator for his kind remarks. I thank every Member of this body and the members of the Finance Committee in particular for the very generous cooperation they gave to the chairman.

In some instances, the chairman decided that we would never conclude the hearings unless we strictly limited Senators in their questioning. It was very considerate of the members of the committee to go along with that mandate, without which we never could have concluded these 7,000 pages of hearings on the bill.

But, more than any Senator, I believe the staffs of the Finance Committee, headed by Tom Vail, and the Joint Committee on Internal Revenue Taxation headed by Larry Woodworth deserve all the praise we can heap upon them.

They have been working 20-hour days—and I do not think too much praise can be accorded to them—to work out the technical sections of this 585-page bill. They have worked around the clock in many instances, on Sundays and holidays as well as the ordinary workdays. I do not think there are more overworked people anywhere in Government than these two staffs, and they deserve all the praise the Senate can accord them. I do not think there are many people in America who are as competent to work on the bill as those we had working for us.

I would also like to make special and fond mention of Harry Littell of the Legislative Council's office. Words cannot begin to adequately praise Harry for the superb craftsmanship of his efforts on this massive task and for his devotion to the job. Without the extremely long and difficult hours put in by Harry, we would not have this bill before us. Without his efforts and skill we would not have a bill that is in such excellent technical shape. We cannot begin to praise Harry enough.

Mr. MANSFIELD. Mr. President, what the distinguished Senator has said is not only well merited, but also very much deserved. The staff members have worked long. They have a good deal of work ahead of them. I think that out of the efforts of the committees and their very capable staffs, the tax reform-tax relief bill this year will be one of the hallmarks, the benchmarks, the landmarks of this Congress.

Mr. LONG. The RECORD also should reflect that many dedicated employees of the Treasury Department volunteered to work with our staffs on this bill.

I yield to the Senator from Massachusetts such time as he requires.

Mr. KENNEDY. Mr. President, in the exchange which has just taken place, the distinguished majority leader has paid a great and well-deserved tribute to the distinguished chairman of the Committee on Finance and to the members of the committee. I warmly associate myself with his remarks, because I feel that this praise and this acclamation is well due.

In addition, as we go into the final minutes before we vote, we ought to recognize the eminent role played by the distinguished majority leader in our efforts to achieve meaningful tax reform. Indeed, I believe that it was the Senator from Montana who articulated most clearly the relationship between the extension of the surcharge and the inequities which existed in our present tax system. It was he who emphasized to us that the surcharge was unfair, because it requires no contribution from those who escape their taxes. It was he who demanded that the surcharge should be coupled with tax reform. Only in this way, he realized, could we bring maximum pressure to bear on tax reform. Indeed, in main part, it is because of the majority leader's strong and dedicated commitment to tax reform, and his leadership in working with the distinguished chairman of the Committee on Finance and the members of the committee that we find ourselves in the successful posture we are in today.

There were those who said we need not act hastily on the question of tax reform. There were those who said the matter ought to be studied. The administration told before the Ways and Means Committee last spring that we should wait until November for yet another review of tax reform proposals.

Throughout this year, the position taken by the majority leader on tax reform was hard and difficult and courageous. He performed a great service not only to the Senate, but also to all our citizens. I am pleased, therefore, to rise at this time to join in acclaiming the members of the Finance Committee and the majority leader for their magnificent effort.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MUSKIE. Mr. President, I should like to join in this well deserved tribute to the distinguished Senator from Montana, the majority leader (Mr. MANSFIELD). I know of his singleminded commitment to the objective of tax reform which he expressed first in the Democratic Policy Committee early in the summer. He sensed the interest of the country in the objective of tax reform. He understood, from his many years in the Senate, that unless such a commitment were made by the leadership, tax reform might well fall through the cracks as we considered the tax questions raised

by the surcharge. He has stuck to his commitments steadfastly.

He was criticized considerably for making that commitment in July and August. Doubts were raised later as to whether or not, because of the sheer immensity of the task, that commitment could be made. It was with the cooperation of the distinguished chairman of the committee, the Senator from Louisiana (Mr. LONG), that it was possible for the majority leader to make that commitment.

It seems to me most appropriate, as the distinguished Senator from Massachusetts has pointed out, that at this point, prior to final vote on this tax package, the Senate and the country be reminded of the leadership role played by the distinguished Senator from Montana.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from Florida such time as he desires.

Mr. HOLLAND. I thank the Senator.

In the first place, I want to compliment in the highest possible terms the chairman of the Committee on Finance and the ranking minority member of that committee; and the members of the committee generally also are entitled to their share of congratulations. I have noted particularly the fidelity with which the chairman and the ranking minority member have stuck by the committee bill. I think that is the finest evidence of real leadership, and I compliment them for doing that.

The second thing I would like to say, Mr. President, is that I have frequently found occasion in the past to express regret about the complex which seems to seize upon the Senate when we consider an important and involved tax measure. It is the type of measure in which most consideration should be given to the committee recommendations, particularly in a matter of this kind, in which after 3 months of hearings, a 585-page bill, which is offered as a substitute for the House bill or to replace the House bill, is the fruit of all that work.

I do not know whether it is because we in the Senate are somewhat frustrated because under the Constitution we are banned from initiating legislation in this field, or what the reason may be; but I think that the most unsound thing we do in the Senate is in attempting to write on the floor a tax bill, no matter how complex or involved the matter may be, and that is exactly what we have done in connection with this bill.

I regret that we show that attribute almost yearly; and I must express regret again this time, because I think it is unsound to follow that practice. It is not a compliment to the committee or its fine leadership or its fine work. To the contrary, it seems to be born in the idea that individual Senators, on the floor, in their judgment, many times most impulsively, have sounder views on the complex matter of Federal taxation than does the committee after its months of study, hearings, and testimony. I cannot join in that kind of approach to the passage of an involved tax bill and that is one of the reasons I shall vote against the bill.

The principal reason, though, why I shall vote against the bill is that it attempts to undo one of the real things that had been attempted to be done by this bill, and that was to fight inflation The fight against inflation will be a particularly tough and important one in the next 2 years, 1970 and 1971.

The bill which is now ready for adoption, and it will be passed so far as the Senate is concerned by its vote, shows this kind of net result in revenue in 1970 and 1971. I am using the composite table prepared by the staff of the Committee on Finance.

In the year 1970, this particular bill, which is now before us and about to be voted on, has a net reduction from the committee bill of about $3.0526 billion. If that is an attack on inflation, if that is an effort to regularize our fiscal practices, this Senator cannot see it. For the year 1971, from this same table, it appears that the amendments we have agreed to on the floor of the Senate will cut the revenue provided by the committee bill by $5.049 billion. In other words, there would be a net reduction in revenue of over $8 billion in those 2 critical years, and they are the 2 critical years in the fight against inflation.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HOLLAND. Mr. President, will the Senator yield to me for 3 additional minutes.

Mr. LONG. Mr. President, I yield to the Senator from Florida 3 additional minutes.

The PRESIDING OFFICER. The Senator from Florida is recognized for 3 additional minutes.

Mr. HOLLAND. The net reduction in those critical years is better than $8 billion. That is moving exactly in the wrong direction rather than in the right direction. That is the principal reason I shall vote against the bill.

There is one ray of hope in this matter. I have found it possible at least three times before, and maybe more, in voting against the complex bills in this field which have been rewritten by the Senate on the floor to vote for a much better bill which came back from conference; and I do hope in this instance we will have that kind of record made again by the conferees of the two Houses.

In my mind it would be not only unfortunate but most misleading to the public and would defeat the objectives of all concerned in trying to bring about this legislation, to come back with this bill in its present form, with a net reduction in revenue as against the committee bill, of over $8 billion in the 2 critical years.

Mr. President, having made those brief remarks and again expressing my compliments to the distinguished Senator from Louisiana, the chairman of the committee, and the Senator from Delaware, I wish to inform the Senate I shall vote against the bill and hope that when they take it to conference we will get back a vastly improved bill.

Mr. ALLOTT. Mr. President, I also join in complimenting the members of the Committee on Finance, the chairman, the ranking minority member, and also all the other members who just as diligently through all the many days and weeks of hearings attended to their business in attempting to fulfill the mandate of the Senate, a mandate which I think was foolish and which I think should never have been given. According to the statement of the majority leader at the time of the passage of the surtax bill, it was a mandate of the Democratic policy committee. I think it was a short-sighted and foolish mandate which we will all live to regret in this country.

Mr. President, for the past 2 weeks or more the Senate has been operating in a circus-like atmosphere. The political Christmas tree known as the Tax Reform Act of 1969 has not only been decorated, it has been gaudily overdressed with flashy and topheavy economic ornaments which threaten to short circuit every light, and may well end up burning down the house.

In the Senate's unprecedented spending spree, it has ignored the cruelest tax of all, inflation. Commonsense and reason has been cast into the fire of political advantage. Champagne has been dished out when the budget can scarcely afford 7-Up.

There is scarcely a citizen of this Nation who has not felt the effects of continued deficit spending by the Federal Government. For the 8 years prior to President Nixon's inauguration America suffered from the combination of the policies of those in Congress who cannot bear to see the budget balanced and administrations which did not have the will to face the economic realities of life.

Now we have an administration which has pledged itself to fiscal sanity. We have an administration which has told its individual departments: "Keep the spending and the hiring down."

The policies of this administration are just beginning to work, but every bit of good which has been accomplished through squeezing and belt tightening and economic restraint will be undone if the Senate version of the tax reform bill becomes law.

While some good things have been accomplished in the bill, the fact remains that the U.S. Treasury would end up with a short fall in revenue for the calender years 1969–72 of $27 billion—$26.284 billion, to be exact—if the bill in the form I find it today is enacted. In addition, in the calender year of 1973 alone the effect of the Mansfield-Byrd amendment for social security would be an added social security tax bill of $6.7 billion for middle-income taxpayers.

Because I cannot in conscience contribute to the destruction of fiscal responsibility, which the American people demand and which this administration stands for, I find it necessary to announce that I shall vote against the final passage of the bill, a self-created economic monster. If it passes, and if the Senate-House conference does not restore sanity to this legislation, I shall vote against the conference report.

However, I have a very good feeling that the bill which comes from the conference is not going to be identifiable with the bill which passes the Senate this afternoon. I also want to make it perfectly clear that I will be among those Senators who have announced they will vote to sustain a veto by the President. In fact, on behalf of the taxpayers of this country, I urgently recommend to the President that he exercise his veto responsibility, as he has indicated he

will, if the bill contains anywhere near the degree of fiscal irresponsibility it now contains, because the vast majority of citizens are in accord with his aim and goal to curb inflation.

Since politically the present bill is supposed to please about everybody, I suppose that taking the position I have enunciated carries with it certain risks. Then so be it. I cannot and will not vote for a measure which could well bring about a situation which in turn would precipitate an economic collapse in this country.

Yesterday afternoon the distinguished Senator from Nebraska offered an amendment in which was incorporated the concept of an administrative budget. I hope we get off this unitized budget kick we have been on for the last 2 years. It does not mean a thing. It is misleading to the people of the country. We will never understand where we are until we get back to the concept of an administrative budget. How in the world can we claim that we have a surplus in this country when we are counting as a surplus the dollars which are paid into trust funds such as social security, highway funds, and other such earmarked accounts?

I have termed this bill the Lawyers and Accountants Civil Relief Act of 1969.

I predict, and believe, that we will have created, if the bill as it now stands is enacted into law, a heyday which will keep our accountants and lawyers busy not only for the space of years but for many years to come. I do not begrudge them their fees, but I am concerned about those middle-income taxpayers who are going to have this additional expense.

There is this to say about the bill, many of us have advocated, and sought, relief in the past for the average citizen. I am talking about those in the lower income and lower median income brackets. This bill does not now do this. It has been rendered completely out of balance by floor amendments. Educational investment credits have been added. This is one of the more meritorious floor amendments. It is a benefit which I have previously supported. In another climate, in another situation, this benefit has been completely logical, because it would give assistance to these low- and middle-income taxpayers and would have helped them to educate their children. I have supported it.

I also advocated at times an increase in the personal exemption, but that was not done at a time when we had taken 5 million people from the tax rolls and had decreased the taxes of some 7 million others.

So it is not that these things are bad, but rather that as amendments to the tax reform bill which the committee brought out, taken together, they are unacceptable for anyone who gives consideration to fiscal responsibility in this country.

I believe that the bill will be a better bill when it comes back from conference. I hope it will not look like the bill which will probably pass this afternoon.

Mr. President, let me say this in conclusion: There is no tax which is as cruel as inflation. It is said over and over. There are many Senators who are wealthy, but they will take care of themselves in an inflationary period, but the man who cannot properly take care of himself is the poor fellow working for perhaps $3,000, or perhaps even $8,000 a year to support his family, or the man and woman who have finished the productive years of their lives and are dependent upon social security, a pension, or fixed incomes. How can we say that we are being honest with them if we do not exert our last and best efforts to maintain the stability of the dollar by holding down inflation as the President has asked?

Senators telling constituents that we are giving them more and saying, "Look at what we did for you," is like Little Jack Horner who sat in the corner saying "What a great boy am I" when he pulled out a plum. We cannot tell them things like that and at the same time pursue a policy which destroys every hour of every day, the very thing we are giving them, with the other hand.

Therefore, Mr. President, I shall vote against the bill and pray that when we see the bill come back from conference, it will be a much better bill as far as the best interests of our country and its citizens are concerned.

Mr. President, I ask unanimous consent that a chart which has been prepared by the Treasury Department showing the revenue loss of the bill, which is illustrative of the remarks I have previously made, be printed in the RECORD.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

REVENUE EFFECT OF SENATE AMENDMENTS TO H.R. 13270

[In millions of dollars]

| | Calendar years | | | | | | |
|---|---|---|---|---|---|---|---|
| | 1969 | 1970 | 1971 | 1972 | 1973 | 1974 | Longrun |

Note: Net revenue loss 1969–74 $38,630,000,000, net revenue loss 1969–72 $26,284,000,000.

Mr. GRIFFIN. Mr. President, I wish very much that it were possible for me to join in the expressions of praise by the distinguished majority leader on the work of the Senate in connection with this bill.

Regretfully, as one Member of this body, I have very little reason to be proud of its collective performance in connection with this product of its deliberations. It is now a hodgepodge of political "goodies" which no longer deserves the title of tax reform.

But, Mr. President, I do join the distinguished majority leader and the distinguished majority whip in their high praise of the chairman of the Finance Committee, the ranking minority member, and all other members of the Finance Committee who worked so hard on this bill. I think it is obvious, in most cases, that by and large, the committee tried to achieve responsible and meaningful tax reform in their deliberations as evidenced by the bill that they reported.

In particular, I want to refer to and commend the great Senator from Delaware (Mr. WILLIAMS).

The other day, I had reason to have printed in the CONGRESSIONAL RECORD an article about the fact that the distinguished Senator from Delaware has announced his retirement, an announcement which I think everyone in this body hopes he will reconsider and change his mind.

The article referred to the Senator from Delaware as being a giant in the Senate.

Mr. President, the Senator from Delaware (Mr. WILLIAMS) is not only a giant in the Senate today but, in the opinion of this Senator, his performance in connection with the pending bill, as in connection with so many other bills, will demonstrate that he is a giant in the history of the Senate.

Time will surely make it clear that he was not only a friend of the taxpayer but that he was also a friend of the consumer as he fought for sound fiscal principles.

Mr. President, many of the amendments which were adopted and added to the pending measure to make it a "Christmas tree" are amendments of great merit.

So far as I personally am concerned, for many years I have advocated and have introduced bills to provide tax

credits for expenses in connection with higher education.

I found it very difficult and distasteful to vote against that amendment when it was offered to the bill, but I felt that the Senate must not abandon fiscal responsibility.

We have to face reality, and this is not the time when we can add to our revenue losses.

For our Nation, like a fat man, to continue eating candy and double helpings of ice cream, would be the height of irresponsibility.

Senior citizens need and deserve an increase in social security benefits. In my view, a 15-percent increase in benefits is not too great, although I believe that a 10-percent increase now, coupled with an automatic escalator provision, based on the cost of living, would be a better deal in the long run for those who rely on social security.

We do a disservice to our senior citizens by tacking social security legislation onto a tax package which is certain to push the cost of living up at an even faster pace.

As it stands, this package contains too little tax reform, too much tax relief and a mighty big boost in prices for everyone.

Mr. President, I have the utmost confidence in the good judgment and commonsense of the American people. I believe that too many politicians do not give them enough credit.

The housewife, the businessman, the worker, are all deeply concerned about galloping inflation. I think they know and understand that Government spending, based upon borrowing, is largely responsible for the plight of our Nation today.

Mr. President, I have little doubt that the bill before us will be passed by the Senate, but, in good conscience, I cannot vote for it. I want the Senator from Delaware to know that he does not stand alone and that the President does not stand alone. Both of them are right, and I am confident the people know they are right.

I shall cast my vote against the bill.

The PRESIDING OFFICER. Who yields time?

Mr. WILLIAMS of Delaware. Mr. President, I yield 1 minute to the Senator from New York (Mr. JAVITS).

Mr. JAVITS. Mr. President, I can state my position on this bill very simply and very directly. I have searched my conscience. If I voted "no" I would do so in the hope that the bill would be carried to conference in spite of my vote.

It is easy to vote either way, because none of us want the bill as it is, neither those who will vote "yes" nor those who will vote "no."

Because I believe in doing something rather than doing nothing, I shall vote "yes," but I shall feel free to debate and to reject the conference report. I want this bill to go to conference, so I must be honest with myself and vote for it.

I take this action with considerable reluctance, because I am deeply troubled by certain provisions in the Senate bill. I have grave reservations about these provisions in this bill, which I opposed when they were offered as amendments. Yet, there is much which is good and worthwhile in it, and I am prepared, at least, to send it to conference and to keep an open mind until the conference report is received.

I have long sought meaningful tax reform, introducing bills to achieve that objective not only in this Congress, but in previous Congresses. However, this bill has been transformed into a tax rate-cutting bill, as well as a tax reform bill, and this poses considerable problems in these inflationary times. I am deeply troubled, in particular, by the Gore amendment, which increases the personal exemption; this would seriously impede our efforts successfully to battle inflation in the present and next fiscal year. I opposed the Gore amendment for that reason. In addition, I am concerned about the amendment which gives tax credits for education which must be costly to Federal aid to education. And by the Cotton amendment, which gives the President unlimited authority to impose import restrictions. The Cotton amendment is particularly unfortunate, since its subject is totally unrelated to the tax bill to which it was added, and it signals to the world that the United States may be entering a protectionist era. Should it survive the conference I would consider seriously opposing the conference report on that ground.

It must be emphasized that this bill contains many valuable reforms, reforms which many of us have sought for years: Improvement in the oil depletion allowance, a fairer tightening of the real estate tax shelter, and the low-income allowance, to mention but a few. In addition, this bill also contains a very important anti-inflationary provision—that is, the 6-month extension of the income tax surcharge—at a reduced 5-percent rate, as requested by the administration.

In some areas the Senate bill is a great improvement over the House-passed measure. Changes made in the Finance Committee and on the floor of the Senate in the past 2 weeks have brought about a bill which contains equitable tax reform in the area of foundations, charitable contributions and real estate. The bill, as amended in the Senate, also contains valuable incentives for low- and moderate-income housing and a deduction for the transportation expenses of the handicapped—a provision which I have been seeking for many, many years.

A provision of this bill would also increase social security payments by 15 percent. I supported this provision, and, while this increase has been cited as having an inflationary impact, I am not persuaded that its inclusion in this bill is a reason for rejecting it. These increased benefits are financed from the social security trust fund—outside of general revenues—and the House of Representatives is now considering an increase of this amount in a separate bill. An increase of benefits for those over 65 cannot be viewed in the same light as other provisions in this bill which would have a negative revenue effect. Rather, it represents a correction of inequities. Like those disadvantaged in need of the immediate establishment of a humane and efficient system of family assistance, social security beneficiaries need this increase in benefits if they are to stay above the line of dependency and poverty.

I am reluctant to see these very positive features of the Senate bill now go down the drain. I do not want to see all these many months of creative and committed work on tax reform wasted. I am particularly reluctant to vote against this bill when to vote for it would be a vote to send it to a Senate-House conference which will have the opportunity to alter or eliminate the more unfortunate features of the bill and to limit its inflationary impact.

On balance, I still believe that it is possible to salvage an equitable and fiscally responsible bill, in which tax reform will predominate over tax-rate cutting and inflationary impact. For that reason I will vote for this bill. It is my intention to carefully examine the work of the conference, to evaluate its report independently, to make a fresh judgment at that point on the virtues of the tax reform bill, and to cast my final vote on the conference report accordingly. Only then can a definite judgment be made on the measure. For now, the momentous work done on the measure should not be aborted.

Mr. President, in conclusion, I want to note that the Senator from Delaware is a really great Senator. I only regret that he cannot live eternally. He has performed a great duty for the U.S. Senate.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JAVITS. May I have 30 seconds?

Mr. WILLIAMS of Delaware. Mr. President, I yield whatever time the Senator needs.

Mr. JAVITS. He has exposed all aspects of this bill. As a Senator representing a State with 18 million people, I thank him and I ask him to feel that, no matter what else he may have done in his life, this is an historic and a great example of the capacity, the patriotism, and the devotion which he has shown.

I would also like to pay tribute to Senator LONG, Senator TALMADGE, Senator GORE, and other Senators who have fought so hard and so valiantly in respect of the bill. I know they will forgive me if I pick JOHN WILLIAMS, who sits in front of me, as my favorite.

Mr. TALMADGE. Mr. President, I yield 4 minutes to the Senator from Indiana (Mr. HARTKE).

Mr. HARTKE. Mr. President, I intend to vote for the bill. I think it is a good bill. It is far from perfect, but it is far better than it would have been without some of the changes that have been made in the Finance Committee and on the floor of the Senate.

I would like to make a brief statement about the amendment that I offered yesterday, and two of the amendments that I did not offer, but plan to pursue in the future at an appropriate time.

First, the amendment that I offered last night as an amendment to Senator MILLER'S amendment would have raised almost $1 billion. Senator MILLER'S amendment is good in that it raised the rate of the minimum tax from 5 to 10 percent. On the other hand, it raises the question of the possible creation of a tax shelter for some taxpayers. This is because Senator MILLER'S amendment allows a deduction from the preferred items of the amount of taxes on ordinary income. It is therefore conceivable that

a taxpayer with large, ordinary income, and also a goodly amount of preferred income, could use the taxes paid on the ordinary income to escape paying any taxes at all on the preferred income. Of course, there is some justice to Senator MILLER's claim that a taxpayer who was paid a large amount of taxes should be treated differently from the taxpayer who has paid little or no taxes. Recognizing this principle, my amendment would have allowed a deduction of one-half of taxes paid. I believe that this would achieve equity while at the same time foreclosing any possible loophole. The different revenue estimates justify this assertion.

The Senate Finance minimum tax provision would have generated $700 million in additional revenue. Senator MILLER's proposal which was finally adopted, by his estimations, generated $740 million. My proposal would have generated slightly less than $1 billion.

Mr. President, I ask unanimous consent that a letter from the Joint Committee on Internal Revenue Taxation setting forth revenue estimates of my proposal be inserted at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON INTERNAL REVENUE TAXATION,
*Washington, D.C., December 11, 1969.*

Hon. VANCE HARTKE,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR HARTKE: This is in reference to your request for an estimate of the effect on income tax liability of a provision to impose a 10 percent tax on the preference items in the Senate Finance Committee version of the tax on preference items after deduction of one-half of Federal income tax otherwise payable and $30,000.

Time did not permit of a computer run for this estimate; we estimate, without benefit of a computer run, that this proposal would result in an increase over present law of approximately $440 million in individual income tax liability and $550 million in corporate income tax liability.

Sincerely yours,
LAURENCE N. WOODWORTH.

Mr. HARTKE. Mr. President, I would now like to discuss two amendments that I did not offer. I did not offer these amendments because the Senate has been overburdened with amendments to the tax reform bill, and because my amendments raised profound and fundamental questions. While I believe these proposals have merit, it may be that some modifications or changes are desirable. My first amendment, No. 369, would repeal some of the more outstanding preferences in our tax code. Beginning in 1985, the following tax preferences would no longer be allowed:

First. Intangible drilling and development costs in the case of oil and gas wells would have to be capitalized and could not be taken as a deduction in the year that they were paid or incurred.

Second. Percentage depletion on natural resources would be repealed, and only cost depletion would be used.

Third. The capital gain provision of the tax laws would be treated as ordinary income.

Fourth. The special treatment of stock options would be repealed and all income arising from stock options would be taxed as any other type of income.

Fifth. Interest received from State and local bonds issued after December 31, 1984 would be taxed.

Sixth. New residential rental housing and property constructed after July 25, 1969, could only be depreciated by a method which did not exceed the amount available under the 150 percent declining balance method.

Seventh. Personal property subject to a net lease could only be depreciated on methods which are not faster than the 150 percent declining balance method.

Eighth. Any deduction for a charitable contribution of appreciated property would have to be reduced by the amount of gain which would have been realized if the property had been sold at its fair market value.

Ninth. Provisions of the tax law permitting financial institutions to deduct reserves for losses on loans would be repealed.

Tenth. The amount of any excess investment interest for a taxable year could not be deducted.

This amendment in no way implies hostility or objection to the social and economic goals to be achieved by the various named preferences. A provision in the tax code is a preference to the extent that it allows any taxpayer to accumulate wealth or enjoy personal consumption without paying the full tax. A preference, then, means deviation from the norm, and the proponents of a preference should have the burden of proof as to the use of the tax code for such a purpose and the measure of its success. My amendment would place the burden of proof on those enjoying special tax treatment, and not make tax reform conditioned upon public outrage.

No one has a permanent right to the U.S. Treasury. Nothing in this life is permanent, and the ordinary taxpayer must make his plans with the realization that his tax burden can change from time to time. It is only fair that those who enjoy preferences face the same uncertainty. For as John Steinbeck said, "in the long run, we are all dead."

My second amendment, No. 385, would create a Senate Tax Reform Commission, composed of 12 members selected for their professional qualifications, excellence, experience in finance, public finance, taxation, or related fields. They would be selected by various Members of the Senate. In the drafting of this amendment, I tried to achieve as much independence for this Tax Reform Commission as possible. Once the members of the commission are selected by the Members of the Senate, they should be entirely on their own to suggest desirable changes in our tax code.

It is my hope that this 2-year commission would create an expertise and fund of knowledge that the Members of the Senate could draw from. The debate of the last 2 weeks shows rather convincingly that there are many ideas for beneficial change in our tax code, but little concrete knowledge.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. TALMADGE. Does the Senator desire additional time?

Mr. HARTKE. Yes, 1 minute.

Mr. TALMADGE. I yield 1 minute to the Senator from Indiana.

Mr. HARTKE. This commission, then, would consider the various tax reform proposals and more importantly try to determine the various proposals' economic and social consequences. Tax reform is insufficient in itself if it does not include careful evaluations of the economic and social change. Also, this commission in evaluating a certain area would develop various alternative approaches. In this way, the Senate could select from a series of possible changes, and not be faced with the rather sterile rejection or approval of one proposal. This commission would also consider desired changes in the tax code to enhance productivity, strengthen our economy, and the achievement of social goals. Finally, this commission would study the relationship between Federal, State, and local, and property taxation. The present U.S. taxation system is a crazy-quilt of different systems, often working against each other.

A columnist recently suggested that taxes are too complex to be handled by Congress. He suggested turning the entire function over to the executive branch. I consider this a most unwise proposal. Taxes are becoming increasingly technical and complex, but every administration is subject to the same pressures that are more conspicuously revealed in Congress. The administration, however, has the expertise and the technical staff so that their decisions seem neater. If Congress is to meet its increasing responsibility in the field of taxation, it must create the necessary machinery.

Mr. WILLIAMS of Delaware. Mr. President, I yield 5 minutes to the Senator from Pennsylvania (Mr. SCOTT).

Mr. SCOTT. Mr. President, I wish, first, to commend the two principal staff aides and their assistants who have worked so well and diligently on this bill in helping solve numerous difficult problems which have faced us. I am referring to Tom Vail, of the Finance Committee, and Larry Woodworth, of the Joint Committee on Internal Revenue Taxation. I also express our appreciation and thanks to the Treasury experts and advisers.

I think all of us would agree that there are few committees whose work is so conscientiously performed as that of the Finance Committee, and there can never be too many tributes to the ranking minority member, Senator WILLIAMS of Delaware, whose conscience and conscientiousness are a byword, and to the work which was done by all the members of the committee on both sides of the aisle, by the very distinguished chairman, who has patiently given consideration to individual concerns and problems of each Senator and has aided them, and to the Senators on his side of the aisle, and to our members on this side of the aisle on the Finance Committee, including the Senator from Utah (Mr. BENNETT), the Senator from Nebraska (Mr. CURTIS), the Senator from Iowa (Mr. MILLER), the Senator from Idaho (Mr. JORDAN), the Senator from Arizona

(Mr. FANNIN), and the Senator from Wyoming (Mr. HANSEN).

For all of the work done and the contributions made, we are all appreciative.

At the same time, as many of them have pointed out and as other Senators have pointed out, this bill is, by the largest understatement of the year, far from perfect.

It has much in it which is designed to meet the true needs of tax reform. It has much added to it which operates to increase the burden on the Treasury, and to reduce the revenue to a point where normal caution would, it seems to me, have dictated otherwise.

I am reassured that the social security increases will be taken care of in another bill if removed from this one. They should be treated in a separate bill. I favor the increases in social security. I do not know of a matter which has aroused more interest in Pennsylvania, as a matter of fact, than the plight of the social security beneficiaries who have been too long denied the very reasonable amounts which they surely need.

There are many reasons why the allowance for dependents should be increased from $600. It has not been increased since 1948. I believe that at least some modest increase is desirable. I would like to see one that does not result in the removal or deprivation to the taxpayer of the proposed increases in the standard deduction allowances.

An amendment which I supported, the Percy amendment, would have preserved, for the most part, this important feature in the Senate bill as it came to us. I am not sure what the conferees will do, but I have a suspicion that the conferees are more than likely to come up with something similar to the Percy amendment, which was defeated.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SCOTT. I ask for 3 additional minutes.

Mr. WILLIAMS of Delaware. I yield the Senator 3 minutes.

Mr. SCOTT. Or which is more likely to resemble the Percy amendment than either the House bill, the Senate bill, or the Gore amendment.

I agree with the Senator from New York when he says he reserves the right to either support or oppose the conference report if it does not remove some of the unwisdom which has now become embedded in the bill. Each of us approaches his final decision in full awareness of the fact that, in seeking to do good for some, we have not done well by all; and therefore, we ask ourselves, "Shall I vote for the bill, or against it?"

My reasoning follows that of others who say that if we throw overboard all the hard work that has gone into this bill for many weeks, we may not have tax reform at all.

On the other hand, if the bill comes back to us in anything like the shape it is in now, perhaps we ought not to have a tax bill at all, or perhaps the President will veto the whole thing; and I would suspect that a veto, under those circumstances, would not be overridden.

Therefore, it is my hope that the conference will result in a bill which represents the distilled wisdom of the conferees, and which can be found acceptable to both parties. Because I want to see tax reform and tax relief, and because I want to see tax reform and tax relief, and because I favor many of the features of the bill, I shall vote for it.

Finally, Mr. President, just a word to express the great regret that all of us feel that the distinguished Senator from Delaware has announced that he will not be a candidate to succeed himself.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SCOTT. Will the Senator from Delaware yield me 1 additional minute to further extend my praises of him?

Mr. WILLIAMS of Delaware. I yield the Senator 2 minutes.

Mr. SCOTT. There is a rule in Delaware that the distinguished senior Senator from Delaware can be reelected for as long as he wishes, and they wish he would wish for longer than he wishes for. He is the only American Senator who has, by custom and tradition, the same privilege which is extended under the Constitution of Canada to Canadian Senators, who serve for life. The Senator from Delaware could indeed serve for life if he so desired. It is our loss that he has reached another conclusion, and we will miss, indeed irreplaceably, the great, courageous, and dedicated service which he has performed.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, I yield 1 minute to the Senator from Texas.

Mr. TOWER. Mr. President, I think much of what has been done here was an exercise in futility, because I think a great portion of it will be stricken out by the conference committee; and if it is not, there is great probability that the bill will be vetoed.

It is, in many respects, a bad bill. I think the bill is too punitive of some elements in our society which have provided the capital flow which has been the dynamic behind the great economic growth of the United States of America.

I think there are other provisions, designed to help people, which will have the ultimate effect of doing them grave injury, through the debasement and destruction of the buying power of their money.

Therefore, I intend to vote against the bill. I join my colleagues in commending my distinguished friend from Delaware, an able and tremendously patriotic Senator. In spite of my battles with him over the depletion allowance, I wish him well, and wish he were not leaving.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, I yield myself 2 minutes.

In my judgment, much of the harsh criticism this bill has received is premature. I think most of us recognize that there are provisions in the bill which perhaps should not be in it. On the other hand, there are many that should be there. In the time I have been a Member of the Senate, it has been my experience that bills of this magnitude usually come back from conference in far better shape than when they left the Senate. In my judgment, that will be true this time. After a conference between the House and the Senate, this bill will be put into shape, where it will be less inflationary in the years 1971 and 1972, and the relative inflow and outflow of funds will be substantially the same.

I pay tribute to the distinguished chairman and the ranking minority member of our committee, who have worked so diligently, as have all the members of the Committee on Finance, in perfecting this measure. As the distinguished majority leader has stated, it required almost 4 months' work. We heard witnesses day after day, and week after week, and we sat in executive sessions for the same period of time. We had outstanding attendance of the members of our committee, both at the hearings and at the executive sessions.

Lastly, I pay tribute to the excellent staff that provided us so much outstanding assistance.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. TALMADGE. I yield myself 1 additional minute.

In my judgment, Dr. Larry Woodward, the chief of staff of the Joint Committee on Internal Revenue, and Tom Vail, the chief counsel for the Senate Committee on Finance, did one of the most outstanding jobs I have ever experienced in my more than 20 years in government. They are knowledgeable, dedicated, and candid. When you ask them a question, you get a responsible, forthright, honest answer. The Senate owes them a great debt of gratitude, and I cannot pay them tribute in terms too warm.

Mr. President, I yield the floor.

Mr. MILLER. Mr. President, will the Senator yield me 2 minutes?

Mr. TALMADGE. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes.

Mr. TALMADGE. How much time does the Senator from Delaware have remaining?

The PRESIDING OFFICER. Three minutes.

Mr. TALMADGE. I yield 2 minutes to the Senator from Iowa.

Mr. MILLER. Mr. President, to put in perspective what we are doing with this bill, the Committee on Finance reported out a bill which would have resulted in a surplus of $6.5 billion for 1970. Now that we have the amendments put on it, it will result in a deficit of $2.7 billion.

For 1971, the Finance Committee bill would have just about broken even, with a surplus of $3 million. Under the bill as now amended, we would have a deficit of $11 billion.

For 1972, the Finance Committee bill would have had a deficit of a little over $3 billion; and under the bill as amended, there will be a deficit of $12 billion.

If we really want to do a job in increasing inflation and high interest rates, the bill presently before the Senate is the way to do it.

Mr. President, I ask unanimous consent that the lead editorial in the New York Times entitled "Inflationary Blackmail" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INFLATIONARY BLACKMAIL

The Senate's decision to incorporate a 15 per cent increase in Social Security benefits and a $100 monthly minimum into its version of the tax bill is a disgraceful exercise in political blackmail. It is, unfortunately, thoroughly in keeping with the irresponsibility that has marked every step of the Senate's effort to distort what began as a tax reform bill into an engine of accelerated inflation.

We have no quarrel with the notion that Social Security benefits need improvement to offset the cost-of-living increases that have cut the value of present pension payments since the last 13 per cent raise in benefits went into effect in February 1968. And certainly there is room for debate as to whether that improvement should be the 10 per cent recommended by President Nixon or the 15 per cent the Democrats favor.

But tacking the higher benefits onto the tax bill is a transparently cynical device to deter President Nixon from vetoing a bill that is turning into a Christmas tree loaded with inflationary candles. Few Congressional actions are more popular than putting more money in the pockets of the elderly, and the imperturbable Senate majority feels rubber dollars are as good as ones that have genuine purchasing power. On that basis, it apparently feels the President will have no option except to sign the omnibus tax measure, however uneconomic it becomes.

It is the President's obligation to insist that increased Social Security benefits be considered on their merits in a separate measure. The actual increase in the Federal consumer price index since the last benefit rise comes to 9 per cent. The Nixon proposal of a 10 per cent across-the-board increase in benefits not only covers that rise but also provides an escalator to keep pace with future increases in living costs.

The question that Congress ought to weigh is whether the present period of rampant inflation is the right one in which to lift the benefit level on a more fundamental basis. We have no doubt that a strong argument can be made for such action once the price level returns to some semblance of stability, but it certainly should not be a matter of shotgun determination now.

That reserve applies even more strongly to the steep increase the Senate has voted in the benefit floor. This newspaper has long contended that the present $55 minimum is scandalously low. Yet a precipitate jump to $100 sets a wretched example for the exercise of restraint in wage-price decisions in the private economy.

It will require political courage for Mr. Nixon to stand up against these giveaways and defend both the nation's fiscal soundness and its ability to meet the social needs that cry out for expanded Federal aid. The President can and must demonstrate that courage by making it plain now that he will veto any tax bill that spurs inflation, even one packed with goodies for Social Security pensioners.

Mr. SCOTT. Mr. President, will the distinguished Senator yield?

Mr. MILLER. Mr. President, there is not much time remaining. I would like to complete my statement.

I supported the Williams motion to recommit. I regret very much that it was defeated. I intend to vote for the bill only for the purpose of getting it to conference with the clear understanding and the hope that the conference committee will come back with a bill which will be fiscally sound, one that I can support.

If they do not do so, I will not be able to vote for the conference report. And I am quite sure that the President will veto it.

Mr. WILLIAMS of Delaware. Mr. President, I yield 1 minute to the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 1 minute.

Mr. HANSEN. Mr. President, I shall vote against the bill. In so doing, I want it to be understood that I have nothing but the greatest respect for the members of the Finance Committee. It has been my privilege and pleasure to serve with them since early September.

I pay my respects also to the staff which has been most helpful to me despite the fact that I am the most junior member of that committee. Their impartial, ever-obvious willingness to serve all of us fairly and patiently attests to their commitment to duty.

Mr. President, I take this opportunity to say a word about the distinguished Senator from Delaware.

Impelled not by political motivation, but only by what he believes is best for our country, JOHN WILLIAMS often stands alone in taking the honest, responsible position.

He pleads unpopular causes.

The very nature of representative government gives encouragement to those who would engage in political demagoguery, and I think that is what has characterized the actions of many on this matter for the last several days.

I leave to history, as all of us must, the rendering of final judgment and decision upon the wisdom of the distinguished Senator from Delaware. Insulated from the heat of present emotions, given the advantage of looking back upon events still before us, I predict history will make an objective evaluation of this man that will fully confirm the great regard in which he is held by all of us.

Mr. WILLIAMS of Delaware. Mr. President, I join the chairman of the committee and others in paying my respects to the staff of the Joint Committee on Taxation.

I also pay my respects to the chairman of the committee for the excellent job that has been done in trying to get a bill before the Senate. I agree completely that we could not have had a more competent staff. We could not have done our job without them. Larry Woodworth and Dennis Bedell are two of the most competent staff members that I have ever worked with.

As to the complimentary remarks concerning me, I thank all Senators.

I was sitting here thinking what consternation there would be if I were to say that I had changed my mind, but I will not so they are safe.

Much has been said concerning the $6.4 billion additional revenue raised by tax reform in this bill. That $6 billion is not all tax reform. I think we should point out the breakdown. The $6.4 billion is arrived at in this manner; $4.2 billion is represented by the extension of the surcharge another 6 months and extending the excise taxes. The repeal of the investment credit accounts for $2.5 billion additional revenue in the bill as reported by the committee, and the tax reform accounts for $1.4 billion.

When we add that up we have $8.1 billion, and the tax relief measures in the Finance Committee bill, as reported, totalled $1.7 billion.

That brings us back to the net gain under the committee bill of $6.4 billion. I repeat, the $6.4 billion surplus for 1970 represented in the committee bill does not altogether consist of reform. It is the revenue derived from the extension of the surtax, the extension of the excise taxes, and the repeal of the investment tax credit. Furthermore, the $1.4 billion from tax reform that was in the bill, as it came from the committee, has been whittled down on the floor of the Senate by $500 million. That only leaves $900 million of actual tax reform in the bill. The $2.5 billion to be gained from the repeal of the investment credit has been whittled down on the floor by $800 million. That leaves only $1.7 billion.

The PRESIDING OFFICER. All time of the Senator has expired.

Mr. BYRD of West Virginia. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. PEARSON. Mr. President, I shall vote against H.R. 13270, the Tax Reform Act of 1969. The original purpose of this bill was to remove from our tax structure certain inequities which have accumulated during the past 56 years. The act purported to provide fairness to those who are able to pay, to remove from the tax roles millions of citizens who fall into the very low income or poverty levels, and to do these things in a fiscally responsible way, having due regard for the goals of the Nation and the dangers of inflation.

The measure now before the Senate fails to achieve these purposes.

Inequities have been added to inequities.

Many of the very low income citizens continue on the tax roles.

The revenue lost to the Federal Treasury by virtue of amendments honestly conceived and properly proposed offers the prospect of a huge budget deficit.

I did not find it an easy matter to vote against an amendment to raise the standard deduction.

Nor was it a simple decision to vote "no" regarding a 15-percent increase in social security benefits.

Particularly, it was a hard matter to vote against the amendment granting tax credits for expenses of the higher education of our young people. As a matter of fact, I have previously introduced legislation to grant such tax credits as a way to help families bear the burden of ever-increasing costs of college educations for their children.

I did vote in favor of the amendment providing the retention of the 7-percent investment credit on investments of up to $20,000 per year, primarily to aid small businessmen and farmers.

I also voted in favor of the amendment adding a new section to the bill providing that the 3-percent floor on medical expenses and the 1-percent floor on medicine would not apply to individuals who are 65 years of age or older.

But aside from the effect of the several individual amendments, the total effect of Senate floor action on this bill would mean that the Federal Government must borrow money to finance the tax benefits

added, and that it must do so at the very same time we are increasing taxes by the continuation of the surcharge.

Moreover, Mr. President, these revenue losses to the Federal Treasury increase the supply of money and thereby fire the flames of inflation precisely at the time when this administration, by resorting to some very difficult measures in cutting Federal spending and halting inflation, has reduced inflationary pressures.

President Nixon has announced his intentions to veto this tax bill if it comes to his desk in the form in which the Senate is attempting to pass it. He has given us his reasons for feeling that this would be necessary. I agree with those reasons—they are exactly the same ones which compel me to vote against final passage.

This bill, before us now, is a fiscally irresponsible bill which gives tax cuts at a time when tax cuts feed the fires of inflation as they already threaten to engulf the economy of this Nation.

Fiscal responsibility is not a matter of being all head and no heart; it is a matter of social responsibility, too.

The country's troubles multiply when legislators do not add and subtract properly.

It is no kindness to the electorate to legislate without regard to the connection between spending and taxing. Inflation eats into every paycheck, and undermines the Nation's ability to put its troubled house in order.

Mr. President, one is compelled to express appreciation for the work of the Senate Finance Committee, and to recognize that they worked under a time limitation, as did the Senate itself as we near the end of the first session of the 91st Congress. Many factors worked against a more orderly and deeper study of tax reform. Yet, to recite these serves no purpose.

The bill before us simply fails to provide tax reform which is urgently required and sought by all.

If this bill passes the Senate today, and if the conference report comes back to this body reporting a fiscally responsible bill, I shall, at that time, vote in favor of the acceptance of that conference report.

Mr. HART. Mr. President, two of the facts of life of this body are that a Senator cannot vote "maybe" and that often the final vote does not present a clear-cut choice between "yea" and "nay".

The Tax Reform Act of 1969 is a case in point.

When discussion of tax reform started last spring, I listed certain goals which I thought the bill should attempt to meet.

There were: First, meaningful tax relief for low- and moderate-income families; second, no extension of the surtax without meaningful tax relief, and maybe not even then; and third, a balance or near balance between revenue lost through tax relief and revenue gained through tax reform.

The bill we vote on today does provide the first item, or at least directs more tax relief to those income groups than the House- or Senate Finance Committee-approved bills.

Of course, the bill also contains extension of the surtax—reduced to 5 percent for an additional 6 months. When I tied surtax extension to tax reform last spring, I had two thoughts in mind.

First, separation of the surtax question from tax reform might have weakened the push for the latter. By keeping the two together, we have at least accomplished a step toward putting more equity into our tax system.

Second, I was not persuaded that the surtax had been or would be effective in slowing the climb in prices. I am still not persuaded, but on balance the long-range pluses from the tax relief provisions outweigh the short-range minuses resulting from a 6-month extension of the surtax.

The gap between the revenue which will be lost and the revenue which will be gained in the Senate bill is a more difficult problem with which to deal.

Without getting into specific figures, it is clear that as now presented, the Senate bill will cost the U.S. Treasury more than the House bill. And it goes without saying that with increasing demands on the Federal dollar, such a decrease cannot be accepted lightly.

Certainly we could have closed or partially closed numerous loopholes untouched or only slightly touched by this bill, and I voted for a number of such amendments.

And certainly we have cut back on loophole closing recommended by the Senate Finance Committee or approved by the House, and I have voted for several such amendments. The problem, of course, is that many such provisions do serve a useful social benefit.

Because some tax benefits are good for society, such as those which might help small businesses to compete better with conglomerates, it becomes difficult to close them all.

A better approach, it seems to me, might be to enact a stiffer minimum tax for persons taking undue advantage of loopholes and limiting the way they can make deductions. This stiffer approach would not necessarily seriously affect useful tax benefits but everyone would pay more for the privilege of using the loopholes. That is why I cosponsored an amendment to set a graduated minimum tax. Unfortunately, that amendment was defeated.

At any rate, I am faced with a "yea" and a "nay" vote on the Tax Reform Act of 1969. Mindful of the revenue lost which would result if the Senate bill became law without change, I will vote yes with the hope that the conferees will do what they can to correct the revenue shortfall.

Mr. DOLE. Mr. President, the passage of my amendment deleting intangible drilling and development costs as a preference item under H.R. 13270 was a victory for the independent oil producers and the economies of our oil- and gas-producing States.

That amendment deleting intangible drilling and development costs for taxpayers who gross $3 million or less annually was necessary to encourage greater investment in the exploration and development of our oil and gas resources by the independent producer. Industry spokesmen indicate the producer of not more than 3,000 barrels a day will receive the greatest benefit from this legislation, thus covering approximately 90 percent of our Kansas oil producers.

Witnesses before the Finance Committee indicated that more than 85 percent of the Nation's efforts to search for oil reserves is conducted by these independent producers. Government and industry report that the lack of incentives, not lack of prospects, has been the principal reason for the sharp reduction in exploration drilling during the past 12 years.

Reports from independent oil producer spokesmen indicate Kansas is an area of great potential. In particular, northeastern Kansas is demonstrating the largest leasing and drilling campaign seen in Kansas for many years. That activity along with heavy leasing in northwestern and western Kansas indicates the potential for profitable oil production. This legislation should provide the necessary economic incentives to increase that exploration and development.

Further, assistance was provided by rewriting the section which included depletion as a preference item and subjected it to a 5-percent tax. Under the amendment accepted by the Senate, the depletion allowance would be set off against intangible drilling and development costs, and the only tax paid would be on the excess of depletion.

Without this amendment and because the Senate later approved a 10-percent tax on preference items, the amendment is, in effect, worth twice as much to those taxpayers who gross $3 million or less annually.

During Senate debate, Senator LONG, chairman of the Finance Committee, made a very good point—that the oil industry would have paid $650 million in additional taxes under the House-passed bill and that the section dealing with intangibles alone would have constituted a burden of $250 million in additional taxes.

In Kansas, where oil and natural gas production means one-half billion dollars to the economy, the small independent producers and the supply, equipment and services firms servicing the oil and gas industry depend directly on the vitality of that industry. The 27,800 Kansans employed in oil and gas production in 1968 and the 100,000 persons in the families of those employees are affected by this tax legislation. But more than that, a combination of these tax incentives will give new vigor to the economy of Kansas and other oil and gas producing states, and all consumers will benefit by increased oil and gas supplies.

Mr. BYRD of Virginia. Mr. President, I strongly favor an audit fee for private foundations, as provided in the present legislation.

The foundations operate wtih tax-free funds. The Treasury Department should police these funds to be certain they are used for public purposes. The audit fee would pay for this.

In this legislation for the first time we are attempting to distinguish between operating foundations and to set them aside from private foundations in general, which act only as conduits to pass income onto others. In the bill, the House committee, the House itself, and the Senate Finance Committee clearly recognized the differences between an operat-

ing and a grant-making foundation, and for the first time we have provided language defining an operating foundation.

By operating foundations, I refer to those foundations which expend their own resources, not derived from tax income, entirely for educational and museum purposes. I have in mind, for example, two operating foundations in the State of Virginia—Colonial Williamsburg and the Mariner's Museum at Newport News—which are engaged solely in educational endeavors completely analogous to tax-exempt museums operating in the same field across the Nation.

The Ribicoff amendment, which I supported, provides for an audit fee equal to one-fifth of 1 percent of the assets in 1970, one-tenth of 1 percent in 1971, and thereafter. That amendment further provides for an annual report to the Joint Committee on Internal Revenue Taxation by the Treasury in regard to the costs of enforcement. The Treasury shall recommend the rate of the audit fee to cover the costs.

Therefore, I say we should point out in the record that we are dealing with an unknown and that we do not have enough information to determine just what the audit fee should be. In view of this, we should request the Treasury in its annual report, as required under the Ribicoff amendment, to look specifically at the distinction to be made between operating foundations and private foundations in general.

In closing, let me reemphasize I am advocating a reasonable fee, not an exemption, for operating foundations. Therefore, what I am saying is let us go ahead for now, but be certain that Treasury recognizes this problem, and the distinction between operating foundations and private foundations in general. Treasury should concentrate on this in developing its report to the Joint Committee on Internal Revenue Taxation.

The PRESIDING OFFICER. All time having expired, the question is, Shall the bill pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS (when his name was called). On this vote I have a live pair with the Senator from Arizona (Mr. GOLDWATER). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withhold my vote.

Mr. STEVENS (after having voted in the affirmative). On this vote I have a live pair with the Senator from Louisiana (Mr. ELLENDER). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withdraw my vote.

Mr. SAXBE (after having voted in the negative). On this vote, I have a live pair with the Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withdraw my vote.

The bill clerk concluded the call of the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that the Senator from Louisiana (Mr. ELLENDER) is absent on official business.

I further announce that, if present and voting, the Senator from New Mexico (Mr. ANDERSON) and the Senator from Maryland (Mr. TYDINGS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business, and his pair has been previously announced. The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Ohio (Mr. SAXBE) and the Senator from Alaska (Mr. STEVENS) have previously announced their respective pairs.

The result was announced—yeas 69, nays 22, as follows:

[No. 223 Leg.]

| Anderson | Goldwater | Symington |
| Ellender | Mundt | Tydings |

So the bill (H.R. 13270) was passed.

Mr. LONG. I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, I move that the Senate insist upon its amendment in the nature of a substitute for the House passed version of H.R. 13270 and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. LONG, Mr. ANDERSON, Mr. GORE, Mr. TALMADGE, Mr. WILLIAMS of Delaware, Mr. BENNETT, and Mr. CURTIS conferees on the part of the Senate.

Mr. LONG. Mr. President, I ask unanimous consent that the amendment of the Senate to the bill (H.R. 13270) be printed; and that in the engrossment of the amendment of the Senate to the bill the Secretary of the Senate be authorized to make appropriate technical, clerical, and conforming changes and corrections, including the placement of new provisions added to the bill by floor amendments, corrections in section, subsection, and so forth, designations, and cross references thereto, of the bill and of the sections of the Internal Revenue Code, and corrections in the table of contents of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, no one in the Senate respects the tradition of the Senate more than I. I have served on conference committees when we knew there would be disagreement. It is the duty of the conferees to work out an agreement between the House and the Senate versions of the bill. Nevertheless, it is the tradition of the Senate that they put on the conference committees those Members they feel can reasonably support the Senate position.

I felt so strongly I could not support this bill in its present form, and it was with great regret I had to vote against it after having worked on it so hard for the past several months.

I cannot in good conscience serve as a conferee and pretend to support the position of the Senate on something which I think is so radically wrong and irresponsible. I opposed all of the major amendments by the Senate, and it would not be fair to serve as a conferee.

I ask to be excused as a conferee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia, Mr. President, may we have order? Would the Chair direct Senators to take our seats?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Montana was recognized.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. MANSFIELD. I yield.

Mr. LONG. Mr. President, I would hope the Senator from Delaware would relent in his decision about this matter, but if he insists on it I will have to ask unanimous consent that the Senator from Iowa (Mr. MILLER) be added as a conferee.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Iowa is added as a conferee.

Mr. DOLE. Mr. President, I understand the conferees have been named by the Senate.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I understand the conferees do not now include the name of the Senator from Delaware. Is that correct?

The PRESIDING OFFICER. The Senator is correct. The Senator from Delaware withdrew.

Mr. DOLE. Mr. President, could the Senator from Delaware be reinstated at his request?

The PRESIDING OFFICER. Not without unanimous consent.

Mr. MANSFIELD. Would the Senator like him to be reinstated?

Mr. DOLE. Yes.

Mr. MANSFIELD. I would like to see him reinstated. Would he approve?

Mr. DOLE. I hope he will reconsider. I think it would be a great tragedy if he were not a conferee. Every Member on this side of the aisle shares that view.

The PRESIDING OFFICER. I think it would be inappropriate unless the Senator from Delaware were present.

Mr. MANSFIELD. The Presiding Officer is correct.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Leonard, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting the nomination of Gerald J. Gallinghouse, of Louisiana, to be U.S. attorney for the eastern district of Louisiana, which was referred to the Committee on the Judiciary.

## LEGISLATIVE PROGRAM

Mr. SCOTT. Mr. President, I rise to ask the distinguished majority leader the order of business today, tomorrow, and Monday?

Mr. MANSFIELD. Mr. President, in response to the question raised by the distinguished Republican leader, I think we should indicate for the RECORD tonight where we stand for the rest of the week, next week, and up to and including the day on which Christmas Eve will fall.

Before I answer the question, I wish to express once again to the distinguished Senator from Delaware my deep understanding of the situation in which he found himself. It is just another indication of his integrity and honesty. Despite the fact that he is not going to be a member of the conference committee I would hope he would reconsider his position, resolve his doubts, and do what he can, because his presence would be constructive in bringing about a resolution of the differences between the House and the Senate.

Mr. President, getting back to the question at hand:

## FOREIGN ASSISTANCE ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 600, H.R. 14580.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Foreign Relations, with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Foreign Assistance Act of 1969".

### PART I—ECONOMIC ASSISTANCE

#### DEVELOPMENT LOAN FUND

SEC. 101. Section 202(a) of the Foreign Assistance Act of 1961, which relates to authorization, is amended—

(1) by striking out "and" after "fiscal year 1968,";

(2) by inserting after "fiscal year 1969," the following: "and $390,000,000 for the fiscal year 1970," and

(3) by striking out "June 30, 1969" in the second proviso and inserting in lieu thereof "June 30, 1970".

#### TECHNICAL COOPERATION AND DEVELOPMENT GRANTS

SEC. 102. Section 212 of such Act, relating to authorization, is amended by striking out "$200,000,000 for the fiscal year 1969" and inserting in lieu thereof "$167,000,000 for the fiscal year 1970".

#### AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 103. Section 214 of such Act, which relates to American schools and hospitals abroad, is amended—

(1) by striking out of subsection (c) "fiscal year 1969, $14,600,000" and inserting in lieu thereof "fiscal year 1970, $25,900,000"; and

(2) by striking out of subsection (d) "fiscal year 1969, $5,100,000" and inserting in lieu thereof "fiscal year 1970, $3,000,000".

#### ALLIANCE FOR PROGRESS

SEC. 104. Section 252(a) of such Act, which relates to authorization, is amended—

(1) by striking out "fiscal year 1969, $420,000,000" and inserting in lieu thereof "fiscal year 1970, $419,000,000";

(2) by striking out "$90,000,000" and inserting in lieu thereof "$81,500,000"; and

(3) by striking out "June 30, 1969" and inserting in lieu thereof "June 30, 1970".

#### PROGRAMS RELATING TO POPULATION GROWTH

SEC. 105. Section 292, relating to authorization, is amended by striking out "fiscal year 1969, $50,000,000" and inserting in lieu thereof "fiscal year 1970, $100,000,000".

#### INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 106. (a) Section 301(c) of such Act, relating to general authority, is amended to read as follows:

"(c)(1) In determining whether or not to continue furnishing assistance for Palestine refugees in the Near East through contributions to the United Nations Relief and Works Agency for Palestine Refugees in the Near East, the President shall take into account (A) whether Israel and the Arab host governments are taking steps toward the resettlement and repatriation of such refugees, and (B) the extent and success of efforts by the Agency and the Arab host governments to rectify the Palestine refugee relief rolls.

"(2) No contributions by the United States shall be made to the United Nations Relief and Works Agency for Palestine Refugees in the Near East except on the condition that no part of the United States contribution shall be used to furnish assistance to refugees who are receiving military training as members of the so-called Palestine Liberation Army or any other guerrilla-type organization or to refugees who have engaged in any act of terrorism."

(b) Section 302(a) of such Act, relating to authorization, is amended by striking out "fiscal year 1969, $135,000,000" and inserting in lieu thereof "fiscal year 1970, $150,750,000".

#### SUPPORTING ASSISTANCE

SEC. 107. Section 402 of such Act, relating to authorization, is amended by striking out "fiscal year 1969 not to exceed $410,000,000" and inserting in lieu thereof "fiscal year 1970 not to exceed $420,000,000".

#### CONTINGENCY FUND

SEC. 108. Section 451(a) of such Act, relating to authorization, is amended by striking out "fiscal year 1968 not to exceed $50,000,000, and for the fiscal year 1969 not to exceed $10,000,000" and inserting in lieu thereof "fiscal year 1970 not to exceed $20,000,000".

### PART II—MILITARY ASSISTANCE

#### MILITARY ASSISTANCE AUTHORIZATION

SEC. 201. Section 504(a) of the Foreign Assistance Act of 1961, relating to authorization, is amended—

(1) by striking out "$375,000,000 for the fiscal year 1969" and inserting in lieu thereof "$325,000,000 for the fiscal year 1970"; and

(2) by adding at the end thereof the following new sentence: "Amounts appropriated under this subsection shall be available for cost-sharing expenses of United States participation in the military headquarters and related agencies program; and no part of any funds made available under any other provision of law shall be used for such expenses."

#### SPECIAL AUTHORITY

SEC. 202. Section 506(a) of such Act, relating to special authority of the President, is amended by striking out "1969" wherever it appears and inserting in lieu thereof "1970".

#### RESTRICTIONS ON MILITARY AID TO GREECE

SEC. 203. Part II of such Act, relating to military assistance, is amended by inserting between sections 508 and 509 the following new section:

"SEC. 508A. RESTRICTIONS ON MILITARY AID TO GREECE.—Military assistance to Greece under this Act shall, until further action by the Congress, be limited to expenditure of funds obligated prior to the date of enactment of the Foreign Assistance Act of 1969."

#### RESTRICTIONS ON TRAINING FOREIGN MILITARY STUDENTS

SEC. 204. Chapter 2 of part II of such Act, relating to military assistance, is amended by inserting at the end thereof the following new section:

"SEC. 510. RESTRICTIONS ON TRAINING FOREIGN MILITARY STUDENTS.—The number of foreign military students to be trained in the United States in any fiscal year, out of funds appropriated pursuant to this part, may not exceed a number equal to one-half the number of foreign civilians brought to the United States under the Mutual Educational and Cultural Exchange Act of 1961 in the immediately preceding fiscal year."

### PART III—GENERAL, ADMINISTRATIVE, AND MISCELLANEOUS PROVISIONS

#### ADMINISTRATIVE EXPENSES

SEC. 301. Section 637(a) of such Act, relating to administrative expenses, is amended by striking out "fiscal year 1969, $53,000,000" and inserting in lieu thereof "fiscal year 1970, $50,000,000".

## LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, it had been anticipated that we would consider two conference reports from the Committee on Banking and Currency. They will not be considered this afternoon, but they will be considered some-

time tomorrow. Following their disposal and the disposition of the foreign aid authorization bill, it is anticipated that the Senate will turn to the consideration of Calendar No. 561, H.R. 6543, the cigarette smoking bill.

If we finish the foreign aid authorization bill tomorrow, it is the intention of the joint leadership to take up the cigarette smoking bill tomorrow and hopefully finish it. If not, we have no choice but to come in Saturday. It is with reluctance I raise this possibility because I thought it might be possible to have either the defense appropriation bill complete on Saturday, or Labor-HEW, or the Department of Transportation appropriation bill, but because of a pile-up of factors over which no one seemingly had control, it will be impossible to get up any of these bills before Monday.

Hopefully on Monday we can take up the Defense Department appropriation bill, to be followed by the Labor-HEW bill or the transportation appropriation bill.

Then, we will have a foreign aid appropriation bill and a supplemental appropriation bill.

In other words, in the next 11 days—and that is all the time we have in which to work before Christmas—we will have five appropriation bills and a cigarette bill, as well as the authorization bill for foreign aid. There may be one or two other bills in the meantime, but it indicates that we have a pretty tough schedule ahead of us.

I am only sorry we do not have a good deal more legislation waiting.

## ORDER FOR ADJOURNMENT TO 10 A.M. FRIDAY AND FROM FRIDAY TO 10 A.M. SATURDAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in adjournment until 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. If we do not finish the foreign aid bill and the cigarette bill tomorrow I ask unanimous consent that at the conclusion of business on Friday we stand in adjournment until 10 o'clock Saturday morning.

The PRESIDING OFFICER. Without objection, it so ordered.

Mr. SCOTT. Mr. President, if the Senator will permit a question at this point, I assume that if we do finish those two bills Friday it will be possible for Senators to do some Christmas shopping and buy their wives a present on Saturday; otherwise not, is that right?

Mr. MANSFIELD. Yes, indeed. I devoutly hope we will finish. I do want to make this announcement as definite as I can because Senators have been faithful and canceled many important appointments which were of importance to them.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. MAGNUSON. Mr. President, I hope that timewise the distinguished majority leader makes it as emphatic as he can. I feel sure the defense bill will be ready and I do not see why the Labor-HEW bill should not be ready also. It could be ready Saturday but the clerks have to do some work on it. I do not see any reason why the bills will not be ready. I think every Senator has some interest in those bills. We could get to that matter before the Defense bill or vice versa.

At any rate, I hope that on Monday we are not confronted with someone saying, "Do not bring that bill out because I cannot be here until Tuesday."

Mr. MANSFIELD. It would be too late for that.

Mr. TOWER. Mr. President, I wish to ask the Senator about the housing bill.

Mr. MANSFIELD. That bill will be reached some time tomorrow.

Mr. DOMINICK. Do I understand the Defense appropriation bill will not come up until Monday?

Mr. MANSFIELD. The Senator is correct. It will not be taken up in full committee until tomorrow, and it would be an impossibility to get the volumes of hearings from the Government Printing Office before sometime Saturday. I think that in the interests of all concerned, we could not possibly proceed before Monday.

Mr. DOMINICK. I thank the Senator.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. SCOTT. I yield.

Mr. MANSFIELD. Mr. President, if the Senator will allow me, I would like to yield to the Senator from Florida who has been waiting very patiently.

The PRESIDING OFFICER. The Senator from Pennsylvania had the floor originally and he yielded to the Senator from Montana.

Mr. SCOTT. Mr. President, I will yield the floor after I have an opportunity to ask the majority leader this question. Does the majority leader expect any further votes tonight?

Mr. MANSFIELD. No.

Mr. SCOTT. I yield the floor.

Mr. HOLLAND. One of the two bills that the Senator referred to is a banking tax bill which the Senator from Alabama and the Senator from Utah had expected to take up earlier today, but they have been unable to do so. May that bill be taken up in the morning?

Mr. MANSFIELD. Yes. The Senator from Alabama was called away on official business unexpectedly. He will be back at 10:30 or so tomorrow morning, and upon his return we will take up the two conference reports.

## ORDER FOR A BRIEF PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Does the Senator from Montana wish the statements to be limited to 3 minutes?

Mr. MANSFIELD. Not now, not with a morning hour in the afternoon.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON REAPPORTIONMENT OF AN APPROPRIATION

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of the Interior for "Management of lands and resources," Bureau of Land Management, for the fiscal year 1970, has been apportioned on a basis which indicates a need for a supplemental estimate of appropriation; to the Committee on Appropriations.

PROPOSED LEGISLATION RELATING TO THE NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

A letter from the Chairman, National Foundation on the Arts and the Humanities, Washington, transmitting a draft of proposed legislation to amend the National Foundation on the Arts and the Humanities Act of 1965, as amended (with an accompanying paper); to the Committee on Labor and Public Welfare.

## PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution adopted by the City Council of Pomona, Calif., remonstrating against certain statements published in the National Enquirer.

## REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. MAGNUSON, from the Committee on Commerce, without amendment:

S. 2244. A bill to amend section 212(a) of the Interstate Commerce Act, as amended, and for other purposes (Rept. No. 91-605).

By Mr. HARTKE, from the Committee on Commerce, with amendments:

H.R. 8449. An act to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1906 (Rept. No. 91-604).

## BILLS INTRODUCED

Bills were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. SPONG:

S. 3236. A bill to amend the Public Health Service Act to establish the eligibility of new schools of medicine, dentistry, osteopathy, pharmacy, optometry, veterinary medicine, and podiatry for grants under the existing program of grants to improve the quality of such schools; to the Committee on Labor and Public Welfare.

By Mr. GOODELL (for himself, Mr. BROOKE, Mr. CANNON, Mr. HATFIELD, Mr. JAVITS, Mr. PERCY, Mr. PACKWOOD, Mr. SAXBE, and Mr. SCOTT):

S. 3237. A bill to authorize the Secretary of Health, Education, and Welfare to make grants to conduct special educational programs and activities concerning ecological-environmental education, and to establish a National Advisory Commission on Technology and the Environment; to the Committee on Labor and Public Welfare.

(The remarks of Mr. GOODELL when he in-

troduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. JAVITS (for himself, Mr. PELL, Mr. CRANSTON, Mr. MURPHY, and Mr. NELSON):

S. 3238. A bill to amend the National Foundation on the Arts and Humanities Act of 1965, as amended; to the Committee on Labor and Public Welfare.

(The remarks of Mr. JAVITS when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. JAVITS (for himself and Mr. GOODELL):

S. 3239. A bill to amend section 302(b) of the National Housing Act; to the Committee on Banking and Currency.

(The remarks of Mr. JAVITS when he introduced the bill appear later in the RECORD under the appropriate heading.)

## S. 3237—INTRODUCTION OF THE ENVIRONMENTAL RECLAMATION EDUCATIONAL ACT OF 1969

Mr. GOODELL. Mr. President, Americans of 1969 are in some ways born into the most enlightened age in history.

Propelled on the strength of a revolution in science and technology, our country has evolved from a rural to a predominantly urban Nation that finds itself on the moon and rocketing beyond.

In less than 200 years—blessed with that particular grace shed upon her by divine providence—America has turned her remarkable energies from the fertility of her soil, to the engine of the industrial revolution, to the metabolism of urbanization.

Yet in terms of their knowledge of their environment and of ecology itself—"the great chain of life"—our people may be said to be living in the stone age. In a sense, they might easily believe that the earth is flat, the oceans bottomless, and our atmosphere limitless.

They have little understanding in an immediate, personalized way of the challenge to our survival posed by our deteriorating environment.

At the heart of that deterioration is planless industrialization, urbanization, and the population explosion. Together they have combined to threaten seriously the continuation of life on this planet.

World population will double by the year 2000.

Here in the United States, land is being urbanized at the rate of 3,000 acres per day.

Waste producing concentrations of people and industry are fouling our air, polluting our water and contaminating our land at a frenetic pace.

As one indication of this, we are spewing 150 million tons of pollutants into our atmosphere annually.

In the last few years, State and Federal governments have begun to move firmly toward control of air and water pollution in the United States.

If, however, we are to survive in a society which uses enormous amounts of matter and energy, I believe that we must create a broad understanding among our people of the complex public issues involved in the maintenance of environmental quality, and the preservation of the delicate, life sustaining ecological cycle.

Mr. President, I believe that it is a matter of the utmost urgency that we embark upon a national effort to create a citizenry that is sensitive and alert to the need for developing informed attitudes of concern for environmental quality. We must sow the seeds of such awareness throughout the entire continuum of American education. We must plant those seeds for tomorrow, and we must marshal the entire community in the effort.

To assist in this objective, I introduce the Environmental Reclamation Education Act of 1969, on behalf of myself and Senators BROOKE, CANNON, HATFIELD, JAVITS, PERRY, PACKWOOD, SAXBE, and SCOTT.

Title I of the bill authorizes the Secretary of Health, Education, and Welfare to develop a truly national environmental-ecological education program ranging from the preschool to the graduate school level. A 3-year $37 million authorization is recommended.

It contemplates the utilization of such programs—which will include curriculum development and teacher training—in State and local school systems, institutions of higher education, adult education courses, community action programs, and in educational television.

It also authorizes the establishment throughout the Nation of a system of regional ecological-environmental education centers, which would develop, collect, and disseminate to the general public information, materials, data, and statistics concerning—

First, the specific ecological-environmental problems peculiar to their particular regions;

Second, the nature, sources, causes, extent, prevention, control and abatement of air and water pollution, and activities affecting undesirable environmental and ecologic change;

Third, establish requirements for the control of emissions of air contaminants and water pollutants, including relevant State and local laws and public hearing requirements, and the enforcement thereof;

Fourth, the present and prospective impact of technology upon the environment and the ecological cycle;

Fifth, methods for monitoring atmospheric waste, the measurement and forecasting of air and water pollution, and the identification of significant meteorological, geographical, and ecological factors within their particular regions; and

Sixth, environmental and ecological factors related to long-term urban and regional planning.

Our people must be marshaled in the effort to preserve our environment through the long-term approach of education.

They must realize that environmental deterioration is not a plague visited upon their community by one industry or group. It is the common problem of all, the inevitable accompaniment of social activity in a producer-consumer society.

While American technology has contributed significantly to the unprecedented economic and social progress of the United States, its development in some instances has been without adequate consideration of its consequences upon the human environment. It is clearly desirable that we have a broad overview of technological developments, their applications, and their impact upon our society in environmental and ecological terms.

Certainly within the Federal Government particular attention must be given to this question in the context of Federal policy priorities and objectives.

It is hoped that the Federal Government can point the way—for State and local governments and the private sector—to more responsible management of technological change consistent with our national environmental goals.

Title II of my bill would create a National Advisory Commission on Technology and the Environment to examine the capacity of the Federal Government to accomplish this at the present time.

It would investigate, analyze and recommend methods to identify deficiencies in the existing processes of governmental assessment and decisionmaking, as they relate to the continuing evolution and impact of technology upon the quality of our environment.

Mr. President, we are approaching the 200th anniversary of the birth of our Nation. We have long since mastered her mountains and plains with physical and social organization, communication, transportation, and economics.

In some respects and in many areas America is monotonous, faceless, and out of touch with nature. The air is foul, the water black, the streets crowded and dangerous. The vast, suffocating urban colossus imposed on so many of our people causes many to doubt our ability to manage effectively ever again the quality of our environment.

What is needed to meet this challenge to mind, body, and spirit is a national commitment to effective substantive programs to clean up and police our environment.

President Nixon has already committed his administration to a national approach to environmental protection, with the establishment of the Environmental Quality Council. I am confident that he will move decisively in this area.

What is called for in addition is a new kind of patriotism—rooted in the very soil, air and waters of America—which seeks to preserve and protect our life sustaining environmental resources for the benefit of present and future generations of Americans.

Environmental education can be the catalyst of that new patriotism—a challenge and a determination to develop a better informed, more effective citizenry willing and able to meet the threat of our degraded environment.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3237) to authorize the Secretary of Health, Education, and Welfare to make grants to conduct special educational programs and activities concerning ecological-environmental education, and to establish a National Advisory Commission on Technology and the Environment, introduced by Mr. GOODELL, for himself and other Senators, was received, read twice by its title, referred to the Committee on Labor and Public Wel-

fare, and ordered to be printed in the RECORD, as follows:

S. 3237

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Environmental Reclamation Education Act of 1969".

TITLE I—ECOLOGICAL-ENVIRONMENTAL EDUCATION PROGRAMS—STATEMENT OF PURPOSE

SEC. 101. (a) The Congress hereby finds and declares that air and water pollution, environmental debasement, industrial and technological development which interferes with the ecological cycle, and the denuding of our land poses a serious threat to the health, strength and vitality of the people of our nation, the propagation and protection of plant and animal life and the protection of property and other resources; that the tremendous growth of population and industry has resulted in substantial increases in atmospheric waste, and air and water pollution throughout the United States; that such abuse of the environment and interference with the ecological cycle is increasing, particularly in our urban and suburban areas; that there is a lack of authoritative information and creative projects designed to educate the American people about meeting the threat posed to our environment and to life itself, by industrialization and technological development, undertaken without regard to their long term effects and upon our environment and the ecologic cycle; and that public support and understanding of the need for prevention and control of such environmental abuse requires intensive and coordinated efforts on the part of Federal, State and local governmental agencies, business and other private organizations, and community action groups.

(b) It is the purpose of this title to encourage the development of new and improved programs in the field of ecological-environmental education for use in State and local school systems, institutions of higher education, adult education courses, community action programs and in educational television programing, to encourage the development of curricula and teacher training programs in such field at all educational levels, including community education programs; and to demonstrate the use of such curricula in model educational programs and to evaluate the effectiveness thereof.

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. There are hereby authorized to be appropriated $10,000,000 for the fiscal year beginning July 1, 1970, $12,000,000 for the fiscal year beginning July 1, 1971, and $15,000,000 for the fiscal year beginning July 1, 1972 for the purposes of carrying out this title. Sums appropriated pursuant to this section shall remain available until expended.

USES OF FUNDS

SEC. 103. From the sums appropriated pursuant to section 102, the Secretary of Health, Education, and Welfare, hereinafter referred to in this Act as the "Secretary," shall assist in educating the American people on the problems of environmental abuse and the long term consequences of advertent and inadvertent interference with the ecological cycle by—

(1) making grants to or entering into contracts with institutions of higher education and other public and private agencies, institutions, or organizations, for—

(A) the development and implementation of ecological-environmental education programs, including curriculum developments, for use in State and local school systems, institutions of higher education, community education programs, including seminars, workshops, conferences, and summer camps, and in educational television:

(B) the formulation and organization within institutions of higher education of integrated courses of study in the field of ecological-environmental education leading toward the establishment of degree-granting programs in such field;

(C) the development of specialized teacher-training program in the field of ecological-environmental education at all educational levels;

(D) the establishment of a system of regional ecological-environmental education centers, which shall develop, collect, and disseminate to the general public information, materials, data, and statistics, concerning—

(i) the specific ecologial-environmental problems peculiar to their particular regions;

(ii) the nature, sources, causes, extent, prevention, control, and abatement of air and water pollution and activities affecting undesirable environmental and ecologic change;

(iii) established requirements for the control of emissions of air contaminants and water pollutants, including relevant State and local laws and public hearing requirements, and the enforcement thereof;

(iv) the present and prospective impact of technology upon the environment and the ecological cycle;

(v) methods for monitoring atmospheric waste, the measurement and forecasting of air and water pollution and the identification of significant meteorological, geographical, and ecological factors within their particular regions; and

(vi) environmental and ecological factors related to long-term urban and regional planning; and

(E) the establishment of State and local councils to encourage ecological-environmental education among the general public, utilizing the resources of institutions of higher education, schools and regional education centers created pursuant to clause 1 (D) of this section; and

(2) undertaking, directly or through contracts or other arrangements with institutions of higher education, and public and private agencies, institutions, and organizations, evaluation of the effectiveness and relevance of the program funded pursuant to clause (1) of this section.

ADVISORY COUNCIL ON ECOLOGICAL-ENVIRONMENTAL EDUCATION

SEC. 104. (a) An Advisory Council on Ecological-Environmental Education (hereinafter referred to as the "Council") is hereby created to—

(1) advise the Secretary concerning the preparation and implementation of regulations and criteria governing programs funded pursuant to the provisions of this title; including criteria designed to achieve an appropriate geographical distribution of funded projects throughout all regions of the Nation;

(2) evaluate such applications for grants and contracts made pursuant to the provisions of this title as the Secretary may direct, and make recommendations to the Secretary concerning approval or disapproval of such applications;

(3) review the administration and operation of programs funded pursuant to this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, making recommendations with respect thereto, and making annual reports of its findings and recommendations to the Secretary;

(4) receive and review progress and evaluation reports on programs and projects carried out under this title; and

(5) propose comprehensive ecological-environmental education goals toward which unified national action can be directed.

(b) The Council shall consist of twenty-one members, including the Secretary of Housing and Urban Development, the Secretary of Transportation, and the Secretary of the Interior or their duly designated nominees, the Science Advisor to the President, the Chairman, President's Council on Environmental Quality, the United States Commissioner of Education, the Surgeon General of the United States, the Director, United States Public Health Service, the Director, National Institute of Mental Health and twelve other persons appointed by the President who shall select such persons from the public and private sector with due regard to their fitness, knowledge and experience in academic, scientific, medical, legal, conservation, urban and regional planning, and information media activities, as they relate to our industrialized consumer-oriented society, and its effect upon our environment and the ecologic balance.

(c) Members of the Council not regularly employed by the Federal Government shall, while serving on the business of the Council, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $125 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5 of the United States Code for persons in the Government service employed intermittently.

TECHNICAL ASSISTANCE

SEC. 105. The Secretary shall, when requested, render technical assistance to local educational agencies, public and private nonprofit organizations and institutions of higher education in the development and implementation of programs of ecological-environmental education. Such technical assistance may, among other activities, include making available to such agencies, organizations, or institutions personnel of the Department of Health, Education and Welfare or other persons qualified to advise and assist the development and carrying out of such education programs.

PAYMENTS

SEC. 106. Payments under this title may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

ADMINISTRATION

SEC. 107. In administering the provisions of this title, the Secretary is authorized to utilize the services and facilities of any agency of the Federal Government and of any other public or private agency or institution in accordance with appropriate agreements, and to pay for such services either in advance or by way of reimbursement, as may be agreed upon.

TITLE II—NATIONAL ADVISORY COMMISSION ON TECHNOLOGY AND THE ENVIRONMENT

STATEMENT OF PURPOSE

SEC. 201. (a) The Congress hereby finds and declares that American technology has contributed significantly to the unprecedented economic and social progress of the United States and its people; that technological advancement has proceeded without adequate consideration of its consequences upon the human environment; that industrial and technological advancement has created certain adverse effects upon our environment and the ecological cycle upon which all life depends; that new, independent, institutionalized organizations are needed within the Federal Government to assess on a continuing basis the impact of the growth and spread of various technologies upon national environmental goals and resources; that decisions affecting the course of technology and its long term effects upon environment require the broadest possible public participation, and should not be delegated solely to governmental, business, scientific and political interests; and that the future of American technology can best promote the continued economic and social advancement of the Nation, if systematic assessment of the nature and effects of its development is undertaken.

(b) It is the purpose of this title to create an Advisory Commission to investigate, analyze and recommend methods to identify deficiencies in existing processes of assessment and governmental decision-making with respect to the evolution of technology and its adverse effect upon environmental quality and ecological regimes.

ESTABLISHMENT OF COMMISSION

SEC. 202. There is hereby established an Advisory Commission on Technology and the Environment (hereinafter referred to as the "Commission").

MEMBERSHIP

SEC. 203. (a) The Commission shall be composed of twenty-one members to be appointed by the President from the public and private sector with due regard to their fitness, knowledge and experience in scientific, medical, legal, public administration, social and physical science, business, and local, State and Federal Government activities. Representatives of the public at large shall be included. Not more than eight members shall be full time employees of the United States.

(b) Any vacancy in the Commission shall not affect its powers.

(c) The President shall designate one of the members to serve as Chairman and one to serve as Vice Chairman of the Commission.

(d) Eleven members of the Commission shall constitute a quorum.

DUTIES OF THE COMMISSION

SEC. 104. (a) The Commission shall undertake a comprehensive investigation and study of the present and prospective impact of technology upon the environment and the ecological cycle, and the existing governmental processes of assessment and decisionmaking with respect to the evolution of technology in the United States as it relates to environmental quality. It shall include without being limited to—

(1) an analysis and evaluation of particular areas of technology by contracting with institutions of higher learning and other private nonprofit organizations to undertake studies of specific problems defined and selected by it, except that such problems shall involve technological developments or applications that are sponsored by the Federal Government or are otherwise affected in a direct way by federal activity or regulation;

(2) an analysis, review, and evaluation of basic research on the subject of technological development and its impact upon the environment;

(3) a review and evaluation of specific assessments of present and future technological impact upon the environment made by Government agencies and departments, including criteria and procedures employed in the assessment process, the nature and technical adequacy of the evidence relied upon, and the representation of potentially affected interests; and

(4) an analysis and evaluation of continuing assessment systems in relevant departments and agencies of the Federal Government and in the Congress.

(b) The Commission shall transmit to the President and to the Congress interim reports and, not later than three years after the first meeting of the Commission, one final report, containing detailed statements of the findings and conclusions of the Commission, together with its recommendations, including such recommendations for legislation and administrative action as it deems advisable.

POWERS OF THE COMMISSION

SEC. 205. (a) The Commission or, on the authorization of the Commission, any subcommittee or members thereof, may, for the purpose of carrying out the provisions of this title, hold such hearings, take such testimony, and sit and act at such times and places as the Commission deems advisable.

(b) Each department, agency, and instrumentality of the executive branch of the Government, including independent agencies, is authorized and directed to furnish to the Commisison, upon request made by the Chairman or Vice Chairman, such information as the Commission deems necessary to carry out its functions under this title.

(c) Subject to such rules and regulations as may be adopted by the Commission, the Chairman shall have the power to—

(1) appoint and fix the compensation of an executive director, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate for GS–18 of General Schedule under section 5332 of such title, and

(2) procure temporary and intermittent services of the same as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $50 a day for individuals.

(d) The Commission is authorized to enter contracts with Federal or State agencies, private firms, institutions, and individuals for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

COMPENSATION OF MEMBERS

SEC. 206. Members of the Commission not otherwise employed by the Federal Government shall receive compensation at the rate of $100 per day for each day they are engaged in the performance of their duties as members of the Commission. All members shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incured by them in the performance of their duties as members of the Commission.

APPROPRIATIONS AUTHORIZED

SEC. 207. There is hereby authorized to be appropriated for the purpose of this title the sum of $1,000,000 for the fiscal year beginning July 1, 1970; $1,000,000 for the fiscal year beginning July 1, 1971; and $1,000,000 for the fiscal year beginning July 1, 1972.

TERMINATION

SEC. 208. On the nineteenth day after the date of submission of its final report to the President, the Commission shall cease to exist.

## STATEMENT OF SENATOR HUGH SCOTT COSPONSORING THE ENVIRONMENTAL EDUCATION RECLAMATION ACT

Mr. SCOTT. Mr. President, I am pleased to be among those who have joined today with the distinguished Senator from New York (Mr. GOODELL) in the introduction of the Environmental Reclamation Education Act of 1969. It is the purpose of this bill to enhance the preservation and protection of our life sustaining environmental resources for the benefit of present and future generations of our citizens. As such, this legislation represents a major, substantive effort to improve the quality of American life.

President Nixon has already committed his administration to a national approach to environmental protection through the establishment of the Environmental Quality Council. I have every confidence that decisive moves in this area will be forthcoming.

The Environmental Reclamation Education Act offers such an opportunity. It would authorize the Secretary of Health, Education, and Welfare to develop a truly national environmental educational program ranging from the preschool to graduate school level. Proper emphasis on a curricula development and teacher training would be provided. Adult education courses, community action programs and the use of educational television are also contemplated as a part of this broad, national approach which would be funded under an initial 3-year authorization of $37 million.

Title II of this act would create a National Advisory Commission on Technology and the Environment to examine both the impact of technological change on the environment, and the ability of the decisionmaking and other governmental processes to deal effectively with environmental concerns.

Mr. President, only an informed citizenry can act willingly and intelligently to reverse the trends which threaten to continue to degradation of our environment. Our bill has this as its goal, and I urge early and favorable consideration.

## ADDITIONAL COSPONSOR OF BILL

S. 3220

Mr. MANSFIELD. Mr. President, I ask unanimous consent that, at the next printing, the name of the Senator from Wisconsin (Mr. PROXMIRE) be added as a cosponsor of S. 3220, to protect a person's right of privacy by providing for the designation of obscene or offensive mail matter by the sender and for the return of such matter at the expense of the sender.

The PRESIDING OFFICER. Without objection, it is so ordered.

## EXTENSION OF PUBLIC HEALTH PROTECTION WITH RESPECT TO CIGARETTE SMOKING—AMENDMENT

AMENDMENT NO. 419

Mr. COTTON submitted an amendment, intended to be proposed by him, to the bill (H.R. 6543) to extend public health protection with respect to cigarette smoking, and for other purposes, which was ordered to lie on the table and to be printed.

## FOREIGN ASSISTANCE ACT OF 1969—AMENDMENTS

AMENDMENTS NOS. 420 AND 421

Mr. GOODELL submitted two amendments, intended to be proposed by him, to the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 422

Mr. MUSKIE (for himself, Mr. MAGNUSON, Mr. PACKWOOD, Mr. HART, Mr. CRANSTON, Mr. DODD, and Mr. JACKSON) submitted amendments, intended to be proposed by them, jointly, to House bill 14580, supra, which were ordered to lie on the table and to be printed.

(The remarks of Mr. MUSKIE when he submitted the amendments appear later in the RECORD under the appropriate heading.)

AMENDMENT NO. 423

Mr. KENNEDY. Mr. President, I submit an amendment intended to be proposed by me to H.R. 14580, the pending Foreign Aid Authorization Act of 1969. The purpose of the amendment is to establish a modest pilot program of loan guaranties for community self-development in Latin America. The principal feature of the amendment is its emphasis on Latin America financing for Latin American development. Today, loan guaranties from the Agency for International Development are available only for U.S. investments in foreign countries. The amendment I have proposed will encourage Latin American banks and other private sector institutions to lend funds for community development projects in their own nations. In so doing, it will promote a system of joint participation by both the rich and the poor in Latin American development.

Under the amendment, a 3-year pilot loan guaranty programs could be established in no more than five Latin American countries, and the total amount of loans outstanding at any one time would be $15 million.

Mr. President, I ask unanimous consent that the amendment be printed at this point in the RECORD.

The PRESIDING OFFICER. The amendment will be received and printed and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 423) is as follows:

AMENDMENT NO. 423

On page 89, insert the following new part after line 12:

PART IV—AGRICULTURAL CREDIT AND SELF-HELP COMMUNITY DEVELOPMENT PROJECTS

"SEC. 401. Title III of part I of the Foreign Assistance Act of 1961, which relates to investment guaranties, is amended by adding at the end thereof the following new section:

"'225. Agricultural credit and self-help community development projects

"'(a) It is the sense of the Congress that in order to stimulate the participation of the private sector of Latin American countries in the economic development of such countries, the authority conferred by this section should be used to establish pilot programs in not more than five Latin American countries to encourage private banks, credit institutions, similar private lending organizations, cooperatives, and private nonprofit development organizations to make loans on reasonable terms to organized groups and individuals residing in a community for the purpose of enabling such groups and individuals to carry out agricultural credit and self-help community development projects for which they are unable to obtain financial assistance on reasonable terms. Agricultural credit and assistance for self-help community development projects should include, but not be limited to, material and such projects as wells, pumps, farm machinery, improved seed, fertilizer, pesticides, vocational training, food industry development, nutrition projects, improved breeding stock for farm animals, sanitation facilities, and looms and other handicraft aids.

"'(b) To carry out the purposes of subsection (a), the President is authorized to issue guaranties, on such terms and conditions as he shall determine, to private lending institutions, cooperatives, and private nonprofit development organizations in not more than five Latin American countries assuring against loss of not to exceed 25 per centum of the portfolio of such loans made by any lender to organized groups or individuals residing in a community to enable such groups or individuals to carry out agricultural credit and self-help community development projects for which they are unable to obtain financial assistance from other sources on reasonable terms. In no event shall the liability of the United States exceed 75 per centum of any one loan.

"'(c) The total face amount of guaranties issued under this section outstanding at any one time shall not exceed $15,000,000. Not more than 10 per centum of such sum shall be provided for any one institution, cooperative, or organization.

"'(d) Notwithstanding the limitation contained in subsection (c) of this section, foreign currencies owned by the United States and determined by the Secretary of the Treasury to be excess to the needs of the United States may be utilized to carry out the purposes of this section, including the discharge of liabilities incurred under this section. The authority conferred by this subsection shall be in addition to authority conferred by any other provision of law to implement guaranty programs utilizing excess local currency.

"'(e) The President shall, on or before January 15, 1972, make a detailed report to the Congress on the results of the pilot programs established under this section, together with such recommendations as he may deem appropriate.

"'(f) The authority of this section shall continue until June 30, 1972'."

AMENDMENT NO. 424

Mr. JAVITS (for himself, Mr. ALLOTT, Mr. BENNETT, Mr. BROOKE, Mr. CRANSTON, Mr. DOLE, Mr. FONG, Mr. GOODELL, Mr. HART, Mr. MCGEE, Mr. MILLER, Mr. PELL, Mr. SCHWEIKER, Mr. SCOTT, Mr. SMITH, Mr. STEVENS, and Mr. WILLIAMS of New Jersey) submitted an amendment, intended to be proposed by them, jointly, to H.R. 14580, supra, which was ordered to lie on the table, and to be printed.

(The remarks of Mr. JAVITS when he submitted the amendment appear later in the RECORD under the appropriate heading.)

## NOTICE OF HEARINGS ON S. 5

Mr. MONDALE. Mr. President, as chairman of the Special Subcommittee on the Evaluation and Planning of Social Programs, I wish to give notice that the current series of hearings on S. 5, the proposed Full Opportunity Act, will resume on next Tuesday, December 16. The hearing will begin at 10 o'clock in the morning in room 1318.

Witnesses to be heard by the subcommittee are Mr. Joseph A. Califano, Jr., and Prof. Ernest Hilgard of Stanford University.

Other members of the subcommittee are the Senator from Wisconsin (Mr. NELSON), the Senator from Missouri (Mr. EAGLETON), the Senator from California (Mr. CRANSTON), the Senator from New York (Mr. JAVITS), the Senator from Vermon (Mr. PROUTY), and the Senator from Illinois (Mr. SMITH).

## HIGHWAY SAFETY BUREAU

Mr. RIBICOFF. Mr. President, Secretary of Transportation John Volpe recently announced the appointment of a new Director for the Highway Safety Bureau and a reorganization of the agency. I commend Secretary Volpe on his choice of Mr. Douglas Toms to head the Bureau. He is well qualified for the post and will bring new energy and direction to a program that has been stagnated and leaderless for nearly 10 months.

The reorganization of the Bureau, removing it from the Federal Highway Administration and placing it directly under the office of the Secretary, is a significant decision. For months the safety program has been seriously limited by inadequate organization. Given the priority it deserves, the program should begin to achieve the results we all hoped it would.

Mr. President, for more than 6 months I have urged that the Safety Bureau be given independent status within the Department of Transportation. I am highly gratified that Secretary Volpe has taken this step and am confident it will improve the effectiveness of the safety program.

I ask unanimous consent that the text of Secretary Volpe's announcement and a brief biography of Mr. Toms be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SECRETARY JOHN A. VOLPE AT PRESS CONFERENCE WITH DOUGLAS TOMS, FRIDAY, DECEMBER 5, 1969

One of the most disturbing and distressing problems facing me as Secretary of Transportation is the fact that we are killing 55-thousand people on our streets and highways every year. We are determined to stop this slaughter.

Yesterday, President Nixon announced his nomination of Douglas Toms of Olympia, Washington, to be Director of one of our Department's most important constituent agencies, the National Highway Safety Bureau.

We are extremely fortunate to have obtained Mr. Toms services. He is eminently qualified and is a widely-recognized expert in the field of highway safety.

We have spent considerable time in filling this most-important post, but we took the time because the responsibilities and challenges are such that a truly top caliber official had to be found. We needed a leader who was not only capable and skilled, but also dedicated and concerned. Doug Toms is just such a person.

He has served as my special consultant for highway safety since September. He has thoroughly reviewed the present organization and programs of the Highway Safety Bureau and has filed a report with me containing a number of recommendations. He did his job well, and we are giving all his recommendations thoughtful consideration.

One of the recommendations that I have acted upon concerns the status and position of the Bureau.

The enabling act that created the Highway Safety Bureau allowed for it to be placed under the immediate direction of the Secretary of Transportation. By administrative action, however, it was subsequently placed under the Federal Highway Administration. We are, today, reversing that action and placing the Bureau directly under the Office of the Secretary.

Such action has been recommended on two previous occasions—by the following statutory groups—this past summer.

The National Motor Vehicle Safety Advisory Council and

The National Highway Safety Advisory Committee.

We feel that this will allow us to give safety the attention and emphasis it demands and deserves.

All of the N-H-S-B functions relating di-

rectly to motor vehicles and their drivers will come under the Office of the Secretary. Several other functions, such as safety design engineering in the construction of new highways, will remain in the Federal Highway Administration.

The actions we are taking now—the appointment of Doug Toms and the initial realignment of highway safety responsibilities—are first steps. We now have our man, and we now have our organization in the right place. We will follow these first steps with a fulfillment of our responsibilities as we work strenuously to assure that our highways and vehicles are safer, and that the terrible toll of over 150 Americans killed in crashes every day will be cut sharply.

Safety—in all aspects and all modes—has top priority in this Department. We look forward to significant accomplishments.

---

BIOGRAPHY OF DOUGLAS W. TOMS, DIRECTOR-DESIGNATE, NATIONAL HIGHWAY SAFETY BUREAU

Mr. Toms has served in the field of traffic management since 1960 having been successively as an an educator, consultant, and administrator in that field. At the time of his appointment by President Nixon, Mr. Toms was serving as Special Consultant to Secretary of Transportation John A. Volpe for Highway Safety and was on leave of absence from his position as Director of the Department of Motor Vehicles for the State of Washington.

Born: September 17, 1930, Michigan.

Legal residence: State of Washington.

Home address: 1907 Lakehurst Drive Olympia, Washington 98502.

Marital status: Wife, Geraldine: children, Gregory.

Education: Central Michigan University, BS, Accounting; Michigan State University, MA, Traffic Administration, and he has completed all work except the dissertation towards a Ph. D. with the emphasis in Traffic Administration at Michigan State University.

Experience: Since March, 1965, Director, Department of Motor Vehicles of the State of Washington and for two months prior was Acting Director. In 1964, he served as consultant to the Department of Licenses and the Legislature of the State of Washington. From 1960 through 1964, Mr. Toms was an Assistant Professor at California State College at Los Angeles.

Professional memberships: President of the American Association of Motor Vehicle Administrators; former National Chairman of the Registration and Title Commission; past chairman of the Driver Licensing Committee of Region IV; former member of the U.S. Air Force Traffic Safety Advisory Committee; in 1963–1964, he was Conference Chairman of the California Driver Education Association.

---

## THE VICE PRESIDENT HONORS HIS FATHER

Mr. DOLE. Mr. President, last evening the Vice President spoke in Baltimore at a dinner organized to honor the memory of his late father, Theodore Spiro Agnew.

The theme of his Greek heritage led the Vice President into an exploration of the present-day status of what the ancient Greeks considered man's most enobling endeavor, the pursuit of knowledge. Mr. AGNEW raised many well-considered and highly pertinent questions about education in America and its role, influences and responsibilities today and in the coming years. I commend these thought-provoking observations to the Senate.

Mr. President, I ask unanimous consent that Vice President AGNEW's remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ADDRESS BY THE VICE PRESIDENT, THEODORE SPIRO AGNEW SCHOLARSHIP FUND DINNER, BALTIMORE, MD., DECEMBER 10, 1969

I am grateful for your presence tonight. More than an honor to me, it is a profound tribute to the memory of my father. Many of you knew him, knew the kind of man he was and knew that such men are rare in any community—at any time.

I am proud to say that I grew up in the light of my father. My beliefs are his and my father believed deeply in America. My father was deeply involved in the life of the Greek community, for this, to him, was part of being an American.

"My Brother Ahepans" he said eight years ago, "Who better understands the true value of freedom and dignity than *we* . . . who are the direct descendants of the authors of those principles—the Ancient Hellenes? Who better understands the true value of freedom and dignity than *we* who have matured and prospered in the workshop of democracy, the United States of America?"

This Ahepa-conceived Scholarship Fund is particularly appropriate to honor my father's memory, for he cherished education as the key to a better life. That belief is Greek as much as it is American.

Pericles, the father of the first democratic state, said in the fifth century before Christ, "Athens is the school of Hellas." The Athenian ideal was that of the free citizen in the free state. But a state of freedom was never a state of ignorance. Education was, and always will be, integral to civilization.

As Pericles said, "The grave impediment to action is . . . not discussion, but the want of that knowledge which is gained by discussion preparatory to action." Courage from conviction distinguishes the free and civilized citizen.

To Socrates, to Plato, to Aristotle, all education served the soul. The Golden Age of Greece gave birth to the concept that public education was prerequisite to intelligent citizenship. Twenty centuries before Thomas Jefferson, Aristotle connected the public and private interest with cultivation of the mind as a free society's ultimate aim.

Never was there a separation of individual and collective good nor was there a distinction between a life of pleasure and a life of civic fulfillment. The Athenian spirit was not only to live but to live well. Civic duty was an honor, and a life balancing work and comfort was the goal. Neither property nor prosperity were vices, only their misuse or a misunderstanding of their value was deplored.

This is our Greek heritage—deeply philosophical and political—and while the world has grown in technical prowess, it has never surpassed the Athenian ideal of free citizenship. Ancient Athens remains the school of civilized nations. And from ancient Athens we can draw lessons of good and evil applicable today.

The rise and fall of all free nations mirrors the rise and fall of Athens. The overall lesson is that freedom and the good life are demanding possessions. To use them well and possess them permanently, discipline and education are required.

If I am known to raise my voice in criticism, it is because I see danger in our nation's course. Because America, like ancient Athens, can become foolish and corrupt; because a life of ease is not synonymous with a life of fulfillment; and because no generation can confer wisdom upon its children. Each generation must work to earn its own.

Heraclitus, one of Greece's earliest philosophers, perceived that all is flux. Change is the only constant. Arcesilaus, the skeptic, said, "Nothing is certain, not even that." Is this not true of today? Power is ephemeral and no excuse for conceit. Freedom, prosperity, moral and military strength are evanescent, not eternal. They cannot be secured once and then forgotten but must be carefully and continuously cultivated.

Education is the source to replenish a free society. America understands renewal and reform. We labor to renew our cities and reform our government. Yet we have left education—the source—relatively untouched. Of course, we have expanded and multiplied educational opportunities. We have had added preschool programs, community colleges, and enlarged universities to multiversities. But we have not sufficiently probed to the essence of the pure institution, and this explains much of our present problem.

By inclination, Americans think quantitatively. We are appreciators of the bigger. The danger in this lies in possible error in the original assumption. If what we are doing is not right to begin with, quantitative adjustments compound the wrong.

We have sometimes failed to perceive that as times change, we must not only change our programs but our premises governing education. Albert Einstein once defined education as "that which remains after you have forgotten everything you learned in school." Yet the American public continues to think of education as a terminal process limited to the youthful years of life. In a society where skilled laborers must learn new techniques six times before retirement, where 50 percent of technical engineering knowledge becomes obsolete within a decade, where 70 percent of all knowledge that will serve our present student generation during their lives is as yet unknown and undiscovered . . . it is time to stop regarding education as circumscribed by a particular period of a lifetime.

We must stop developing educational programs for twelve years, or sixteen, or twenty years and start creating programs that gear themselves to useful, satisfying lives.

In the first place, the penchant for clustering higher education in the post adolescent decade adversely affects the human spirit. We are consigning a huge group of our young citizens to an academic limbo totally alien to their human instincts. Whether we realize it or not, whether we intend it or not, we have created a disenfranchised social class called youth.

How? Although our young population—between the ages of eleven and twenty-five—has not grown disproportionately, the proportion of young people in school has increased dramatically. High school attendance has doubled in two decades; 94 percent of our young people attend high school; 75 percent graduate from high school; and in higher education, the growth is even greater. College enrollment has tripled in twenty years; 40 percent of all young people attend college for at least a year. Including advanced technical training, the figure approaches 50 percent.

By pricing teen-age labor out of the market and expanding secondary and higher education, we have stretched post-adolescent dependency a full ten years. While the age of physical maturity has declined, we have confined a generation on campuses at a point in life when their fathers and grandfathers were supporting households. We have subsidized youths' education at the expense of many of their human rights. And society, in many cases, has forced its youth into an academic mold alien to their aptitudes or inclinations. The distinguished psychologist, Dr. Bruno Bettelheim, writes of higher education's debilitating effect;

"What makes for adolescent revolt is the fact that a society keeps the next generation too long dependent in terms of mature responsibility and a striving for independence . . . . all too many who now go to college have little interest, ability, and use for what constitutes a college education. They would be better off with a high level vocational education which is closely linked to a work program which gives scope to their needs for physical activity and visible, tangible

achievement. The complaint of many of these students is that nobody needs them. They feel parasites of society, and hence, come to hate a society which they think makes them feel this way."

In our reverence for education and our desire to do right by our children, we have inadvertently denied this generation's right to participate as mature citizens. The damage it does to the individual is no greater than the damage it does to the university. Denied political participation in the real community, the youth seeks to politicize the only community he has, the academic one. This defeats the purpose of the university which journalist William Shannon notes:

". . . . is to transmit knowledge and wisdom and to enhance them by research and study. The university is not a forum for political action. It is not a training ground for revolutionaries. It is not a residential facility for the psychiatrically maladjusted. It is not a theater for the acting out of racial fears and phantasies."

As we demean, we pervert. Consider the single problem of those black students, trapped by the best intentions into a situation where he cannot compete. The demands for black studies, black dormitories, special black grading systems, are often smoke-screens evading the basic failure in black primary and secondary education. Brandeis professor and former Presidential Aide, John P. Roche, sees black separatism on the campus as a last ditch attempt for survival by culturally deprived students who have been admitted to college just because they came from inner city ghettos. They are bright, but unprepared to compete with their highly articulate classmates. Without swimming lessons, they have been dumped in the mainstream and they are not going to drown without a struggle. Bayard Rustin, pioneer in civil rights and Executive Director of the Philip Randolph Institute, takes a harder line:

"Everyone knows that education for the Negro is inferior. Bring them to the University with the understanding that they must have (the) remedial work they require. The easy way out is to let them have black courses and their own dormitories and give them degrees. . . . What in hell are soul courses worth in the real world? No one gives a damn if you've taken soul courses. They want to know if you can do mathematics and write a correct sentence . . . an element in that society.

The point remains that we have neglected the real problem of compensatory education for the shallow solution of sympathy. And there are other equally compelling areas of neglect.

We have neglected vocational and technical education for the elegant ornament of liberal arts. Certainly, the social sciences are important but they are not sacrosanct. And in our society, which needs skilled labor, we must restore the manual arts to their rightful place of esteem. We have done a grave disservice to the working man by neglecting his central importance to our society. We have failed his appetite for the arts, his preparation for leisure, and, in many cases, his need to renew his skills.

If we are not going to have revolution within our educational community, we will be wise to take a revolutionary look at our institutions of education. We should not be reluctant to ask daring questions or consider bold solutions. Is the four year college necessary in all cases? Are there better ways to combine secondary and undergraduate programs? To accelerate graduate work? Or to space it out over the years? Should we invest more in adult education and enrichment? Are present primary and secondary school programs creating enough outstanding citizens—citizens with an appetite for learning and an aptitude for service to others?

The answers require courage and cooperation from every sector of our society. There is little point in questioning the value of graduate degrees in the soft sciences if businessmen continue to treat these degrees as keys to open the inner doors to better jobs. There is no point in discussing black studies without an objective ordering of educational priorities by the black community. There is no hope for major academic reform without the support of America's academicians.

There is no chance for change if parents revere the college degree as a symbol of their parental success. Until every interest group reappraises its attachments to existing institutional forms, we cannot achieve a new structure.

Today's students have an obligation, too, to question radicalism and demands for relevance as satisfactory answers. Revolution is ridiculous and relevance often an excuse for more amusing and less arduous involvement. Where is this drive for reality in the demand for non-graded courses? The real world distinguishes between excellent and mediocre effort. Is doing one's own thing ennobling or selfish; profound or simply vacant?

Finally, I think government has an obligation to review its many programs affecting youth and ask itself whether it is doing a good job or even what it intends to do? Right now, this Administration is taking a hard look at youth policies. We are looking at the ways we have prolonged the period of dependency . . . disenfranchised our young adults . . . discriminated against non-college youth and directed others, in disregard of their desires, into higher education.

We are saying that many young people have cause to complain. They are alienated—not by our hypocrisy, or racism, or the war in Vietnam—but by our best intentions and inappropriate institutions. Their claims of hypocrisy, racism or immoral wars are not borne out by the facts. Their frustration at being held apart from responsibility and reality is understandable.

The educational community should ask whether encouraging ever increasing numbers of young people to attend college—when 40 per cent already do—benefits the lower half of the intelligence scale. We should question whether society's demand for college attendance compounds social antagonisms between those who go and those who do not. For if everyone is expected to attend college, life will only be harder on those who simply cannot achieve in an academic setting.

The Federal government should re-evaluate those policies which protract dependence . . . civil service age requirements, restrictive apprenticeship programs, present age limits on voting and public candidacy.

We should question whether some programs do, in effect, discriminate against the working young . . . such as the Peace Corps and VISTA which could benefit greatly from their marketable skills.

All of these questions should be asked not in the fear that we are out to destroy popular education, but as a positive search to broaden educational opportunities and to make our educational institutions fit the public rather than make the public fit the institutions. The threat to education does not lie in asking these questions but in not asking them.

The challenge of American education from the cradle to the doctoral degree is our most important work. Our nation's future depends upon it, for as the Greek maxim goes, in the face of youth we find the future. America need not falter like ancient Athens if we learn from ancient Athens. We can retain our vigor and replenish our power by renewing our institutions.

Hope brought my father to America, and in honor of his limitless hope, the Theodore Spiro Agnew Scholarships will be bestowed. Because he was a child of Greece, they will go to youths of Greek descent. And because he was a citizen of America, their recipients will study here.

For as my father revered his Greek heritage and, like Pericles, saw Athens as the school of Hellas, so he would want . . . as we want . . . America to be the school of free men everywhere.

Above all, this scholarship is established in the spirit of my father's legacy to me—his painfully accumulated knowledge that the principles of freedom need and deserve our constant protection—that we must work to make democracy live.

## NOMINATION OF CLARENCE M. COSTER AS ASSOCIATE ADMINISTRATOR OF THE LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

Mr. MONDALE. Mr. President, for approximately 3 years the city of Bloomington, Minn., has had the good fortune to have as its chief of police, Clarence M. Coster, whose nomination has been confirmed by the Senate as Associate Administrator of the Law Enforcement Assistance Administration. In his brief but effective tenure in Bloomington, Mr. Coster built a fine reputation as a first-rate administrator and a forward-looking policeman.

Both of these qualities will serve him well in his new position. Through the Law Enforcement Assistance Administration program, the Nation has a unique opportunity to effect meaningful improvements in law enforcement. Mr. Coster's years of personal experience in various law enforcement functions—from patrolman in San Fransico to narcotics agent and coordinator of riot control activities for the State of California to Chief of Police in Bloomington—will be invaluable in LEAA's efforts to help the States develop the most effective improvements for police.

Although Mr. Coster's background is in police work, he has had ample opportunity to view the other parts of the criminal justice system at work. He knows the sad state of corrections and the huge backlogs that clog the courts, and I am sure he will bring a sense of urgency to meeting the needs of all parts of the criminal justice system.

In addition to his duties as Bloomington police chief, Mr. Coster served on the Governor's Commission on Law Enforcement, Administration of Justice and Corrections. He was chairman of the science and technology subcommittee of that commission and helped to formulate its recommendations. His awareness of the relevance of modern technology for law enforcement is another indication of his innovative approach to police work.

Mr. Coster is, I believe, well qualified to be Associate Administrator and I support his nomination.

## REMARKS OF THEODORE R. McKELDIN AT THE WHITE HOUSE CONFERENCE ON FOOD, NUTRITION AND HEALTH

Mr. MATHIAS. Mr. President, the White House Conference on Food, Nutrition, and Health was an important and constructive undertaking. Although some of its recommendations cannot be fully implemented at once, the conference did give us new insights into the problems of hunger and malnutrition in this country, and also gave new impetus to the search for solutions.

One of those who addressed the conference was the Honorable Theodore R. McKeldin, former Governor of Maryland, twice mayor of Baltimore, and a leader in the national Republican Party for many years. In his brief remarks, Governor McKeldin outlined the scope of some of the problems in Maryland, and pledged his support for the efforts initiated by President Nixon and the conference.

I ask unanimous consent that Governor McKeldin's statement be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF THEODORE R. MCKELDIN AT THE WHITE HOUSE CONFERENCE ON FOOD, NUTRITION, AND HEALTH

The Nixon Administration is less than one year old. In that year we have seen, I believe, an unprecedented commitment to meet the needs of the poor, the underfed and the sick. This White House Conference, and the President's commitment yesterday to a follow-up conference next year, show that he means business. He is our President and whether we are rich or poor, well or ill, Republican or Democrat we must support this effort to make our Nation healthy, well-fed and socially sound.

I, for one, want to do all I can to help the President succeed in this task for, if he succeeds, we all succeed!

As a former Governor of my State of Maryland and as a former Mayor of Baltimore, I am thoroughly familiar with the need, not only in our cities but in our rural areas, and I believe I know how important it is for us all to succeed. For example, in Maryland in 1969, with our national economy producing more goods than ever before, we are told that elderly poor people use food stamps to buy dog food and cat food for their own consumption because they do not have enough money for decent diets.

In Balimore City, we know that 40,000 school children need free school lunches. Last October (1969) we were feeding only 5,000 of these children. Today we are feeding 30,000.

The money came from the hard-pressed city and state—not from the Federal Government. With Federal aid we could meet the need in our city.

In Maryland 25% of the children under one year of age have been found to suffer from malnutrition. Among our school age children about 10% suffer from malnutrition.

These conditions cannot be permitted to continue. This Conference can and must help America come to grips with this problem. I believe it will, and I congratulate the President on his speedy recognition of the necessity for immediate action.

## THOMAS C. HENNINGS MEMORIAL LECTURE AT WASHINGTON UNIVERSITY, ST. LOUIS—STATEMENT BY SENATOR FULBRIGHT

Mr. EAGLETON. Mr. President, this year the Thomas C. Hennings memorial lecture at Washington University in St. Louis was delivered by the chairman of the Committee on Foreign Relations, the distinguished Senator from Arkansas (Mr. FULBRIGHT).

Speaking before the audience, Senator FULBRIGHT discussed in depth and with perception the war in Vietnam. He analyzed the effects of that war upon our society and presented his views as to the way in which it might be ended.

I believe Senator FULBRIGHT's speech deserves careful reading not only by Senators but by high administration officials and the American public.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE WAR AND WHY WE MUST END IT

(Statement by Senator J. W. Fulbright, Chairman, Committee on Foreign Relations)

In his speech of November 3 President Nixon spoke of the "right of the people of South Vietnam to determine their own future" as the single American war aim which is not negotiable. "Let historians not record," declared the President, "that, when America was the most powerful nation in the world, we passed on the other side of the road and allowed the last hopes for peace and freedom of millions of people to be suffocated by the forces of totalitarianism."

The President's words are a reasonable expression of the *theory* behind our war in Vietnam. Like many theories, however, it does not tell us much about the *practice*. To remedy that ommission a few additional quotes are necessary—such as the following:

"They just marched through shooting everybody. Seems like no one said anything—they just started pulling people out and shooting them. They had them in a group standing over a ditch—just like a Nazi-type thing." *

These words are probably familiar to you by now. They are an eye-witness description of the alleged massacre at Songmy.

Another illustration of the Vietnamese war in *practice* is provided by an American soldier who had reported four other GI's with whom he had been on patrol for the abduction, rape and murder of a young Vietnamese girl. This soldier recalled the following reaction from a member of the military police company to which he was subsequently assigned:

"One M.P., I remember, told me he could have understood it if I'd gone to bat for a G.I. who was murdered, but how could I do it for a Vietnamese? But he was very tolerant about it. He said it was only human to make mistakes." [1]

I recall to you also the now famous words of an American major after the Tet offensive in 1968: "We had to destroy Ben Tre in order to save it." This statement comes as close as any I have heard to summing up the theory and practice of America's war in Vietnam. It may stand some day as Vietnam's epitaph.

### *I. The stakes*

American intervention in Vietnam never has been rationalized primarily in terms of indigenous Vietnamese considerations. It was said—and is still said—to be an exemplary war—an object lesson for the makers of "wars of national liberation," and a war designed to inspire worldwide confidence in America through a demonstration of fealty to our presumed commitments. For these great purposes it has been judged necessary to make use of the Vietnamese people—or at any rate the "silent majority" of the Vietnamese people—as pawns—luckless expendables in a test of America's will.

Mr. Nixon has long subscribed to this theory of an exemplary war. Early in his campaign for the Presidency he made reference to Vietnam as "the cork in the bottle of Chinese expansion in Asia." [2] In the spring of 1968 he asserted that the war was "not for the freedom and independence of South Vietnam alone, but to make possible the conditions of a wider and durable peace. . . ." [3] And in his speech of November 3 the President predicted that American withdrawal from Vietnam—our "defeat and humiliation," as he chose to put it—"would spark violence wherever our commitments help maintain the peace—in the Middle East, in Berlin, eventually even in the western hemisphere."

Rooted in the analogy of Munich, the idea took firm hold during the Johnson Administration that, by fighting a relatively small war in Vietnam now, we were sparing ourselves a much greater war—or a whole series of wars—later on. This notion has been reaffirmed by President Nixon. Again speaking on November 3 of the consequences of "precipitate" American withdrawal from Vietnam, the President laid it down as a flat prediction that "Ultimately, this would cost more lives. It would not bring peace. It would bring more war."

With due respect for the President's strong conviction, I submit that the theory of the exemplary war—a war to end "wars of national liberation"—is unsound.

Analogies are dangerous devices, giving people who take them very seriously an erroneous conception of their ability to read the future. Drawn upon in this way, the past is far more likely to deceive than to enlighten. History, as any good historian will tell us, does not really repeat itself in the sense of a pattern of events unfolding in one set of circumstances in exactly the same way that they did in seemingly similar circumstances in the past. All that history can ever provide is a general insight into the broad tendencies of political behavior and a certain sense of what is and is not possible in human affairs. History can endow us with wisdom but never with prescience because nothing is foreordained. There may, for example, be certain similarities between Hitler's design for conquest and Mao Tse-tung's concept of wars of liberation, but whatever element of truth there may be in the analogy, there is a larger element of untruth. For one thing, Hitler acted on his plan while Communist China is neither participating in the Vietnamese war with her own troops nor otherwise engaged in military activities anywhere outside of her own borders. This strikes me as a significant flaw in the Mao-Hitler analogy.

Expanding on the exemplary war thesis, President Nixon expressed the opinion on November 3 that calling off our war in Vietnam "would result in a collapse of confidence in American leadership not only in Asia but throughout the world." The President's own chief foreign policy adviser, Mr. Kissinger, effectively challenged this proposition in an article written shortly before he went to work in the White House. "Whatever the outcome of the war in Vietnam," he wrote, "it is clear that it has greatly diminished American willingness to become involved in this form of warfare elsewhere. Its utility as a precedent has therefore been importantly undermined." [4]

Wedded as they have been to the idea of Chinese communism as a conspiracy for the conquest of Asia, if not of the world, our policy makers have been more than resourceful in disposing of facts that do not fit the cherished preconception. Conceding in *principle* that the world communist movement is divided, and that North Vietnam is not merely a pawn of China, our policy makers nonetheless invoke these very specters in their efforts to justify our involvement in Vietnam. Mr. Rusk used to warn of a "world cut in two by Asian communism." The President's speech of November 3 was suffused with associations of this kind, including a reference to "those great powers who have not yet abandoned their goals of world conquest." For whatever their reasons—conviction, pride, or dogmatic anticommunism—our policy makers have never been willing to recognize the Vietnamese conflict for that which virtually every expert and seasoned observer has long recognized it to be: a civil conflict in which

Footnotes at end of article.

communism is and always has been secondary to the drive for national independence. As the former Secretary of the Air Force, Mr. Townsend Hoopes, put it in his excellent memoir on the reversal of the Johnson escalation policy:

"North Vietnam was fighting *primarily* to achieve an unfulfilled national purpose. While it was, to be sure, fully aware of the implications for the wider application of the Mao-Ho-Giap insurgency doctrine, it was fighting not an abstractly ideological war, but a very particular war—in a particular place, characterized by a particular kind of terrain and weather, peopled by a particular breed of men and, above all, conditioned by a particular history. What really drove Ho's sacrificial legions was not the dream of world conquest, nor even the notion of generating a new momentum for Communist advance and triumph throughout Asia. What motivated Hanoi and enabled its leadership to hold 19 million primitive people to endless struggle and sacrifice against odds that were statistically ludricous was the goal of national independence." [5]

Once it is clear that the war in Vietnam is neither a valid global testing of the liberation-war doctrine nor a proxy war in a grand Chinese strategy for the conquest of Asia, it follows inescapably that the United States has been fighting a war without need or justification—a war based on demonstrably false premises. My own premise of course is that our legitimate interest in southeast Asia is not ideological but strategic, having to do not with the elimination of the Vietcong or of any other indigenous communist movement but with the discouragement of overt Chinese military expansion. The prevalent view among southeast Asian specialists outside of government is that the Chinese challenge in south Asia is more political and cultural than military, that a strong independent Communist regime is a more effective barrier to Chinese power than a weak non-Communist regime, that the Hanoi government is nationalist and independent, and that, accordingly, once peace is restored—if ever it is—North Vietnam will serve as a barrier rather than as an avenue to Chinese expansion.

Assuming still that our national interest in Asia is strategic rather than ideological, it follows that the United States has no vital security interest in the preservation of South Vietnam as an independent, non-Communist state. Indeed the United States has no vital interest in whether South Vietnam is governed by Communists, non-Communists or a coalition; nor is it a matter of vital interest to the United States whether North and South Vietnam are united or divided. Our interest is in the prevalence, whatever its form, of indigenous Vietnamese nationalism; beyond that strategic interest gives way to ideological preference—if not, indeed, to ideological obsession.

On the basis of their grudging, minimal contributions to the fighting in Vietnam it would appear that our Asian and Pacific allies either do not take the ostensible threat to their own security very seriously or are content to have the United States do their fighting for them. Of our nominal allies Thailand is the closest geographically to Vietnam; it is challenged by a minor communist insurgency within its own borders and its leaders have been effusive in their enthusiasm for the American involvement in Vietnam. Nonetheless, we have paid the Thais an enormous sum in military equipment and financial support, including salary bonuses and PX privileges for their soldiers, to get them to send a force to Vietnam which at its maximum reached twelve thousand men.

South Korea has provided 48,500 tough, effective combat soldiers, with the United States paying for everything above the base pay of the troops: premium pay for combat, food and shelter, logistic support—and generous additional support for the Republic of Korea's home army.

The Philippines, after haggling and entreaties, sent a noncombatant engineer battalion of about two thousand men to South Vietnam in 1967, for which the United States gratefully agreed to bear all costs in addition to maintaining military assistance to the Filipino home force. President Marcos recently announced his intention of withdrawing the Filipino battalion from Vietnam.

Australia, which raised an army of 682,000 in the Second World War, has, at its own expense, provided a token force of 7,600 men for Vietnam, more, quite obviously, as an investment in Washington's gratitude than as a serious contribution to the war. New Zealand, which had raised an army of 157,000 men in World War II, provided what Townsend Hoopes describes as the "astonishingly token contribution of 450 men;" [6] it has since been increased to 550 men. Both Australia and New Zealand have been rewarded with lavish praise and gratitude from the United States.

Gratitude for what? for making a tiny contribution to what they themselves consider their own defense? for patting America on the back at a time when most of the world was pelting us with epithets? How has the United States, the greatest and strongest nation on the face of the earth, been reduced to such pitiable gratitude for such small favors? The explanation, according to our policy makers, is that the United States has global responsibilities which compel us to bear burdens which no one else will bear. Then the familiar image is invoked: of America, the martyred giant, manning the ramparts of freedom, humoring the recalcitrance and enduring the insults of those who are free from the "discipline of power," bearing without complaint the unfair burdens which destiny has thrust upon us. Diplomats have described this role as the "responsibility of power"; others have called it imperialism.

I call it nonsense. Power is a narcotic, a potent intoxicant, and America has been on a "trip." We soared for a while, gladly dispensing goods and services for the tribute which nourished our vanity. Then our unpiloted space ship came down in the swamps of Vietnam, and suddenly, instead of soaring, we found ourselves slogging in mud. The contrast could not have been greater and it has shocked and confused us. We must hope that it will also have sobered us, and that we will be able to find our way out of the swamp, not, let us hope, to take flight again, but just to get back on our feet, which is the posture that nature intended for us.

To get back on our feet we will have to shake off the lingering effects of the narcotic of power. For a start we might stop the prideful nonsense about "defeat" and "humiliation." Liquidating a mistake is neither a defeat nor a humiliation; it is a rational and mature way of accommodating to reality, and the ability to do it is something to be proud of. When President Johnson used to declare that he would not be the first American President to lose a war, and when President Nixon warns, as he did on November 3, against "this first defeat in American history," they are not talking about the national interest but about the national ego and their own standings in history. A war is not a football game which you try to win for its own sake, or in order to maintain an unblemished record of victories. A war is supposed to be fought for purposes external to itself, for substantive political purposes, not just for the glory of winning it. When its political purposes are recognized as unworthy, as they have been in Vietnam, it is rank immorality to press on for a costly, destructive and probably unattainable victory.

As to their own personal roles, both the incumbent President and his predecessor seem to have subscribed to an essentially military view of history's judgment. "History," as they have invoked it, is a kind of divine magistrate, lavish in its praise of victors and scornful of all losers. To some extent that is probably true—witness the glorifications of despots like Caesar and Napoleon—but if it is true, all it shows is that historians, like laymen, employ some primitive standards in judging their fellow men.

Everybody knows that we could "win" in Vietnam; we could wipe that poor country and every living thing within it off the face of the map. What would "history" have to say about that?

*II. The kind of war it is*

The stakes of the war in Vietnam have been debated, without resolution, for five years. In recent weeks we have learned something about the way the war is being fought. What emerges from the atrocities, from the destruction of whole villages by artillery and B–52 raids, and from the indiscriminate killing of the "free fire" zones is the picture of a war whose means have consumed its ends. As the major said of Ben Tre, we are having to destroy Vietnam in order to save it.

A whole new set of questions now arises. Even if all of the rationalizations for this war were valid—even if it were containing China, preventing future "wars of national liberation," and upholding the principle of self-determination—would we have the right to do what we are doing to the people of Vietnam and to ourselves in the process?

I am not advocating an exercise in national flagellation. Quite a number of people—I among them—suggested the need for a national effort at critical self-evaluation after the murder of President Kennedy. It seemed appropriate at the time but nothing came of it. We did not look into ourselves and, instead of the cathartic reconciliation that we hoped might come of the shock we had experienced, there has occurred over the last six years a rising tide of both personal and political violence in American society.

Soul-searching and expiation are preacher-talk; they make good sermons but how many people have ever walked out of a church and really searched their souls? As any good psychiatrist is likely to tell you, moral incantation seldom if ever results in serious self-examination, much less in altered behavior. It ought to, but it doesn't. What it does result in is *rationalization,* in the reinterpretation of disagreeable facts and events in such a way as to make them bearable. That is what we did after each of the political assassinations of recent years, and that is what we are starting to do with the information we have been given about atrocities in Vietnam. Arousing as it does our natural defenses, guilt is simply not very useful as a means of eliciting serious introspection. The people who are most willing to feel guilty are usually blameless humanitarians; perhaps, for some reason, guilt has a certain attraction for them. The rest of us are usually satisfied to rationalize, improvising whatever arguments are necessary for self-justification.

If we really want to understand the meaning of the Songmy massacre and all the other acts of indiscriminate killing in Vietnam, we are not going to do it by declaring a national day of atonement. That might satisfy other needs but it is not likely to result in the acquisition of accurate and useful information about ourselves. That can only come from an appreciation—as guiltless an appreciation as possible—of the *common* human susceptibilities with which every one of us—old and young, communist and noncommunist—is endowed by the simple virtue of being human. I stress *this point to* you as students because I have had the impression of a certain Puritanical stuffiness on the part of many young people, a certain reluctance to face the likelihood that deep in the soul of the most high-minded student activist are

Footnotes at end of article.

some of the same fears and longings that lurk within the soul of the most ravenous, bloodsucking, imperialist warmonger.

The really important and useful thing to know about Songmy is not the unspeakable things that certain GI's did but the unspeakable things that most human beings are capable of doing in extreme circumstances. The American soldiers who wiped out the civilian population of that Vietnamese village were not monsters but ordinary young men acting under the pressures of intense fear and anger. "You see," said one major, recounting the confession of one of his men that he had killed three children, "a half hour before, a kid had thrown a grenade that killed the guy's best buddy. So you have to understand." [7] Another veteran of the Songmy massacre, Mr. Paul David Meadlo, who admitted on national television that he shot some thirty or forty men, women and children, is described by people in his home town of New Goshen, Indiana, as "a very nice boy," "the nicest guy you'd ever want to meet." [8]

In his chilling account of the rape and murder of a Vietnamese girl by four American soldiers on a patrol, Daniel Lang recounts how the fifth member of the patrol, who turned the others in, encountered almost uniform hostility for his act of conscience. As the fifth soldier himself later recalled, "They were among the ones—among the few—who did what everyone around them wanted to do." At their trials numerous witnesses testified to their good characters and soldierly virtues. One of the defense lawyers summed things up:

"There's one thing that stands out about this particular offense. . . . It did not occur in the United States. Indeed, there are some that would say it did not even occur in civilization, when you are out on combat operations." [9]

Most of what is happening in Vietnam—the face-to-face killing of women and children as at Songmy, the out-of-sight killing of women and children by artillery and B–52 raids in the "free-fire zones," the deliberate burning of entire villages by the so-called "Zippo squads," and the assassination of thousands of presumed Vietcong cadre under the "Phoenix" program—all these things are happening outside civilization. They are happening in a jungle of our own creation. That is the kind of war it is—a war in which civilians are indistinguishable from soldiers, a war in which mass murder is the strategy of both sides, a war which has released the furies within the human soul, a war which degrades all those whom it does not destroy.

These atrocities in Vietnam, committed by Americans, must be taken as a warning and a symbol of what can happen to a whole society. We are, I believe, far short of the state of moral disintegration that Germany reached in the 1940's and I am all but certain that we will not descend into that abyss. It is not, however, utterly and eternally out of the question. We are susceptible to the same virus of brutalization that other societies have come to, and nothing contributes more to the moral breakdown of a society than the long continuation of an unjust and unnecessary war.

It is more nearly an inevitability than an accident that a war of this kind should make a travesty of its own ominal objectives. Finding himself in a strange, dangerous and technologically primitive place, the ordinary GI responds with something short of the perspective of a cultural anthropologist. Not only are the Vietnamese primitive by the American soldier's standard but they are also dangerous; combatants and civilians are indistinguishable; even a woman or child may throw a grenade at him. Fearing and despising the people he is supposed to be saving, the GI soon dehumanizes them, or is likely to; they are not people but "gooks" and "dinks." Again, I emphasize these are not monsters but perfectly decent Americans who are dehumanizing the Vietnamese people; they do it almost as an act of self-defense. Nonetheless, it brutalizes them. As the anthropologist Edward T. Hall has commented, "Without widespread acceptance of the 'gook philosophy' Pinkville could never have happened." [10]

I would not want the perpetrators of the Songmy massacre let off. On the contrary, I want them tried and, if guilty, punished—not for retribution but for deterrence, not because they are different from the rest of us but because they are so much like the rest of us, because what they have done almost any of us could have done.

Vietnam has knocked us Americans off our pedestal. It has taught us that we are no better than the rest of the human race—although neither are we any worse. And that is the useful thing to be learned from all these horror stories and from the war itself. It was moral presumption—the so-called "responsibility of power" and the traditional American notion that we are better than other people—that led us into this war in which we have largely destroyed Vietnamese society while brutalizing ourselves. If out of all this we learn to respect and guard against the destructive instincts that lie within all of us, then something at least will have been retrieved from the disaster.

President Nixon said one thing in his recent speech with which I agree. He said that "North Vietnam cannot defeat or humiliate the United States. Only Americans can do that." In my opinion we have already done it, but I also think we can undo it—not with glory, because there is no glory in a charnel house, and not with "honor" in the sense in which soldiers use that term. But we can do it with dignity and we can do it with self-respect—the self-respect of human beings who have learned something about their own humanity and its terrible fallibilities. The question of course is how.

### *III. The way out*

The Administration has a plan—so they tell us—for getting out of Vietnam. They won't tell us exactly what it is, or exactly how it will work, or when it will be accomplished, but they insist that they have a plan. They call it "Vietnamization."

As defined in the President's speech of November 3, "Vietnamization" means that American forces will be withdrawn gradually while the Saigon army is built up to take over a greater share of the war. How far this process will go remains unspecified. In recent closed hearings of the Senate Foreign Relations Committee both Secretary of State Rogers and Secretary of Defense Laird refused to answer these questions: how long will "Vietnamization" take? and does it mean that all American troops will be withdrawn or only American ground combat troops, leaving a residual support force of 100,000 or 200,000 or 300,000 men? All that the two Secretaries would tell us was that the President has a "plan," that he does not deem it wise to divulge it to the public—or to the Senate Foreign Relations Committee—but that, if we were patient, took things on faith, and watched developments, we would be pleased with the result.

Equally unclear is the crucial question of what the President's plan calls for if "Vietnamization" fails, if the Army of the Republic of Vietnam comes near to collapse as it did in 1964? In his speech of November 3 the President warned of reescalation. As he put it, "If I conclude that increased enemy action jeopardizes our remaining forces in Vietnam, I shall not hesitate to take strong and effective measures to deal with that situation." Pressed for an explanation of the meaning of the President's words, all the Secretary of State would say in the Foreign Relations Committee was that the Administration did not expect the Army of the Republic of Vietnam to collapse and therefore had no plan for that contingency. The Secretary of Defense was equally unenlightening but he told a House Appropriations Subcommittee on November 17 that Vietnamization "could lead the way to a military victory in the sense of the South Vietnamese being able to defend their country, even against North Vietnam." [11] Asked whether the United States might reescalate the war if Vietnamization should fail, Mr. Laird replied, "I would not rule out that possibility completely." [12]

Until and unless the Administration provides clear, specific evidence to the contrary, Vietnamization can only be taken as "heads I win, tails you lose," a strategy aimed at victory for the Thieu-Ky government. And that, as the Paris peace talks have shown, is an outcome which the North Vietnamese and the Vietcong will never accept, unless it is forced upon them by military defeat.

Since it is all but inconceivable that the shaky Saigon army can hope to win the victory which half a million Americans and the Saigon army besides have been unable to win, it would appear that the best possible prospect for Vietnamization—"best," that is, for Thieu and Ky and for the Nixon Administration's prestige—is a continuing war of stalemate and attrition, with a reduced number of Americans reverting to their pre-1965 "advisory" role in a semi-permanent war of counterinsurgency. For the Vietnamese people this of course would mean continuing terror and death for the indefinite future. That is the price which it is proposed to exact from them so that the Americans can withdraw with what their leaders conceive of as "honor."

Whether the Army of the Republic of Vietnam can be gotten to fight even this well is by no means certain. After twenty years of warfare the South Vietnamese army still has failed to demonstrate anything approaching the fighting spirit of their Vietcong countrymen. Information gathered by the *New York Times* this fall in a three-week countrywide survey of South Vietnamese fighting proficiency showed that the brunt of the fighting is still being carried by the Americans, who, by the favored yardstick of success in this war, the "body count," are responsible for two of every three North Vietnamese and Vietcong reported killed. Promotions in the Army of the Republic of Vietnam still depend greatly upon a man's family background, wealth and political influence. The result is in an unaggressive, unmotivated, demoralized, war-weary fighting force, greatly superior to its enemy in numbers, equipment, and in every respect—except the ability to fight and win battles. [13]

American soldiers in the field have little confidence in the ability of the Army of the Republic of Vietnam to take over the fighting. One Green Beret captain, part of a 12-man team which has been trying to shape up a South Vietnamese force in an outpost near the Cambodian border, commented to a reporter: "Let our glorious allies in on anything, and the enemy knows about it within an hour." [14] A group of GI's gathered around their radio at an outpost in Vietnam greeted President Nixon's glowing account of the progress of Vietnamization on November 3 with what one account describes as "loud, ironic laughter." [15]

The crucial issue of the war is the character of the government which rules in Saigon. As long as American policy is committed to survival of the Thieu-Ky regime or one very much like it, "Vietnamization" will remain a euphemism for victory. The North Vietnamese and the Vietcong have said that they will fight indefinitely to prevent that and they have shown their ability to do so. As outlined by President Nixon, Vietnamization, according to a Rand Corporation expert, "is a policy that must goad the Hanoi leadership to challenge it by increasing the pressure of United States casualties; to which

Footnotes at end of article.

the President promises to respond by re-escalation against all past evidence (and consistent, reliable intelligence predictions) that this would neither deter nor end such pressure." [16]

A recent American visitor to Hanoi (Richard Barnet) told me, upon his return, that the North Vietnamese are confident that the South Vietnamese are incapable of taking over the war; that they doubt that President Nixon thinks they can either; that they do not believe the United States is sincerely willing to give up its control of South Vietnam; and that, accordingly, they anticipate the strong possibility of reescalation by the United States. The North Vietnamese leaders also emphasized that, while they might agree to the participation of Thieu and Ky themselves in a new government, they will not agree to the continuation of the "Johnson constitution," as they call it, which they regard as an instrument of American control, nor to an election managed by the Thieu-Ky government. Rather than accept any of these, they said, they are prepared to go on fighting indefinitely.

The weakness of the policy of "Vietnamization" is the weakness of the South Vietnamese government itself. Its claims to legitimacy is based on rigged elections and on an American-sponsored rather than an authentic Vietnamese constitution, which specifically bars all Communists from participating in the government. The electoral law barred "neutralists" as well as Communists from running for office in the supposedly free election of 1967. In a memorandum to the Secretary of Defense on March 14, 1968, Under Secretary of the Air Force Townsend Hoopes gave the following characterization of the Saigon government:

"The GVN is a narrowly based military clique. While it is systematically corrupt, this fact does not particularly distinguish it from other military governments in Asia. . . . What does distinguish the GVN are its inefficiency, lack of popular support, and inability to protect or govern large areas of South Vietnam. . . . For better or worse, it is Ho Chi Minh and Hanoi who have harnessed nationalism to their cause and who have demonstrated superior determination, organization, and fighting qualities. To survive without permanent massive U.S. support, the GVN must win broader allegiance and extend its effective authority. Yet its will and ability to do either of these things have never been in greater doubt." [17]

In his speech of November 3, President Nixon said that "we really have only two choices open to us if we want to end this war:" either "precipitate" withdrawal or, failing acceptance of our terms in the Paris peace talks, Vietnamization. The President, I think, is mistaken. There is a third and better option than either of these: the negotiation of arrangements for a new interim government in South Vietnam, for elections conducted by the interim coalition regime with or without international supervision, and for complete American withdrawal. The obstacle to such a negotiation is our continuing attachment to the Thieu-Ky government. If we could bring ourselves to deprive Saigon of its veto on American policy—as we could do without impairing either our own vital interests or, I daresay, the best interests of the South Vietnamese people—there would be no need either for the "precipitate" withdrawal which the President likes to talk about or for the condemnation of the Vietnamese people to prolonged war, which is the true meaning of "Vietnamization."

There is good reason to believe that, in return for our agreement to an interim coalition government and to ultimate total American withdrawal from Vietnam, the Vietcong and the North Vietnamese would be willing to make significant concessions. They have already indicated that they would not expect total American withdrawal prior to substantive negotiations but only a commitment to a definite schedule for withdrawal. They have also indicated that a transitional government need not necessarily include members of the National Liberation Front. In addition, the North Vietnamese government is on record as being willing to accept a neutralist, independent South Vietnam which they would not seek forcibly to reunite with North Vietnam. It should also be possible, in such a negoiation, to make arrangements for a general amnesty on both sides and for prevention of the "blood bath" which the Administration confidently predicts should the Vietcong ever gain power in South Vietnam.

Whether and to what extent the North Vietnamese and the Vietcong are sincere in the concessions they say they are willing to make can only be ascertained in serious, substantive negotiations. To get these negotiations going two things are required of the United States: our willingness to require Thieu and Ky to take their chances along with the other factions in South Vietnamese politics and our willingness to commit ourselves to a phased but total American military withdrawal from Vietnam.

We do not have to force such a settlement on the South Vietnamese government. We need only put them on notice that these terms have become our war aims, that we hope they will join us in negotiating their realization, but that, if they are not, we shall nonetheless negotiate the conditions of American withdrawal, while they, in turn, will be at liberty to continue the war on their own, to negotiate for new alliances, or to come to their own terms with the Vietcong. If we did withdraw and the Army of the Republic of Vietnam, with its one million well-equipped soldiers, could then be inspired to defend the Saigon government, it would survive. If it could not be so inspired, then the South Vietnamese government would not survive. But we have done enough, having fought their war for over four years at the cost of over forty thousand American lives thus far.

As long as the Nixon Administration adheres to its present position that it will "discuss" but not "negotiate" a settlement without Saigon's approval, thereby giving Saigon a veto on our policy, Mr. Thieu will have every incentive for continued adherence to his present uncompromising stance. He minced no words in stating his government's position upon his return from Midway last June. "I solemnly declare," he said at that time, "that there will be no coalition government, no peace cabinet, no transitional government, not even a reconciliatory government." Again, on Vietnamese television on September 19, Thieu dismissed the idea of a standstill cease-fire as "unrealistic," pledged never to cede "so much as a hamlet" to the Vietcong and said he would make no further concessions at Paris. He said that his government would never accept the existence "in any way" of a communist party in South Vietnam.

Lacking either a reliable army or the support of their own people, the Saigon generals have only one solid base of power; their veto over American war policy. If they had anything like the same influence in Vietnam that they have had in Washington, Thieu and Ky would have beaten the Vietcong long ago. The critical question therefore remains: Are we going to allow Saigon to continue to exercise this veto or are we going to give them the simple choice of joining us in making a compromise peace or continuing the war on their own?

Our basic asset, which neither the Johnson nor the Nixon Administration has been willing to acknowledge, is that this war is not now and never has been essential to our interests, essential, that is, to the freedom and safety of the American people. The exact terms of peace do not, therefore, matter very much from the standpoint of American interests, but the early restoration of peace matters enormously, because every day that this war goes on the sickness of American society worsens.

Looking back on the history of Vietnam since World War II, if we had not intervened in any way either to support the French or to create the Diem Government, the nationalists would probably have achieved the independence of a unified Vietnam. It would have been achieved under the only authentic nationalist leader in Modern Vietnamese History, Ho Chi Minh, and we would probably be today on as good terms with a unified Vietnam as we are with Yugoslavia.

After all this killing and destruction, and unless we remain in peramanent occupation of Vietnam, the eventual outcomes will probably be the same that it would have been if Americans had never gone to Vietnam. Our leaders may then suffer a loss of prestige but our country will have recovered its self-respect. And, as for the Vietnamese, they are a nation of tough, resilient peasants who will make their own accommodations to reality. As a young South Vietnamese army officer told an American reporter: "In thousands of years of our history we have seen the Chinese and the French and the Japanese come and we have forgotten them all. In time we will forget the Americans, too. Whether they did good or ill, they will only be a footnote to our history." [18]

## VOCATIONAL EDUCATION

Mr. SAXBE. Mr. President, many have spoken out about the need to expand vocational education opportunities for our young people. In my own State, only 14 percent of our youngsters complete a 4-year college program. The question of what happens to the other 86 percent is of concern to many of us. They, too, must become self-sufficient, productive citizens in our society. The subject of vocational education was discussed in a speech earlier this year by Alice Widener during a Governor's Symposium on Vocational Education in Columbus. I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

[From U.S.A., June 1969]

COLLEGE EVERYONE? *

It has been said we have a sick society. I don't believe this. But I do believe we have a sick public education system. It is predicated on the mistaken belief that every boy and girl should go to college and that those who don't go are doomed to inferiority. That system is injuring about 85 per cent of the youth in America. These are the boys and girls who are not going to be graduated from a four-year college course and emerge with an academic degree in hand. Certainly, they are not material for a junk heap. But they are led to believe that if they are *academic* high school drop-outs or college drop-outs, they cannot "make it" in our society.

You're all familiar, I'm sure, with an advertisement in slick magazines, newspapers, and on television, showing a young mother and father bending over an infant in a cradle. "Insure your child's future," says the ad. "Take out a college education policy." That ad is relevant to the family situation, of course, only if the infant shown in the cradle is exactly like every other infant in every other cradle, regardless of what the individual talents, aptitudes and mental gifts of that baby might be. Let us suppose that the infant is going to be greatly gifted in a field of endeavor unrelated to purely academic studies. Are a mother and father going to doom that infant in the cradle to a future of frustration? I think they should not.

The myth or slogan "Every boy and girl should have a college education" is largely responsible for juvenile delinquency in the United States of America. It is largely responsible for the welfare problem, for the high crime rate, for the Hippies and Yippies, the freak-outs and drop-outs. It is largely responsible for the narcotics problem among youth today. I think it's about time we junk the inflexible educational snobbery that junks youth. It's about time that the great business corporations and enterprises in our country stop saying about employment, "College graduates only need apply." This snobbery, intellectual snobbery, is like all snobbery—it is grounded on wrong assumptions. It is beginning to destroy the great universities and colleges in our country. Many victims of the "college everyone" myth are suffering from a most acute financial burden. Still worse, college populations are exploding by thousands and thousands of boys and girls who don't belong on campus and are raising hell because they really don't belong there.

We in the United States have a great stake in the field of education. We fail to understand that the problems we are discussing here today are those of every advanced nation in the world. It is a problem in Italy and Japan, West Germany, France and Great Britain. In the advanced nations, people no longer are living in a mainly agricultural society. A few enormously productive farms can produce food enough to sustain large populations. So there is a migration of population away from small uneconomic farms to the cities. The education of mass population in urban public school systems is a gargantuan task.

In France, for example, every problem being discussed by American vocational and technical education teachers is being discussed with utmost urgency. I discussed these problems with Yves Jaigu, a government official occupied with what the French call "l'aménagement du territoire," the refurbishment of the territory. In Brittany, for example, 85 per cent of the farms were owned by widows—small, uneconomic farms operated by the survivors of two world wars. Naturally, those farms couldn't make money enough for modern needs. Naturally, the families there are moving to urban communities to try to make a living. So France has to try to find out what to do with Brittany and is seeking to make it into an advanced technological communications center. But there is a language problem with aspects similar to that in our own racial problems. In Brittany, many older people speak only Breton. They have spoken that language in the area for a thousand years or more. There are French and Frenchwomen from Brittany who can't speak French, only Breton, and go to the Ile de France area—Paris and its environs—to get jobs. And so their is a language-employment problem.

We have it too in our country. We have hundred of thousands of people in urban and industrial communities who don't speak English, they speak American Negro. There is nothing wrong with it and nothing to criticize about it. But they speak it. Therefore, when their children enter academic school system in which the major language is English, they have severe difficulties. The problem arising from this situation is very similar to that in many other lands—in Northern Italy, for example, where Sicilians and Neapolitans come to find employment. In Milan newspaper help-wanted ads, I have read "No Sicilians need apply." It isn't that northern Italian industrialists are so prejudiced against Sicilians, it really is very difficult to employ a Sicilian who doesn't speak North Italian. The situation involves a language problem and other problems of social adjustment.

In general, we Americans don't know very much about modern, progressive vocational-technical education as it exists today in many countries of Western Europe. We discuss the subject in terms of a Europe before it had electric light. Time and again, I've asked public officials, labor leaders, industrial plant managers and educators in our country whether they are familiar with what the best vocational-technical education schools abroad are doing. "Well, what are you doing?" they say to me. "Are you pleading for vocational-technical education in order to have a European-type class structured society in America? Do you want schools like those in Europe where a boy of ten is forced to decide his future and if he can't pass an exam the university doors are shut to him? Do you want vocational-technical schools that will sentence boys and girls forever to the working class?"

When I ask these officials and managers whether they ever have visited the marvelous CERIA School in Brussels, or the Fiat Free School in Turin, they say, "I never heard of 'em." Their knowledge is so limited about the modern schools in Europe that they might as well be discussing Ohio when it had only gaslight and outhouses. Yet in Europe today, a funny thing is happening. The best vocational and technical education schools are in danger of becoming the snob schools. At CERIA in Brussels, Professor Doms told me last spring, "You know we don't know what to do because we had 2,500 boys and girls here. We increased it to 3,000. We have 6,000 on the waiting list, from 25 nations, and some of the richest families in Europe are trying to induce us through offers of high tuition fees to accept their sons and daughters as pupils at CERIA. You see, many of the wealthy people in Europe today are not men and women of hereditary fortunes. They are people who earned their wealth and came up the hard way. They study their children and see that perhaps Jean or Marie is not interested in going to the University of Louvain or to the Sorbonne. But Jean or Marie has ideas about wanting to start a hotel somewhere, or an industry, and is eager to learn the know-how. These wealthy parents want to send their children where they can get such training. Of course, the vocational and technical-training students receive basic academic training too. And if they develop a keen interest in academic studies they can pursue them."

I have met hundreds of CERIA students and I can assure you they are literate. They read, write and spell correctly, which is more than I can say for a lot of college graduates in the United States today.

Each time I plead in my newspaper columns for vocational-technical education in our country, someone from a university sociology or political science department writes to the editor, "Mrs. Widener is an anti-intellectual that I don't like Ph. D.'s! It is fantastic. For the benefit of the press here today, let me make myself so clear that what I'm saying cannot be distorted: I am *for* every academically gifted boy or girl going to college if he or she really wants to learn and can learn. I am *for* a progressive, dynamic vocational-technical education system suited to the last third of the 20th century and the challenges of the 21st century. I am *for* a vocational-technical education system that will provide boys and girls in grade school with opportunities to develop themselves as individuals, according to their own natural gifts and desires. I believe such a system should have equal status and equal pay to those of the academic system. I am *for* the kind of vocational-technical education systems that will not close any doors to future academic learning and will not draft any boy or girl in America into the labor market against his or her will.

I predict that if we don't provide the right kind of vocational-technical education that will give 85 per cent of our young people the opportunities they need, and also keep the doors wide open for them to go as high educationally as they want, then we're going to fail in public education. If we think we have severe problems now, just wait until we get a few more! Ladies and gentlemen, I am not going to talk any bunk from this podium if I can help it. So let's get down to cases:

In San Francisco, a few years ago when

* Editors' note: Last spring there was held in Columbus, Ohio, a Governor's Symposium on Vocational Education, convoked by Governor James A. Rhodes and sponsored by the Ohio State University College of Education. The theme was "Learning to Serve to Earn" and the official program stated; ". . . like other resources, skilled manpower must be cultivated and replenished. . . . A most fundamental fact of life is that people need jobs, not only as a means of earning a living, but as a basis for identity, a basis for participating citizenship, a basis for worthy leisure, a basis for participating in the fruits of a technological society."

This is the full text of the speech delivered by Alice Widener to the Governor's Symposium, April 8, 1969. Requests for copies have come from educators, public officials and business executives throughout our nation *U.S.A.* is grateful to Dr. Robert M. Reese, chairman, Academic Faculty for Vocational-Technical Education, College of Education, Ohio State University, and chairman of the Governor's Symposium, for kind permission to publish the text in advance of publication by The Ohio State University College of Education.

the Job Corps was started, I was stuck in the airport between plane trips for five hours. The ladies in Traveler's Aid were enormously busy so I offered to help them, thinking their work was due to the Vietnam War. "We'd be delighted if you'd help that boy over there," they said. "But he looks too young to be going to Vietnam," I remarked. "We're not busy with war work," they explained. "We're helping the Job Corps enrollees." So there was a big fat boy who said he was 14. (He must have told the government he was 16.) He was crying his eyes out. He was from Grand Rapids and had been flown by jet plane to San Francisco to study electronics at a Job Corps center. "I don't want to be here," he cried. "I love farming and I love pigs. Ever since I had a baby pig, I wanted to be a hog farmer." I said "Good for you. You're lucky. You know what you want to be." But he wasn't lucky, because evidently someone in government thought there was something wrong about his wanting to be a hog farmer, and here he was at the airport in San Francisco, having been flown from Grand Rapids at taxpayers' expense, crying his eyes out.

I wrote a newspaper column about it and right away I heard from Washington, D.C. The Office of Economic Opportunity invited me to tour some Job Corps centers. I went to Camp Kilmer in New Jersey on a hot August day. In the broiling sun, I sat on the grass for hours talking with 19 boys of whom 15 were black. Seventeen had criminal records. Their ages were 19 to 21. They were unhappy boys; boys from the junk heap piled up in the academic public education system. All were high school drop-outs. I found out why. It went like this: "Ma'am, I just couldn't stand all that book learnin'. I didn't see the sense in it. I had to get me some pocket money. I wanted to work to help out with my family, Ma'am, I don't mind studyin' for two or three hours a day, but then I wanted to go out and learn me a trade or get a job and I didn't know how to work. They told me it was against the law and I was a problem." One boy said to me, "It wasn't my prostitute mother or drunk father that done me out. I got done out in school."

Sitting with those boys on the grass in the sun and listening to their problems, I thought maybe I was the first person they'd met who didn't want to do something to them but was willing to listen to what they had to say. At other Job Corps centers, I learned other facts. For instance, if you take a pre-adolescent girl of 11 or 12 who wants to know what she looks like with lipstick, and if she doesn't know how to earn any pocket money and is forbidden to earn any and can't get any from her family, she is going to steal a lipstick at a ten cent store. That starts her on the road to delinquency, if she is caught. Do you think that hasn't happened? It happened to my maid's granddaughter.

I am not against the Job Corps. It was a crisis program that came along much too late. It cost the Federal Government hundreds of millions of dollars to maintain. How long are we going to continue a public school system that produces an army of drop-outs who will grow into candidates for a Job Corps? It tries to do for young men and women of 19, 20, and 21, what should have been done for them when they were 10, 11, and 12. We have a misfit public school system in our nation. As Governor Rhodes said this morning, we have a "decadent education system." It is unsuited to the social and economic needs of our times and future times. If it is true that we have a "sick society," then I am all for children not getting the disease! The only way they are going to remain immune is for them to have the right kind of opportunities when they are young, extremely young. I believe that vocational-technical education should begin in grade school. The Job Corps, well-intentioned as it was, is only a palliative, trying to job-train boys and girls who should have been job-trained years earlier before they became drop-outs and delinquents.

In reply to my newspaper columns about our national need for vocational-technical education, I have received heartrending letters from parents of every race, color and creed, victims of intellectual snobbery and financial servitude thrust on them by the intellectual snobs. The "college everyone" slogan has forced them to try to keep up with the Joneses and send Johnny and Mary to college whether or not Johnny and Mary wish to go or are capable of spending all their time profitably in the pursuit of academic "higher learning." Parent after parent has written to me, "I know my boy likes to work with his hands, but the teacher says if he doesn't go on to college he has no future." Or, "My daughter can't pass math; she wants to be a beautician. But her guidance counselor says if she doesn't go to college she can only do menial work."

*I believe the word "menial" as applied to honest work ought to be struck out of the dictionary and people's vocabulary.*

Invited to Ohio in 1967, I went to the Mahoning Valley School for problem boys. There were 350 boys, 325 with criminal records. I guess the percentage was about 60% black, 40% white. In the cafeteria and library with the vocational-technical education students, I heard exactly what I'd heard at the Job Corps. "Ma'am, we got done out in school. I knowed I wasn't as smart as some of the others. I jes' couldn't get the hang of it. The first time I made two and two come out five, the teacher marked it right. I knowed it wasn't right. She passed me along anyway. I knowed it was a lie. I hated her and I hated the school." Or, "Ma'am, school to me was the place to get out of my daily life, my home life. When the school let me down, that's when I got done out." I heard that over and over again. If you citizens of Ohio let that wonderful Mahoning Valley school go down the drain, you're out of your mind! One of the boys, with a criminal record, talked his heart out to me. Afterwards, he wrote to me and now we correspond regularly. That was two years ago. There hasn't been a holiday since—Valentine's Day, Easter, Fourth of July, Christmas, Thanksgiving, that I haven't heard from him. He has made it all the way from a reformatory to the Air Force.

From Mahoning Valley, I went to the Thomas Edison School in the Hough area of Cleveland. That is the big problem area where they had the riots. Every window pane within blocks of the school—which used to be for "bad boys" and was converted into a vocational-technical school several years before the riot—was smashed. Every blade of grass was trampled on. But not a window pane at the Thomas Edison School was broken or a blade of grass trampled. Why? The teachers and pupils there explained it to me. "It's our school, our hope," they said. "It was a holy area during the riots. God ran that place. The people in Hough know it is our ray of hope."

At Mahoning Valley School, I asked the boys if I could visit the toilets. They were stunned. A woman comes to this boys' school and wants to go into the toilets. Why? Here's why: Because the condition of the toilets tells volumes about a school. In some of the best private schools in New York City, the walls are scribbled with obscenities and vile messages. In the toilets at Mahoning Valley School, I discovered, the walls were absolutely spotless. Moreover, it is one of the few schools I have seen where there isn't a scratch on the desks. I asked the boys why they don't deface the school and smash windows there. "It's ours," they said. "It's our place where we can learn what we need to learn and want to. It's the place that we can learn how to earn a living, where there's hope, a place of real use to us. We want to keep it the way it is so that other guys can use it after we leave."

After Chesly Manly of the *Chicago Tribune* read my columns about Mahoning Valley and the Thomas Edison School, he teased me about having written a sob story. I told him to go there and see for himself.

"You're one heck of a good reporter," I said. "You'll see." He did go and then phoned me. "I went to the Thomas Edison School," he said, his voice choked with emotion. "I talked to the students and teachers there. That's the greatest place. Why can't we have schools like that all over the country?"

Last summer, the State of Florida held its first statewide convention of vocational and technical education teachers. That conference, in just about the southern-most state of the Union, was a model for America in good race relations. There was complete interracial communication and cooperation. Nobody gave a damn about "integration." It was the most beautiful experience I've had in many years. I asked a Negro teacher who has been in the Florida State education system for 25 years why conditions were so ideal at the conference. "We're working together towards a good goal for a common, constructive purpose," she replied.

I dedicate myself to that purpose and I believe every single one of you should dedicate himself and herself to it. Go out and preach the gospel of vocational-technical education. Follow your lifework; carry out your programs; let the opponents do as they wish. You stick to your guns and make a sick public education get well. When it is well, American society will have solved its biggest problem.

---

### Children's Educational Rights

(By Alice Widener)

In 1776, a small group of far-sighted men, who had been thinking long and hard about the art of politics, gave the American people a Constitution ensuring their political, economic and religious liberty. In 1862, a small group of men, who had been thinking long and hard about the art of education, gave the American people a Land-Grant Colleges Act ensuring their educational liberty. The Act entitled each State in the Union to select 30,000 acres of public land per each Member of Congress for use in constructing vocational-technical colleges.

On July 2, 1862 when President Abraham Lincoln signed the Land-Grant Act establishing the land-grant colleges, or "cow colleges" as academic opponents snobbishly called them, he freed more slaves than he did on January 1, 1863, when he signed the Emancipation Proclamation. The slaves freed by Lincoln in 1862 were all the young people in America, regardless of race, sex, color and creed. From then on they were able to strive for a high degree of education in science, mechanics, agriculture, industry and business. Previously, the earning of a college degree was almost entirely restricted to two per cent of male Americans pursuing mainly classical studies in Latin, Greek and Hebrew for the professions of the ministry, law and medicine.

What the great education revolutionists of mid-19th century America really did was to create in our nation a college system of vocational and technical education. Just as our 18th century political revolution had its Founding Fathers, whose names today are known to all, so did our 19th century educational revolution have its Founding Fathers. But though their wisdom, courage and vision were in many ways as great, their names—with the excepton of Lincoln's—are not generally familiar to us today.

They should be. The social ills they correctly diagnosed in 19th century society as being due to an out-of-kilter college education system are precisely the same as the social ills requiring correction in 1969 due to an out-of-kilter elementary and seconday education system.

Unless our century produces now a new group of revolutionary Founding Fathers

in education, to do for young Americans what our 18th and 19th century great revolutionists did, our nation will not be able to continue its marvelous advancement which affords most citizens in the United States the highest standard of living in the world.

In the middle of the 19th century, a few great men—Jonathan Baldwin Turner, Justin S. Morrill Hoarce Greeley Ezra Cornell and their allies—became aware that though 93 per cent of Americans lived on farms higher education in our nation was geared to about two per cent of American youth whose families for the most part lived in cities and belonged to a wealthy minority.

Among these 19th century education revolutionists Turner was the ideological leader. A native of Massachusetts graduate of Yale and professor of *belles lettres*, Latin and Greek at Illinois College, Jacksonville, Illinois, Turner conceived in the early 1850's the "Turner Plan" for a system of practical higher education. He delivered a speech calling for the democratization of higher education and for "industrial universities." Persistent, patient and persevering, Turner spoke his piece, always the same piece, whenever he could and wherever he could for ten years. It influenced progressive thinkers throughout the nation, and it influenced Justin S. Morrill, son of a blacksmith in Vermont, who became a member of the U.S. House of Representatives and later a U.S. Senator. Justin Morrill was the main Congressional author of the Land-Grant Colleges Act.

In 1859, President Buchanan vetoed the Morrill Act. But neither Morrill nor Professor Turner abandoned their common cause.

In 1931, Professor Eugene Davenport, Dean Emeritus, University of Illinois College of Agriculture, recalled, "Professor Turner told me personally in his study a few years before his death that he and Mr. Lincoln were discussing the Buchanan veto when Lincoln jokingly remarked, 'Turner, get me elected President, then put your bill through Congress again and I'll sign it.' "

1852 BILL OF RIGHTS

What were Turner's ideas, the ones that led Lincoln to emancipate all American youth from educational slavery? Here they are as adopted in an educational Bill of Rights by the Turner-inspired State of Illinois Farmers Convention of 1852:

"(1) As representatives of the industrial classes, including all cultivators of the soil, artisans, mechanics, and merchants, we desire the same privileges and advantages for ourselves and our posterity in each of our several pursuits and callings, as our professional brethren enjoy in theirs.

"(2) The institutions originally and primarily designated to meet the wants of the professional classes as such cannot, in the nature of things, meet ours, any more than the institutions we desire to establish for ourselves, meet theirs.

"(3) Immediate measures should be taken for the establishment of a university, in the State of Illinois, expressly to meet these felt wants of each and all of the industrial classes of our state."

The Convention favored the Turner Plan for "a university for the industrial classes in each of the States to apply existing knowledge directly and efficiently to all practical pursuits and professions in life, and to extend the boundaries of our present knowledge in all possible practical directions."

President Lincoln's signing of the Morrill Act gave the impetus to men seeking solutions to the problems arising from the agricultural, scientific and industrial development of our nation, and to its geographical exploration. The Morrill Act created a social bond among Americans, bringing them together while permitting them to develop their individuality.

"Conditions in America during the early part of the [19th] century . . . were largely those of a frontier country," wrote W. J. Kerr, President of Oregon State Agricultural College, in 1931. "The great mass of the people were uneducated and provincial. Despite their many admirable qualities, the majority . . . knew little about science or the applications of it. . . . Higher education was strictly traditional and classical. It had no relation to the resources of the country or to the occupations and objectives of the great mass of the people. Yet it was securely entrenched in both public and private support, all classes contributing to its maintenance."

HISTORY REPEATS ITSELF

Today, in 1969, precisely the same situation exists in relation to our elementary and secondary education. Geared to pursuit of an academic or professional education in college, our elementary and secondary schools do not meet the needs of the great mass of people or the resources of our nation.

In 1862, when the Morrill Act was passed, 93 per cent of Americans lived on farms and seven per cent in the cities. Higher education was geared to the needs of the urban minority. Now, a century later, seven per cent of Americans live on farms and 93 per cent are in urban communities. Lower education (that is, elementary and secondary schools) is geared to the needs and desires of a minority, the third (approximately) who enter college, of whom only half are eventually graduated from a four-year course. Nationwide, only 12 per cent of our youth in public schools are receiving any kind of vocational/technical education. Yet the felt wants of the mass urban populations, and their needs, require education affording them gainful employment according to their aptitudes as mechanics, merchants, distributors, service and technical personnel, and other practical occupations.

In 1967, 60 per cent of all new employment opportunities were in the service areas. In 1967, Congress appropriated several billion dollars in aid to education, but only $252 million under the Vocational-Technical Education Act of 1963 and other vocational education acts.

Yet the 1966 Digest of Education Statistics, Office of Education, U.S. Department of Health, Education and Welfare reported: 99 percent of our children are attending school; and in the 14 to 17 age group (the usual high school age), 93 per cent are enrolled in educational institutions. Approximately 70 per cent of the young people graduate from high school today, and more than one-third of the young adults [graduating] may be expected to enter college.

These statistics show that as of 1965 almost a third of our high school students were drop-outs. The latest figure from the Office of Education shows that despite all efforts to keep students in school, 25 per cent are high school drop-outs. Furthermore, approximately two-thirds do not go on to college, yet their education is directed at college entrance.

Worse, of the third who do go to a four-year college, only half remain there and earn a degree. The other half drop out, mainly in the first and second years. And so the following comparison can be made.

In 1861, American higher education was geared to the real needs of only two per cent of youth; in 1969, American elementary and secondary education is geared to the needs of about 15 per cent of American youth.

FULFILLMENT MAKES FOR CLAIM

It is interesting to note that by far the biggest number of college dropouts is in the liberal arts and social sciences, not the professional schools. Also, the acute social unrest in colleges occurs mainly among students in the arts and social sciences, not in the professions.

In cities, almost all social unrest has been among students in academic high schools and colleges. The vocational and technical schools have been virtually free of it.

On October 18, 1968, the *London Sunday Times* reported in an article entitled "The Detonators" that all recent student rebellions in England had occurred in the academic colleges; none in the technical and vocational institutions. Everywhere, students are crying out for "relevance" in education.

Is the calm in vocational and technical schools due to students' inferior intelligence, or is it due to their receiving the kind of education that fulfills their individual needs, enables them to display their individual aptitudes, and furnishes them with definite, practical goal?

FULFILLMENT MAKES FOR ACHIEVEMENT

Many theories are being advanced about the relative intelligence of children, and about the influnece of environment and heredity on their intelligence. These theories are mainly guesswork; most of the same notions were advanced during the 1850's in the fight against the Land-Grant Colleges Act. Then, it was thought that only upper class "gentlemen" were mentally and morally fit for a higher education. It also was thought that only the "higher subjects" of classical studies were fit for scholarly degrees. Agricuture, mechanics, science and industry were considered to be lower subjects of study fit only for lesser intellects.

Few Americans today are aware that the great Massachusetts Institute of Technology, for example, is a land-grant college.

In 1931, when eminent American scholars assembled at the 45th Annual Convention of the Association of Land-Grant Colleges and Universities in Chicago, Dr. W. J. Kerr said:

"Progress today is based on science. . . . The science first taught in the land-grant colleges was of the most objective and practical kind. These early beginnings led to larger and more intensified applications of science, producing cumulative results, which in turn gave fresh momentum to the movement."

The "practical science" in agriculture, pursued first at our land-grant colleges, is what led to the abundance of our present day agriculture, which enables us to avoid famine and feed half the world. Moreover, it was academic freedom at land-grant colleges that enabled individual scientists to make great discoveries and put them to good use under our free enterprise system.

And so we see that our nation was blessed with thousands upon thousands of gifted young people who pursued higher education at "poor boy" or "cow" colleges. They enriched not only America but the entire world.

REASON FOR DROPOUTS

When Chauncey M. Depew, celebrated his 93rd birthday in 1927, he said, "When I graduated from college, it was either the law, the ministry or medicine for the graduate. Today there are 3,000 occupations upon to the college graduate."

Now in 1969 there are many more than 3,000 occupations open to trained young people at the age of 18. But 88 per cent of them are untrained in elementary and secondary schools for any occupation except pursuit of an academic education which two-thirds do not pursue because they do not wish to, or cannot afford to, or are not mentally able to.

Obviously, our elementary and secondary public education system is out-of-kilter with most young people's callings, needs and desires. Obviously, that is why at least 25 per cent drop out of high school. That is a very high rate, one that our nation cannot afford. After all, if any business in America lost 25 per cent of its customers it would go broke.

Nevertheless, today, as we move into the 1970's, all classes of our citizenry, as in the 1850's, are contributing to an education system "securely entrenched in both public and private support that has no relation to the resources of the country and the objectives of the great mass of the people."

SPUTNIK SCARE

Our misfit public school system was snobbish and undemocratic enough in the early 1950's to guarantee a future social upheaval in our nation; but in 1957 it was made infinitely worse when the Soviet Union launched Sputnik into space. Hysterical over what was supposed to be Soviet superiority in science and education, many of our national leaders embarked on what might be called the Sputnikization of American public education. Immediately, there arose the demand that every boy and girl should go to college in order that our nation could meet a need for nuclear physicists and other advanced scientists.

MEANWHILE, ON EARTH

This Sputnikization took place at a time when masses of our agricultural workers left newly automated farms in the South, and flocked North to the cities to find employment. A large percentage of these farm workers were Negroes who spoke a dialect, had little basic education, and suffered from all the handicaps of new emigrés plus the problems of ethnic differences and political disadvantages. At the same time, in many urban communities, there was an influx of Spanish-speaking emigrés from Puerto Rico and Mexico. What the new minority groups in cities most needed was job-training to become economically self-sustaining. What they received in public school was impractical, college-oriented academic training. And the law forced them to remain imprisoned in the academic schools until the age of 16 in 37 states, 17 and 18 in the others.

As captives, the children of the new emigrés became saddest victims of a misfit school system. The dropout rate soared; so did juvenile delinquency and crime rates.

Simultaneously, there occurred a wave of intellectual and emotional sentimentality that affirmed civil rights by pretending all children are alike except for differences in environment. Though no two blades of grass or petals on a rose are alike, it was preached and propagandized that all children could be taught in school, willy-nilly, to pass college entrance exams and go on to a higher academic education.

Because elementary and secondary public education in our big cities is largely irrelevant to the needs of at least 85 per cent of urban youth, there has arisen a social situation that threatens to bring the nation down. Our cities are rife with violence mostly brought on by the frustrations of rootless, goal-less, untrained young people easily misled by agitators.

The social, economic and intellectual pressures being exerted on masses of young people in overcrowded urban schools to acquire a college education are cruel and undemocratic in the extreme. Literally, they cannot take it. Dr. T. Campbell Goodwin, pediatrician and Assistant Commissioner for Children's Services in the New York State Department of Mental Hygiene, says that today state mental institutions are crowded with children falsely labeled as "retarded" or "problem cases."

On August 9, 1967, *The Christian Science Monitor* said in an editorial:

"What's wrong with a good vocational education and a technical high school diploma? Why should it be considered, as it so often is, inferior to a college preparatory course?

"A survey made by an Ohio educator in his state found 75 per cent of parents and students desiring vocational education in the schools.

"Throughout the United States, and in some other industrialized countries, vocational education has long been a stepchild. Only the academic curriculum has had prestige. The boy (or girl) who turns away from college to train for a job too often loses status in the eyes of his teachers and companions. The high school which boasts of the high proportion of its graduates going to college is disappointed in him.

"The time has come to wipe out these snobberies. One way to do this is to provide much better vocational education than is now offered."

Yet, on December 5, 1967, the *New York Post* reported, "The Board of Education today imposed the death sentence on most of the city's [New York City's] vocational schools. The action, part of a change-over to four-year comprehensive (academic plus vocational) high schools, ends two years of bitter debate within the school system. . . . [Schools Superintendent] Donovan last spring urged the board to drop plans for a single system of comprehensive schools on grounds that they posed 'major difficulties' in terms of facilities, programs, equipment and personnel. The board, overruling Donovan's arguments and earlier threats of rebellion from principals' associations, said today that its 24 'multi-trade' vocational schools, housing 33,000 students, would be phased out or converted . . . within the next eight years."

EDUCATION FOR THE FUTURE

It is the opinion of the *Christian Science Monitor* that, "The era of upgraded vocational education for all who want it is overdue." That was the opinion of the Frontiers of Science Conference in Oklahoma City, January 1969, at which inventors and manufacturers of our space and oceanography technology, of the "picture-phone" and other great new scientific endeavors stressed the national need for trained technicians, mechanics and service personnel.

In July 1967, *Lloyd's Bank Review* carried an article by Gerard Colley, Senior Economist at the Battele Memorial Institute, Geneva, Switzerland, who pointed out, "Tourism is today one of the fastest-growing sectors in the world economy."

Does anyone deny that with the advent of mass national and international air travel there is necessary a huge number of trained technical, mechanical and service personnel to fill jobs in airports, hotels, eating places, museums, parks, cultural and entertainment centers, banks, shops and markets? Does anyone doubt that service and technical personnel will be needed not only to foster tourism in the developed and developing nations, but also to build and man 21st century space and outer planetary stations and underseas colonies on the ocean floor?

THE REAL LAG

Faster than automation eliminates some jobs, the development of science and technology creates new ones. *The employment "lag" is in trained people, not available jobs.*

As all this becomes more and more evident, there is a change even in the New York City educational attitude. On May 29, 1969, the *New York Times* headlined "Dispute Over Vocational Schools Here Revived," pointed out that city vocational schools "have been largely free of the student unrest that has troubled many academic schools," and went on to say that many youths in the vocational schools "are quick to express their satisfaction."

This student satisfaction in all vocational and technical schools is being expressed in most graduates' sincere desire to go on to higher education in their chosen fields of work. It is very difficult to stifle the eagerness to learn of a young person studying a subject of genuine interest well suited to his or her individual abilities. Very often, along with students' progress in manual or artistic skills there is born a keen desire for more academic achievement.

Since 99 per cent of young Americans between the ages of six and seventeen are in elementary and secondary schools, it is there that they should be able to find opportunities rescuing them from the variables and early vicissitudes of home environment. Children are not of one mold and they must not be cast into a school system of one mold.

The Founding Fathers who drafted our Educational Bill of Rights in the mid-19th century and created the land-grant colleges were aware of this truth when they revolutionized higher education in America. Now in 1969, we must have Founding Fathers with courage and foresight enough to revolutionize the elementary and secondary education, adapting it to the children's real needs and freeing it from the fetters of academic intellectual snobbery and the dictates of an academic hierarchy and bureaucracy.

WE NEED NEW "IMMORTAL ACT"

In 1962, Allan Nevins, historian for the Civil War Centennial Commission, wrote a paper on "The Origins of the Land-Grant Colleges and State Universities, a Brief Account of the Morrill Act of 1862 and Its Results." Nevins began thus:

"It was an immortal moment in the history of higher education in America and the world when, on July 2, 1862, Abraham Lincoln lifted his pen and signed the College Land-Grant Act, of which Justin S. Morrill of Vermont was the principal author."

In 1862, when Morrill was asked why he had led the fight for the Act that bears his name, he replied, "Being myself the son of a hardfisted blacksmith . . . who felt his own deprivation of schools (never having spent but six weeks inside of a schoolhouse), I could not overlook mechanics in any measure intended to aid the industrial classes in the procurement of an education that might exalt their usefulness."

Now in our century, which is so full of good hope even while it manifests so many human disappointments and fears, can we deny a majority of our youth the opportunity to procure an education exalting their usefulness to themselves and to the society in which they live?

Webster's Dictionary defines the verb "to exalt" as "to raise high; elevate, raise in rank, power, or character; to elevate by praise or in estimation."

In 1862, Abraham Lincoln exalted American higher education by making it wider and better suited to the individual talents and needs of the people. Let us hope that by 1972, another American President will have lifted his pen to exalt our elementary and secondary education by making it wider, by granting to vocational/technical schools both status and funds equal to those of academic schools, by according to vocational and technical education teachers with practical know-how the same degree of prestige enjoyed by academic teachers, and thus creating a 20th century education Bill of Rights for all of American's children.

## CRITICISM A TWO-WAY STREET

Mr. CURTIS. Mr. President, I would not want to live in a country where officeholders could not be criticized. It is a two-way street, however. Unless officeholders can criticize the press, the public is deprived of a full discussion on the issues.

I ask unanimous consent to have printed in the RECORD an editorial entitled "Fair Exchange," published in the Norfolk (Nebr.) Daily News of November 22, 1969.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FAIR EXCHANGE

Even before Vice President Spiro Agnew provided some "equal time" criticism for newspapers after dealing with the TV networks, a prominent editor rose to claim that the Nixon administration was trying to muzzle the media.

But when Spiro says that's not true, and Herb Klein and other administration spokesmen chime in, we do not allow our traditionally skeptical newspaper nature to disbelieve them. Many in private and public life would like to influence the news, to change it, to make it more responsive to a particular point of view, but there are few Americans with a dangerous disregard for the value of a free press.

Norman Isaacs, the executive editor of the Louisville Courier-Journal and Times, and also president of the American Society of Newspaper Editors, accused the administration of undertaking a campaign for "some sort of covert control" of both newspapers and broadcast stations. It is an unfortunate reaction when critics of the media arise.

They are put in the position of attacking a free press, rather than criticizing what the free press does occasionally that one thinks is wrong.

Mr. Agnew has made it clear he believes in no censorship, no control; but he wants to criticize the press just as it criticizes politicians. That ought to be fair enough.

## ANNIVERSARY OF THE ADOPTION OF THE HUMAN RIGHTS CONVENTION ON GENOCIDE

Mr. PROXMIRE. Mr. President, on December 11, 1948, the General Assembly of the United Nations adopted the Human Rights Convention on Genocide during its Paris session.

The text of the convention confirms that genocide is a crime under international law, whether committed in time of peace or war. Of even greater importance, the convention states that all persons committing genocide shall be punished, be they constitutionally responsible officials, or private individuals. Though genocidal crimes are not to be confused with political crimes, those guilty will be subject to the rulings of their competent national court, or, if possible, an international penal tribunal.

Over 70 nations have ratified the Genocide Convention since 1948. The United States has not.

On June 16, 1949, the convention outlawing genocide was submitted to the Senate by President Truman. Public hearings on the convention were held by the Foreign Relations Committee in January and February of 1950. Although the subcommittee reported favorably on the convention, it became stalled in full committee and remained on the table at the time the 81st Congress adjourned.

On this day, the anniversary of the adoption of the Genocide Convention by the General Assembly of the United Nations, I once again ask this Chamber to recognize the importance of this matter. How can it be that this Nation, which is founded on the principle of life and liberty for all, not think it scandalous that we have not affirmed this principle for all peoples throughout the world? I urge the Senate to immediately consider and move toward ratification of this convention.

## THE DICTATORIAL JUNTA IN GREECE

Mr. MOSS. Mr. President, our tragic involvement in Vietnam and such explosive events as those taking place in the Middle East overshadow developments of great significance in other parts of the world. One such area is Greece, where a dictatorial junta continues to rule that brave and freedom-loving people.

A few days ago, I was visited by the former Greek Minister, Mr. Constantine Mitsotakis, one of the best-known personalities in the postwar history of Greece. Today he is engaged in the struggle to restore parliamentary democracy in his native land. A resistance fighter against the Germans in World War II, Constantine Mitsotakis was first elected M.P. for Chania at the age of 28. From then on he was continuously elected for the Centre Party. He has served in the Papandreou government as Economic Minister in 1965 and 1966. After the colonels' coup, he was arrested and imprisoned, but succeeded in escaping in 1968 and is living outside Greece.

In our discussion, Mr. Mitsotakis emphasized several points which he considers of particular significance concerning the situation in Greece today—points which I feel it is important for the Senate to understand.

First. Perhaps of major concern, Constantine Mitsotakis believes that the next few months—possibly 3—present the last opportunity for a restoration of a democratic government in Greece without a bloodbath. Moreover, he is certain that, given the history and character of the Greek people, a future attempt will be made to force out the colonels' government even if that means a bloody revolution.

Second. Also, he considers the present attitude of the United States to be one of the most powerful factors in maintaining the junta in office. Even the Greek military, he believes, does not favor the junta, but rather tolerates it from belief that it enjoys the support of the Pentagon.

Third. Mr. Mitsotakis believes that the initiative taken at the end of September by the former conservative Greek Prime Minister, Constantine Karamanlis, offering his personal cooperation for the restoration of normality and the safeguard of order and security, creates an opportunity for restoration of parliamentary rule. Mr. Mitsotakis was a liberal opponent of the conservative E.R.E. government—under Mr. Karamanlis—while free debate prevailed. But from the first moment of his escape from Greece, Mr. Mitsotakis placed his services at the disposal of Mr. Karamanlis and declared publicly the need for the political world to rally around Mr. Karamanlis and support his leadership. Mr. Mitsotakis told me he believes that such a movement can succeed only if the junta is denounced by the United States and other nations of the free world.

We can sympathize, I am sure, with the plight of the citizens of Greece, who endured so much during and after World War II to establish self-government. Tribulations of the more distant past resulted in the immigration of thousands of Greeks to the United States. Many went to my State of Utah—principally young men—to work on railroad construction gangs and in the mines. Substantial sums of money earned through this hard labor were sent back to the homeland to assist needy relatives. Homes, families, and business enterprises were begun. Today, the descendants of these immigrants are among our most respected families and are most active citizens of Utah.

It is now 2½ years since the colonels' regime crushed self-government in Greece. During that time, their government has apparently failed to gain even a minority of supporters. Repeated statements that the regime would be regularized by elections have not been redeemed and restoration of parliamentary rule in any form appears to be far off.

It must be remembered that America, applying the Truman doctrine, allotted some $3 billion to Greece to counteract a Communist threat. Thus we succeeded, without the loss of a single soldier, in preventing Communist expansion in Europe. In this struggle, all Greeks were united and the bloody war was successfully prosecuted without even temporarily suspending parliamentary government.

As Senators may recall, December 12 will see a meeting of the Foreign Ministers of 18 nations of the Council of Europe. It appears that the Council will expel Greece, based upon a report of the European Commission for Human Rights, written after more than 2 years of investigation.

If the Council takes such action or if strong support for expulsion is at the meeting, the United States should surely reassess its position toward the Greek dictatorship. And such a review should take place soon—before the opportunities which appear to be present for the restoration of a popularly based parliamentary regime have passed.

Mr. President, a number of editorials and news reports have been published in the press recently concerning the Greek situation. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Post, Nov. 26, 1969]

GREEKS EXTEND EXILE FOR 5

ATHENS.—Five former members of parliament considered security threats by the army-backed Greek government were committed to an additional year in exile under a government decision today, informed sources said here.

The five men have been in exile in remote villages and islands for more than two years. They were deported after the army seized power in Greece in April, 1967.

The sources named the five former members of the Center Union Party—a powerful party before the army takeover—as Ioannis Charalambopoulos, Ioannis Papaspyrou, Panayotis Katsikopoulos, Constantine Koniotakis and Ioannis Alevars.

[From the New York Times, Nov. 30, 1969]

ATHENS HERALDS POLITICAL REFORM—LAW IS DRAFTED ALLOWING FORMATION OF PARTIES

ATHENS.—The army-backed Greek Government announced today that it had drafted a law establishing rules for the formation of political parties, which are now banned under martial law.

The draft would be one of 18 "institutional laws" that are to take effect only when full constitutional rule, suspended since April, 1967, is restored.

The Government has pledged to have the 18 draft laws ready by the end of this year, but refuses to commit itself to a timetable for the restoration of the suspended articles of the Constitution and the lifting of martial law.

Today's announcement, which concerns one legal step in a lengthy procedure for the final ratification of the "institutional laws," was seen in part as an effort to placate Greece's critics abroad.

Criticism of the Greek authorities for their failure to restore democracy, more than two and one-half years after seizing power, is expected to reach a climax in the next two weeks when Western foreign ministers meet in Brussels for the North Atlantic Treaty Organization winter session and later in Paris for the meeting of the 18-nation Council of Europe.

FURTHER GESTURES EXPECTED

Diplomats here expected the Athens authorities to make further gestures to demonstrate their good faith, including the release of some of their 2,000 political prisoners.

These gestures were expected particularly before the Council of Europe meeting on Dec. 12, which is to vote on a motion for the suspension of Greece's membership.

The Athens leaders are eager to demonstrate their goodwill in view of the impression that will be created by the report of the European Commission on Human Rights which, after a two-year study, is said to have reached the conclusion that Greece had tolerated the torturing of political prisoners and that the danger of an imminent Communist take-over invoked by the military to seize power in April, 1967, did not really exist.

The report is still secret and the Council of Europe is bound by its statutes not to discuss it or take any action on it before a three-month cooling-off period has elapsed.

---

INQUIRY ON GREECE REPORTS TORTURES—EUROPE COUNCIL REPORT ALSO FINDS THE MILITARY REGIME BARS MANY BASIC RIGHTS

(By Alvin Shuster)

LONDON.—The European Commission for Human Rights has concluded that Greece's military-backed Government allowed torture of political prisoners and denied many fundamental human rights.

Its 1,200-page report, the result of more than two years of investigation, found that torture and ill-treatment were "an administrative practice" that was "officially tolerated." It charged that Greek authorities had taken no effective steps to stop the practices.

The commission, an agency of the 18-nation Council of Europe, also found that, contrary to contentions of the Greek regime, there was no danger of a Communist takeover at the time the army colonels seized power on April 21, 1967, and imposed martial law. It is still in effect.

"There is evidence indicating that it [a Communist takeover] was neither planned at that time nor seriously anticipated by either the military or police authorities," the commission said.

Its still-confidential report, in four volumes, is likely to bolster the case of governments that will push for the expulsion of Greece when the ministers of the Council of Europe meet in Paris on Dec. 12. The council has postponed action awaiting the commission's findings, which have now been submitted to the member nations.

Apart from the blow to Athens' prestige, expulsion from the Council would also mean removal of Greece from the Parliament of Europe, which sits in Strasbourg and prepares social and economic programs for its members.

BRITAIN TO BACK EXPULSION

Britain has decided to vote against the regime at the meeting and is trying to influence others to do so. The United States, although not a member of the council, has indicated concern about Greece's expulsion, fearing, in part, that it might lead to pressure to expel her from the North Atlantic Treaty Organization as well.

Some United States officials also worry that such council action might lead the colonels, out of pique, to withdraw from participation in NATO.

Greek leaders have sought to give the impression of movement toward democracy. They are expected to defend themselves at next month's meeting by citing steps they have taken, including recent talk of a still-vague timetable for the restoration of representative government.

But the regime will be presenting its argument against the background of the most detailed and official condemnation of its actions yet. The report represents the efforts of lawyers who took hundreds of hours of testimony and even traveled to Greece for on-the-scene investigation. Some have called their work the weightiest international legal inquiry since the Nuremberg trial of war criminals after World War II.

Technically, the council cannot take any steps on the basis of the report until three months after its submission. But such countries as Britain, Norway, Sweden and Denmark believe there are sufficient grounds for action now anyway.

CHARTER VIOLATION CHARGED

The conclusions—that the use of torture had been established "beyond doubt," that human freedoms are violated and that no Communist threat existed at the time of the coup—go to the heart of the case. The report concludes that the Greek regime has thus violated the conditions of membership, in particular Article 3.

That article in the charter of the council, founded 20 years ago, states that members "must accept the principles of the rule of law and of the enjoyment by all persons within its jurisdiction of human rights and fundamental freedoms."

Such rights may be suspended under the charter in "time of peril of other public emergency threatening the life of the nation," but the commission found that these conditions did not exist at the time of the coup.

The report said that while there was a period of "political instability and tension" in Greece, this did not constitute a "public emergency." While there were demonstrations in the streets, it said, the situation did "not differ markedly from that in many other countries in Europe."

It also rejected the Greek Government's argument that continued suspension of rights was necessary because of bomb incidents and the growth of "illegal organizations."

"The commission does not find, on the evidence before it," it said, "that either factor is beyond the control of the public authorities using normal measures, or that they are on a scale threatening the life of the Greek nation."

CONFRONTED GREEK AUTHORITIES

The report said that competent Greek authorities, "confronted with numerous and substantial complaints and allegations of torture and ill-treatment," failed to take any effective steps to investigate them or to insure remedies for "any such complaints or allegations found to be true."

Moreover, the report said that Greeks were being denied such fundamental rights as freedom of expression, association, a fair trial, and free elections at regular intervals. Such rights, it noted, are required under the council's charter.

The report, prepared by a subcommission of the Human Rights Commission, was adopted by the parent group earlier this month. It was submitted to the member countries nine days ago.

The council, primarily an advisory organization, was organized to further political, social and economic unity of Europe. Its other members are Austria, Belgium, Cyprus, France, West Germany, Iceland, Ireland, Italy, Luxembourg, Malta, the Netherlands, Switzerland and Turkey.

---

[From the Washington (D.C.) Post, Nov. 30, 1969]

AMBASSADOR TO ATHENS—CONTEMPTUOUS REMARKS ABOUT U.S. KEEPING AMERICAN ENVOY'S CHAIR VACANT IN ATHENS

(By Rowland Evans and Robert Novak)

Contemptuous remarks about the U.S. by a high Greek official are producing two wholly unexpected side effects: Keeping the American ambassador's chair in Athens vacant a bit longer and worsening relations between the State Department and the Senate Foreign Relations Committee.

Moreover, the indiscretion of Panayiotis Pipinellis, Foreign Minister of the Greek military dictatorship, might just tip the balance against full resumption of U.S. military aid to Greece.

At issue is a top-secret briefing by Pipinellis for Greek ambassadors in Western Europe delivered at Bad Schniznach, Switzerland, on Aug. 26. Two weeks ago, we reported from a verbatim account of that briefing that Pipinellis referred to the U.S. as a "so-called democracy" not to be trusted.

At that point, the Senate Foreign Relations Committee was ready to recommend confirmation of Foreign Service officer Henry J. Tasca, nominated on Sept. 9 by President Nixon for the long vacant Athens post. But when Sen. J. W. Fulbright of Arkansas heard of the Pipinellis document he informed the State Department that his committee would not act on Tasca until it had a chance to study the Pipinellis document.

The State Department went into a classic diplomatic stall. In response to three separate telephone calls from Fulbright aides, it curiously pleaded inability to locate a copy of the briefing—curious because a copy was actually in the State Department's hands before we obtained ours. Vexed with the State Department, Fulbright finally obtained a copy through private channels.

That means Tasca may not get confirmed before the new year. More important, the effort of Sen. Claiborne Pell of Rhode Island to put a rider on the foreign aid bill barring military assistance to Greece is strengthened.

In addition to Pipinellis' assault on U.S. style democracy, he belittled Mr. Nixon's Vietnam and defense policies.

"We all thought that, after the Republican victory, there would be greater stress on rearmament and on strengthening the world's defenses," Pipinellis said. "But the real situation has proved quite different. Mr. Nixon went to the Far East without, as it seems, having decided any other concrete program than a declaration to all Asians that America is returning to a policy of falling back to home."

News of U.S. troop pullouts "has been heard with disbelief," Pipinellis said, sarcastically referring to a $5 billion U.S. defense cutback as "good news."

---

[From the Washington (D.C.) Post, Nov. 29, 1969]

KEEPING THE HEAT ON THE ATHENS JUNTA

The foreign ministers of 18 nations in the prestigious Council of Europe are to meet Dec. 12 to decide whether to throw Greece out. They should. The ruling junta in Athens has, as charged, violated human rights and blocked parliamentary rule. An organization of the council's idealistic purposes which countenanced the junta would forfeit public

respect. As long as there seemed a chance that the colonels might pick their way back toward democracy, the council could reasonably suspend judgment. But the officers have made it plain they do not intend to relinquish power voluntarily. They are sapping the Greek economy and, by their clumsiness and terror, turning the public's earlier apathy into opposition. Their isolation by the Council of Europe could add an important increment of pressure on their position at home.

After the April, 1967, coup, and especially after the King's abortive countercoup that December, Greek politicians were in disarray and many observers feared there was no real and acceptable alternative to military rule. This autumn, however, Constantine Caramanlis, a widely respected former premier who had gone into exile, managed to organize the responsible political elements into a standby coalition; he offered himself as head of a provisional government of national unity. Mr. Caramanlis called on the junta to step down; otherwise, he said, other officers should "appreciate their duty"—that is, oust them. For now, the colonels remain in power. But those who oppose them can work with confidence that constitutionalism, not chaos, lies beyond.

Though the United States has taken pains to stay at arm's length from the colonels, the 20-year record of deep American involvement in Athens has given wide currency in Greece to a curious myth. This myth holds that Washington sustains the junta and that, if it chose, Washington could bring it down. Bringing down the colonels is not Washington's duty, or right. But denying them crucial support is: military aid is one kind of crucial support.

Two administrations have withheld major military aid since the coup, except for a brief period last year when jitters about the Soviet invasion of Czechoslovakia took precedence over distaste for the Athens regime. By Senator Pell's calculation, as much as $263 million in aid has backed up. In remarks not fully appreciated by the junta's American critics, the Nixon administration states that Greece has "scrupulously fulfilled" its NATO obligations—but *without* the military aid. The critics have been alarmed by a Pentagon chart listing Greece as having bought $33 million worth of arms in 1969, as against $24 million in the preceding *six* years. Inquiry reveals, however, that the $33 million figure includes $27 million for deals that fell through. The colonels are furious. The United States should do nothing to bring them joy.

## JOBS NOW, INC.—LOUISVILLE, KY.

Mr. COOK. Mr. President, I invite the attention of Senators to the outstanding community relations work being done in my hometown of Louisville by a corporation called Action Now, Inc., under the able direction of George T. Underhill, Jr.

Action Now, Inc., represents the involvement of the private sector in the problems of the underprivileged. It does not in any way compete with Federal, State or local agencies. Rather it attempts to complement and aid them. Its primary purpose is to tap one of the city's largest resources—successful management. The directors of Action Now, Inc., are drawn from the Louisville business community, black and white. They have much to offer that cannot be duplicated in a Government agency: Their time is unstructured, they are familiar with their city's problems, they have a vested interest in those problems.

Action Now is a privately financed, nonprofit organization designed to function as its name implies—to stimulate jobs, housing, and business experience for the disadvantaged. Its three companies function in the areas of job procurement, Jobs Now; adequate housing, Housing Now; and business advice and guidance, Economic Development Now.

Jobs Now is an employment agency only for the hard-core unemployed, including parolees. It has a particularly practical approach to job training which avoids the pitfalls of other such programs. No one is processed through training unless a specific job awaits him at the end of the program. The agency thus enlists a strong commitment from industry—willingness to lower entry-level standards and to work with the hard-core individual. Training includes orientation toward how to succeed on the job; for example, explaining what sort of behavior will be expected and rewarded. A job counselor is assigned to each prospective employee for the period of 1 year, during which time they meet at least once a week to anticipate problems which may interfere with work performance. Job counselors are ghetto products who, in contrast to their counselees, have had successful work experience. Group counseling is used whenever possible, because the hard-core individual more readily opens up to his own peers.

Perhaps the most important service that Jobs Now provides and one that is probably overlooked by other employment facilities is supervisor training. This takes the form of informal group discussion of problems of working with the hard-core unemployed by the supervisors on the job. A significant index of the success of this approach is that companies using this training have not only improved their retention rate of the hard-core dramatically, but they have also reduced the turnover of all employees in entry-level jobs.

Housing Now acts as a technical consultant to religious, civic, and other nonprofit groups. It aims to stimulate new housing for low-to-moderate-income families and the rehabilitation of blighted areas, by helping to arrange financing and construction. It also encourages homeownership by the underprivileged, which provides a sense of personal responsibility and stimulates better community spirit. Projects currently in process represent approximately 1,000 units with an estimated cost of $15 million.

Economic Development Now actively recruits potential disadvantaged-owned businesses, and then provides thorough, professional marketing advice. The board of advisers selects for study only those businesses with a potential for viability and opportunities for employment. It helps develop specific financing, train management, and stays with the business until successful. Perhaps most important, it publicizes and promotes its programs in the community in order to enlist full community participation.

## McCOOK, NEBR., DAILY GAZETTE CLOSES PAGES TO X-RATED MOVIES

Mr. CURTIS. Mr. President, our whole Nation should be grateful to the people who are speaking up for decency and order.

On November 19, 1969, the McCook Daily Gazette at McCook, Nebr., carried an editorial reciting that its pages were closed to X-rated movies. I commend them for it. Because I think the editorial deserves a place in the CONGRESSIONAL RECORD, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the McCook Daily Gazette, Nov. 19, 1969]

GAZETTE CLOSES PAGES TO X-RATED MOVIES

The McCook Daily Gazette is hereby joining those newspapers across the nation who are refusing to advertise the X-rated movies.

The movie shown last week at the Fox Theater is the first ever shown in McCook to rate the X classification under the new Hollywood system for openly filming and advertising not only questionable material but what some consider detrimental to the moral well being.

Even movies carrying the R (restricted) rating are far from a compliment to the film industry and Hollywood.

Newspaper people are not noted for a "holier than thou" attitude and can generally roll with the tide of change and adjustment, but it is extremely difficult to see how the Hollywood trend today under the disguise of "realism" can be good for society in any stretch of the imagination.

Walt Disney Studios are an exception to the Hollywood trend and we salute them. Likewise, the local theater management is not to blame since it has only limited control over film selection.

The moral decay is not confined to the screen but can be found at most newsstands and the U.S. mail is full of it. Our elected officials must find a way of stopping this.

Pornography flows through the mails with return addresses, indicating absolutely no fear of prosecution. Why? We frankly don't know. The freedom of press guarantee has been used as an alibi in some cases but what is commonplace in the mails today has absolutely nothing to do with freedom of the press and any judge would have difficulty making anyone believe there is a grey area to hide behind.

This newspaper can not stop this rage in our nation or even in McCook but we can and are preventing the film industry from using our pages to advertise X rated movies in the future.

## GRAZING FEES—II

Mr. METCALF. Mr. President, yesterday I called the attention of the Senate to the inability of the Secretary of the Interior to provide in 15 days the information regarding grazing fees on which he has given the public 30 days in which to comment.

Fortunately, the resolution of the Senate Committee on Interior and Insular Affairs, to which I referred yesterday, was also directed to the Secretary of Agriculture.

The committee has received, and within the time specified, "A Review of the Forest Service Grazing Fee System as Implemented in 1969 on National Forests in the 11 Western States, South Dakota and Nebraska." Prepared in November 1969 by Chief Edward P. Cliff of the U.S. Forest Service, it will be helpful to those seriously concerned with the management of our public lands as they prepare comments on Secretary

Hickel's tentative conclusion not to increase grazing fees on the public lands for 1970. I therefore ask unanimous consent that this report and its appendices be printed at this point in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

A REVIEW OF THE FOREST SERVICE GRAZING FEE SYSTEM AS IMPLEMENTED IN 1969 ON NATIONAL FORESTS IN 11 WESTERN STATES, SOUTH DAKOTA AND NEBRASKA

(By Edward P. Cliff, Chief, Forest Service, USDA, November 1969)

PURPOSE

By its August 7, 1969, resolution, the Senate Committee on Interior and Insular Affairs requested a comprehensive review of the grazing fee schedules as announced January 14, 1969. The review was to include consideration of whether the public interest and equity, as well as the intent of the Congress as expressed in specified Acts, are reflected in the criteria and methods used. The Acts to which the Resolution referred are the Taylor Grazing Act and Title V of Public Law 137, 82nd Congress (65 Stat. 268, 290), the Independent Offices Appropriation Act of 1952. This report presents findings of a review of the Forest Service grazing fees system in 1969.

FEE AUTHORITIES AND POLICIES

User charges for livestock grazing on Federal lands in the National Forest System are established by the Secretary of Agriculture under authorities that flow to him through provision of the Organic Administration Act of 1897 as well as the 1952 Act cited above and other authorities. No provision in the law gives direction specific to grazing fees on the National Forests. In this respect the Department of Agriculture is different from the Department of the Interior which does have specific statutory direction about grazing fees. Under Section 3 of the Taylor Grazing Act (48 Stat. 1269, as amended by the Act of August 6, 1947, 61 Stat. 790, 43 USC [1964 ed.] sec. 315b), the Secretary of the Interior is authorized to issue grazing permits upon payment of reasonable fees and is given therein further direction about fees.

Title V of the Independent Offices Appropriation Act of 1952 sets forth Congressional direction applicable to the establishment of user charges for grazing on the Federal lands in the National Forest System (Appendix A).

In response to a long history of looking at user charges, some of which went back to 1947, the Bureau of the Budget in 1957 set forth in a BOB Bulletin general policies for developing an equitable and uniform system of charges for certain Government services and property. Policies of the 1957 Bulletin were incorporated into Circular A–25, the September 23, 1959, policy directive on User Charges by the Bureau of the Budget. The general policy of Circular A–25 was amplified in a 1964 "Natural Resources User Charges" report that spelled out general principles to follow in establishing user charges. Principles specific to establishment of grazing fees were presented in the 1964 BOB report.

Circular A–25 and the 1964 Report specified that fair market value should be obtained where federally owned resources or property are leased or sold. The 1964 BOB report restated the policy that the recipient of special benefits that accrue from the use of federal resources to identifiable recipients above and beyond those that accrue to the public at large generally should pay a reasonable charge for the resource used. That basic concept is believed to have been an endorsement of Title V of the Independent Offices Appropriation Act of 1952.

In transmitting the 1965 budget to the Congress, the President said, "Many Federal Government programs furnish specific, identifiable benefits to the individuals and businesses using them. Equity to all taxpayers demands that those who enjoy the benefits should bear a greater share of the costs."

THE FEE SYSTEM

Under the authority above noted the Secretary of Agriculture set forth the new fee system for the National Forest System in a Regulation (36 CFR 231.5), published January 14, 1969, in the Federal Register. (Appendix B). This system has been in effect during 1969 on the 97 National Forests in the 11 Western States, South Dakota and Nebraska. It will raise grazing fees to fair market value in 10 equal annual steps.

As announced by the Bureau of the Budget on January 14, 1969, the grazing fees decision was made using data obtained in 1966 from a westernwide survey of some 10,000 farmers and ranchers, and bankers and other representatives of lending institutions. The basis for the method used in the survey was a series of studies that extended back to about 1961. The Bureau of the Budget provided policy direction and guidelines that had their basis in Title V of the Independent Offices Appropriation Act of 1952 referred to above.

The formulation of the 1966 Western Livestock Grazing Survey, the analysis of the data thereby produced, the design of the grazing fee formula, and the implementation schedule announced on January 14, 1969, were all guided by the Congressional mandate and Executive principles previously discussed.

The general principle of the new grazing fees system was establishment and recovery of fair market value for the Government. The system recognized that immediate, full imposition of a fair market value charge could have an adverse impact on the users and, thus, set forth a schedule that would take ten years to arrive at the fair market value level. This was considered to be the reasonable period of time called for in the policy guidelines. It was considered to be in line with the 1952 Act which prescribes fairness and equity.

The system placed into effect in 1969 further employs the principle of uniformity in the basis for grazing fees charges among the several Federal agencies that administer public lands for grazing. Under the new system, a common set of guidelines and procedures was used to arrive at the basis for grazing fees on the National Forests and on the Federal lands administered by the Bureau of Land Management and a uniform fair market value fee level was established. The fee system is fully intended to provide a fair return to the Government and equitable treatment to the users.

THE FEES SYSTEM IN REVIEW

One of our concerns throughout the past ten years of fees studies, surveys, and analyses and evaluation, has been that of equity to the user while attempting to find a fee system that also is equitable to the Federal Government. We have believed that the system now in effect is such a system. As I pointed out to the Public Lands Subcommittee of the Senate Interior and Insular Affairs Committee on February 27, 1969, "Our overriding concern has been to sympathetically and responsibly weigh impacts . . .", upon the permittees. Our concern, as does the Committee's, continues. Thus, we have been reviewing the fees system in several respects.

We are trying to determine whether or not differences exist from place to place that are great enough to justify continuation of a variable fee system that may be more equitable than the one fee level which all National Forest fees will reach in 1978. In addition the Department is interested in giving special considerations to problems of small livestock operators in low-income areas. The Forest Service has many of this kind of operator. In F.Y. 1970 we are placing emphasis on improving grazing opportunities to low-income area permittees using a small increase in our range appropriations.

Conservation groups supported the decision as did eastern and some western farmers and ranchers who do not share in the privilege to graze livestock on the National Forests. However, the revision initially was protested strongly by a number of livestock permittees who indicated that increases in fees under the new system will put them out of business. Strength of the protest, as well as the support, is evidenced in the records of the Hearings before the Subcommittees on Public Lands of the Senate and House Committees on Interior and Insular Affairs[1] and litigation in Utah and New Mexico. The grazing fees matter also was discussed to some degree in hearings and meetings of the Advisory Council to and before the Public Land Law Review Commission during the year.

The January 14, 1969, Regulation was challenged by that segment of the livestock industry using public lands through a suit filed against the Secretary of Interior in the U.S. District Court for Utah. Suits were also filed against both the Secretary of Interior and the Secretary of Agriculture[2] in the U.S. District Court for New Mexico. Injunctive relief was sought against the regulations in each suit. In all instances, the Courts dismissed the cases in favor of the Secretaries.

In the New Mexico District Court case the Court ruled that "It has not been shown that the Secretaries have failed to consider all the factors as directed by Congress. They have acted within the area of discretion and judgment committed to them by law in promulgating the new regulations . . . ."

The New Mexico case has been appealed to the United States Tenth Circuit Court of Appeals and will probably be heard in 1970.

Because of the protests to the current fee schedule and the expressed concern of Congress, our concern has extended to specific individual user groups for whom the new fee has been predicted to be an excessive burden. Therefore, in line with the Committee's resolution, we have made an extensive search of our records and other sources of information to determine the degree to which the current fee schedule has been responsible for causing economic hardships.

In making this review we sought to determine if, because of the new fee schedule, (a) permittees are in fact being put out of business as alleged and to what degree permittees are declaring bankruptcy, (b) permittees are waiving permits back to the Forest Service or permit transfers are continuing, (c) permittees have been refused mortgages or if their ability to obtain loans has been reduced, (d) the permit is still used as collateral and to what extent, (e) permittees refused to pay their fees or paid under protest, (f) permittee cooperative contributions to structural and non-structural improvements and maintenance on the National Forests have been reduced.

The setting for our review is the fee sys-

tem as it has been in effect. A summary of 1969 grazing fees on the Western National Forests provides that setting.

1969 GRAZING FEES

In 1969, National Forest cattle fees averaged 1 cent higher than they would have been under the old system. The old fees were hitched to livestock prices and, since average prices paid to farmers and ranchers in 1968 were up from 1967, the increase would have been reflected in 1969. However, averages do not tell the whole story.

Forest Service grazing fees varied widely from place to place under the system in effect from 1931 through 1968. Under the new system, this variability will continue, although decreasing as fees approach the fair market value for 1978. In 1969 National Forest fees for cattle varied from 31 cents to $1.25; under the old system they would have varied from 22 cents to $1.90. Sixty percent of the Forest Service grazing users on the Western National Forests paid the same fee or less in 1969 than they would have paid under the old system. However, fees in 1969 increased for the remaining 40 percent of the cattle permittees over what they would have paid under the old system. These increases varied from 1 cent to 9 cents per animal unit month, with the greatest increases where fees have been the lowest.

Sheep fees on the National Forests in 1969 varied from 6¼ cents to 25 cents per sheep month. One sheep fee rate was decreased 17¼ cents per sheep month from what it would have been under the old system. The remaining sheep fees increased, when compared against the 1969 fees under the old system, by from ¼ to 2¼ cents per sheep month.

FEES IMPACTS

Our review of data from the 97 National Forests in the 11 Western States and South Dakota and Nebraska and other sources disclosed the following:

(a) Out of almost 15,000 permits affected by the new fees system, only six (6) relinquished their permit due to ranch liquidation and bankruptcy. This is about 4/100 of one percent of all permits. In none of these six relinquishments was there any indication that the new fees schedule played any part in the foreclosure. Economic Research Service data relating to farm title transfers shows that forced sales as a percentage of all classes of title transfers did not change for 1969 in the Mountain and Pacific Regions, as compared with previous years.[3]

(b) *The new fee system has had no effect on the movement of permits in 1969.* Total number of permits transferred from one rancher to another has been about the same as in recent years. In 1969 through October, 694 permits (4.6 percent of all permits) were transferred—586 of which were cattle permits. This is from a 1969 total of slightly less than 15,000 permits. This compares with a 5-year (1961–1965) average of 624 transferred annually (4.2 percent of all permits)—534 of which were cattle. Permits transferred in 1969 ranged in size from 1 to 1,283 cattle and from 25 to 6,207 sheep. Transfers were reported on almost every National Forest. Thus, it would appear that demand for Forest Service grazing permits at the normal supply rate was unaffected by the fees decision.

(c) *There were 368 escrow waivers of Forest Service permit privileges filed in 1969.*[4] Although data for full comparison with prior years is not readily available, it is believed that there is essentially no change in 1969 from previous years in number, size and tenure of loans to Forest Service permittees as evidenced by escrow waivers filed.

Sheep and cattle permittees of all size classes obtained loans in 1969 (Appendix C). Half of the 368 mortgages issued to Forest Service permittees in 1969 for which we have records were for $50,000 or more. Minimum mortgage value was for $1,000 to be loaned annually; maximum value was $2,540,000. Simple average value was $117,073. Total value of all mortgages initiated in 1969 as of November 1, 1969, was $42,848,866.

The proportion of all loans made to Forest Service permittees in 1969 by the Federal Land Banks and other banks and savings and loan institutions remained essentially the same as loans of record in 1967 (Appendix D). Proportion of loans by insurance companies decreased significantly while Farmers Home Administration, Production Credit Association, and loans made by individuals increased greatly. If this decrease in insurance company loans and increase in loans by individuals is in fact a change from typical annual loans, it more than likely is a reflection of increased interest rates charged by insurance companies.

(d) *The question of degree of use of permit value as partial collateral is difficult to answer.* Loans are normally made following an appraisal of the value of the total operation and the net earning capabilities of the operator. An appraisal of the operation encompasses the total ranch operation. That portion of the operation dependent upon National Forest lands, called assured lands, is discounted due to the risk of change of number of animals permitted. The amount of discount varies with each operation and is dependent upon several factors, mostly including past history of the operation and the operator. The fact is that the grazing privilege is considered part of the total ranch operation and is, after discounting, considered in determining the total amount of loan to be transacted. Since the recent fees decision in no way alters the grazing privilege itself, the higher fee will have no effect on this portion of the ranch value appraisal. The net-income portion of the appraisal is the area where higher fees may affect the total amount of mortgage. The estimated net income measures the rancher's ability to repay the loan. As fees are increased with no income-compensating factor, this estimated net income will be reduced. From the records available, comments from our field people, and discussions with lending personnel, the fees increase in 1969 has apparently had no measurable effect on the lending industry's willingness to make loans to permittees nor on the amount of such loans.

(e) *Less than 1 percent of all permittees (119 permittees) paid their fees under protest to the new fees system.* Many of these 119 protests, 80 percent of which originated in the Southwest, were declared by the permittee writing on his fee bill the following statement as encouraged by National and State livestock organizations: "This payment is made without waiver of any rights which the permittee may have to seek refund in the event it is eventually determined that the increased grazing fees represented by your statement are invalid." Others simply wrote, "paid under protest." There were no reports of permittees refusing to pay their fees in 1969 for any reason.

(f) *Of all 97 National Forests on which the new fee schedule is effective in 1969, only one reported any decrease in permittee cooperation.* This one occurrence is an isolated case consisting of one permittee. Most Forests reported no noticeable change in cooperation. Several reported an increase in permittee cooperation toward structural and non-structural improvements and maintenance in 1969.

(g) *A review of lease rates charged by States and large corporations showed that in 1969 almost every lease rate was higher than actual Forest Service fees.* Most charges were higher than the $1.25 fair market value. The lowest lease rates charged include the State of Montana charge of 76 cents per animal unit month and the State of Utah charges ranging from 55 cents to $1.37 per animal unit month. Most lease rates ranged from $1.00 to $2.50 per AUM.

(h) *In the Western States 15 corporations based their lease rates directly on Forest Service fees.* Three of these charged fees determined under the previous Forest Service fee system due to lack of time to change the agreement. The other 12 corporations have land intermingled with or adjacent to National Forest lands and allow their land to be managed by the Forest Service. Fees on these lands in 1969 were the same as on National Forest land. Collectively these corporation lands total 596,000 acres which are managed along with 47 Forest Service management units.

(i) *Although several States are in the process of revising their grazing fee schedules and many plan a fee increase in 1970, only Idaho is planning to increase its fees due to the increase in Forest Service fees.*

(j) Outside of the corporations in (h) above that use the Forest Service fee as a basis of charge, *there is no indication of any other corporations that will adjust their fees in 1970 due to the Forest Service fees increase.* The few corporations which stated that they do intend to increase fees in 1970 also stated the changes are due to factors other than the Forest Service fees change.

(k) *We asked the Farmers Home Administration and the Farm Credit Administration of the U.S. Department of Agriculture if they had denied credit to permittees or modified their credit facilities as a result of the fee system change.* The Farmers Home Administration reports that it has encountered no cases where FHA credit has been denied due to the grazing fees announced January 14, 1969. The Farmers Home Administration further reported that the number of requests for farm purchase loans continues to exceed the funds available for these loans, indicating the demand for loans continues. The amount loaned to date in 1969 in the 11 Western States exceeds the amount loaned in 1968. Responses from James V. Smith, Administrator, Farmers Home Administration, and Edwin A. Jaenke, Governor, Farm Credit Administration, are included in the Appendix. (Appendixes E and F).

SUMMARY AND CONCLUSIONS

The grazing fee system put into effect in 1969 on National Forests in the 11 Western States, South Dakota and Nebraska utilized administrative policies and principles that have their basis in Title V of the Independent Offices Appropriation Act of 1952 (P.L. 137; 82nd Congress; 65 Stat. 268, 290).

Under a regulation of the Secretary of Agriculture, fees are to attain fair market value level in equal annual increments over a ten-year period. Protests against the new system were made by members of the livestock industry; conservation groups and many individuals supported the new system.

In lawsuits seeking injunctive relief from the fees regulations, the U.S. District Court for New Mexico found that the actions on grazing fees were not beyond the authority delegated by Congress to the Secretaries and that the Secretaries had taken into account the required items as directed by Congress.

[3] Farm Real Estate Market Developments, ERS, USDA, CD–73, August 1969.

[4] The Forest Service has an arrangement with the Farm Credit Administration and Farmers Home Administration, also used by other lenders, by means of which the lender can be advised of Forest Service management decisions that may affect the size of a Forest service grazing permit issued to the permittee who has an operational or other loan with his permitted livestock or base property used as collateral. The form of record is held in Forest Service files and is called an escrow waiver. Change in number, size, and tenure of loans to Forest Service permittees is an index to the degree to which the new grazing fee system has affected the ability of the rancher to obtain operational and other financing.

Prices paid in the private forage market are still considerably above those charged for use of the public land resource. The percent of forced sales in the farm real estate market for 1969 has not changed. The number of loans and total amount loaned to agriculture-related industries in the 11 Western States has increased for 1969 and the rancher income has improved over previous years.

FHA loan credit has not been denied due to the new grazing fees. Federal Land Bank System policy in regard to lending on ranches dependent on permits has not been changed as a result of the fees increase in that the capacity provided by the grazing permit is still being recognized. Ranchers using private lands are able to function economically even though paying lease rates much higher than the public lands fee scheduled for 1978.

In our judgment the criteria used in arriving at the new system on the National Forests do, in fact, conform to criteria established by Congress in Title V of Public Law 137, 82d Congress (65 Stat. 268, 290).

A fee system is in effect that will return the Federal Government fair market value for the grazing privilege. It considers public equity. The grazing user, with his tenure of use unaffected by the fees decision, remains essentially in the same position insofar as his ability to secure operational and other loans is concerned. Forest Service grazing permits continue in demand with the rate of transfer essentially the same as in the 5-year period 1961–1965.

Evaluation of extensive information collected from the 97 National Forest areas throughout the 11 Western States and in South Dakota and Nebraska and other sources strongly indicates that the public interest and equity are being served under the new grazing fee system.

---

APPENDIX A

TITLE V—FEES AND CHARGES

It is the sense of the Congress that any work, service, publication, report, document, benefit; privilege, authority, use, franchise, license, permit, certificate, registration, or similar thing of value or utility performed, furnished, provided, granted, prepared, or issued by any Federal agency (including wholly owned Government corporations as defined in the Government Corporation Control Act of 1945) to or for any person (including groups, associations, organizations, partnerships, corporations, or businesses), except those engaged in the transaction of official business of the Government, shall be self-sustaining to the full extent possible, and the head of each Federal agency is authorized by regulation (which, in the case of agencies in the executive branch, shall be as uniform as practicable and subject to such policies as the President may prescribe) to prescribe therefor such fee, charge, or price, if any, as he shall determine, in case none exists, or redetermine, in case of an existing one, to be fair and equitable taking into consideration direct and indirect cost to the Government, value to the recipient, public policy or interest served, and other pertinent facts, and any amount so determined or redetermined shall be collected and paid into the Treasury as miscellaneous receipts: *Provided*, That nothing contained in this title shall repeal or modify existing statutes prohibiting the collection, fixing the amount, or directing the disposition of any fee, charge or price: *Provided further*, That nothing contained in this title shall repeal or modify existing statutes prescribing bases for calculation of any fee, charge or price, but this proviso shall not restrict the redetermination or recalculation in accordance with the prescribed bases of the amount of any such fee, charge or price.

APPENDIX B

TITLE 36—PARKS, FORESTS, AND MEMORIALS

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 231—GRAZING

*Grazing fees*

Part 231 of Title 36, Code of Federal Regulations, as revised in the FEDERAL REGISTER, volume 33, No. 56, page 4802, dated March 21, 1968, is further revised as follows:

Section 231.5, *Grazing fees*, is revised to read as follows:

§ 231.5 Fees, payments, and refunds or credits.

(a) *Fees.* (1) Fees will be charged for all livestock grazing upon or crossing National Forest System lands or other lands under Forest Service control except such livestock as may be grazed free of charge under paragraph (b) (6) and (7) of § 231.3. Such fees will be based on general governmental policy as established by Bureau of the Budget Circular A–25 of September 23, 1959, which directs that a fair market value be obtained for all services and resources provided the public through establishment of a system of reasonable fee charges, and that the users be afforded equitable treatment. This policy precludes a monetary consideration in the fee structure for any permit value that may be capitalized into the permit holders' private ranching operations.

(2) Fair market value is defined as the difference between total costs of operating on private leased grazing lands and total nonfee costs of operating on National Forest System lands. These costs include lost animals, veterinary services, moving livestock to and from permitted areas, herding, salt and feeding, travel to and from permitted areas, water, horses, fence and water maintenance, development depreciation, and other miscellaneous costs. In addition the private costs include the private lease rates.

(3) A base fee of $1.23 per cow month for the National Forests in the six Western Forest Service Regions is derived from the comprehensive survey conducted by the Department of Agriculture's Statistical Reporting Service in 1966. This 1966 base of $1.23 is a sliding base adjusted annually against an index of private land grazing lease rates as determined by the Economic Research Service for the year preceding the fee year (Annual Forage Value Index). If significant differences in fair market values are determined to exist for various geographical areas or because of differences in the quality of the range environment, these differences will be incorporated into the basic fee structure for National Forest System lands. Fair market value base rates will be developed through similar studies for other National Forests, the National Grasslands, and Land Utilization Projects. Current base rates and procedures will apply for these lands until new base rates are established.

(4) Conversion to the 1966 base rates for the Western National Forests will be carried out during a 10-year period beginning in 1969. The difference between the fees paid in 1966 and the 1966 base rate of $1.23 will be made in installments of 10 percent per year for a 10-year period. Increases or decreases in the base rate because of changes in the index of private land grazing leases will be made annually. Changes derived from this index between 1966 and 1968 increase the base by $0.02 to $1.25 per cow month in 1969. Fees which have previously been established through appraisals and are currently above the 1966 base rate will be reduced to $1.25 per cow month in 1969. Fees which have been established by competitive bid will remain unchanged during the period specified in the bid.

(5) The fair market value is based on one (1) animal month of grazing by a mature cow. Five (5) sheep are considered as equivalent to one cow.

(6) No charge will be made for animals under 6 months of age at the time of entering National Forest System lands and other lands under Forest Service control which are the natural increase of the livestock upon which fees are paid or for those born during the season for which the permit is allowed: *Provided*, That the full fee may be charged for all weaned calves and colts regardless of age and for such animals as will become 12 months of age during the permitted period of use.

(7) No additional charge will be made for the privilege of lambing upon National Forest System lands or other lands under Forest Service control.

(8) Pack and saddle animals may be charged for at a special rate, and a minimum permit charge established for such use.

(9) The fees for crossing privileges will conform with the rates established for other livestock under paid permit. Where practicable, crossing fees for permitted livestock will be covered in the regular grazing fee and the crossing period covered in the regular grazing period.

(b) *Payments.* (1) Grazing fees are payable in advance of the opening date of the grazing period unless otherwise authorized by the Chief, Forest Service.

(2) Crossing fees are payable in advance of the livestock entering National Forest System lands or other lands under Forest Service control.

(c) *Refunds or credits.* (1) Refunds or credits may be allowed under justifiable conditions and circumstances as the Chief, Forest Service, may specify.

(Sec. 1, 30 Stat. 35, as amended, sec. 1, 33 Stat. 628; 16 U.S.C. 551, 472; sec. 32, 50 Stat. 525, as amended; 7 U.S.C. 1011)

*Effective date.* This revision shall become effective on the date of its publication in the FEDERAL REGISTER.

ORVILLE L. FREEMAN,
*Secretary of Agriculture.*

JANUARY 10, 1969.

APPENDIX C

NUMBER OF ESCROW WAIVERS INITIATED JAN. 1, TO OCT. 31, 1969 BY SIZE OF PERMIT AND TOTAL AMOUNT OF MORTGAGE, CATTLE AND SHEEP, NATIONAL FORESTS, REGIONS 1-6

| Size of permit | Total amount of mortgage (dollars) | | | | | | |
|---|---|---|---|---|---|---|---|
| Number of head permitted | Less than 25,000 | 25,000 to 49,999 | 50,000 to 99,999 | 100,000 to 249,999 | 250,000 to 999,999 | 1,000,000 and over | Total |
| Number cattle permittees: | | | | | | | |
| 1 to 40 | 25 | 15 | 7 | 3 | 0 | 0 | 50 |
| 41 to 100 | 35 | 28 | 21 | 11 | 8 | 1 | 104 |
| 101 to 250 | 15 | 26 | 26 | 19 | 6 | 0 | 92 |
| 251 to 1,000 | 1 | 5 | 18 | 13 | 13 | 4 | 54 |
| 1,001 and over | 0 | 0 | 3 | 0 | 3 | 0 | 6 |
| Total | 76 | 74 | 75 | 46 | 30 | 5 | 306 |

APPENDIX C

NUMBER OF ESCROW WAIVERS INITIATED JAN. 1, TO OCT. 31, 1969 BY SIZE OF PERMIT AND TOTAL AMOUNT OF MORTGAGE, CATTLE AND SHEEP, NATIONAL FORESTS, REGIONS 1-6

| Size of permit | Total amount of mortgage (dollars) | | | | | | |
|---|---|---|---|---|---|---|---|
| Number of head permitted | Less than 25,000 | 25,000 to 49,999 | 50,000 to 99,999 | 100,000 to 249,999 | 250,000 to 999,999 | 1,000,000 and over | Total |
| Number sheep permittees: | | | | | | | |
| 1 to 200 | 3 | 0 | 0 | 0 | 0 | 0 | 3 |
| 201 to 500 | 9 | 1 | 0 | 2 | 0 | 0 | 12 |
| 501 to 1,250 | 7 | 9 | 2 | 2 | 2 | 0 | 22 |
| 1,251 to 5,000 | 1 | 4 | 6 | 5 | 9 | 0 | 25 |
| 5,001 and over | 0 | 0 | 0 | 0 | 2 | 0 | 2 |
| Total | 20 | 14 | 8 | 9 | 13 | 0 | 64 |
| Grand total | 95 | 88 | 83 | 55 | 43 | 5 | [1] 370 |

[1] Of the 368 actual escrow waivers filed, 2 did not have the total amount of mortgage shown and 4 were based on both cattle and sheep permits.

APPENDIX D

LOANS TO FOREST SERVICE PERMITTEES AS A MATTER OF RECORD [1] IN 1967 AND NEW LOANS OBTAINED IN 1969, BY LENDER OR LENDER GROUP

(Forest Service permittees on National Forests in the 11 Western States and South Dakota and Nebraska)

| Lender | Loans as of 1967 (percent) | Loans obtained in 1969 (percent) |
|---|---|---|
| Federal Land Bank | 38 | 37 |
| Insurance Companies | 38 | 19 |
| Farmers Home Administration | 3 | 9 |
| Production Credit Association | 1 | 3 |
| Individuals and other non-institutional | 17 | 30 |
| Banks, and savings and loan institutions | 3 | 2 |

[1] From escrow waiver records in Forest Service files.

APPENDIX E

U.S. DEPARTMENT OF AGRICULTURE,
FARMERS HOME ADMINISTRATION,
*Washington, D.C., November 17, 1969.*

Subject: Grazing Fees Schedules Review, Senate Committee on Interior and Insular Affairs.

To: Edward P. Cliff, Chief, Forest Service.

We have reviewed the material attached to your memorandum of November 10.

The Farmers Home Administration makes loans to individuals and groups which involve, in many cases, Forest Service grazing permits.

We have encountered no cases to date where FHA credit has been denied due to the grazing fees announced January 14, 1969. In fact, the revised fee schedule may enable family-type farmers a better opportunity to secure grazing permits.

We have not modified our regulations as a result of this increase as each loan, individual or group, must be determined economically feasible before it can be approved. If the increased grazing fees would cause a loan request not to be feasible, then the proposal would have been very marginal anyway.

We have nothing adverse to report.

JAMES V. SMITH,
*Administrator.*

APPENDIX F

To: Edward P. Cliff, Chief, Forest Service, USDA.

From: E. A. Jaenke, Governor, Farm Credit Administration.

Subject: Senate Committee Grazing Fees Resolution.

This is in reply to your November 10 memorandum in regard to the impact on the ranch lending policies of the Farm Credit System caused by the increased grazing fees on the public lands. We do not have the specific information you requested on denied loan applications, and the question you pose in light of only one year's experience with the new fee schedule is a difficult one. There are, however, a few general observations that might be helpful. Ranch real estate loans would be the most directly affected so these comments apply to the land banks' lending.

1. There do not seem to be any indications at this time that ranchers are being denied credit due to increased grazing fees or because the permit values have been discounted as collateral for loans. Good livestock prices over the past few years have more than compensated for the increase and it is difficult to say what the effect might have been with lower cattle prices. However, it does not appear that it would have affected any but the most marginal cases.

2. The Land Bank System policy in regard to lending on ranches dependent on permits has not been changed as a result of the fee increase in that the capacity provided by the permit grazing is still being recognized. It should be noted, however, that in our normal value appraisal process the value of the portion of the ranch capacity provided by permit grazing has always been discounted to take care of the additional risk. The present levels of land bank ranch appraisal standards were set in May 1968. These levels were reviewed in the Spring of 1969 and were left essentially the same. Changes that were made were not related to the fee issue. The Farm Credit Administration plans to continue to make an annual review of the land bank ranch lending standards.

3. In lending on ranches dependent on permit grazing, the land banks are just as concerned about the outlook for the tenure and stability of the permits as the fees charged. Any uncertainty in this regard would very likely have as great or greater effect on ranch prices and financing as would the increased fees.

4. On the basis of the information we have, the sales price of ranches heavily dependent on permit grazing has been relatively static for several years and no change in this situation has been noted since the fee schedule was announced. Nearly the same situation exists in completely fee-owned ranches; however, there probably has been more upward movement of prices on these properties especially in the central and northern plains.

Since the process of appraisal and lending is complicated by so many factors, all the way from the applicant's management ability to the organization of his ranch, it is very difficult to isolate the effect of the increased grazing fees. One thing is certain, however, and that is, anything that increases a rancher's expense will eventually affect his ability to repay and the lender's willingness to loan unless he can take up the slack through efficiencies in his operation. This, of course, applies to all other cost factors in a ranch operation as well as grazing fees. For example, real estate tax increases on some ranch properties may be more significant than the increased grazing fees.

As you know we have watched the developments on the grazing fee issue very carefully and will continue to do so. It will be our policy to make adjustments as they are needed; however, we plan to continue giving consideration to the leasehold benefits of public land grazing permits in our valuation and lending process.

Mr. METCALF. Mr. President, included in this report is a letter of November 17, from the Administrator of the Farmers Home Administration advising the Chief of the Forest Service that they "have encountered no cases to date where FHA credit has been denied due to the grazing fees announced January 14, 1969," and further, "we have nothing adverse to report."

Also included in the report is a memorandum of November 21 from the Governor of the Farm Credit Administration advising the Chief of the Forest Service:

There do not seem to be any indications at this time that ranchers are being denied credit due to increased grazing fees or because the permit values have been discounted as collateral for loans.

The Land and Bank System policy . . . has not been changed as a result of the fee increase.

Any uncertainty (about the outlook for the tenure and stability of the permits) would very likely have as great or greater effect on ranch prices and financing as would the increased fees.

. . . The sales price of ranches heavily dependent on permit grazing has been relatively stable for several years and no change in this situation has been noted since the fee schedule was announced.

In turn, the Chief of the Forest Service observed:

The U.S. District Court for New Mexico found that the actions on grazing fees were not beyond the authority delegated by the Congress to the Secretaries (of Agriculture and Interior) and that the Secretaries had taken into account the required items as directed by the Congress.

Prices paid in the private forage market are still considerably above those charged for use of the public land resource. The percent of forced farm sales in the farm real estate market for 1969 has not changed. The number of loans and total amount lent to agriculture-related industries in the 11 Western States has increased for 1969 and ranch income has improved over previous years.

Ranchers using private lands are able to function economically even though paying lease rates much higher than the public land fee schedulec for 1978.

The grazing user, with his tenure of use unaffected by the fees decisions, remains essentially in the same position insofar as his ability to secure operational and other loans is concerned. Forest Service grazing permits continue in demand with the rate of transfer essentially the same as in the 5 year period 1961–1965.

Evaluation of extensive information collected from the 97 National Forest areas throughout the 11 Western States, South Dakota and Nebraska and other sources strongly indicate that the public intent and equity are being served under the new grazing fee system.

If, on November 25, Secretary of the Interior Hickel had had such a report before him I wonder if he would have concluded that the Interior Department should not continue with the schedule of grazing fees announced January 14, 1969.

On December 7, the Washington Post,

discussing Nixon administration themes for 1970, reports that Secretary Hickel "has also recommended the establishment of a new Cabinet department that would be known as the Department of Natural Resources and Environment."

As a cosponsor of the Moss bill to provide such a department, I believe it might better serve the public interest than what has been demonstrated in this area by the Secretary of the Interior to date.

## THE ROLE OF THE ARTS IN OUR COUNTRY

Mr. PERCY. Mr. President, on Thursday Congress received a most thought-provoking message from President Nixon regarding the role of the arts in our country. It requested $40 million, almost double the current amount, for the National Foundation on the Arts and Humanities in the next fiscal year. The President noted that few investments we could make would give us so great a return in human understanding, human satisfaction and the essential qualities of spiritual fulfillment.

I particularly wish to commend the President for his appointment of Miss Nancy Hanks as Chairman of the Arts Foundation. It is indeed a distinguished appointment, in keeping with that of her predecessor, the able Roger Stevens.

I fully agree with President Nixon that our Nation has a responsibility to encourage the arts and humanities. The judgment of history is passed not upon a nation's gross national product but upon the quality of its life. Art must be an integral part of our lives.

How many young Americans, whose natural talents and abilities could have led them into long and productive lives in the arts, have been forced to turn to other professions by the economic pressures of our society?

How many hundreds of potentially accomplished singers have grown discouraged and dropped from the ranks of those studying opera because they could not afford the risks of foreign bookings or study?

How many potential poets have we lost to the ranks of business and industry because our publishing houses cannot afford to publish poetry?

And, how do these losses—in talent and in inspiration—affect our lives as a people, and our purpose as a nation?

The effect, I think, is great. We need those who create beauty; we need those men and women who confront the reality of our lives, and tell us the truth as we see it.

The work of a great artist can make us see. It can give man the reflective calm, the inspired reason to change his life, and the lives of others, for the better.

The desire in America to participate in and appreciate the arts will be a strong and enduring force in the coming decade.

Recent studies of the economic problems of the performing arts, conducted for the Rockefeller Brothers Fund and the 20th-Century Fund, have done much to clarify the steps we must take if we wish to encourage the arts and artists in our country. The two reports offer conclusive evidence that massive new support must be found for music, the theater, and the dance.

Almost without exception, the price of admission to such a performance is insufficient to cover the cost of production—the prorated cost, per person, for providing that one performance on that one night. The answer, I have often heard, is simply to raise the price of tickets to cover the total cost of a performance.

It should be obvious that such increases would put the performing arts beyond the reach of an important part of their present audience. The result would be an elite theater or opera, an exclusive symphony orchestra from which many middle-income and all low-income families, young people, and students would be barred. So, quite clearly, raising ticket prices is not the answer.

My own feeling, as that of President Nixon, is that the best answer lies in a combination effort between the private and public sector of our economy.

The President has made it clear that the Federal Government cannot and should not seek to substitute public money for essential private sources of continuing support. Nevertheless, an urgent and growing need exists, as a result of the acute financial crisis in which many privately supported cultural institutions now find themselves, for Federal stimulus and assistance.

The National Foundation on the Arts and Humanities plays this role with great skill and diligence. Since its formation in 1965, the Foundation has proved itself to be innovative and productive. Despite limited funding, the two endowments which make up the Foundation have judiciously initiated new programs of great benefit to individual artists and humanists, to performing arts and organizations—and through them to our entire country.

I am well aware of the severe budget restraints imposed by the inflationary climate and other pressing spending priorities. Despite these restraints, the President has called for a renewed impetus to the understanding and appreciation of the arts in America. I fully support him in that goal and I agree that it bears a compelling claim upon our resources.

Now the challenge and responsibility to make the President's goals a reality falls upon Congress. The encouragement of the arts and artists must not be ignored when we draw up our list of national priorities and work on the new budget.

The relatively modest budget request of the President for the National Foundation on the Arts and Humanities is an investment in understanding the spirit of man, and encouragement to that spirit to grow and express itself. It is the quality of that expression that measures the quality of our way of life. The commitment the President is asking Congress to make is not a commitment made in the name of luxury but in the name of excellence and, ultimately, of necessity to the good life in America.

## IN HONORED GLORY

Mr. BYRD of West Virginia. Mr. President, in former halcyon days, it was our custom, nationally and individually, to devote 1 day a year to reflecting upon the tremendous sacrifice and contribution to our national welfare made by those Americans who have fallen in the service of their country. In these troubled times, however, quite rightfully, those cherished men are seldom out of our thoughts.

With this in mind, I ask unanimous consent that the Veterans' Day address, given by the Reverend Mr. John F. Streng, pastor of St. James Evangelical Lutheran Church, before the Wheeling, W. Va., Rotary Club on November 11, 1969, be printed in the RECORD. This speech, which has been widely acclaimed by those who heard it, gives us further food for thought about those valiant men who have given their all, in the past and in more recent days.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

IN HONORED GLORY

(By Rotarian John F. Streng, pastor, St. James Lutheran Church)

A grateful nation pauses this day to pay its annual respect to Americans everywhere who served their country and those who gave their life to perpetuate our land of the free and home of the brave! In thousands of city squares, civic centers, and cemeteries, special ceremonies are being observed. This is the day when the militant minority is shamed into silence, and the silent majority proudly pledges allegiance to the flag and the Republic for which it stands! This is the day when for one fleeting hour symbols of sacrifice and valor take precedence over crude banners whose aim is to divide and conquer.

It was an inspired idea to deposit the body of an unrecognized soldier in the hillside memorial in Arlington National Cemetery. Millions have visited the hallowed spot. Several comrades of subsequent combat zones have joined that lonely first Unknown Soldier. To this day the most stirring military pageantry for peace centers not around world-acclaimed heroes whose name everyone reverently repeats, but upon young martyrs whose names are known only to God!

These All-Americans resting from their labors deserve our tribute today. The simple inscription chiseled into the tomb of the Unknown Soldier has inspired millions: "HERE RESTS IN HONORED GLORY AN AMERICAN SOLDIER KNOWN BUT TO GOD!" He was a young man in the prime of life. That gleaming white cenotaph rallied all races and classes to hallow American ideals and integrate PATRIOTISM into one nation, indivisible, under God. Underneath that half-acre lie the crushed remains of men who were burned crisp in the heat and hell of battle instead of burning their draft cards to save their unkempt bearded and beaded bodies for softer living.

The comrades we honor today fought, bled, and many died that equal and exact justice might prevail. Their patriotism is the criterion for peace on earth and goodwill among men. For their service and sacrifice they merit a nation's everlasting tribute within the communion and bivouac of the dead!

From those guarded gravesides, America's eyes will scan the sloping knolls completely immersed in row on row of white crosses and the Star of David. And beyond, in massive orbiting sweep, an international panorama discloses 95 similar military cemeteries and 28 final rest arenas throughout the world.

What a breath-taking array of divisions of muted martyrs hallowing American freedom;

Those memorable mounds were everywhere carved out of the good earth to cradle courageous Crusaders for liberty who remained true to their country above and beyond the call of duty. They have thrown to us the torch that will light the way to a more peaceful tomorrow! Without exception each day continues to record the rythmic step of military details accompanying creaking caissons rolling past Washington city memorials to the cross-crowned arteries of Arlington adding new mounds at the rate of 110 per week. The unbroken assembly line of heroes perpetuates America's date with destiny!

In muffled cadence this international chorus echoes the stirring requiem of John McCrae: "We are the dead! Short days ago we lived, felt dawn, saw sunset glow; loved and were loved; and now we lie between these crosses row on row! Scarce heard amid the guns below. Take up your quarrel with the foe. To you from falling hands we throw the torch. 'Tis yours to hold it high. If you break faith with us who die, we shall not sleep tho poppies grow in Flanders Field!" Must America be pre-occupied only with sports, recreation, the cost of living, the stock market? The cost of dying equals all of these and the Word of the Lord in Judgement over miscarriage of justice, plus the handwriting on the world's wall scribbled in tainted blood has a serious message.

These brave heroes changed the course of history and freedom's holy light in our favor. They accepted death in the prime of a promising career. Their patriotism was not hidden behind the 5th amendment, the 5th column, or the 5th dimension. They did not defect in the hour of crisis. They were not midget politicians in a day when giants of the earth were needed. They fomented no turncoat philosophy when the life and breath of their buddies depended upon them! No hero's blood is ever shed in vain! Gallant men never hesitate to secure libery in hot blood and cold steel.

Nor shall America vacillate NOW as we for the 2nd time in 500 years enter the threshhold of new frontiers, this time so vast and inconceivable in space that none but the Almighty Creator of Heaven and earth has the answer.

National problems always rise to the level of the patriotism of the people! Our obligation is to posterity. The character of youth is always moulded by their elder's example! When radical voices in other lands, whose very lives are spared because of American military protection, keep shouting unprintable invectives, and chorusing: "Yankee go home", let us point to the uncounted knolls of heroic Yankees on their soil reminding them why their saviors cannot come home.

Now is the time for all parents, teachers, officials, and good citizens, to make sure that American youth memorizes the pledge of allegiance, the preamble to both the Declaration of Independence and the Constitution of the U.S.A. No philosophy of education is so critical today as to try and strengthen American freedom. Let us cease all this irresponsible dialogue about black and white power. Our constitution is printed in black letters on white paper; it takes both black and white piano keys and musical notes to play the Star Spangled Banner. No one ever questions this! Let us speak only of red, white and blue power, for these colors are guaranteed not to run, not for anybody!

On Gettysburg's colorful countryside burns an eternal flame symbolizing a nation's devotion far beyond triumphal arches and skyscraper shafts. Its warmth inspires all who cluster at its base and read its messages. Not since the Civil War on whose battleground the memorial rises, has the issue of whether this nation or any other nation, conceived in liberty, can long endure, been so in doubt and dissent. When statesmanship is crucified on the cross of gold and greed and the double-pronged promises of the demagogue are highly exalted, the moral fibre of the nation is afflicted with cancerous fissures of communism and kindred anti-American philosophies.

The problem of patriotism is as old as free man. Let tension be cultivated! America was born in revolution. Tension means 'stretching'. When patriotism is stretched aroused citizens rise in holy wrath to declare their convictions at the public poll, in the press, and on the plaza. Our God-given nation is not ready to fold prematurely because of a few uprisings whose leaders gallop from campus to Congress on borrowed time and talents. History's Paul Reveres have been riding herd since colonial days! Two recent horsemen of another stripe are assuming apocalyptic proportions: James Forman demands 'reparatory' retaliation; and Dennis Banks, full-blooded South Dakota Indian tells a U.S. senate committee: "Our state is the most racist of all where the white man spells 'justice'—'just us'. This two-fold confrontation symbolizes a national trend blending culture and religion in ferment.

Frantic superpatriots plead that we should light candles of conciliation, NOW. That candle has always been lit. They are unaware of the explosive powder kegs of carelessness, apathy, fanaticism and bigotry planted everywhere. The catalog of American martyrs has grown too painful to rehearse. We must not allow moratorium marchers to monopolize the reading of Vietnam heroes. Our city-square honor rolls and scrolls have remembered them in honored glory for years! Fragmented, polarized American citizenship is an import that must not be nourished.

Man's oldest records are blood-stained documents. Memorials are representative of deserved recognition but it takes more than marble and marches to preserve human freedom. It is to the everlasting credit of America's veteran groups and hundred organizations that the true meaning of this day is perpetuated. Representatives of many faiths and cultures today invoke the ancient blessing of the Almighty: "The Lord lift His countenance upon thee and give thee peace!" What does this mean to millions? Veterans day in charge of those under arms in behalf of those who laid down their arms to protect those yet in arms, urges unqualified loyalty and obedience to God and country! Human sacrifice is no statistic. Liberty lies in the hearts of people; if it dies there is no law that can save it. Let those who protest loud and long against yesteryear's time-honored slogans know that this modernizated word: "Peace" which they throw around loud and loosely, means nothing unless it is sealed in blood. There has been no time in history when it meant anything else!

In the Arlington Cemetery museum display room is this Rotary International plaque: "To the glorious memory of the gallant deed of the American forces who gave their full measure of devotion and service in the world wars". Our Rotary motto being: "service above self!" dispenses upon us a duty in this area that we must recognize.

Whether we stand amid Arlington's 420-acre solemn stillness where the 130,000th serviceman's body was recently interred; or whether we visit last week's battle hero in some local or nearby cemetery, or visit some paralytic veteran who will never walk again, our tribute is the same resolve, namely: "Peace with honor!" Whether we recall the ancient battle prophecy of Joshua, Israel's venerable military general of long ago when he said: "Let these stones forever be a memorial to you!", or whether we recall the inscription on the Bastogne, Belgium, war memorial: "Seldom has so much American blood been shed in a single action", the call for eternal vigilance is the same. Human blood is the price of liberty in every generation and there is no short cut to freedom.

What is Americanism? It is many dialects blended into one language; many avenues of prosperity converging into one way of life; many types of service forged into one loyalty. It is the sacred assumption that government rests upon the consent of the governed!

Let us boldly, and if necessary, bitterly, meet all carping criticism of our country with restrained loyalty. Who are these self-appointed foreign free-loaders to employ our American free speech privilege to gripe about America? There's nothing wrong with the U.S.A. that a good dose of democracy and old fashioned patriotism cannot cure in a hurry. Alien axe-grinders are welcome to one-way no-return tickets any time they wish apply.

John Stuart Mills said: "A people may prefer free government. But if from indolence, carelessness, or want of public spirit they are unequal to the exertions necessary for preserving it; if they will not fight for it; if they can be induced to lay their liberty at the feet of even a great man and trust him with powers enabling him to subvert their institutions—in all these cases the people are unfit for Liberty!

Jesus of Nazareth, universally acclaimed Prince of Peace, once said: "Greater love had no man that to lay down his life for his friends!" Since currently some militant youth and adults moratorium masses and peace preachers extol LOVE as life's highest aim, let them demonstrate their love by personally defending with their lives, government of the people, by the people, and for the people. "In God we trust" is no mere motto; it is America's confession of her most holy faith!

Let no one mar or minimize the sacred preamble to our Declaration of Independence! It is a hallmark of fame second to none in human history.

May it be your good fortune to walk slowly and solemnly down the verdant lush carpet on Mount Vernon's slopes leading to the cenotaph housing the remains of George and Martha Washington. When the courteous guard permits you to look thru the iron lattice entrance gate you will be awestruck by the simple head inscription carved in perpetual marble: "I am the Resurrection and the Life, saith the Lord; he that believeth in me tho he were dead yet shall he live!" Of this solid eternal moral fibre was our nation born. May we be given courage to sustain it!

---

## STRENGTHENING ELECTIVE ASCS COUNTY COMMITTEES

Mr. BAYH. Mr. President, this weekend the National Association of Farmer-Elected Committeemen is holding its 1969 national convention in St. Louis. These elected county ASCS committeemen meet this year under a cloud of concern over a pattern of action by the Washington bureaucrats in ASCS which raises questions about their attitude toward the committee system.

A number of directives and actions taken recently throughout the country give rise to the suspicion that the ASCS Washington officials are seeking to downgrade the autonomy and importance placed in the elective county committees. There may be rational answers to these questions other than the dilution of the committees' role in farm policy.

But I am concerned. Because I believe the county committee system of administration is essential to the confidence and the grassroots support of this program by the farmer. Without this confidence and without this local control,

American agriculture is headed for trouble.

Industrial workers have their unions. Businesses have their trade associations. But the primary involvement by farmers in directing farm programing is the locally elected county committee.

I am concerned. Farmers in my State are concerned. And farmers across the country are concerned when they see the autonomy and importance of this last vestige of local control being chipped away.

In my State, farmers are concerned when they hear that suddenly local committee decisions on adjustments to the conservation reserve must be approved individually by the farm fieldmen. This gives ASCS employees authority to veto the elective committee decisions, removing this important responsibility from local control.

They are alarmed when they learn a majority of the county committees have been informed that they are meeting too regularly. Analyses of workloads have been made and a few men sitting in Indianapolis or Washington are telling the committees how much time they need to work. I do not think they know the local problems well enough to do that. The county committeemen are not getting rich off of their meetings. They are paid $25 a day when they meet and 9 cents a mile travel expense. If a farm committeeman loses a hog or has some other preventable accident happen while meeting one day, his salary for a few months is lost. Most committeemen work as little time as possible with the office and they lose money doing this public service. They are completely responsible for the activities of the office and the administration of the full time staff. It is pennywise and pound foolish to set stringent limits on their meeting times.

The committeemen are not pleased to learn that they have to secure permission from Washington to meet with other county units outside of their county. There is much need for coordination and the exchange of ideas that take place several times each year. The committees in my State have been getting together on a regional basis with State officials to discuss their mutual problems. These are not holiday excursions. These are working sessions that now require approval all the way from Washington.

My constituent farmers in Indiana have expressed for me their concern over these recent actions and directives and they report hearing similar stories from other States. I express my own concern about this, too. Because we must give the farmer an avenue to express his personal influence over the administration of programs that affect his income. I hope the ASCS is not moving away from a strong, local, elected committee system. I would hope the ASCS would be moving to encourage additional participation.

And I hope the Department of Agriculture will soon provide Congress and the American farmer an inkling of what it proposes for a 1970 program. Too many times in the past the farm programs have been proposed and enacted after the crops are in the fields. It is already late for proper farm planning. I urge the Department to present a program for 1970 promptly, so that it can be properly considered and allow time for the farmer to plan appropriately.

## FULL FUNDING OF HEALTH PROGRAMS

Mr. CRANSTON. Mr. President, last Thursday I appeared before the Labor-HEW Subcommittee of the Senate Appropriations Committee to express my strong conviction about the urgency of providing a level of funding for medical research and health manpower programs which adequately reflects the great need in these areas today. I am deeply concerned that we will find ourselves either standing still or even reducing our efforts in many vital areas if funds are appropriated at the levels requested in the administration budget or the House-passed appropriations bill.

The benefits of past investments in basic and applied health research, as well as the future supply of doctors, nurses, researchers, and teachers, are imperiled by the reductions proposed for seven of our important National Institutes of Health, for the chronic disease and clinical research center programs, and for various programs affecting the education and training of health manpower at all levels.

I have received more than 700 letters, cards, and telegrams from California citizens expressing their deep concern about the effect of the proposed budget requests. In San Marian County, Calif., a number of parents and friends of children who are suffering from cancer have formed an organization called the Candlelighters, in memory of Eleanor Roosevelt, of whom Adlai Stevenson said, "She would rather light a candle than curse the darkness." The Candlelighters have collected about 10,000 names on petitions protesting the proposed cutback in funds for the National Cancer Institute.

One of those who helped organize the Candlelighters is Dr. Richard W. Wolk, a family doctor in San Rafael, whose 9-year-old son, Brian, is stricken with leukemia. Dr. Wolk also testified before the Appropriations Subcommittee last Thursday. His courageous and moving statement was a most effective reminder to all who heard it of the dramatic human dimension of the problems we are discussing.

I would like to read briefly from Dr. Wolk's letter to me:

> As you know, bio-medical researchers across the country have already experienced a cut of five to twenty percent of their funds. The administration's economy drive will force the closing of at least nineteen clinical research centers.
>
> At this critical time in cancer research we need an increase in appropriations; yet President Nixon wishes to cut them. You can well imagine the emotional response that this evokes from those of us who have children afflicted with cancer. The hope that a cure is imminent is not a delusion. We trust that you share this hope. The best expression of concern that you and your fellow senators can offer us is legislation providing expanded appropriations for the National Cancer Institute.

Mr. President, how can you respond to the parents of cancer-stricken children? Or to the young nurse in San Francisco, dying of cancer, who wrote to the President: "We who are afflicted with such diseases as leukemia and cancer live only in the hope that a cure can be found in time, and by cutting off the great Federal allotment to this cause you have greatly jeopardized our hopes of a breakthrough."

How can you explain to a parent whose child is dying of leukemia that this Nation can spend $100 million to refurbish a battleship for exactly 1 month's use in Vietnam before being returned to the mothball fleet but cannot find $9.7 million to keep alive the chronic disease control program of HEW's Health Services and Mental Health Administration?

What can you say to those who compare the enormous cost overruns on a single defense contract to the reduced funds available for research in cancer, heart disease, multiple sclerosis, or mongoloidism?

How can you explain that this Nation can find billions of dollars for the controversial ABM but finds it necessary to close down 19 of the 93 clinical research centers supported by the National Institutes of Health?

The administration's priorities are badly out of order when a cutback in vital medical research is authorized at a moment in our history when there has never been greater recognition of the potential for alleviating human misery from disease or a greater opportunity for finding new cures.

The Nixon budget requests an increase of only 9 percent for fiscal year 1970 over the 1969 comparable appropriations for the National Institutes of Health, the Health Services and Mental Health Administration, and the Consumer Protection and Environmental Health Service. This amount will not enable these agencies to move in any significant way against the vast problems of which I have spoken today. Because of inflation they will not even be able to maintain past momentum in too many cases. Previous gains can be seriously undermined or nullified not only by budget cuts, but also by a static level of appropriations in a time of inflation, when each dollar appropriated has declined in real value.

Furthermore, the extent of real "savings" in Federal outlays which will result from the administration's actions is dubious. Increased health costs and a further decline in the general quality of health care will be the price to be paid, offsetting any temporary savings. The consequences, long range and short range, of postponing the provision of really adequate resources for basic and applied health research, health manpower training and health facilities construction must be fully and carefully evaluated.

President Nixon has warned of an impending "massive health crisis." HEW Secretary Finch and Assistant Secretary for Health Affairs Egeberg, in a joint report last July, said the situation with respect to our already overburdened health care system was becoming increasingly grave and we would be faced with "a breakdown in the delivery of health care unless immediate concerted action is

taken by government and the private sector."

The administration is obviously aware of the vast need for improved health care among all segments of our population. The recognition and the rhetoric is there, but the money is not forthcoming. There are grave inconsistencies between the administration's public statements and the budget requests for the agencies and institutes which must meet these needs. The budget requests for all programs of the National Institutes of Health—which call for an increase of only 5 percent over 1969—are hardly an appropriate response to the administration's own call for "immediate concerted action—by the Government and the private sector."

And in the vital research area, the administration has proposed a cut of $30 million from the fiscal year 1969 Research Institutes appropriation.

In stark contrast, Dr. William McElroy, Director of the National Science Foundation, estimates that inflation in research amounts to about 15 percent a year: About 5 percent from normal inflation costs; 5 percent from the increased sophistication and complexity of research, which demand more expensive equipment and methods; and another 5 percent from increasing salaries because so many of the researchers are young scientists. In this context, a simple 5-percent increase is virtually a step backward.

The Nixon administration has requested appropriations below the 1969 level for eight major programs of the National Institutes of Health: The National Cancer Institute, National Heart Institute, National Institute of Dental Research, National Institute of Arthritis and Metabolic Diseases, National Institute of Neurological Diseases and Stroke, National Institute of Allergy and Infectious Diseases, National Institute of General Medical Sciences, and the General Research and Services program. Research projects which has involved many years of preliminary work may now have to be halted because of this foolhardy move. For example:

The Los Angeles Children's Hospital Clinical Research Center provides vital services to some 200 children and is the primary research resource for the University of Southern California's Department of Pediatrics. In other words, not only will the children and parents suffer as a result of this closing, but a major hospital and a university medical school will be deprived of its major research funds and facilities in this vital area.

Clinical research centers play a major role in the crucial final stage of medical research, the phase in which new ideas, drugs, and devices which have been tested in the laboratory are applied to the improvement of actual patient care. Yet, 20 percent of the 93 centers operated under grants from the Division of Research Resources of NIH are to be phased out at the end of this year.

Almost 400 primates which have been under experimental study in the virus program of the National Cancer Institute during the past 5 years are scheduled to be destroyed just as researchers are isolating certain viruses that may cause cancer in man.

The Framingham heart study, in Framingham, Mass., is to be phased out at the end of the current fiscal year because of lack of funds. The data accumulated over the past 20 years in this internationally known project represent an unparalleled source of information on not only heart disease but also on a wide variety of other conditions, such as stroke, arthritis, high blood pressure, diabetes, lung disease, and blood cholesterol.

In Washington, D.C., the pioneering work of Dr. Mary Coleman, a pediatric neurologist at Children's Hospital, with young victims of Down's Syndrome, or mongoloidism, may be curtailed by cutbacks in research funds.

However, not only human lives are directly at stake in these NIH cuts. The future of medical education itself is also very much involved, for research and education are inextricably linked in our medical colleges.

I would like at this point to quote from a speech given recently by Dr. Daniel Steinberg, professor of medicine in the Division of Metabolic Disease at the University of California, San Diego. Dr. Steinberg is chairman of the Council on Arteriosclerosis of the American Heart Association, and in his chairman's address given at the American Heart Association meeting on November 12 he has excellently illustrated this close relationship between medical research and education:

> The last point I want to make is one I had to leave the NIH to appreciate. Having recently immersed myself deeply in the complexities of developing and operating a medical school, I can see with perhaps a fresh eye something fundamentally important about the structure of the academic center of medicine. This is probably familiar to most of you and yet it is something the legislator may not easily understand. And that is the absolute interdependence of the several functions—at least 7—of a modern medical center: (1) medical student training; (2) house staff training; (3) continuing education for physicians; (4) delivery of medical care; (5) graduate student training; (6) postgraduate research and specialty training; and, finally, (7) research. Secretary Egeberg called for in their July report, which said in part: "we will ask and challenge the deans and faculties of the medical schools and all who are involved in the education and training of professional manpower to find new ways to expand the number of persons they are training. . . .

This enormous need for expanded training of health personnel will not be met by the administration's proposed budget for NIH health manpower programs for fiscal year 1970. President Nixon requested $25 million for health profession student loans in fiscal year 1970, less than half the authorized amount of $55 million and 50-percent lower than was expended in fiscal 1969. This will have an especially detrimental effect on the ability of medical schools to admit students from minority and disadvantaged groups. Entering medical students, for example, must buy approximately $1,500 worth of books and equipment; without adequate student loans medical schools may have little option but to admit only the wealthier students.

Some medical schools already have announced they will not be able to increase the number of their students because of the cuts in the NIH student loan program. And this comes at a time when this Nation is still so short of doctors it must rely on the importation each year of more than 2,000 doctors from foreign countries—which can ill afford to lose physicians—in order to avoid a complete breakdown of the medical care system.

In other actions affecting the training of health personnel:

Health manpower scholarship funds were cut back to the 1969 level of $17,719,000 by the House from the Nixon request level of $28 million, a commendable $10 million increase over fiscal year 1969, but still $17.7 million below the fiscal year 1970 authorization figure.

Fiscal year 1969 funding levels were barely maintained in the 1970 request for NIH programs of institutional aid for schools of public health and for health manpower traineeships. And in spite of an extremely critical shortage of nurses, in addition to the inadequate levels requested for loans and scholarships, no increase has been requested for NIH programs of institutional aid to schools of nursing or for construction of health, education, research, and library facilities for nursing. In these area, we are, at best, standing still.

Moreover, we cannot measure our health needs by the fiscal year 1969 level of appropriations, for the pattern of substantial underfunding of all health programs over the past 5 years has brought us to a critical juncture. Authorization levels approved by the Congress provide a more accurate reflection of existing needs than past appropriations.

For example, in those NIH programs for which specific authorization levels were established by Congress, 1970 authorizations total $523 million, of which less than 60 percent, or $305 million, has been requested by the administration. This amount is clearly inadequate in the context of the impending "massive health crisis."

And not only NIH, but also the Health Services and Mental Health Administration is faced with 1970 appropriations requests equal to or below the 1969 levels as a result of either the Nixon budget request or cuts by the House. These include training grants for mental health manpower, new institutional support for community mental health center staffing, and project grants for comprehensive health planning and services.

Also cut below the 1969 comparable appropriation level are the important programs of migrant health services, regional medical programs, communicable disease control, and hospital construction under the Hill-Burton act.

Those programs of the Health Services and Mental Health Administration for which specific 1970 authorizations are set would, if fully funded, require appropriations of $834 million. The Nixon budget request for these programs was $468 million, or only slightly more than 50 percent.

The United States ranks behind 19

other nations in male life expectancy at birth, and we are sixth in the world in deaths among males aged 40–60 who die of the major category of killer diseases known as heart-cancer-stroke. Is this a reason to virtually eliminate the applied research efforts of the regional medical program's chronic disease control program, which includes the heart-cancer-stroke projects?

Yet, HEW requested $130 million for RMP for fiscal year 1970, the Nixon budget reduced that to $100 million, and the House reduced it again to $76 million.

Other RMP chronic disease control programs, in addition to the heart-cancer-stroke projects, which will be phased out are those in arthritis and diabetes; neurologic and sensory disease, such as Parkinson's disease and multiple sclerosis; and respiratory disease, such as pulmonary emphysema.

The Nation's top scientists, including the President's own science adviser, Dr. Lee A. DeBridge, have warned that our country's future is endangered unless we increase research into disease, pollution, and other problems involving our highly technical society. For although we have conquered space and seen visions of worlds beyond this world, we are at the same time witnessing the destruction of this planet through the pollution of our atmosphere, streams, soil, and oceans. We are threatening the lives of millions with this reckless assault on our environment, but the administration has actually requested an overall increase for environmental health services of only $217,000, or less than 1 percent. This is ironic at a time when we are beginning to learn of the close and deadly relationship between air pollution and serious diseases, such as emphysema.

Can anyone really doubt the enormous dimensions of the need for medical research, training, and construction and for environmental health services? Then how can we also accept this administration's ill-considered response to these vital needs?

I plead with all of you. I plead with our President, to pause for a moment and think about the future of this Nation, and indeed, this planet. I ask you and I ask our President to again review our budget and our priorities and see whether we are doing enough to insure the physical and mental health of our Nation. I do not believe we are. We can and must do more if we are to respond effectively to the "massive health crisis" which has been predicted.

Mr. President, I ask unanimous consent that Dr. Wolk's eloquent statement of December 4 and several representative letters I have received from concerned constituents be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF DR. RICHARD WOLK

Mr. Chairman and members of the committee, I appreciate this opportunity to testify before this committee today.

Shortly before I left San Francisco, one of my medical colleagues said to me, "Give 'em hell, Dick!" Well, I have no intention of doing that. You gentlemen receive enough hell as it is!

Since our children have no lobby to represent them, it is my responsibility to inform you of the needs of cancer stricken children and their families. It is your responsibility to appropriate the funds necessary to satisfy those needs.

Although I will confine my remarks to the problems of childhood cancer, much of what I have to say can also apply to the million Americans now under treatment for cancer.

I have taken the liberty of providing you with copies of a letter sent to President Nixon by the Candlelighters. This letter contains statistical data that you may find useful.

I am also circulating among you, a photograph album of our children, some of whom are already dead. This is to illustrate that we are talking about human beings, not just abstract figures.

I claim no expertise in the field of biomedical research, and I know very little about financing this research. That is your job.

I am a practicing family physician in San Rafael, California. In the course of my practice, I have had my share of experience with the calamity and suffering that cancer inflicts upon families. For it is true that when cancer strikes a family member, the entire family has it.

Since last February, I have become especially qualified to attest to this tragedy, because it was then that my nine year old son, Brian, was afflicted with acute leukemia.

Because the reactions of other Candlelighters have been similar to ours, I will tell you about our initial experience with this situation.

When we first learned that Brian had what the doctor termed "a fatal illness," my wife and I went through all the grief that people usually feel when they have lost a loved one. Perhaps this feeling was more intense, since, in this case, it was a bright child who so reveled in the joys of life that we knew his future would certainly be a happy one.

Our initial grief was tempered by the fact that our son's life could be prolonged with various drugs.

It is at this point that parents of such children must make a very basic decision: to treat or not to treat.

Some parents have felt that no treatment was more merciful than prolonging the life of a doomed child. Most parents elect treatment on the basis that some additional life is better than none at all.

Without treatment, we knew that Brian would die within two months. With treatment he could live two or three years. We elected treatment.

Once this decision is made, we parents commit ourselves and our children to what is often a very difficult road. For when the children are not suffering from their disease, they are frequently suffering from the untoward side effects of their therapy.

Their medications, though usually life-sustaining, reduce their natural resistance to ever-lurking infections, which sometimes end the child's life before their disease does.

In leukemia, the children undergo countless blood tests, bone marrow taps, injections, transfusions, and spinal taps. Somehow, these brave little people withstand all this better than the parents do.

In other forms of childhood malignancy, such as brain cancer, the course is usually more horrifying; and these children and their families suffer agonies that few people will ever experience in a whole lifetime.

So why, as parents, do we try to prolong our children's lives? What gives us the strength to fight this miserable disease?

Well, it is an uncanny mixture of faith, hope, and love. Our children's trusting love gives us the power to nurture them, to comfort them, and to protect them. Our children's hope, that they can be as healthy as their playmates, gives us energy to work toward that goal. And we parents have faith that this nation's biomedical technology will soon produce more effective control for childhood cancer. If not for our children, perhaps intensive research can provide help for those five thousand other American school children who might otherwise die in 1970.

More intensive biomedical research costs more money! We have learned that federally funded research is being seriously held back by budgetary cuts. In considering H.R. 13111, you gentlemen have heard plenty of testimony substantiating this.

As you consider this bill, I want you to think of how these cuts affect those of us who are intimately involved in a life or death struggle with childhood cancer.

We Candlelighters find little assurance from the present level of federal funding for cancer research.

At the present time, one-third of the *approved* research projects are lacking funds altogether. The remaining two-thirds are laboring under a ten to twenty percent cut in funds.

The reduction of research capability is further compounded by a ten percent inflationary bite.

As a result, some projects are seriously crippled, others abandoned, and some research teams are economically forced to disperse.

An appropriation at the 180 million level will perpetuate this crisis.

Ironically, the budget cuts come at a time when our researchers are at the threshold of important breakthroughs in the medical treatment and control of cancer.

We are all concerned with the staggering news that we have sustained 300,000 American casualties in Vietnam. Fifty thousand of these died.

During the course of this war, this country has lost four million of its citizens from cancer; and 35,000 of these were school children.

Look at *this* costly war here at home! Yet, the House recently passed H.R. 13111, calling for a reduction in cancer research expenditures, as the Nixon administration requested. Gentlemen, I ask that in fiscal 1970 Congress satisfy the demands for expenditure control and tax relief in an area of lower national priority.

Placed before you are petitions bearing thousands of signatures of ordinary people who are concerned with the fact that cancer is killing more American school children annually than any other disease.

They know that until effective prevention and control is achieved by biomedical research, one out of four Americans will eventually develop cancer.

They endorse the Candlelighters' plea that the funds for cancer research be increased by at least twenty percent in fiscal 1970.

Some felt that the cost of *medical* weaponry was a *bargain* compared to the cost of our nation's military weaponry. Others felt that they would rather see the money spent for medical research than for going to the moon.

These petitions are but a sampling of public opinion obtained by our group over a two-week period. Please heed their message!

In closing, I'd like to relate what my boy told me on Thanksgiving when I asked him what he was most thankful for. He replied, "I am thankful for being myself. I am thankful for my parents and for my friends. I am thankful for my health."

Gentlemen, our children have a right to no less! It is up to you to assure that right.

Thank you. I welcome questions at this time.

---

DEAR ALAN: Thank you much for your letter of Oct. 13, relative to cuts in medical research. It will be too late for Doug, as you see by the enclosed. But concerned action may help prevent deaths of thousands of others.

Perhaps you would consider entering the letter in the Congressional Record? We are sending out 300 to organizations, medical auxiliaries, churches, etc., hoping some may take appropriate action. To be more moved by budget pleas for instruments of destruction than by humanitarian pursuits is horribly inhuman. What has become of "promote the general welfare?"

KAY BLACK.

---

URGENT: THE ISSUE IS SAVING LIVES

Millions of Americans face premature death if the budget cut proposed by President Nixon in health research funds is allowed to pass. Programs now underway in various divisions of the National Institute of Health will be halted or seriously crippled.

Affected will be studies of vital importance in these NIH departments: Cancer; Heart; Arthritis & Metabolic Diseases; Strokes & Neurological Diseases; Allergy & Infectious Diseases; Dental Research, and General Medical Sciences.

In the last fiscal year, the sum of $634 million was allocated for *all* NIH health research grants. Of this, less than $186 million went for cancer studies. Yet it is proposed to whittle this trivial amount (less than $1 per citizen) though inflation already reduces it by about 10 percent.

In 1938, 320,000 Americans died of cancer. To date for 1969, it is estimated 940,000 persons are under care for this affliction.

We are informed that concerned citizens should notify the President and Secretary Robert Finch, Dept. of Health-Education-Welfare, that we object to such flagrant indifference to the welfare of the nation; and that we want NIH appropriations set at a level allowing concerted attack upon major human afflictions.

*The time factor is critical.* The Senate Appropriations Committee is expected to present a bill early in November. Even should it provide better funding, unless the administration chooses to spend the money there would be no benefit. Thus, postcards, letters, telegrams should go to Washington immediately.

What possible question of priority can be argued in weighing the conquest of disease against such frivolous non-essentials as the supersonic transport, going to Mars and the stockpiling of biological warfare agents?

Our son, Douglas, died October 18 of a type of cancer which often attacks young people. We ask you, in the name of humanity, in the hope you may help prevent such grief among your own family and friends, to join us in informing our leaders of the real values the American people wish our government to represent. We believe that at the top of the list would be compassion and sensitivity to the preservation and enhancement of life.

Mr. and Mrs. C. W. BLACK.

MODESTO, CALIF.

---

UNIVERSITY OF CALIFORNIA, SAN FRANCISCO MEDICAL CENTER,
*San Francisco, Calif., November 7, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: I am writing to bring to your attention my growing concern regarding the reduction in federal funds to support health professions education and medical research in California. I am attaching a copy of the recent Los Angeles Times article by Mr. Harry Nelson, which describes the situation in the Los Angeles area. Equally serious problems exist in the Bay Area and in other parts of the state where medical research is being conducted.

While I was in the Department of Health, Education, and Welfare we found it necessary to restrict the growth of support for biomedical research in fiscal year 1968 and again in fiscal year 1969. This is the third year that funds for research have not been increased and inflation has increased the cost of research by at least 5 percent per year. This means a decreasing research base. I believe the consequences of these reductions are becoming increasingly serious.

I am also deeply concerned, as I know you are, with the problems of health manpower in California. The present authorizations, under the Health Manpower Act of 1968, for health manpower development need to be fully funded if we are to begin to meet the rising demand for more physicians, dentists and other key health personnel. This is most critical because of the growing demand for health care and the shortages which exist everywhere. Our physicians are overworked and in many areas hospitals and other health care institutions are forced to limit their services because of shortages of nurses and other critical health personnel.

The funds appropriated by the House of Representatives under the Health Manpower Act have been far below the authorized levels. The House action has, I believe, been essentially as follows:

Institutional support: authorized $192 million, approved by the House $128.9 million;

Traineeships (public health, allied health, nursing): authorized $30 million, approved by the House, $20.7 million;

Student loans: authorized $55 million, approved by the House $34.9 million;

Construction of health professions schools: authorized $205 million, approved by the House, $126.1 million;

Health research facilities construction: authorized $20 million, approved by the House, zero;

Medical libraries construction: authorized $10 million, approved by the House, zero.

It is not only the House action, however, but rather the priorities reflected in the expenditure controls imposed by the Bureau of the Budget that are creating very serious problems, particularly in the student loan area. I am attaching a detailed list of the extent of medical school student loan cutbacks and their impact on California schools and other institutions. The impact on our dental students has been even more severe than on our medical students and we have been able to meet only a limited amount of their needs through student loans and grants.. The loan shortage is the most critical one in the whole health manpower area and I hope it will be corrected by the Senate. An additional problem related to loans under the Health Manpower Act and those under the federally guaranteed private loans is the limit on these loans ($1,500 per academic year) and the high rate of interest that must be paid beginning one year after graduation.

I am attaching materials related directly to our campus and the financial needs here. These are, however, typical of the other institutions in California and other health professions schools through the country. I hope this material will be helpful in your considerations of these serious problems.

I am well aware of your deep interest in these matters and of your special concern for the problems of the veteran. I would be very pleased to have you visit us here at the Medical Center or at the Fort Miley Veterans Administration Hospital, where we have joined with the VA in developing outstanding programs of patient care, education and research.

In addition to the attachments noted above, I am including a brief article on the recent statement by Dr. Roger Egeberg on the problems of alcoholism. I hope we might also discuss this during your visit.

With best personal wishes.

Sincerely yours,

PHILIP R. LEE, M.D.,
*Chancellor.*

---

LOS ANGELES COUNTY FEDERATION OF LABOR, AFL–CIO,
*Los Angeles, Calif., October 27, 1969.*

Hon. RICHARD M. NIXON,
*President, United States of America,*
*Washington, D.C.*

DEAR MR. PRESIDENT: I am writing to you to express our concern with the cutting off of funds from the Clinical Research Center of the Children's Hospital Center in Los Angeles and to ask that steps be taken to restore the full appropriation voted by Congress.

This Center, one of the nineteen Research Centers, has been doing outstanding work in the field of combating children's diseases. Its closure would cause great harm to this important area of research because, as far as we are aware, no other agency is equipped to pick up the activity. Many children who just a few years ago were doomed to lifelong invalidism or an early place in the vital statistics tables can now look forward to healthy and productive lives as a result of the work done in these research institutes.

I feel very strongly that our young people constitute a resource which we must cherish, and that funds to insure their well-being continue to be expended.

Respectfully yours,

SIGMUND ARYWITZ,
*Executive Secretary.*

---

GLENDALE, CALIF., CHAPTER OF THE AMERICAN ASSOCIATION OF RETIRED PERSONS,
*Burbank, Calif., November 7, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senate,*
*Washington, D.C.*

MY DEAR MR. CRANSTON: As one of a group of retired persons, I would like to urge you to use your influence to have the Senate Appropriations Committee, and the entire Senate, approve the measure to provide funds to finance the Health Research Facilities Construction Program. I understand that $20 million for the current fiscal year (1970) was authorized by Congress, but it still requires favorable action in the appropriation of the money.

I am particularly interested in the Federal matching funds for the Ethel Percy Andrus Gerontology Center planned for construction at the University of Southern California at Los Angeles. This project would not be a 100% Federal "give-away", since private citizens and organizations such as ours are engaged in raising $2 million toward the cost of this particular research facility.

While there are many demands for Federal funds, all the way from SST to Outer Space Exploration, I feel the approval of funds for the Health Research Facilities Construction Program would be a worthwhile investment of government money for the health of all the citizens of the country.

Thank you for your consideration of this matter.

Sincerely,

J. HENRY NIEBANCK,
*President, Glendale Chapter No. 258, American Association of Retired Persons.*

---

LOS ANGELES COUNTY FEDERATION OF LABOR, AFL–CIO,
*Los Angeles, Calif., October 27, 1969.*

Hon. ALAN B. CRANSTON,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: Enclosed is a copy of a letter I have written to President Nixon regarding restoration of funds for the Children's Hospital Clinical Research Center in Los Angeles.

I would appreciate your taking what steps are possible to support this position.

Sincerely yours,

SIGMUND ARYWITZ,
*Executive Secretary.*

ROHNERT PARK, CALIF.,
*November 6, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senator,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: This letter is being sent to you with a dual purpose. Firstly, you are to be commended for the action you so swiftly took in having the letter written by Mr. Sheldon Rosenthal of San Francisco, regarding the H.E.W. cut backs on Disease Research Projects, read on the floor and made part of the Congressional Record on October 14, 1969. Your introductory speech before you read the letter was full of compassion and understanding to the fullest extent. I have shown a copy of this Congressional Record to many people, and they have all been greatly impressed. Compliments are due you, and my sincere, deep gratitude is extended to you.

Secondly, I would like not only to confirm all that Mr. Rosenthal so eloquently stated in his letter, but I would like to enter my own plea for not only a reversal of the decision to cut back funds for such worthy Research Projects, but to try to make more funds available to the Medical Scientists who are so dilegently trying to forge ahead in seeking causes and remedies for some of the maladies that have been cutting short the productive lives of so many who are afflicted. It doesn't seem fair that the lives of so many human beings are being jeopardized by cut backs or curtailment of any kind of Federal funds to carry on research by the Medical Scientists who are dedicated to try their utmost to procure a break through on some of these dread diseases. They cannot continue this difficult task without the necessary funds being made available to them.

Tho I know a great many people who feel just as keenly about this situation as Mr. Rosenthal and I do, somehow people become complacent and lax when it comes to actually writing to the people we elect to office, about vital matters, especially when they or members of their families are not personally afflicted.

Since Mr. Rosenthal's wife is my only daughter, it is natural that I would feel the need for research funds more keenly than an unconcerned person, but every human being's life is worth saving, so *please,* use all the pressure at your command to see that the situation is rectified and funds be made available for Medical Research.

It is heart rending to stand by and watch a dearly loved one's strength and capabilities ebb away after having been such an active, productive, capable individual. People who know my daughter Sylvia marvel at her fortitude and cheerful attitude, in spite of her adverse state of health. With every fiber of her mind and body she tries to keep abreast of current happenings and to do things for herself, which at times is a herculean task. She hasn't been as fortunate as some to have a remission in her illness.

The one redeeming feature in my situation is that my daughter Sylvia is blessed with such a steadfast, devoted, and concerned husband as Sheldon Rosenthal. One could not ask for a finer human being, nor a more devoted father to his wonderful two children. I could not love him more if he were my own son.

May all your efforts in this endeavor for more medical research funds be fruitful. In my estimation, it is a more worth while project than sending men to the Moon, and much less expensive.

Bless you for your kind consideration, and thank you for taking time to read this.

Gratefully yours,

EVELYN KAMNIN.

---

NEWHALL, CALIF.

Senator ALAN CRANSTON,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: This is an appeal to you to help save my child's life and the lives of untold children and adults.

My son is a victim of a fatal brain disease; however, the disease will not be fatal for long. Biochemists at UCLA think they have found a cure; all that is needed is more testing before it can be used in humans. My child will very possibly be the first to be saved from this disease.

The breakthrough in a cure has come just this past year; had there been no research last year my family would have no medical hope at all.

If research clinics are closed around the United States our story will be told over and over again. Because of the cutback in funds to the National Institute of Health, nineteen research centers in the country will be closed; including UCLA and Children's Hospital in the Southland.

I beg of you to bring the situation to the attention of your peers. Snuffing out millions of lives is a tall price to pay for the sake of economy. Surely there is a better way.

Sincerely,

Mrs. THOMAS RAYBURN.

---

MILL VALLEY, CALIF.,
*November 8, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senate, Senate Office Building, Washington, D.C.*

DEAR SENATOR CRANSTON: I am the mother of a beautiful and bright four year old girl—she has leukemia. She has been ill for two years now and according to statistics, she may have another year of life. So far her tiny body has had to tolerate blood transfusions, 11 spinal taps and injections, excruciating headaches, 2 bone marrow tests, 208 intermuscular injections, ulcers, baldness, vomiting and numerous infections. All of these problems and many more are experienced by all leukemic children in the course of trying to keep them alive in hopes of a research breakthrough.

During the past two years of my daughter's treatment, I have seen six children die from leukemia. I have witnessed the devestation wrought by these illnesses and deaths. Can you imagine how we feel when we hear that our government plans to cut research funds? Or that such things as moon exploration, wars and supersonic jets take priority?

In a nation such as ours, the health and welfare of the people has to come first! As one of our nation's leaders, you have the power to help. Cancer research is making great strides forward—it cannot be slowed-down at this crucial time. Therefore, I urge you to give your full support to the restoration and expansion of National Cancer Institute research funds for fiscal 1970.

Very Respectfully,

NANCY K. ROACH.

---

LOCKHEED AIRCRAFT CORP.,
*Burbank, Calif., October 29, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senate,*
*New Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: As President of the National Multiple Sclerosis Society, I was very much impressed with your expression of concern for the decline of federal support for scientific and medical research as reported in the Congressional Record for October 14, 1969.

I share the concern expressed by Mr. Sheldon Rosenthal of San Francisco in his letter to you about our failure to find a cure for multiple sclerosis. My wife also is a multiple sclerosis patient.

The human loss from multiple sclerosis is very real. Two out of every three multiple sclerosis patients come from the nation's work force. Multiple sclerosis creates a two billion dollar annual economic loss to the nation.

Prospects for meaningful advances in the fight against M. S. have recently improved abruptly and dramatically. For this reason, the National Multiple Sclerosis Society has set forth this year on a campaign which will enable us to invest $10 million over a five year period to speed up the search for an answer to multiple sclerosis.

Our Society feels that research is the key to the solution to this and other health diseases, but we cannot do it alone. Our present fund raising campaign for research was predicated upon the plans of the Department of Health, Education and Welfare to expend considerable amounts of money on multiple sclerosis research. Although the Society will continue its efforts, I was disappointed to hear that this government research might be reduced.

Sincerely,

D. J. HAUGHTON.

---

SAN MATEO, CALIF.,
*December 4, 1969.*

Hon. ALAN CRANSTON,
*U.S. Senate,*
*Washington, D.C.*

DEAR MR. CRANSTON: I am writing this letter in the hopes you can do something in Congress toward getting more money spent on research, rather than the cut-back that is planned, for cancer and more specifically for leukemia. I read in the paper this evening that you have already heard from Dr. Wolk from San Rafael and I'd like to reaffirm his plea from the bottom of my heart.

Six weeks ago, my child died of leukemia and during our two-year ordeal we were clinging to the knowledge that thousands of dollars were being poured into research for this dreaded disease and that our child would be the lucky one for which the cure was found. I know this is the hope of all such parents and somehow it seems inhuman for the Government to cut back this much-needed expenditure when unlimited funds are available to go to the moon.

Our seven year old is at peace now and that cure can't help her, but I plead with our representatives in Washington to give careful thought to their priortiies—5,000 children will die of leukemia in 1970—allow the parents of these children hope. Polio was conquered through one big effort in research, surely the same effort is needed for leukemia?

Please do all you can to push a bill through that will allow these dedicated researchers to continue their important task.

Sincerely,

BRENDA COMERFORD.

---

Hon. ALAN CRANSTON,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR CRANSTON: My name is Martin Monica and I am 14. I had a kidney transplant October 14, 1969. I was lucky to have it because there has been a cut in the money. Now a lot of people will die who need a transplant or need to go on the kidney machine.

What can you do to increase the money? Dr. Samuel Kovntz, the transplant doctor at University of California, San Francisco only has money for a few this year. There isn't enough money for kidney machines for everyone who needs it either.

It's sad to suffer from a renal disease and to know there's no hope, no help because there is no money.

Your Friend,

MARTIN MONICA.

## SEGREGATION IN THE SCHOOL DISTRICTS OF CALIFORNIA

Mr. STENNIS. Mr. President, California, according to the HEW's IBM statistics based on the 1968 national school survey, has 4,284,304 students in elementary and secondary schools. Of these, 3,172,686, or 74.1 percent, are white; 613,074, or 14.3 percent, are Spanish American; 382,525, or 8.9 percent, are Negro students; 103,547, or 2.4 percent, are classified as Orientals; and 12,472, or 0.3 percent, are American Indians.

This is the first State on which I have presented HEW's IBM data where there are two minority groups—Spanish Americans and Negroes—which appear in numerous school districts throughout the State that have one or more schools with minority group enrollment of 80 percent or above.

There are 57 cities, or school districts, in the State of California which have one or more schools with minority group student enrollment of 80 percent or above. Some are relatively small districts, and others involve large cities. In these 57 school districts, there are 413 schools where the minority group enrollment is 80 percent or above.

There are 19 of these 57 districts where the schools having from 80 to 100 percent minority enrollment are predominantly Negro and 26 districts where schools which exceed 80 percent minority enrollment are predominantly Spanish American. There are only 12 districts of the 57 where there is a substantial percentage of both Negroes and Spanish Americans in the schools with 30 percent and above minority group enrollment.

However, whether these districts have been following the concept of neighborhood schools; whether they have vestiges of a dual system; whether they have been gerrymandered; or whether the composition of the racial makeup is entirely accidental—there are a great many of them that are highly segregated.

Of the 382,525 Negro students in California, 8.9 percent of total enrollment; 321,383, or 84.5 percent of total Negro enrollment, are in 57 school districts which have one or more schools with a minority enrollment of 80 percent or above, and 239,009, or 62.5 percent of all Negro students in California, are actually in schools in these 57 districts that are 80 percent to 100 percent minority segregated; 321,383, or 52.4 percent, of the total Spanish American enrollment in the State of California are in these same 57 school districts that have one or more schools with a total minority enrollment of 80 percent or above. However, only 120,595, or 19.6 percent, of the total State enrollment of Spanish Americans, are actually in schools that are 80 percent to 100 percent minority segregated.

Let us analyze Los Angeles, the largest city in California, where the numbers of Spanish Americans and Negroes are about equal.

According to HEW's IBM data for 1968, there was a total enrollment of 653,549 students in 591 schools. The total white student enrollment was 350,909, or 53.7 percent of total enrollment, and there were 147,738 Negro students, or 22.6 percent of the total; 130,450, or 20 percent, Spanish-American students; and a total of other minorities of 24,452, or 3.8 percent.

There are 22 schools with total enrollment of 23,493 which are 100 percent minority segregated. In these 22 schools there are 22,717 Negroes, or 15.3 percent of the city's total Negro enrollment; 737, or 0.5 percent of the total Spanish American enrollment; 36 students of other minorities; and two white students.

There are 48 schools with a total enrollment of 65,877, which are 99 percent to 99.9 percent minority segregated; 54,330 Negro students, or 36.7 percent of the city's total Negro student enrollment, attend these 48 schools along with 10,321 Spanish-American students, 7.9 percent of the city's total Spanish-American enrollment; 831, or 3.6 percent of the city's total of other minority group students; and 345 white students, or 0.098 percent of the city's total white student enrollment. There are another 26 schools with a total enrollment of 34,725, which are 98 percent to 98.9 percent minority segregated. This enrollment consists of 23,995 Negro students, or 16.2 percent of the city's total Negro enrollment; 9,169 Spanish-American students, or 7 percent of the city's total Spanish-American enrollment; 1,048 students of other minority groups, or 4.2 percent of the city's total of other minority group enrollment; and 511 white students, or 0.1 percent of the city's total white student enrollment.

To recap, there are 96 schools in Los Angeles where the minority enrollment is 98 percent to 100 percent of the total enrollment in these schools—124,095—which is 19 percent of the total enrollment of all the city's schools. In these 96 schools that are 98 percent to 100 percent minority segregated, there are 101,043 Negro students, or 68 percent of all Negro students enrolled in the city's schools; 20,228, or 15.5 percent, of the city's total enrollment of Spanish-American students; 1,965 students of other minority groups, or 8.3 percent of the total enrollment of students of other minority groups; and 860 white students, or 0.2 percent of the city's total white student enrollment.

There are another 54 schools with an enrollment of 62,604, which are 90 percent to 98 percent minority segregated, and which are attended by: 21,636 Negro students, or 14.6 percent of the city's total Negro student enrollment; 26 percent of the city's total Spanish American enrollment; 16.6 percent of the city's total enrollment of other minority group students; and 0.8 percent of the city's total white enrollment. In other words, there are 150 schools that are 90 percent to 100 percent minority segregated, where 122,678 Negroes, or 83 percent of the city's total Negro enrollment, attend. There are another 29 schools with 80 percent to 90 percent minority enrollment, where the total enrollment of 29,433 is made up of 7,594 Negroes, 14,871 Spanish Americans, 2,572 students of other minority groups, and 4,396 white students.

To recap, there are 179 schools in Los Angeles that are 80 percent to 100 percent minority segregated, with an aggregate enrollment of 216,132, or 33 percent of the city's total enrollment, composed of 130,272 Negro students, or 88.1 percent of the city's total Negro enrollment; 69,088, or 52.9 percent, of the city's total Spanish American enrollment; 8,608 students of other minority groups, or 35 percent of the city's total enrollment of other minority groups, and 8,164 white students, or 2.3 percent of the city's total white student enrollment.

Of the city's total white student enrollment, only 27,037, or 7.7 percent of the city's total white enrollment, are attending schools that have 50 percent to 100 percent minority student enrollment. The total Spanish American students in the 50 percent to 100 percent minority student enrollment schools is 87,750, or 67.2 percent of the city's total Spanish American enrollment, and 69,088 of these are in schools from 80 percent to 100 percent minority segregated, and 18,662 are in schools where the minority enrollment is 50 percent to 80 percent.

In taking a look at the white majority schools, there are 77 such schools that have no Negroes at all enrolled and another 82 which have either one or two Negroes enrolled in each school.

A similar analysis could be made in any number of other school districts in California. For example:

In Oakland, which has a total enrollment of 64,105, 30.9 percent of which are white; 8.2 percent are Spanish American; and 55.2 percent, or 35,386, are Negro, there are 39 schools with 27,292 Negro students, or 77.1 percent of the city's total Negro student enrollment, which are minority segregated between 80 and 100 percent. Three of these schools are 100-percent minority segregated; 10 are from 99- to 99.7-percent minority; 16 are 90- to 99-percent minority; and 10 are 80- to 90-percent minority segregated.

In Fresno, where the Negro student enrollment of 5,251 is only 9 percent of the city's total enrollment, 4,023, or 76.6 percent, of the city's total Negro enrollment are in eight schools along with 1,261 Spanish Americans, that are 93.9- to 100-percent minority segregated.

San Francisco, with a total school enrollment of 94,154, of which 41.2 percent are white; 27.5 percent are Negro; 18.1 percent are oriental; and 13 percent are Spanish American, has seven schools where the Negro enrollment is 99 to 100 percent, and 29 schools where the minority enrollment is 90 to 100 percent.

Richmond, Calif., which has a total enrollment of 43,123, of which 67.6 percent are white; 24.2 percent are Negro; 5.2 percent are Spanish American; and 2.9 percent are oriental, and 0.1 percent are American Indians, has five schools with a total enrollment of 3,856, which are attended by 3,627 Negroes, or 34.8 percent of the city's total Negro enrollment, and which are 95- to 100-percent minority segregated.

I ask unanimous consent that information relating to California be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

CALIFORNIA STATE TOTAL

[Number of districts: 511. Representing: 725. Number of schools: 6,098. Representing: 6,600]

## LAND REFORM IN VIETNAM

Mr. MAGNUSON. Mr. President, I ask unanimous consent that an important article on land reform in Vietnam be printed in the RECORD. Recently, I introduced Senate Resolution 290, which deals with the important subject of land reform in Vietnam. Roy L. Prosterman, associate professor of law at the University of Washington Law School, is a leading expert in land reform. Professor Prosterman has made one trip under private grant to Vietnam and two trips as the land law consultant to Stanford Research Institute under a Government-sponsored project.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LAND REFORM IN VIETNAM

(By Roy L. Prosterman)

Old Vietnamese Proverb: "He should own the land who rubs it between his hands each season."

Joseph Alsop, in the New Yorker, June 25, 1955: "The Vietminh could not possibly have carried on the resistance [against the French] for one year, let alone nine years, without the people's strong, united support."

President Nguyen Van Thieu in a speech delivered January 18, 1968: "In the Social Reconstruction mission, Land Reform as is natural has to be placed on the top line. . . . Nevertheless, we must bravely acknowledge that, until now, the results obtained are lowest in consideration of its goal and its requirements."

It should be in no way surprising that in a country where the bulk of the population—still 60 per cent today—is dependent on the land as its sole source of livelihood (as has been the case in Vietnam for at least 2,000 years) the question of land tenure should assume gigantic proportions.[1] Tenure imbalance strikes at the very base of the country's economic and political stability. Historically, breaking up large holdings and transferring them to individual small owners was a means of power consolidation by new Vietnamese royal dynasties. Even as late as the first decades of the nineteenth century, Nguyen Anh, who founded the last dynasty, set about breaking up large feudal landholdings in Vietnam. This policy was pursued by his successor, who acceeded to the throne in 1820. The advent of French colonialism in the 1860's was accompanied by dramatic changes.

It is estimated that between 1880 and 1930 the land area devoted to rice in the fertile, southern region of Vietnam then known as Cochinchina (which included, in particular, the Mekong Delta region south of Saigon), grew by at least 400 per cent, with resulting increased yields. Yet, by 1930, the position of the Vietnamese peasant in the economy had so deteriorated that his situation was worse than it had been prior to French intrusion. Land was sold at absurdly cheap prices to colonialists who amassed vast holdings; the rice that could have put an end to peasant starvation was extracted through land rents and was exported, rather than made available to the indigenous population. The rough figures that are available indicate that during the 1930's some 57 per cent of the rural population of Cochinchina was landless.

As Joseph Buttinger, a leading Western historian of Vietnam, summed it up in *Vietnam: A Dragon Embattled*,[2] "the rural masses became as dependent on the rich landowners as the serfs of medieval Europe had been on their feudal lords."

After a third visit to Vietnam, in September, 1969, I had to conclude that the final word on success or failure of land reform as a program bearing on the conflict could not—quite—be written yet. Like Pearl lashed to the rail, and then rescued, this quintessential program had been up again and down again so many times over the last 15 years that even a week's lead time before publication might find one badly out of date. But at least for one sparkling moment, starting in May, 1969, and lasting at least through mid-fall, land reform was definitely "up" again. Whether or not the Vietnamese Senate or President Nguyen Van Thieu himself utilizes far reaching amendment powers to restore Thieu's genuinely excellent legislative proposal (after its evisceration at the hands of the lower house at the start of September), it would still be true that 1969 was the best year ever for South Vietnamese land reform. Unfortunately, this is not really saying much. Without a good bill to effect the transfer of privately owned lands, plus vigorous enforcement of the legislation and of programs begun earlier this year, South Vietnam will lose what is very likely her last chance to make sense out of this most basic of all "pacification" programs, and to acquire the leverage this might supply for a political settlement broadly satisfactory to various shades of American opinion.

### LAND TENURE PATTERN

That the land problem is near the root of the conflict—as it was, for example, in China and in Cuba—has long been clear to most careful and scholarly observers; it is a point on which there has been close agreement among Bernard Fall (land reform is "as essential to success as ammunition for howitzers—in fact, more so"), Buttinger, Douglas Pake, and many, many others. Today, at least three-fifths of South Vietnam's population of about 17 million is rural and derives a livelihood chiefly from rice farming. About three-fifths of this rural population lives in the Mekong Delta, south of Saigon, where 80 per cent of the country's rice is produced. Most of the remaining two-fifths of the farmers live in a narrow belt of riceland running up the coast—the area known as the Central Lowlands.

The tenure pattern under which the bulk of these farmers live and gain their sustenance is not fundamentally changed from

[1] The author has just returned from his third extended trip to Vietnam to review progress in the land-reform area. This trip was taken under private grant, while the two earlier ones were made as the land-law consultant to the Stanford Research Institute survey of land tenure in Vietnam, undertaken for AID in 1967–68.

[2] (New York: Frederick A. Praeger, 1967).

that shown in the 1960–1961 Agricultural Census of South Vietnam, as confirmed by field work by the Stanford Research Institute (S.R.I.) in which I participated at the end of 1967. During the critical period of the conflict's development in the early 1960's only 257,000 out of 1,175,000—or 23 per cent—of the Mekong Delta's farming families owned all the land they worked. Their average holding was four and one-half acres. Another 334,000 families, or 28.5 per cent of the total, tilled six acres—four of which were rented, while 521,000 families, roughly 44 per cent, farmed an average of three and one-half acres of land that was *totally* rented. Thus, in the Delta, more than seven farming families out of 10 (44 per cent+28.5 per cent=72.5 per cent) were substantially dependent on tenant farming.

The massive dislocation of the war has reduced the rural population from 75 to 80 per cent to the current 60 per cent figure, and the exodus to the cities was probably proportionately greater among those who had no land of their own. But the 1967 field work showed that at least 60 per cent of the Delta's agricultural population, in the relatively secure areas (where the field work could be carried on), remained without ownership of land, and the size of holdings and conditions of tenure remained unchanged. In its percentage of landlessness, the Mekong Delta thus qualified as one of the four worst areas of the world—along with the Huk country of Central Luzon, Java, and northeastern Brazil—and equalled or exceeded pre-revolutionary China, Russia and Cuba.

The S.R.I. field work—the major portion of which consisted of nearly one thousand hour-long interviews with Mekong Delta residents, carefully randomized, and using an extensively pretested set of questions and Vietnamese interviewers under American supervisors—uncovered further details, although most of these simply confirmed the accurate appraisals which had already been available for more than a decade. In the Delta, landlords supply virtually no inputs: no credit, seeds, implements, fertilizer or advice. They collect rents—typically one-third to one-half of the gross crop, and sometimes even more. The landlords of roughly half the tenanted land are absentees, so rent collection becomes an annual foray either by them or by agents—often local officials or military men who get a cut of what they collect.

Tenants can usually be evicted at will. They are held responsible for most, or all, of the rent even when their crops fail, for the rent is calculated in advance on an *estimate* of the gross crop. Thus, after major flooding reduced the harvest of 1966–67—the Delta harvest period is from December to February—many tenants were held for rents that exceeded 75 per cent of their actual production. Should a tenant be unable to pay his rent, he is confronted with interest rates on the unpaid portion that *average* 60 per cent a year, and which in one case out of five exceed 120 per cent a year.

The situation is no better in the Central Lowlands. As the 1960–1961 census showed, the typical family—403,000 out of 695,000—lived on a two-acre farm, one acre of which was rented. About 74,000 families held rented land only, their average holding being one and one-tenth acres. Rents on the tenanted or share-cropped portion of lands in the Central Lowlands generally are 50 per cent of the gross crop, although here the actual crop is the measure more often than an estimate made in advance. Security of tenure, however, is as nonexistent as it is in the Delta.

These land-tenure figures can be given some perspective by noting that South Vietnamese calculations indicate that once the rents go much above one-fifth of the crop, even a three and one-half acre Delta plot (the average for the 44 per cent of families that the census showed to be living wholly on rented land) does not produce enough rice to keep the average six-person household at recommended minimum sustenance levels.

The typical Central Lowlands mixed-tenure holding, as indicated, averages only two acres, one-half of which is rented.

A further finding of the S.R.I. study, contrary to a vast amount of conventional wisdom found in Saigon offices (but generally not found out in the field), was that the tenant farmers of the Mekong Delta—in an open-ended question with multiple responses allowed—regarded land ownership as a paramount concern five times as frequently as they regarded physical security as a paramount concern, and rated agricultural credit as a paramount concern four times as frequently as security.

### THE VIETCONG PROGRAM

All the above data, however, relates to "tenancy" as it exists in areas under South Vietnamese government control. In areas where the Vietcong are in control, they have offered only one substantive program: land reform. The program has deep roots, adumbrated in the Joseph Alsop quotation that begins this article.

By the time that the Geneva Conference was convened in 1954, the Vietminh ruled 60 to 90 per cent of what is now South Vietnam. Their support by the rural population had accounted in substantial part for the crucial advantage that had enabled them to overcome the superior arms and manpower of the French. In their struggle, they had built their broad base of support on the strong foundation of anticolonial nationalism, and they had added to this (even more concretely than the Algerian rebels were to do a few years later) the attraction of land-tenure reform for the mass of the peasantry.

Beginning in 1945, in areas that they controlled, the Vietminh had enforced strict limitations on rent and interest rates. Lands held by the French, communal lands, and the land of "traitors" were confiscated and given to the poorer peasants. Beginning in 1953, the Vietminh undertook the second, more sweeping phase of their land reform program, under a classification system similar to that which had been employed by the Communist Chinese ("landlord," "rich peasant," "middle peasant," "poor peasant" and "agricultural worker"). In its first stage of implementation this system was aimed at taking land from the first two groups and giving it to the last two. Wherever it was applied, the program utterly transformed the village social structure.

The sad history of the post-1954 years can only be briefly sketched here. The North Vietnamese moved to a stage featuring bloody village "trials" of the landlords and—very broadly defined—"rich peasants" (100,000 died, according to the best estimates), and then to collectivization. President Ngo Dinh Diem missed the chance to carry out a competitive democratic land reform, on models such as those of Mexico, Japan, Taiwan, Bolivia or South Korea (all of which had inaugurated sweeping land reforms before 1954). Instead, he adopted a law that was blatantly impossible to administer, attempting to control the landlord-tenant relationship—actually *restoring* the landlord-tenant relationship for hundreds of thousands of families in formerly Vietminh-controlled areas who had thought the land was now theirs—plus an extremely mild law regulating the acquisition of large holdings. The latter allowed retention of 247 acres (eventually raised to 284 in most cases), which was at least 30 times greater than the "retention limits" in the successful Asian land reform programs of Japan, South Korea and—ten years too late—Taiwan. It also suffered from multiple administrative defects.[3] Diem's program ground to a final halt in 1961, with benefits for only one out of ten tenant families. Local officials were allowed to retain and rent out the best of the acquired lands.

This left two great groups identifying the Communists with land reform and Saigon with the interests of the landed oligarchy:

About one million peasants who remained under Vietminh control even in Diem's heyday, and who continued to live under the economic and social transformations wrought by "first stage" (i.e., precollectivization) Communist land reform.

The great mass of tenant farmers who returned to Diem's control, who not only gained no benefits from Diem's unworkable laws, but actually found the government reestablishing a relationship that the Vietminh had already sundered.

Under the circumstances, it was not only logical but virtually inevitable that at the end of the 1950's the Vietcong should become the active successors of the Vietminh, building popular support throughout the countryside with the promise of the maintenance and extension of the Vietminh land reforms.

Saigon's response, from 1961 onward, not only totally omitted any competitive land reform measures, but from late 1965 onward actually involved the elaboration of decrees which justified the ultimate, very common "pacification" process by which the American innocents, having "secured" a village and moved on, were followed by the landlords riding in on the jeeps with "ARVN" (the South Vietnamese Army) to reassert control over their former lands. Not surprisingly, but very tragically indeed, many Americans have died at the hands of enraged peasants who have associated them with "pacification" in this, its completed, sense.

Unfortunately, the role of AID[4] and the United States State Department in all of this was pusillanimous. Starting with clear marching orders from President Dwight Eisenhower and those at the top in 1954 that made support for land reform a matter of high priority, working-level officials allowed themselves to be backed off step by step from a workable program by the clear signs of hostility emanating from major segments of the ruling elite. During 1960–65, the United States Mission obligingly failed to have present in Vietnam even one full-time official dealing with the land reform problem, and a plethora of rationalizations sprang up about the need to rely on the landlord class for political stability. In the case of some officials, all these rationalizations stubbornly failed to give way even when the house of cards collapsed in the early 1960's and the preeminent role of the peasants in supporting the rebellion became clear.

### PEASANT SUPPORT FOR THE WAR

It is this deeply rooted peasant support which has given the Vietnamese conflict the very strong "insurrection" or "civil war" flavor which it still retains, despite the highly publicized infusions of manpower from the North which began in 1965. The measures of this peasant support are not hard to find. In March, 1968, *The New York Times* noted that the Vietcong had been steadily able to recruit 5,000 to 7,000 men a month. Lieutenant Colonel William Corson, former head of the Marine's Combined Action Platoons (CAP) program, writing in the summer of 1968, noted that some three-fifths of these Vietcong recruits could be regarded as volunteers of "soft-sell" enlistees. The common appeal in wide areas where Vietcong land re-

---

[3] One example: regulations ultimately gave landlords eight years in which to prove "preordinance" transfers to others that brought their holdings below the point where the law took hold; transfers to relatives and strawmen were common; and the author has met Vietnamese who openly admit that they still "own" over 2,000 acres.

[4] The United States Agency for International Development.

form was in effect was "The movement has given you land, give us your son."

*Newsweek*, on January 1, 1968, reported that 377,000 men were bearing arms against the United States and South Vietnamese forces, of whom only one-sixth were North Vietnamese. *The New York Times* on March 19, 1968, offered official estimates of all five categories of enemy strength, in which the North Vietnamese were said to play an even smaller role (See Table I).

Estimates made during my 1969 visit were that the North Vietnamese "main force" component was up, and that of southern recruits was down; in the local level southerners were still functioning in large numbers. The vitally important category of southern "cadres" or "V.C.I." (Vietcong infrastructure) had been somewhat depleted by the Communists' chosen tactics during *Tet*, but since then had hardly been touched. These V.C.I. do the recruiting, arrange the reconnaissance, obtain the porters and, by establishing supply and ammunition depots at intervals of about a day's march, prepare the way for main force actions—a *sine quo non* of these actions, since the main force units cannot carry with them the supplies and ammunition needed for their attacks. Moreover, despite well-reported "battles," it was doggedly, tragically true that over one-half of American casualties were the result of such essentially local guerrilla activities as the planting of mines and booby traps (and the mute silence of the villagers as they watched Americans walk into them).

The one bright spot in the picture was that fresh Vietcong recruitment had fallen to about 3,500 men a month, apparently through a combination of the loss of senior cadres at *Tet*, the spread of knowledge that main force units have been using southern recruits at the "first wave," and the first important stirrings of land reform under Nguyen Van Thieu, including an important effort to prevent landlords from returning to reclaim their lands in "pacified" villages.

The final part of this history—which was still undergoing almost daily changes as I was writing this—has involved the process by which the Thieu government appears, at last, and perhaps too late, to have embraced a really sweeping and workable program of land reform. The bizarre reality, of course, is that while the Communists have successfully billed themselves in Vietnam (and elsewhere) as "land reformers," genuine democratic land reform does not take a back seat to Communist land reforms by any means. Quite the contrary: the collectivization which has been the universal "second stage" of Communist land reform promises that have led to successful revolutions has been an economic disaster vastly distasteful to the peasantry, while the half-dozen successful non-Communist land reforms of this century[5] have led to major increases in agricultural production and have furnished a bulwark of political stability—including assistance in defeating attempts to start guerrilla movements in Bolivia and South Korea by depriving the would-be revolutionaries of their "gut" issue.

TABLE I: ENEMY STRENGTH

| | National intelligence estimate | C.I.A. estimate |
|---|---|---|
| 1. Main force units | 118,000 | 160,000 |
| North Vietnam | 54,000 | 80,000 |
| Viet Cong | 64,000 | 80,000 |
| 2. Village guerrilla platoons and squads | 70,000-90,000 | 100,000-120,000 |
| 3. "Irregular" or self-militia | 150,000 | 100,000 |
| 4. Administrative and logistic apparatus | 35,000-40,000 | 75,000-80,000 |
| 5. Political cadres | 75,000-85,000 | 80,000-120,000 |

[5] In Mexico, Japan, South Korea, Taiwan, Bolivia and Iran, in that order, perhaps soon to be followed by Peru.

THIEU'S LAND REFORM PROGRAM

The first signs of real movement came from the South Vietnamese. President Thieu, speaking to a gathering of provincial land-affairs officials on January 18, 1968, just before the *Tet* offensive, had made the statement quoted at the beginning of this article.

Over the following months, the *Tet* offensive, the Johnson announcement of a bombing halt, the start of talks in Paris and the presidential campaign of Minnesota Senator Eugene McCarthy all supplied additional shocks to the Vietnamese, and major elements of a land reform program began to take shape.

First of all, distribution of the choice lands taken by Diem but never distributed began in earnest. Procedures were simplified with the help of United States land reform advisers so that village-level committees could approve the applications made by the present cultivators and hand out deeds in under a week, and a tremendous boost was given the program when President Thieu decreed at the start of July, 1969, that henceforth the distribution would be free and that former recipients would be freed from their payment obligations. The distribution over the two years sharply accelerated:

TABLE II. LAND DISTRIBUTION, 1968–1969

January–June, 1968—20,000 acres distributed.

July–December, 1968—40,000 acres distributed.

January–August, 1969—90,000 acres distributed.

September–December, 1969 (est.)—90,000 acres distributed.

In 1969, an estimated 50,000 families will receive these government-owned lands.

Second, a temporary end, at least, was brought to "negative land reform." In September, 1968, Thieu declared that the processes by which landlords evicted occupants and collected rents in newly "secured" areas would be ended. Very likely, he had the forthcoming "accelerated pacification" drive in mind: if the process of planting the flag, at least in daytime, in additional villages, were to be accompanied by the customary inflow of returning landlords, the results for Saigon would be politically—and perhaps military—disastrous. This declaration was followed by three decrees:

One in November, 1968, that prohibited officials or soldiers in newly secured villages from reinstalling landlords or helping to collect rents;

A second in February, 1969, that extended the prohibition to the private landlords themselves and made it effective until February, 1970;

And a third in April, that made the earlier prohibitions countrywide, apparently in anticipation that landlords in more secure areas might try to evict tenants and resume personal occupation in contemplation of further land reform measures.

My just-concluded field work persuades me that the countrywide occupancy "freeze" is being widely adhered to. It has been well publicized; it involves a highly visible action if it is violated; and in areas where the new local-force units ("Popular Forces," "Regional Forces," and "Local Self Defense Forces") have received some 500,000 rifles, the South Vietnamese Army (ARVN) can no longer trample on peasants' legal rights with impunity. The rent "freeze" (supposedly at a zero level in newly secured areas) involves more clandestine violations, and appears to be only spottily effective.

Third, there was an almost disastrous decision in February, 1969, to design the biggest, final part of the program—involving transfer of some, most, or all of the 3,000,000 acres of privately owned lands that are farmed by tenants—as a "voluntary" purchase program. This would have merely *urged* landlord transfers for 2 to 3 years and then would have "required" them only when the administrators could determine (with the land records for three out of eight villages totally destroyed) that a landlord held more than 37, or perhaps 75, acres. Fortunately, President Thieu took a personal hand, which resulted in the scrapping of the "voluntary" plan, the sacking of the land reform minister, and the drafting of the sweeping "Land to the Tiller" bill and its presentation, in early July, to the lower house. This bill would affect all of the 3,000,000 acres of land that are cultivated by tenants or non-owners, and would make *all* Vietnamese peasants the owners of the land they till. The regime of tenant farming for a million families would be ended in a drastically simplified and rapid way:

All land not tilled by the owner would be affected (so there would be no need to apply a "retention limit" under which each owner would have to make a "declaration" of how much he owns, with the onus on the administrators to find out if he is lying).

The peasant tilling the land would receive it *free* (so there would be no occasion for corrupt administrators to dun the peasant for payments and the message would be the simplest possible: you don't pay anything to anybody).

The effect would be *nationwide* (so that peasants tilling land in insecure areas could nevermore be goaded to support the Vietcong with the threat that landlords would otherwise return: "negative land reform" would be gone for good).

Confirmation of title would come via a highly simplified village-level application procedure, involving only a few days' delay, and requiring neither the shifting of families, the shifting of present boundaries, nor the resurveying of the land.

Landlords would be fully compensated (20 percent in cash, 80 percent in 8-year inflation-adjusting bonds). The total cost would be $400 million, equal to between five and six days' cost of the war.

The bill, in fact, represents one of the great non-Communist land reforms of the twentieth century, even more sweeping, for example, than those of Japan and South Korea. The "Land to the Tiller" program, however, is now in deep political trouble, the basic difficulty being that the South Vietnamese landlords do not trust the bonds. Because of this, they combined their influence in the lower house with another group that sees opposition (shortsightedly would be an understatement) as a way of preventing Thieu from increasing his political power. This combined opposition eviscerated the bill—putting in a 37-acre "retention limit" and adding that only "legal" occupants could receive land—and even then added a provision boosting the cash portion of compensation for the landlords from 20 percent to 60 to 70 percent.

Now the upper house is considering the bill. In a heartening demonstration of firmness, President Thieu has asked to have it amended to its original strong version. Under Vietnamese law, the upper house amendments, if any, will prevail unless overridden by two-thirds of the total membership of the lower house. Even then President Thieu can amend and will prevail, unless his amendments are overridden by a majority of the joint membership of the two houses. Thus, for the moment, with President Thieu's continued exhibition of firmness, land reform is "up" again after its lower house drubbing.

But whether the upper house amends and—if not—whether President Thieu amends and is not overridden, now depend crucially on the credibility of the compensation to the landlords.

As this was written, pressures appeared to be building for a United States declaration of financial support for the program—consistent with President Richard Nixon's strong general statement of support for the program

in the Midway communiqué of June, 1969. Whether such a statement is made may well be decisive in determining whether, as this is being read, the mass of South Vietnamese peasants are finally becomng owner-farmers, or whether the chance to achieve an impact during the 1969 main Delta harvest period (December to February) has been missed. If, finally, land reform goes "down" again, it may well be for the final count.

## THE U.S. AMBASSADOR TO GREECE

Mr. GOODELL. Mr. President, I have requested Senate Majority Leader MANSFIELD to place a hold on the consideration of the nomination of Henry J. Tasca to be U.S. Ambassador to Greece.

My reason is that I believe this is not the propitious moment for the United States to send an ambassador to Greece—not that I have any reservations concerning Mr. Tasca's qualifications.

Mr. President, I ask unanimous consent that a statement I issued yesterday explaining the reasons for my action be printed in the RECORD, as well as an editorial on this subject which appeared in today's New York Times.

There being no objection, the statement and editorial were ordered to be printed in the RECORD, as follows:

GOODELL REQUESTS SENATE TO DEFER NOMINATION OF AMBASSADOR DESIGNATE TO GREEK MILITARY DICTATORSHIP

I have requested Senate Majority Leader Mansfield to hold up consideration of the nomination of Henry J. Tasca to be our Ambassador to Greece.

My reason is not that I have any reservations concerning Mr. Tasca's qualifications. He is, by all accounts, an able diplomat who is fully qualified to hold ambassadorial rank.

I have taken this action because I think it is not advisable at the present moment for the United States to send an ambassador to the Greek dictatorship.

I recognize that it is often desirable to have full representation in countries with whose policies we fundamentally disagree. Diplomatic communication is important between countries having different political systems.

This, however, is a delicate moment.

The Council of Europe is about to consider a motion to suspend or expel the Greek regime from membership because of its violations of the basic human rights of Greek citizens.

The Administration has been urging the Greek regime to adopt more democratic policies.

The Senate Foreign Relations Committee, I am pleased to note, has decided against authorizing any military aid to Greece.

There are signs that the forces behind the Greek junta might respond to these and other pressures for reform.

I am hopeful that the temporary withholding of an ambassador would be an additional signal of our displeasure with the dictatorship's present practices and might encourage responsible elements in Greece to press for more democratic and humane policies.

I am fearful that the dispatch of an ambassador at this time—two days before the Council of Europe meets to consider the suspension or expulsion of Greece—would be particularly ill-timed. It could be misconstrued in Europe as a gesture of support for the junta and its present course; and intrude ourselves gratuitously in a decision that should be made by the Europeans themselves.

I note also, that we have not even nominated an ambassador to Sweden. Many in that country apparently believe that we have not done so because we are displeased with the Swedish government's position on Vietnam. I do not know if this is the case. Whatever happens, we must certainly avoid giving the impression that we are more concerned over Swedish views on Vietnam than we are over totalitarian practices in Greece.

In summary, I am proposing a temporary hold on the nomination because I believe this is the wrong moment to send an ambassador; and also to emphasize our disapproval of the Greek junta's present policies and encourage responsible forces for change in Greece.

A police state now reigns in Greece, the birthplace of democracy. Government by terror and by torture rules in the land which first conceived of government by consent of the governed.

The Human Rights Commission of the Council of Europe, after extensive investigation, has found that torture and ill-treatment of political prisoners amounted to an "administrative practice" that has been "officially tolerated" by Greek government authorities. The Commission specifically reported 213 cases in which it had found evidence of torture—including a number of cases in which evidence of torture was found to be conclusive.

In addition to torture, the Commission found the Greek junta guilty of widespread abuses of civil and personal rights.

The Commission also exploded the fiction propagated by the junta that its seizure of power and subsequent rule was justified by the threat of a Communist takeover. After reviewing the evidence, it found there was no substance to the junta's claims that a Communist coup was imminent in 1967.

At this critical moment, it is imperative that we do nothing that can be misinterpreted by the Greek dictatorship and other nations as an endorsement of the junta's present policies.

---

[From the New York Times, Dec. 11, 1969]

THE GREEK JUNTA ON TRIAL

Membership in the Council of Europe is restricted by its statute to countries that "accept the principles of the rule of law" and enjoyment by all citizens of "human rights and fundamental freedoms." Foreign ministers of the eighteen members vote in Paris tomorrow on a resolution adopted by a huge majority of the Council's Consultative Assembly demanding the ouster of Greece "for serious violations of the conditions of membership."

The ministers will have before them a 1,200-page report by the European Commission on Human Rights that details many cases of torture of political prisoners by the Greek junta. They will also doubtless consider the uncovering by a respected British reporter of what appears to be a top-secret document, signed by the Director-General of the Greek Foreign Ministry, involving Premier Papadopoulos himself in a right-wing plot to stage a military coup in Italy.

In these circumstances, Senator Goodell has acted responsibly in asking Majority Leader Mansfield to delay a vote on the confirmation of Henry J. Tasca as United States Ambassador to Athens. As Mr. Goodell makes clear, this is no reflection on Mr. Tasca; nor is it an effort to keep the ambassadorship in Athens vacant indefinitely because of disapproval of the junta.

It is simply that for the Senate to confirm Mr. Tasca on the eve of the Council's vote would be interpreted as an attempt by Washington to pressure undecided Governments to keep Greece in the fold. The United States is already being accused of trying to influence the Council's decision in favor of the junta. A brief delay will not damage Mr. Tasca's standing with the colonels; indeed, it may enhance his influence if the delay helps persuade them that the United States is genuinely concerned at their failure to to move Greece back toward freedom and democracy.

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Nos. 581, 594, 595, 596, 597, 598, and 599.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PUBLIC HEALTH TRAINING

The Senate proceeded to consider the bill (S. 2809), to amend the Health Service Act so as to extend for an additional period the authority to make formula grants to schools of public health, which had been reported from the Committee on Labor and Public Welfare with amendments, on page 2, after line 5, insert a new section, as follows:

SEC. 2. Section 309(a) of the Public Health Service Act is amended by striking out "and $12,000,000 for the fiscal year ending June 30, 1971" and inserting in lieu thereof: "$15,000,000 for the fiscal year ending June 30, 1971, $18,000,000 for the fiscal year ending June 30, 1972, $21,000,000 for the fiscal year ending June 30, 1973, $24,000,000 for the fiscal year ending June 30, 1974, and $27,000,000 for the fiscal year ending June 30, 1975".

And, after line 13, insert a new section, as follows:

SEC. 3. Section 306(a) of the Public Health Service Act is amended by striking out "and $14,000,000 for the fiscal year ending June 30, 1971" and inserting in lieu thereof: "$14,000,000 for the fiscal year ending June 30, 1971, $18,000,000 for the fiscal year ending June 30, 1972, $22,000,000 for the fiscal year ending June 30, 1973, $26,000,000 for the fiscal year ending June 30, 1974, and $30,000,000 for the fiscal year ending June 30, 1975".

So as to make the bill read:

S. 2809

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 309(c) of the Public Health Service Act is amended by striking out "$5,000,000 for the fiscal year ending June 30, 1968, $6,000,000 for the fiscal year ending June 30, 1969, and $7,000,000 for the fiscal year ending June 30, 1970" and inserting in lieu thereof: "$7,000,000 for the fiscal year ending June 30, 1970, $9,000,000 for the fiscal year ending June 30, 1971, $12,000,000 for the fiscal year ending June 30, 1972, $15,000,000 for the fiscal year ending June 30, 1973, $18,000,000 for the fiscal year ending June 30, 1974, and $20,000,000 for the fiscal year ending June 30, 1975".

SEC. 2. Section 309(a) of the Public Health Service Act is amended by striking out "and $12,000,000 for the fiscal year ending June 30, 1971" and inserting in lieu thereof: "$15,000,000 for the fiscal year ending June 30, 1971, $18,000,000 for the fiscal year ending June 30, 1972, $21,000,000 for the fiscal year ending June 30, 1973, $24,000,000 for the fiscal year ending June 30, 1974, and $27,000,000 for the fiscal year ending June 30, 1975".

SEC. 3. Section 306(a) of the Public Health Service Act is amended by striking out "and $14,000,000 for the fiscal year ending June 30, 1971" and inserting in lieu thereof: "$14,000,000 for the fiscal year ending June 30, 1971, $18,000,000 for the fiscal year ending June 30, 1972, $22,000,000 for the fiscal year ending June 30, 1973, $26,000,000 for the fiscal year ending June 30, 1974, and $30,000,000 for the fiscal year ending June 30, 1975".

Mr. YARBOROUGH. Mr. President, today a high rate of infant mortality is the major reason why the United States lags behind other major countries in longevity. Prenatal and infant care and

nutrition education needed to reduce our infant mortality rate are essentially public health problems. So are the long-term chronic illnesses of age becoming a new domain for public health inquiry and control.

Increased urbanization and acceptance of public responsibility for new health services to the population have expanded the need for personnel trained in protecting the public health. For many years agencies concerned with community health problems have been faced by shortages of professional personnel with public health training, including physicians, nurses, and sanitarians.

Approximately 5,400 positions in State and local health departments are currently vacant or filled by individuals lacking appropriate training. This represents one-third of the total positions that require advanced training in public health. Many such jobs are also going unfilled in voluntary public health agencies and on university faculties. If the need for graduates with training in public health methods and specialties continued to expand at the same rate between now and the early 1970's as it did between 1962 and 1967, the current deficit in trained manpower will more than triple in size by 1975.

Thus, earlier this year I introduced S. 2809, to extend the program of formula grants to schools of public health. As reported by the Committee on Labor and Public Welfare, S. 2809 would extend until June 30, 1975, three authorities of the Public Health Service that have as their objective the training of additional and better-prepared public health personnel. The provisions of this bill as amended by the committee have the support of the Association of Schools of Public Health, the American Public Health Association, and the Association of State and Territorial Health Officers.

The bill, as amended, would extend the existing programs of formula grants for schools of public health, section 309 (c) of the Public Health Service Act; project grants for graduate training in public health, section 309(a) of the Public Health Service Act; and traineeships for professional public health personnel, section 306 of the Public Health Service Act.

These three programs are not new. The traineeships were authorized in 1957, the formula grants in 1958 and the project grants in 1960.

S. 2809, as reported, would authorize the following appropriations:

For traineeships, $18 million for 1972; $22 million for 1973; $26 million for 1974; and $30 million for 1975,

For project grants, $15 million for 1971; $18 million for 1972; $21 million for 1973; $24 million for 1974; and $27 million for 1975,

For formula grants, $9 million for 1971; $12 million for 1972; $15 million for 1973; $18 million for 1974; and $20 million for 1975.

Mr. President, the 16 schools of public health, nine of which are in State universities, have the responsibility for providing graduates capable of duty in the health services of all the 50 States, the territories, and the Federal Government, as well as for international activities. They are analagous to national service academies in that they must prepare students for public service anywhere in the country. Ninety percent of their graduates enter public service and hold key posts in local, city, State, National, and international agencies, and the character of professional leadership in the teaching of public health in the United States has been reflected in the frequency with which faculty members are called on for consultation abroad.

Mr. President, because this bill is vitally important to the training and better preparation of public health personnel, I recommend that this bill pass the Senate.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–586), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SUMMARY

As reported by the Committee on Labor and Public Welfare, S. 2809 would extend until June 30, 1975, three authorities of the Public Health Service that have as their objective the training of additional and better-prepared public health personnel. The provisions of this bill as amended by the committee have the support of the Association of Schools of Public Health, the American Public Health Association, and the Association of State and Territorial Health Officers.

The bill, as amended, would extend the existing programs of formula grants for schools of public health, section 309(c) of the Public Health Service Act, project grants for graduate training in public health, section 309(a) of the Public Health Service Act, and traineeships for professional public health personnel, section 306 of the Public Health Service Act.

These three programs are not new. The traineeships were authorized in 1957, the formula grants in 1958 and the project grants in 1960.

AMENDMENTS

As introduced, S. 2809 would have extended and expanded the existing program of formula grants for graduate schools of public health under section 309(c) of the Public Health Service Act that is scheduled to expire on June 30, 1970.

These formula grants are one of three basic, closely related sources of support for the training of public health personnel. The other two are section 306 of the Public Health Service Act that authorizes appropriations for traineeships for professional public health personnel and section 309(a) of the Public Health Service Act that authorizes appropriations for project grants for graduate training in public health. Both of the latter two authorizations expire June 30, 1971.

The common objective of these formula grants, project grants, and traineeships is to increase the supply of well-trained public health personnel. These sources of financial support are closely related.

It is recommended, therefore, that the formula grants, project grants, and traineeships be given a common expiration date of June 30, 1975.

THE PROBLEM

Advancing urbanization and acceptance of public responsibility for new health services to the population have expanded the need for personnel trained in protecting the public health. For many years agencies concerned with community health programs have been faced by shortages of professional personnel with public health training—including physicians, nurses, and sanitarians.

In recent years the shortages have become more severe than ever before as new concepts of the role of public health have evolved. New responsibilities have been given State and local health departments. Some years ago the control of infectious diseases represented the major role of health departments. Today immunization programs are a relatively small but none the less important aspect of the activities of health departments and these activities require highly specialized and trained public health personnel. Among the new responsibilities are comprehensive health planning, health and medical care administration; environmental management in the areas of air, water, and land; population and family planning; chronic disease control; and licensure of health care facilities.

Approximately 5,400 positions in State and local health departments are currently vacant or filled by individuals lacking appropriate training. This represents one-third of the total positions that require advanced training in public health. Many such jobs are also going unfilled in voluntary public health agencies and on university faculties. If the need for graduates with training in public health methods and specialties continues to expand at the same rate between now and the early 1970's as it did between 1962 and 1967, the current deficit in trained manpower will more than triple in size by 1975.

To meet the need for training more public health personnel, many educational institutions—such as schools of public health, engineering, and nursing; departments of preventive medicine and dentistry; and other institutions which provide special public health training—must continue to expand their enrollment capacity. Such expansion will require additional highly specialized faculty and supportive staff.

BACKGROUND

The formula grants for graduate schools of public health assist in providing comprehensive programs of graduate training in public health professions. These grants are awarded on a formula basis. The formula provides that one-third of the total appropriations be divided among the schools equally. The remaining two-thirds is divided among the schools according to the number of Federally sponsored students enrolled. Formula grants are entitlement grants available only to the accredited schools of public health which the schools can use for administrative and direct educational purposes. They reflect the unique situation of these schools as a national resource with a substantial proportion of federally sponsored students.

The project grants are available to support graduate public health training proposals recommended by the National Advisory Public Health Training Council as having a high national priority after competitive review. The grants are used for projects related to development, innovation, and otherwise for strengthening and expanding graduate public health curriculums in colleges and universities including schools of public health, medical and dental schools, engineering colleges, schools of nursing, and similar institutions.

Traineeships for professional public health personnel are awarded through grants to individuals and grants to training institutions which then select the individuals to receive support.

*Formula grants*

The program of formula grants for graduate schools of public health was originally enacted in 1958 as Public Law 85–544. It provided the first formal recognition by Congress of the Federal responsibility for schools of public health as a national resource. At that time there were 11 schools of public

health eligible for grants. Since that time five new schools of public health have been accredited and several more are in various stages of development. Proposals to establish new schools of public health are under consideration in Alabama, Illinois, Ohio, and Washington.

At the present time, schools of public health are located at the following universities:

California (Berkeley), California (Los Angeles), Columbia, Harvard, Hawaii, Johns Hospital, Loma Linda, Michigan, Minnesota, North Carolina, Oklahoma, Pittsburgh, Puerto Rico, Texas, Tulane, and Yale.

The authorization for appropriations has increased from $1 million in 1958 to $7 million in 1970.

It must be emphasized that the 16 schools of public health, nine of which are in State universities, have the responsibility for providing graduates capable of duty in the health services of all the 50 States, the territories and the Federal Government, as well as for international activities of the United States and the international agencies. Thus, each school has had to be concerned with an area far beyond that of its ordinary university range of influence. It has been pointed out that the schools of public health are analogous to national service academies in that they must prepare students for public service anywhere in the country. This point is particularly significant in the State schools since State legislatures, faced with mounting costs in all fields, customarily sharply restrict out-of-State registrants.

More than 90 percent of the graduates of schools of public health enter public service and hold the key posts in local, city, State, National, and international agencies. The character of professional leadership in the teaching of public health in the United States has been reflected in the frequency with which faculty members are called on for consultation abroad. Moreover, schools of public health on the American pattern have been formed in many countries elsewhere in the world, thus making it possible for students of those countries to see more directly applied the principles taught in our schools of public health.

Schools of public health have found it necessary to enlarge faculty to bring new skills in order to pay proper attention to the many teaching programs which have had to be added. Some index of the scope of a school of public health in 1969 may be gained from listing the programs of study offered at the school of public health of the University of Michigan:

Air Pollution, Biostatics, Chronic Diseases, Adult Health and aging, Dental Public Health, Environmental Health—Food Contact, Environmental Health—General, Environmental Health—Water Contact, Epidemiology, Health Education, and Health Planning.

Hospital Administration, Industrial Hygiene, Maternal and Child Health, Medical Care Organization, Mental Health, Nutrition, Occupational Medicine, Population Planning, Public Health Administration, Public Health Laboratory Practice, Public Health Nursing, and Radiological Health.

A study conducted by the Association of Schools of Public Health covering the years since the formula grant legislation was approved disclosed the following improvements since 1958:

A doubling in the number of graduate degrees awarded;

A tripling in the number of students enrolled;

An increase in the number of accredited schools from 11 to 16;

A tripling in the number of federally sponsored students attending schools of public health; and

The addition of hundreds of courses in the schools to meet the health needs of our changing society.

This study also showed that formula grants met only 12 percent of the total costs of basic operations and teaching in 1968 as compared to 16 percent in 1963.

This same study revealed that the existing 16 schools of public health estimated that substantial increases in the formula grants would be required. To meet expanding student enrollments, teaching programs, and increases in basic operating costs they estimated the need for the following appropriations in formula grants:

| | |
|---|---|
| Fiscal year 1971 | $12,500,000 |
| Fiscal year 1972 | 16,800,000 |
| Fiscal year 1973 | 21,600,000 |

*Project grants*

The program of project grants for graduate training in public health was originally enacted in 1960 as Public Law 86–720. The legislation was extended in 1964 and the authorization for appropriations has been increased from $2 million in 1961 to $8.5 million in 1970. The major change in the legislation came in 1964 when the eligibility for grants was broadened from schools of public health, engineering, and nursing which provide graduate or specialized training in public health to include all public or private nonprofit institutions which provide such training.

This program, coupled with the student traineeships authorized in section 306 of the Public Health Service Act, has made a significant contribution to the expansion and improvement of public and community health training throughout the country, and to increasing the numbers of trained public health specialists so badly needed in today's society. It has made possible:

(a) special innovative programs in schools of public health to provide them with the capacity to become balanced centers of public health training and major public health consultative and investigative resources for the Federal, State, and local governments;

(b) the initiation of specialized preventive medicine and public health graduate training programs in schools of nursing to prepare well-qualified nurses for public health nursing positions;

(c) the strengthening and broadening of graduate training programs in environmental public health engineering so critical in view of contemporary problems of urban environmental hazards; and

(d) the development, expansion and strengthening of programs of community-preventive medicine and dentistry in medical and dental schools with the result of making young physicians and dentists more aware of careers in public health.

During the period from fiscal year 1961, when the program was initiated, through fiscal year 1968, 779 project grant awards were made: 270 in schools of public health, 156 in schools of nursing, and 189 in schools of engineering. Effective with fiscal year 1965 eligibility for the grants was extended to departments of medicine and dentistry. In fiscal years 1965 through 1968, 112 grants were awarded in schools of medicine, and 52 in schools of dentistry.

The 1968 awards represent 15 major curriculum areas, including medical care economics and administration, public health nursing, environmental health, chronic disease, and preventive medicine and dentistry. These projects are often administered in conjunction with public health traineeship grants, which provide support for students trained in these specialized areas.

During the period 1961–65, 49 new faculty positions had been added through this program, including such disciples as air pollution engineering, pharmacology, environmental chemistry, bioengineering, environmental biology, and microbiology.

In schools of medicine, the project grants have been used to revise curricula in departments of preventive medicine. In 1967 alone, approximately 5,000 medical students were exposed to the expanded teaching of preventive and community medicine.

TABLE 1.—SUMMARY OF PROJECT GRANTS FOR GRADUATE PUBLIC HEALTH TRAINING AWARDED IN FISCAL YEAR 1968

| Type of school | Number of schools awarded grants | Number of grants | Amount of grants |
|---|---|---|---|
| Total | 91 | 124 | $4,498,950 |
| Public health | 14 | 43 | 1,880,816 |
| Nursing | 13 | 14 | 419,989 |
| Engineering | 13 | 14 | 284,294 |
| Medicine | 34 | 36 | 1,286,658 |
| Dentistry | 17 | 17 | 627,193 |

*Traineeships*

The program of traineeships for professional public health personnel was originally enacted in 1956 as Public Law 84–911. The legislation was extended in 1959, 1960, and 1964. The annual authorization for appropriations was increased to $10 million for 1968, 1969, and 1970.

Since the program was initiated, the number of long-term academic traineeships awarded has increased to more than 1,500 annually. In addition, the program has been expanded to provide support for short-term training to upgrade and develop special professional skills for approximately 4,500 trainees annually, 70 residencies in preventive medicine and dentistry, and 600 medical and dental apprenticeships each year. By the end of fiscal year 1969, more than 12,000 individuals had received long-term academic training, 47,000 short-term training, 223 residency awards and 2,135 apprenticeship awards.

The primary objective of traineeships for full-time graduate training in public health has been to increase the numbers of adequately trained public health professionals. Categories and number supported to date include physicians (822) dentists (307), nurses (4,450), engineers (1,180), sanitarians (449), veterinarians (127), social workers (46), health educators (928), dental hygienists (92), administrators (1,077), and others. Special emphasis has been placed on training for new and developing program areas such as medical care administration, family planning, and environmental health. These programs have succeeded in attracting greater numbers of increasingly able students to public health training and careers. Of 3,800 past trainees who were surveyed in preparation for the Third National Conference on Public Health Training, approximately 2,400 or 63 percent are now working in public health, the majority in State and local health departments. About 5 percent are in Federal programs and an additional 7 percent (280) are still in school. Of the remainder, a significant number are housewives, many of whom plan to return to service in public health.

In addition to staffing traditional public health programs in official and voluntary agencies, these trainees constitute a crucial manpower source for such recently enacted programs as Medicare, the Appalachian and urban health centers authorized through OEO and HUD programs, comprehensive health planning, air and water pollution control, and solid wastes.

The primary purposes of traineeship support for short-term training have been to upgrade the skills of public health personnel working in the field, and to update their knowledge in areas essential to new or ongoing public health programs. This grant program has been widely and enthusiastically utilized by official and voluntary health agencies, professional organizations, and academic institutions.

Traineeship support for apprenticeship as-

signments was designed to provide medical, dental, and osteopathic students with an exposure to public health programs in order to attract them to careers in public health and/or to prepare them for constructive participation in community health programs as private practitioners. This program has been highly successful in arousing tremendous enthusiasm in the medical schools and the communities involved. An important byproduct of the apprenticeship training program has been the contributions of these trainees to more than 150 projects to which they have been assigned during their apprenticeships.

Traineeship support for residency training in the public health specialties for physicians and dentists is intended to increase the numbers of teachers of preventive medicine and dentistry and of well-trained public health physicians and dentists, particularly for leadership positions in local and State public health programs.

In fiscal year 1969 approved applications will exceed available funds by approximately $6,025,000. This backlog will include $6 million for approved long-term traineeships which would have supported 1,330 trainees. In the area of short-term training, the backlog will amount to $25,000 which would have provided training to an estimated 165 professional health workers.

TABLE 2.—TRAINEESHIPS FOR PROFESSIONAL PUBLIC HEALTH PERSONNEL, SEC. 306, PUBLIC HEALTH SERVICE ACT

[Number of trainees by type of program, 1957–69]

| Year | Type of program | | | | |
|---|---|---|---|---|---|
| | Long term | Residency | Apprenticeships | Short term | Total |
| 1957 | 363 | | | | 365 |
| 1958 | 665 | | | | 663 |
| 1959 | 654 | | | | 654 |
| 1960 | 634 | | | | 634 |
| 1961 | 607 | | | | 607 |
| 1962 | 568 | | | | 568 |
| 1963 | 1,054 | | | 1,482 | 2,536 |
| 1964 | 1,092 | | | 3,534 | 4,626 |
| 1965 | 1,057 | | 119 | 5,440 | 6,616 |
| 1966 | 1,314 | 24 | 333 | 10,081 | 11,752 |
| 1967 | 1,361 | 61 | 498 | 12,000 | 13,920 |
| 1968 | 1,300 | 70 | 600 | 10,000 | 11,970 |
| 1969 | 1,392 | 68 | 585 | 4,456 | 6,501 |
| Total | 12,061 | 223 | 2,135 | 46,933 | 61,412 |

AUTHORIZATION FOR APPROPRIATIONS

Since 1967 the actual appropriations for formula grants for schools of public health, project grants for graduate training in public health and traineeships for professional public health personnel have lagged far behind the authorizations for appropriations. In 1969, for example, only 70 percent of the authorized appropriations were actually approved. With this consideration, the authorizations of S. 2809 are set forth below:

AUTHORIZATION FOR APPROPRIATIONS

[In millions of dollars]

| Program and PHS Act section | 1971 | 1972 | 1973 | 1974 | 1975 |
|---|---|---|---|---|---|
| Sec. 306, traineeships | | 18 | 22 | 26 | 30 |
| Sec. 309(a), project grants | [1] 3 | 18 | 21 | 24 | 27 |
| Sec. 309(c), formula grants | 9 | 12 | 15 | 18 | 20 |
| Total | 12 | 48 | 58 | 68 | 77 |

[1] S. 2809 would increase the 1971 authorization for project grants from $12,000,000 to $15,000,000.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the committee amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended, so as to read: "A bill to amend the Public Health Service Act so as to extend for an additonal period the authority to make formula grants to schools of public health, project grants for graduate training in public health and traineeships for professional public health personnel."

## THE MIGRATORY FARM LABOR PROBLEM IN THE UNITED STATES

The resolution (S. Res. 283) authorizing the printing of additional copies of "The Migratory Farm Labor Problem in the United States" was considered and agreed to, as follows:

S. RES. 283

*Resolved*, That there be printed, for the use of the Committee on Labor and Public Welfare, two thousand nine hundred additional copies of the 1969 report of its Subcommittee on Migratory Labor entitled "The Migratory Farm Labor Problem in the United States" (Senate Report Numbered 91–83, Ninety-first Congress).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–598), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 283 would authorize the printing for the use of the Committee on Labor and Public Welfare of 2,900 additional copies of the 1969 report of its Subcommittee on Migratory Labor entitled "The Migratory Farm Labor Problem in the United States" (S. Rept. No. 91–83).

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing-cost estimate*

| | |
|---|---|
| Back to press, first 1,000 copies | $796.41 |
| 1,900 additional copies, at $206.34 per 1,000 | 392.04 |
| Total estimated cost, Senate Resolution 283 | 1,188.45 |

## MARY K. DURISOE

The resolution (S. Res. 295) to pay a gratuity to Mary K. Durisoe was considered and agreed to, as follows:

S. RES. 295

*Resolved*, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Mary K. Durisoe, widow of John E. Durisoe, an employee of the Senate at the time of his death, a sum equal to eight months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

## JAMES H. NEWMAN, SR.

The resolution (S. Res. 296) to pay a gratuity to James H. Newman, Sr., was considered and agreed to, as follows:

S. RES. 296

*Resolved*, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to James H. Newman, Senior, father of James H. Newman, an employee of the Senate at the time of his death, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

## REPORT OF PROCEEDINGS OF THE 44TH BIENNIAL MEETING, CONVENTION OF AMERICAN INTRUCTORS OF THE DEAF

The concurrent resolution (S. Con. Res. 47) authorizing the printing of the report of the proceedings of the 44th biennial meeting of the Convention of American Instructors of the Deaf as a Senate document which had been reported from the Committee on Rules and Administration, with an amendment in line 6, after the word "that", strike out "six" and insert "five"; so as to make the concurrent resolution read:

S. CON. RES. 47

*Resolved by the Senate (the House of Representatives concurring)*, That the report of the proceedings of the forty-fourth biennial meeting of the Convention of American Instructors of the Deaf, held in Berkeley, California, June 20–27, 1969, be printed with illustrations as a Senate document; and that *five* thousand additional copies be printed and bound for the use of the Joint Committee on Printing.

The amendment was agreed to.

The concurrent resolution, as amended, was agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–599), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 47 as referred would provide (1) that the report of the proceedings of the 44th biennial meeting of the Convention of American Instructors of the Deaf, held in Berkeley, Calif., June 20–27, 1969, be printed with illustrations as a Senate document; and (2) that 6,000 additional copies of such document be printed and bound for the use of the Joint Committee on Printing.

The Committee on Rules and Administration has amended Senate Concurrent Resolution 47 by reducing the number of additional copies to be printed from 6,000 to 5,000, the quantity customarily provided biennially.

## ADDITIONAL COPIES OF THE 1969 REPORT OF THE SENATE SPECIAL SUBCOMMITTEE ON INDIAN EDUCATION

The concurrent resolution (S. Con. Res. 50) authorizing the printing of additional copies of the 1969 report of the Senate Special Subcommittee on Indian Education was considered and agreed to, as follows:

S. CON. RES. 50

*Resolved by the Senate (the House of Representatives concurring)*, That there be printed for the use of the Senate Committee on Labor and Public Welfare three thousand additional copies of the 1969 report of its Special Subcommittee on Indian Education entitled "American Indian Education: A National Tragedy—A National Challenge" (Senate Report 91–501).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–600), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 50 would authorize the printing for the use of the Senate Committee on Labor and Public Welfare of 3,000 addtional copies of the 1969 report of its Special Subcommittee on Indian Education entitled "American Indian Education: A National Tragedy—A National Challenge" (S. Rept. 91–501).

This proposal is identical to that contained in Senate Resolution 293, referred to the Committee on Rules and Administration on December 9, 1969. Since the concurrence of the House of Representatives is required on proposals to print additional copies costing in excess of $1,200 (44 U.S.C. 703), the Committee on Rules and Administration is expressing its approval of this proposal by reporting out this original concurrent resolution in lieu of Senate Resolution 293.

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing-cost estimate*

| | |
|---|---|
| Back to press, 1st 1,000 copies | $1,315.29 |
| 2,000 additional copies, at $373.81 per thousand | 747.62 |
| Total estimated cost, S. Con. Res. 50 | 2,602.91 |

## A GUIDE TO STUDENT ASSISTANCE

The concurrent resolution (H. Con. Res. 345) providing for printing as a House document "A Guide to Student Assistance" was considered and agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–601), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 345 would provide (1) that there be printed as a House document "A Guide to Student Assistance," prepared by the House Committee on Education and Labor; and (2) that there be printed 62,200 additional copies of such document, of which 43,900 would be for the use of the House of Representatives (100 per Member), 10,300 would be for the use of the Senate (100 per Member), 4,000 would be for the use of the House Committee on Education and Labor, and 4,000 would be for the use of the Senate Committee on Labor and Public Welfare. Copies of the document would be prorated to Members of the Senate and the House of Representatives for a period of 60 days, after which the unused balances would be distributed by the respective Senate and House Document Rooms.

## OUR FLAG

The concurrent resolution (H. Con. Res. 407) to authorize the printing as a House document the pamphlet entitled "Our Flag" was considered and agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–602), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 407 would provide (1) that the publication entitled "Our Flag," published by the Office of the Armed Services Information and Education, Department of Defense, be printed with illustrations as a House document; and (2) that there be printed 271,000 additional copies of such document, of which 219,500 would be for the use of the House of Representatives (500 per Member), and 51,500 would be for the use of the Senate (500 per Member).

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing-cost estimate*

| | |
|---|---|
| To print as a document (1,500 copies) | $2,832.00 |
| 271,000 additional copies, at $53.56 per thousand | 14,514.76 |
| Total estimated cost, H. Con. Res. 407 | 17,346.76 |

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, that concludes the call of the calendar and brings us to the pending business, and I thank the distinguished chairman of the Foreign Relations Committee for permitting me to proceed with the consideration of the bills on the calendar.

## FOREIGN ASSISTANCE ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 14580) to amend further the Foreign Assistance Act of 1961, as amended, and for other purposes.

Mr. FULBRIGHT. Mr. President, I derive no pleasure in presenting the foreign aid bill to the Senate. It is submitted to the Senate not with enthusiasm, but with reluctance. And, speaking for myself only, the committee's endorsement of the bill now before the Senate should not be taken as a vote of confidence in foreign aid as presently constituted. This is a stop-gap bill only—and no more—pending the development of a new, more workable program.

The House approved major substantive changes in the foreign aid program.

The Foreign Relations Committee, however, is submitting an amendment which does not authorize new programs but continues the existing programs at approximately the same level as last year.

Last year Congress appropriated foreign aid funds totaling $1.7 billion for both economic and military assistance; this year the Senate bill authorizes appropriations of $1.9 billion. This slight increase is, at worst, a vote of reluctant acceptance of the existing foreign aid program. At best, it is a tranquilizer. At its best or at its worst, I am reluctant to support most of the bilateral aspects of the aid program—even at the level of funding provided for last year.

Mr. President, prior to the committee's final action on the bill, I proposed a continuing resolution for the purpose of carrying existing programs forward while, at the same time, providing that they be phased out by December 31, 1970. I appreciate the novelty of this suggestion in terms of our traditional legislative procedure and I understand why my proposal was not accepted. Nevertheless, the concept of a continuing resolution this year was not without a rationale. The 1970 fiscal year is almost half gone and much has happened to change the frame of reference for foreign aid legislation since the President's message to Congress on May 28.

Domestically, inflation has continued unchecked—to such a degree that the President has announced he could not accept the tax reform bill as passed by the Senate. The stock market—as the Nation's single most important measure of our fiscal and economic well-being—continues to set new record lows, and our balance-of-payments situation has continued its downward slide, with a record deficit this year approaching $10 billion, twice as large a deficit as that for any previous year in the postwar period. This situation has forced considerable retrenchment on much needed domestic programs.

On the international front, the new administration is still in the throes of reappraisals stretching from Asia to the Middle East. If "Vietnamization" works, the economic bill for reconstruction in Vietnam will be big. The report of the World Bank's Commission on International Development, headed by Lester Pearson, has been made public, but its costs have not been assessed.

Finally, the President has initiated a reappraisal of the entire foreign program and, by law, has been requested to submit his findings and recommendations to Congress no later than March 31, 1970—less than 4 months away.

In short, time and events have rendered the President's 1970 foreign aid proposals obsolete. Under these circumstances, it seems to me that for Congress to pass any substantive foreign aid bill at this point would be putting the cart before the horse.

Mr. President, year after year, the Committee on Foreign Relations has attempted to bring about needed reforms in foreign aid, but with little practical effect. Experience has shown that the only means left to bring about significant reform is to phase out the existing program and start afresh.

Four years ago, the Senate decided to do that. It voted to terminate the aid program so that fundamental reappraisals might provide not only a rationale for the program, but programs consistent with the lessons we have learned—programs which would not perpetuate the errors of the past. Unfortunately, the House did not accept the Senate's proposal and the program has stumbled along for 4 more years—finally developing a pattern of incipient danger to the legislative process itself. This is the pattern of authorizing and appropriating funds for specific foreign countries and projects. I fear we have come to the point where some lobbyists for foreign governments are more effective in promoting their special projects than Members of this body are in promoting projects for their own States and districts. The foreign aid bill which the Senate received from the other body had earmarked $155

million—as much as we spend on some Government departments—for projects of a size and type which no Member of Congress could hope to get for his own constituency, especially without the approval of the Bureau of the Budget—the administration, in effect.

What Member of this body could with equal ease get $50 million more than the President requested for his State—as was the case with South Korea? What Member could get $54.5 million more than the President requested—as was the case with Taiwan? What Member could get $50.5 million more than the President requested—as was the case with Israel?

Senators know how exceedingly difficult it is for them to get money, in any size or of any consequence, for their own States without the support of the administration.

These amounts were earmarked in the foreign aid bill that came to the Senate from the other body. The Committee on Foreign Relations removed some of these unrequested authorizations; but I expect the final bill will contain funds for these purposes.

To shed a little more light on this issue, I am sure some of my colleagues will recall having received last year a letter from a Minister of Defense of an allied nation calling upon Senators to give their support for an additional $100 million in military assistance for his country. An additional $50 million has now been authorized for South Korea by the House—as I say, without budgetary approval by the administration. I fail to see how lobbying activities of this kind differ in any practical way from the finagling that went on behind the scenes to secure $28 million for building the so-called freedom fighter—also without the recommendation of the Budget. This project is to lay the groundwork for providing certain countries with fighter aircraft which they otherwise could not afford.

Mr. AIKEN. Mr. President, does the Senator care to discuss these matters as he goes along, or does he wish to be unmolested until he completes his statement?

Mr. FULBRIGHT. A Senator can interrupt at any time. I am always honored to yield to the Senator from Vermont.

Mr. AIKEN. I was interested in the Senator's statement as to the effectiveness of foreign lobbyists. I know foreign lobbyists are not backward, and some of the ambassadors from foreign countries are not backward, in encouraging us to spend money in their countries; but I would say, in the long run, it is the American concerns, the industrialists, that are more effective.

When the Senator refers to the $54 million which the House put in the bill for planes for Taiwan, I am satisfied it was the people who expected to manufacture those planes who were successful in getting that item inserted.

I can assure the Senator that, as far as I am concerned, the bill will not contain that item of $54 million, which was not asked for by the foreign government, and was not asked for by our own Government, but was slipped into the House bill. I feel quite sure it was American industrial concerns that did that.

The same may be true of South Korea, although the South Korean Government has fared very well at the hands of the U.S. Government, and they want to fare better, of course. There again we have to put the blame or responsibility on our own people to a greater extent than we do on the foreign people.

I want to assure the Senator that as as far as I am concerned, these funds, which our own executive branch did not ask for and even the foreign government did not ask for, will not be in the bill. I would rather have no bill than to have industrial concerns running our foreign aid program, because the trouble with the foreign aid program now is that these interests have really converted it, in large part, to a subsidy for American industry. I can hardly blame the foreign countries for that.

Mr. FULBRIGHT. I will say to the Senator that, while I am quite sure the companies directly involved have probably expressed themselves, I am not quite prepared to say that the foreign countries did not ask for the military aid. I can assure the Senator, for example, that I myself received a letter from the Government of South Korea last year, suggesting, asking, or pleading for additional funds, which was something I had never experienced before. This was a letter addressed to me, which came from the Ministry of National Defense of the Republic of Korea.

Mr. AIKEN. What date was that?

Mr. FULBRIGHT. This was last year, February of 1968.

Mr. AIKEN. Yes. Well, I am sure they still want all the assistance they can get.

Mr. FULBRIGHT. I do not think the Senator is quite accurate in saying foreign governments have not asked for assistance.

Mr. AIKEN. That may be true on an informal basis but I believe that officially there was no request on the matter.

Mr. FULBRIGHT. I think they have asked for it. In the hearings on Taiwan, if the Senator remembers, there was the evidence of the enlargement of their bases, for no apparent purpose other than to get ready to receive planes which only the United States could have furnished. There had been no public statement in the press, but I think the meaning of it was quite clear. They were not going to spend that amount of money for any other reason. They were expecting those additional planes.

I believe the press also reported—I think I read it in the newspapers—that Members of the House of Representatives who visited Mr. Chiang Kai-shek last summer were the ones who sponsored the amendment in the House of Representatives. It was not in the administration bill to supply those planes.

Mr. AIKEN. But as I said earlier officially we have no request from the Government of Taiwan for those planes, and no request from the U.S. Government to furnish the planes.

Mr. FULBRIGHT. That is not unusual. I do not know of any lobbyist who operates through official channels in that respect. Their influence has become very powerful, a fact which I deplore.

In the foreign aid bill, we do not attempt to write into the legislation itself the specific countries to which the aid will go. There have been a few exceptions where we have been overruled because of the persuasiveness of certain Senators. But the practice has been, I think the Senator will agree, not to specify in the legislation itself the country, and just how much is for what. But there have been some exceptions.

Mr. AIKEN. Yes. Although the committee cut the request of the administration and the authorization of the House of Representatives down $226 million, I have had no protest on that from our own executive branch, up to this point.

Mr. FULBRIGHT. Well, I have not received any protest, either. I imagine one reason for the lack of protest is that, as I was told a few minutes ago, the House of Representatives passed its own appropriation bill by a margin of only five votes. In fact, the Senator from Vermont told me that.

Mr. AIKEN. Yes. I agree with the Senator.

Mr. FULBRIGHT. So the administration probably was very lucky to get a bill at all.

Mr. AIKEN. Yes. I believe the program as presently constituted cannot last more than a year or so longer. We are in the very unhappy situation, here in the United States, of not being satisfied with what we have and not knowing just what we want. I think we will have to extend the present program for 1 year. I would like to see technical assistance carried on for 2 years, but I believe I was outvoted by the committee on that, and this measure simply extends the program until next July, and before that time we shall have to decide what we want to do in the future.

We cannot just sever connections with every country in the world all at once, but we can, I hope, work out a program which will make our foreign aid program more acceptable to the people of the United States, and possibly to the people of the other countries as well.

Mr. FULBRIGHT. I have certainly never suggested, and I do not know of anyone who has suggested, that we cut off all relations with the other nations of the world. But there is a difference of opinion, and I think a legitimate difference, as to how we should give aid and assistance to other countries.

I, myself, have advocated for some years that it be given primarily, except for very limited items, through international institutions such as are outlined and referred to on page 4 of the committee report: The Inter-American Development Bank, the Asian Development Bank, and the International Development Association.

The World Bank is not listed there, but it is, of course, the parent organization of the International Development Association.

I have at various times given explanations of my reasons for that position. At least I know what I would like to see. It is true that in the Senate, and in the Government as a whole, there is considerable division about what the majority want in the way of an aid program.

The Pearson commission has made its report. We really have not had time to digest it; it is a very recent report. The President is authorized, in fact he is requested—or his task force is—to report on March 31, 1970, and make its recommendations with respect to foreign aid in general.

I would hope that the next session of this Congress, with the recommendations of the administration, will determine that a new approach on this whole problem would be in order; and I hope a start can be made before the end of this fiscal year. That was one of the main reasons why I recommended a continuing resolution.

Mr. AIKEN. Again, I think there is very little disagreement in the committee that we could and should do more of this work through the international multilateral agencies. However, we should not give up all bilateral programs, because, as I understand it, the multilateral agencies sometimes take a long, long time to make arrangements with the country which needs their help, whereas in bilateral arrangements, it can be done more quickly. That is one advantage of bilateral aid.

However, we should do more through the multilateral agencies, and I think that is the opinion of nearly every member of our committee.

Mr. FULBRIGHT. I hope that is true, and I hope that we can move in that direction.

As to responding quickly in the case of emergencies, if the Senator from Vermont is talking of taking action in such cases, that is one thing. But the development loan program, and the like, are not for emergencies. We are supposed to make careful surveys of the needs of each country. I do not know that there is any substantial difference in these ongoing programs, particularly in development lending, between the multilateral banks' procedures and AID's.

Contingency items, of course, are different. We have always had programs of relief for acts of God, floods, fires, and earthquakes. But that is another matter. I think we could meet those problems, which are different from the ones I am talking about.

The incipient danger to our legislative process in all this is that other nations, seeing the success of some nations in tapping the American till, will seek to do the same for themselves. The examples I have cited surely will not be lost on others. It will only be a question of time until we will be persuaded by other lobbies to take care of their clients.

This practice could become standard operating procedure and, in effect, we will have acquired foreign constituencies of our own. As the number of these constituencies grows, we can expect to receive more offers of friendship and solidarity, more offers of special favors, more offers of expense paid trips—and more pressures from the agents of foreign governments, which may or may not be representing the real interest of their people.

As a part of this developing pattern, it has become increasingly apparent to me in recent months that far too many of our officials abroad tend to represent the country to which they are assigned as effectively as they represent the United States. Aid has become an indispensable crutch for diplomacy—no aid, no influence. As a result, career diplomats who often thought of aid programs as too grubby for career advancement are now in the position of having to make the best case they can for the aid-receiving country to which they are accredited. Their position is not unlike a lawyer-client relationship, in that they are expected to defend any aid request regardless of their client's need or, for that matter, the legitimate interests of the United States.

In making these observations, I only wish to point to the indications that representatives of some foreign nations are able to muster legislative support for their purposes—purposes which have the effect of taking needed money from domestic programs for support of questionable projects abroad.

Is it more important to have a desalting plant in the Middle East than in our own Southwest? Is it more important to provide $54 million worth of fighter aircraft to one government and $50 million for an air squadron to another than to have this amount available for perfecting antipollution techniques, or cancer research, or education, or cleaning and rehabilitating our cities?

In the bill the House sent over, these and similar questions were answered in the affirmative.

Mr. President, these actions are an indication that our foreign aid program is based on a bankrupt and outdated policy of dollar diplomacy which mires the United States ever deeper in the political affairs of aid recipients while, at the same time, forcing us to cut back on programs to meet the needs of our own citizens. And any Senator with doubts about the entangling character of bilateral aid should read the transcripts of the revealing hearings on the Philippines, Laos, Thailand, and Taiwan chaired by the senior Senator from Missouri.

Most regretfully there is another aspect of foreign aid that is disturbing. It is that the aid program is becoming a symbol of the confusion that pervades our foreign policy. One would never know what this Nation stands for by studying the bill which the House has acted upon and which is now before us.

The stated policy purposes of the aid program include such phrases as "freedom of the press," "freedom of information," and "freedom of religion." There is in the policy statement strong objection to ignorance, hunger, despair, aggression, and subversion.

But what of the reality? The reality is that aid in large part is an instrument for maintaining the status quo by supporting dictatorships—with the support couched in terms of maintaining economic and political stability. I will not name the countries enjoying the fruits of our questionable stabilization efforts; but I challenge anyone to go through the list and deny that about half of them are dictatorships. In short, our aid program has become—despite the best of intentions—an instrument for the perpetuation of the political status quo—whether that be in the Middle East, the Far East, Latin America, or Africa.

But no matter how serious the shortcomings of the aid program, sheer inertia seems capable of keeping the present program moving indefinitely in the same rut. No businessman would attempt to carry on business as usual with an enterprise which was failing; he would salvage what he could and start afresh. It is time for Congress to exhibit a similar degree of prudence and recognize that dollars are not a substitute for a sound foreign policy.

I believe most of us realize that our national priorities are confused. Part of the distortion comes from foreign aid programs which too often attempt to remake the societies of ancient lands in the American image—at the expense of the social needs of our own Nation.

Mr. President, to sum up, I think it is remarkable that the committee reported out any foreign aid bill this year. Our present program has run out of steam. We know it is inadequate in amount—that we should do more to promote development—but it has not been our inclination to put more money into programs which are inadequate in conception and distorted in practice. The majority, I believe, felt that, in the absence of an immediate and viable alternative, it was best to continue the existing program—with the understanding that a new program would be forthcoming next year.

I do not wish to conclude these brief remarks without indicating the direction in which I believe foreign aid programs should move if they are to have support in the Nation and in the Congress.

In the first place, as a matter of principle, I believe the developed, wealthy nations should give economic assistance to the impoverished and underdeveloped countries. This is not only humanitarian in motivation, but is in the financial and political interest of the developed industrial countries.

Second, I believe the bulk of economic assistance should be extended through multilateral institutions such as the World Bank, the International Development Association, and consortia devoted to specific projects. Multilateral institutions can maximize the economic controls necessary to sustained development and minimize the political interference in sovereign nations conscious of their national identity.

Third, I believe it essential that bilateral aid be kept at a minimum and when it is provided that it be used to support projects rather than governments. Bilateral aid which is extended to governments unavoidably involves the benefactor nation in the internal politics of the recipient nation—and involvement in the internal politics of any nation is the first step toward involvement in civil strife which may be expected in countries struggling toward nationhood.

Fourth, I believe it essential that military assistance be limited and eventually terminated. Any country which receives grant military assistance from another is accepting interference in the most

delicate area of its sovereignty. It is not for the United States to tell a country that it needs tanks, or aircraft, or missiles. Items a nation needs for its national defense should be purchased from its own treasury. If it spends too much for defense or for prestigious weapons, it is to be expected that multilateral sources of economic aid would dry up.

There has been some slight movement in recent years in the directions I have suggested. It seems to me, however, that the new administration has opportunity to build an aid program which can find some stability in public support and which will serve the long-term interests of the United States. It will not be able to do so by packaging the shibboleths of the past in new boxes with new wrappings and ribbons. It is the substance which must be changed. If the opportunity is not grasped now, I believe we can only anticipate further erosion of the foreign aid program.

Mr. President, I yield the floor.

AMENDMENT NO. 422

Mr. MUSKIE. Mr. President, on behalf of myself and Senators MAGNUSON, PACKWOOD, HART, CRANSTON, DODD, and JACKSON, I introduce today an amendment to the Foreign Assistance Act of 1969. This amendment would authorize U.S. assistance, at a level of $80 million a year for 4 years, and is designed to encourage positive action by the Government of South Vietnam in enacting a program of land reform.

Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. Mr. President, I ask unanimous consent that an article entitled "Land Reform in Vietnam," written by Dr. Roy L. Prosterman, and published in the current issue of Southeast Asia be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. MUSKIE. Mr. President, last July President Thieu of the Republic of South Vietnam initiated legislation calling for a broad program of land reform in South Vietnam. The major provision of this "land to the tillers" bill are as follows:

First. All land not tilled directly by the landowner would be affected, on a nationwide basis—approximately 3 million acres.

Second. The peasant tilling the land would receive it free. Any large landowner who has directly tilled his land in the past would receive the right to retain a certain portion of this land with the condition that he must directly cultivate within 2 years from promulgation of this law.

Third. Landlords would be fully compensated by the South Vietnamese Government, on a ratio of 20 percent cash and 80 percent 8-year inflation-adjusting bonds. Total cost would be $400 million.

Fourth. Reapportioned land would be distributed to every farming family for each of which the maximum would be 5 hectares in South Vietnam and 3 hectares in Central Vietnam.

Fifth. Recipients would include those who have fled from the countryside and wish to return to their villages.

Sixth. The Government of South Vietnam would encourage the establishment of farm cooperatives to facilitate the improvement of agricultural methods.

Due to a widespread lack of confidence in the value of these bonds to be offered as compensation, South Vietnamese landowners exerted sufficient pressure for the bill to be rendered virtually ineffective by the lower house of the South Vietnamese Legislature in early September. Unless an immediate effort is made to assure the landlords that a substantial proportion of the bonds can be turned into productive resources, it is likely that similar action will be taken in the Upper House which is cosidering the bill at the present time.

I believe that such reform is essential to the development of a viable, free society in South Vietnam. Currently, more than 100,000 landlord families own land cultivated by some 1 million tenant farmer families who pay one-third to one-half of their crop in rent. Massive land reform would go far toward giving the peasants, who constitute by far the largest single group in South Vietnamese society, a stake in the preservation of their country, and toward discouraging the recruitment of an estimated 40,000 peasants a year into the Vietcong.

The 1969–70 Mekong Delta rice harvest is now beginning, and will last until February. It is essential that action be taken now, before the collection of rents from this season's harvest, if the full impact of reform is to be felt.

Therefore, I propose the following amendment, in support of meaningful land reform in South Vietnam. The main provisions are as follows:

First, that U.S. support be authorized at a level of $80 million a year for 4 years, for a total of $320 million, such funds to be used for the purchase of certain U.S. nonluxury commodities—principally agricultural goods such as seed, fertilizer, and farm machinery, as approved by the President. Specified commodities are to be used in direct exchange for those bonds issued by the South Vietnamese Government as compensation for confiscated lands.

Second, that small landowners have access to the bonds on a basis proportionately equal to the larger landowners.

Third, that import duties and other taxes on imported goods be waived for commodities brought in under this amendment, as well as permits or licenses to import.

The total cost of my proposal is equal to the cost of about 4 days of the present war in Vietnam. A successful land reform program could shorten the war by many more than 4 days.

Mr. President, I urge my colleagues to support this proposal. It has been my conviction for a long time, one which I have expressed from time to time on the floor of the Senate, that we cannot really wind this war down unless in some way we can find a political solution to the problem represented by South Vietnam. I think that a political solution involves inevitably a broadening of the base of political support for the Government of South Vietnam—the present one or one which succeeds it as a result of free elections. I think land reform which would give the people of South Vietnam a stake in things as they are could do a great deal to encourage and promote the development of a viable political solution.

The PRESIDING OFFICER. The amendment will be received, and printed, and will lie on the table.

EXHIBIT 1

AMENDMENT NO. 422

On page 87 insert:

"SEC. 108. VIETNAMESE LAND REFORM.—(a) The success of land reform programs in Vietnam is a material factor in the future political and economic stability of that nation, and the speed with which such programs are given effect may have consequences with regard to the termination of hostilities there. In order to support and encourage Vietnamese land reform programs, the President may make grants to the Government of Vietnam, out of funds appropriated pursuant to this section, for the purchase and shipment to Vietnam of goods and commodities, manufactured or produced in the United States, which, by their introduction into the Vietnamese economy, will contribute to sound economic development in Vietnam. Such goods and commodities (1) shall be of a type approved by the President for such programs; (2) shall include goods suitable for business inventories in nonluxury enterprises; (3) shall be exchanged for bonds issued by the Government of Vietnam to compensate landowners whose lands are transferred to other persons under such programs; and (4) shall be selected by any such landowner to whom a bond has been issued or by any other person or entity validly holding, according to Vietnamese law, any such bond.

"(b) In order to carry out the provisions of this section, there are authorized to be appropriated $80,000,000 for the fiscal year 1970, and the same amount for each of the three succeeding fiscal years.

"(c) The provisions of this section shall not be effective unless—

"(1) on or before February 1, 1970, there is enacted by the Government of Vietnam a law providing for the transfer of substantially all land used for the cultivation of rice, which is not under cultivation by the owner thereof from the owner of such land to the person who lives on such land actively cultivates it, or, if the land is suitable for such cultivation but is not being cultivated, to the person living on such land;

"(2) on or before February 10, 1970, the President certifies to the Congress that such Vietnamese law or decree is in such form and is being administered in such manner that the substantial proportion of rents otherwise collectible in connection with the Mekong Delta rice harvest from December, 1969, through February, 1970, will not be collected;

"(3) the Vietnamese law or decree carrying out the program set out in paragraph (1) of this subsection provides a means of compensating, at the fair market value, those landowners whose lands are transferred under the provisions of such law to other persons, such compensation to include bonds redeemable for goods and commodities as provided under subsection (a) and such bonds, whether all or part of the compensation provided, are being made available on a nondiscriminatory basis, as to maturity dates and forming the same percentage of compensation paid to such landowners having holdings of various sizes;

"(4) all import duties and other taxes on imported commodities are waived or suspend-

ed by the Government of Vietnam with regard to goods and commodities brought into Vietnam under the authority of this section; and

"(5) no permit or license to import is required, in connection with such goods and commodities, of former land owners who hold bonds issued in accordance with paragraph (3) of this subsection."

On page 87, line 11, strike out "Sec. 108." and insert in lieu thereof "Sec. 109."

EXHIBIT 2

LAND REFORM IN VIETNAM

(By Roy L. Prosterman, associate professor of law, University of Washington School of Law)

It should be in no way surprising that in a country where the bulk of the population—still 60 per cent today—is dependent on the land as its sole source of livelihood (as has been the case in Vietnam for at least 2,000 years) the question of land tenure should assume gigantic proportions.* Tenure imbalance strikes at the very base of the country's economic and political stability. Historically, breaking up large holdings and transferring them to individual small owners was a means of power consolidation by new Vietnamese royal dynasties. Even as late as the first decades of the nineteenth century, Nguyen Anh, who founded the last dynasty, set about breaking up large feudal landholdings in Vietnam. This policy was pursued by his successor, who acceded to the throne in 1820. The advent of French colonialism in the 1860's was accompanied by dramatic changes.

It is estimated that between 1880 and 1930 the land area devoted to rice in the fertile, southern region of Vietnam then known as Cochinchina (which included, in particular, the Mekong Delta region south of Saigon), grew by at least 400 per cent, with resulting increased yields. Yet, by 1930, the position of the Vietnamese peasant in the economy had so deteriorated that his situation was worse than it had been prior to French intrusion. Land was sold at absurdly cheap prices to colonialists who amassed vast holdings; the rice that could have put an end to peasant starvation was extracted through land rents and was exported, rather than made available to the indigenous population. The rough figures that are available indicate that during the 1930's some 57 per cent of the rural population of Cochinchina was landless.

As Joseph Buttinger, a leading Western historian of Vietnam, summed it up in *Vietnam: A Dragon Embattled*,[1] "the rural masses became as dependent on the rich landowners as the serfs of medieval Europe had been on their feudal lords."
